A. RISK FACTORS

The following is a disclosure of risk factors (the "Risk Factors") that are material with respect to the ability of UniCredit Bank AG ("HVB" or the "Issuer", and together with its consolidated subsidiaries, the "HVB Group") to fulfill its obligations under securities issued by it, whereby the two most material risk factors are presented first in each category. The Issuer's assessment of materiality was based on the probability of their occurrence and the expected extent of their negative effects.

1. Risks related to the Issuer's financial situation

1.1 Liquidity risk

In the course of its business activities, HVB Group must ensure, among other things, that the smooth and orderly processing of foreseeable and unforeseeable business transactions with regard to payment obligations entered into and means of payment available is guaranteed at all times within the regulatory framework. In this context HVB Group is subject to liquidity risk and defines this as the danger that the bank is not able to meet its payment obligations on time or in full and as the risk of not being able to obtain sufficient liquidity when required or that liquidity will only be available at higher interest rates, and/or as the risk that the bank will only be able to liquidate assets on the market at a discount.

For example a financial market crisis could lead to financial instability and to a decline in volume and availability of liquidity in the short-term, medium-term and long-term funding in the market. In such situation an increasing dependence on central bank liquidity could arise. In addition, counterparty risk between banks in particular could increase substantially which could cause a decline in interbank business and could entail a decrease of customers' confidence. In this connection, reduced trust could result in large outflows of deposits in HVB Group, which as a consequence could create liquidity problems for HVB Group and thus could result in a limited ability to fund its activities and meet its minimum liquidity requirements.

Furthermore the access for HVB Group to liquidity could be impeded in case of an inadequate access to bond markets or by the inability to issue bonds or to obtain other forms of interbank loans. Interbank funding costs could increase and reduced availability and/or higher costs of funding, combined with reduced access to similar or other forms of funding and/or the inability of HVB Group to dispose its assets or liquidate its investments could have negative effects on its business activities and on its operating results and financial situation.

Another risk concerns transfers of liquidity between units of HVB Group. These transfers are monitored by the regulatory authorities so that HVB and its subsidiaries could be forced to reduce their lending or borrowing to/from other legal entities within HVB Group and this could negatively impact the ability of HVB Group to meet the liquidity regulations of its subsidiaries through an intra-group transfer of capital, which in turn could have substantial negative effects on the operating results of HVB Group and on its business and financial situation.

Besides there are risks known as 'systemic risks'. HVB Group routinely processes high volumes of transactions with numerous counterparties in the financial services sector, including business with brokers and traders, commercial banks, investment banks and other institutional clients. Financial services institutions operating transactions with such institutions, are linked through trading, investment, clearing and counterparty relationships, among others. Concerns regarding the stability of one or more of these institutions and/or the countries in which they operate could lead to a serious liquidity shortage (up to and including an entirely frozen interbank business), to losses and/or other institutional defaults. These risks could have detrimental effects on financial intermediaries such as clearing facilities, clearing houses, banks, securities houses and stock exchanges with which HVB Group interacts on a daily basis. This could in turn have negative effects on the ability of HVB Group to procure new funding.

1.2 Risks arising from pension commitments

HVB Group has undertaken to provide a range of different pension plans to current and former employees, which are largely financed by various forms of investment, some of which are external. Pension risk may arise in connection with the pension plans on both the assets side and the liabilities side (pension commitments). This may be caused by a decline in the fair value of plan assets on the assets side due to disadvantageous changes in market prices as well as by an increase in the obligations on the liabilities side, for instance due to a reduction in the discount rate. Furthermore, actuarial risks, such as longevity risk (changes to the mortality tables) may arise on the obligation side. In this context, pension risk is the risk that the pension provider will have to provide additional capital to service the vested pension commitments.

Low interest rates continue to be seen as the main negative factor for both the amount of the pension commitments disclosed and the amount of the income that can be generated from the plan assets with acceptable

risk. It is perfectly conceivable that, should low interest rate levels persist for a longer period of time, the discount rate will have to be lowered again, thus causing the pension obligations to rise further.

Changes in the actuarial assumptions (for example, pension increases, salary increases, career trends and life expectancy) could influence the amount of the pension obligations, resulting in significant increases. Moreover, turmoil in the capital markets and the low interest rate environment could lead to losses in the plan assets of the various pension plans or prevent the achievement of the respective return targets. As a result, funding levels of the individual pension plans may be seriously compromised. All of the detrimental factors can have negative effects on the business results and the capital position of HVB Group, and thus on its financial situation. As of 31 December 2019 the present value of pension commitments in HVB Group was at €5,653 million, the fair value of plan assets had a volume of €4,314 million.

2. Risks related to the Issuer's specific business activities

2.1 Risk from lending business (credit risk)

As a universal bank with a wide range of banking products and services, lending is one of HVB Group's main business areas. The HVB Group is thus exposed to a large extent to credit risks.

The credit risk of HVB Group, consisting of credit default risk including counterparty risk and issuer risk as well as country risk is influenced amongst others by several, unforeseeable factors, regarding economic and political trends, such as recessions, industry specific market developments, foreign currency risks, changes in tax and monetary policies, natural disasters, wars, changes in laws and regulatory requirements, liquidity and expectations of the capital markets as well as consumer behaviour with regard to investments and savings.

The solvency of HVB Group's customers could, among other things, deteriorate as a result of the above mentioned factors, with the result that they may probably not be in a position to meet their entire contractual obligation towards HVB Group as a whole, without having to take recourse to measures like the sale of collateral (where present).

In addition the value of the loan collaterals (e.g. real estate, securities, deposits, ships) could also fall below the amount of outstanding capital or in case of debt enforcement HVB Group could be unable to realise the expected value.

As result HVB Group could be forced to arrange for a revaluation of the loan and/or form additional loan loss provisions and higher reserves leading to losses for HVB Group.

A weakening of demand for financial products or inaccurate assessments of the creditworthiness or the country risk of the customers could also have detrimental effects on the operating results of HVB Group and its business and financial situation.

In addition to traditional banking activities, HVB Group is active in transactions in securities, derivatives, foreign exchange, commodities or securities lending/repurchase transactions. In this context further risks could arise from settlement or performance that is not provided at all or in a timely way by the counterparty as well as from system failures at clearing agencies/houses, stock exchanges or other financial intermediaries (including HVB Group).

A part of the credit risk of HVB Group results from credit exposures to the parent company of HVB Group, the UniCredit (UniCredit S.p.A. together with its consolidated subsidiaries). Changes in German and international laws and regulations with regard to the amount and weighting of intra-group exposures could have substantial negative effects on the internal funding of HVB Group, the costs of this funding (especially when it must be procured externally) and therefore on the business and financial situation of HVB Group.

2.2 Risks from trading activities (market risk)

HVB Group is exposed to market risk, which mainly arise in the Corporate & Investment Banking (CIB) business segment. One part of the market risk is in trading books while the other part – mainly invested in interest-bearing-securities – lie in strategic investments or in liquidity reserve portfolios in the banking book.

Market risk is defined as the risk of incurring losses on positions held on and off the balance sheet in the trading or investment books as a result of unfavourable changes in the market value of securities or financial derivatives. The most relevant of these prices are interest rates (used to determine and discount cash flows), share prices, credit spreads (including, but not limited to, changes in these spreads due to credit defaults or rating changes), spot exchange rates, commodity prices and derived prices such as volatilities and correlations between these parameters.

Interest rate fluctuations in Europe and other markets in which HVB Group does business may negatively affect its financial situation and profitability. For example the current low interest rates are causing a decrease in margins, especially on the deposit side, that is having a direct negative impact on earnings. It cannot be

guaranteed that there will be no substantial long-term decrease in earnings that would lead to a loss in market value of HVB Group.

HVB Group earns income outside the eurozone and a portion of its transactions is conducted in other currencies than euro. Consequently, HVB Group is exposed to exchange rate risks and risks pertaining to transactions in foreign currencies. Unfavourable changes in exchange rates could therefore negatively affect the business activities of HVB Group and its financial situation.

Market liquidity risk relates to the risk that the Issuer will suffer losses due to the disposal of assets that can only be liquidated on the market at a discount. In extreme cases, HVB Group may not be able to sell such an asset, as the market does not offer enough liquidity or the Issuer holds a position that is too large compared to the market turnover.

2.3 Risks from other business activities

In addition to the core/banking business, the Issuer is also exposed to risks from other business areas like own real estate and financial investments.

Real estate risk covers potential losses resulting from changes in the market value of the real estate portfolio of HVB Group. Besides the real estate owned by HVB, the HVB Group portfolio also includes the real estate owned by the property ownership companies, real estate owned by HVB subsidiaries (according to International Financial Reporting Standards (IFRS) scope of consolidation) and, among others, by the Special Purpose Vehicles (SPVs). Following the introduction of the new IFRS16 accounting principle, rented/leased assets are also considered in the real estate portfolio. No land or properties are included that serve as collateral in lending (credit) transactions. The real estate portfolio value as estimated on 31 December 2019 is equal to \ll ,894 million. From a geographical perspective, the focus is on the Munich region with 60.4% of the portfolio value located there.

The main risks for the bank-owned portfolio mainly stem from the trend of the market value resp. the trend of the book value (for IFRS properties). The risk drivers are e.g. the future usage by the bank, property rents/bank rents, market rents, occupancy rate, residual term of rental contracts and investment needs. The situation in real estate markets depends on economic trends. Should the growth slow down, a corresponding decline in demand for rental properties is likely. This would probably lead to negative consequences for the operating results and financial situation of HVB Group.

Financial investment risk covers potential losses arising from fluctuations in the measurement of HVB Group's equity interest. Financial investment risk of HVB Group stems from equity held in companies that are not included in the consolidated financial statements according to IFRS principles or are not included in market risk. The financial investment portfolio mainly consists of unlisted interests, private equity investments (co and direct investments), equity derivatives and other fund shares (real-estate funds and other closed funds).

Operational or financial losses to which these companies are exposed could cause decreases in the value of these participations and thus have negative effects on the assets, liabilities and situation of HVB Group.

3. General risks related to the Issuer's business operations

3.1 Operational risk

Due to its business operations HVB is exposed to operational risks (OpRisk).

HVB defines operational risk as the risk of losses resulting from inadequate or failed internal processes, systems and people or from external events in line with the Capital Requirement Regulation (CRR). The definition of OpRisk includes legal risk, but excludes strategic and reputational risk. Legal risk includes, but is not limited to, exposure to fines, penalties, or punitive damages resulting from supervisory actions, as well as private settlements.

The group of various types of operational risk of the Issuer HVB contains among others:

- Risks due to the use of necessary Information- and Communication Technology (ICT)-systems, e.g. due to unavailability of ICT, hacker attacks (ICT Risk)
- Risks due to disruption and/or discontinuity of critical business processes (business continuity management risk)
- Risks in the course of outsourcing of operations and processes to external providers (outsourcing risk)

In case operational risks occur, financial losses of Issuer HVB could arise, in the worst case leading to a total loss of securities issues.

3.2 Reputational risk

HVB Group defines reputational risk as the risk of a negative Profit and Loss ("**P&L**") effect caused by adverse reactions of stakeholders due to their altered perception of the bank, which can in turn be triggered by the materialization of a primary risk such as credit risk, market risk, operational risk, liquidity risk, business risk, strategic risk or other primary risks. Thus reputational risk potentially arises as an additional risk from the materialization of a primary risks as for example an operational risk of the bank. Moreover reputational risk may also not have to be linked to a primary risk as for example in case of a high-level representative of the bank making adversely perceived public statements concerning matters of the bank.

Basically reputational risk implies a loss of confidence of a stakeholder vis-à-vis the bank. The HVB Group, as part of a Pan-European Banking Group, defines as key stakeholders customers, employees, regulators, rating agencies and creditors. A possible reaction of stakeholders arising from the loss of confidence could be for example that customers cancel their relationship to HVB or rating agencies downgrade the bank's rating.

The effects of a reputational risk event on the P&L of the bank may be reflected e.g. in the operational risk (e.g. losses due to increased client claims), in the business risk (e.g. decline in sales) or liquidity risk (e.g. increased refinancing costs).

3.3 Business risk

HVB Group defines business risk as potential losses resulting from unexpected negative changes in the business volume and/or margins that are not attributed to other risk types (e.g. credit, market, operational risk). It can lead to serious losses in earnings, thereby reducing the fair value of the company. Business risk can result above all from a serious deterioration in the local and global market environment, changes in the competitive situation, in customer behaviour or in expenses structure, or changes to the legal framework.

Essentially, business risk refers to the possibility that the bank will have lower than anticipated profits or experience a loss rather than taking a profit impairing the company's ability to provide its investors and stakeholders with adequate returns. Given that HVB Group's activities are mainly concentrated in Germany and Italy, scenarios that would include a deterioration of the macroeconomic conditions in these countries could cause an increase in the business risk of HVB Group.

3.4 Risks from concentrations of risk and earnings

Concentrations are accumulations of risk and/or earnings positions that react similarly to specific developments or events. Risk concentrations may have an impact within a risk type or equally across risk types. They indicate increased potential losses resulting from an imbalance of risk positions held in customers and products or specific industries and countries in line with HVB Group's business model and business strategy.

The largest concentrations of credit risk are in Germany, HVB Group's core market, and in Italy, which is partly due to HVB Group's role as a Group-wide competence centre for UniCredit's market and investment banking activities. In terms of industries, the largest concentrations of credit risk are in the financial institutions (including foreign countries), real estate and the public sector industry groups. The concentration in financial institutions (including foreign countries) and the public sector is partly due to HVB Group's own liquidity investments.

In addition, concentrations of earnings may also occur at individual customers, business segments, products, industries or regions which also represents a business-related strategy risk for HVB Group.

In the case of a deterioration in the economic environment, e.g. in individual sectors or countries in which the Bank is heavily involved, the Bank may be affected to a correspondingly greater extent by possible losses due to an existing concentration risk.

4. Legal and regulatory risks

4.1 Regulatory risks

The activities of HVB Group are regulated and supervised by the central banks and regulatory authorities in the countries and regions where HVB Group does business. Within the Single Supervisory Mechanism (SSM) HVB Group is subject to the supervision by the European Central Bank (ECB).

The bank regulatory regimes in the various local jurisdictions contain disparities and may change at any time. This could have a severe impact on the competitive situation and may require HVB Group to take wide-ranging measures. Apart from e.g. significantly higher capital costs and a significant rise of costs for the implementation of regulatory requirements also changes in the business model may be required.

Should HVB or any of its subsidiaries not fully comply with the regulatory requirements of the respective supervisory authorities, this could lead to sanctioning measures by the relevant Competent Authority supervisor right up to the withdrawal of the licence.

HVB has therefore established a process in accordance with the Minimum Requirements for Risk Management (MaRisk) which shall ensure the identification und implementation of new regulations by and applicable to HVB. In addition, the potential impacts of relevant new regulations on the Bank are assessed at an early stage according to defined criteria (e.g. relevant implementation costs or their impact on potential earnings or risk weighted assets (RWA)) and relevant measures are taken, if necessary. Moreover external audits and the communication with supervisory authorities are coordinated centrally in HVB.

Nevertheless changes of the regulatory and statutory environment of HVB or cases of non-compliance with regulatory requirements by the supervisors may still occur, which can have a severely disadvantageous impact on certain business activities, the earnings situation and the financial situation of HVB, such as restrictions on the business activity of HVB or its subsidiaries.

According to European and German regime on bank recovery and resolution law credit institutions are obliged to prepare recovery plans and to participate in the preparation of resolution plans by the relevant national resolution authority. The national competent supervisory authority may initiate early intervention measures in order to react to a critical financial situation. If the requirements for resolution are met the competent resolution authority may undertake a range of measures, especially resolution measures. In this case there is a risk of total loss of invested capital for shareholders and creditors.

Furthermore, credit institutions are required to meet the Minimum Requirement for Eligible Liabilities (MREL). The relevant minimum contribution is determined on a yearly basis by the competent resolution authority.

HVB and HVB Group are subject to stress testing measures introduced by the German financial supervisory authorities (German Federal Financial Supervisory Authority ("**BaFin**") and the German Central Bank (Deutsche Bundesbank), European institutions (European Banking Authority (EBA), ECB, European Commission and European Systemic Risk Board (ESRB)) as well as by the supervisory authorities in the countries in which HVB and HVB Group operate.

Since the ECB has classified UniCredit S.p.A. as a systemically important bank, HVB and HVB Group, as a part of UniCredit, were subject to the EU-wide stress tests. As these stress tests were run at the highest level of consolidation, HVB and HVB Group were subject to the EU-wide stress test only as a part of UniCredit, but not on a stand-alone level. HVB and HVB Group, as a part of UniCredit, may be subject to similar measures in the future.

In addition to the participation in EU-wide stress tests, HVB and HVB Group are required to regularly conduct internal stress tests based on macroeconomic scenarios or on ad-hoc basis. The results of these internal stress tests are provided to the top management of HVB and of relevant subsidiaries within HVB Group as well as to the German Central Bank.

In addition, UniCredit S.p.A. and HVB are subject to the Supervisory Review and Evaluation Process (SREP). HVB Group complies with all requirements from SREP 2019.

The business performance of HVB and HVB Group could be negatively affected and it may be required to comply with additional prudential requirements or to take remedial actions (such as raising own funds) in case of poor stress test results or deficiencies being identified in the course of stress testing measures or in connection with SREP by HVB, HVB Group, UniCredit or one of the financial institutions with which they do business.

4.2 Compliance risk

Compliance risk is defined as an existing or future risk to income or capital as a consequence of infringements of or non-compliance with laws, regulations, statutory provisions, agreements, mandatory practices and ethical standards. This may result in fines, compensation for damage and/or contracts being rendered null and void in addition to damaging the HVB Group's reputation.

This includes the risk of being misused for the purposes of money laundering, terrorist financing and other criminal offences. In HVB Group, the Compliance function supports the management and monitoring of compliance risks with the main focus on breaching of laws and legal rules and regulations. The Compliance function identifies the compliance risk under consideration of external circumstances, potential impacts to the bank and their business activities and works towards the implementation of effective internal procedures and appropriate measures (including controls) to ensure compliance with the material statutory provisions and requirements for the institution. Dedicated risk analyses are therefore performed on a regular basis and follow the requirements from the Minimum Requirements for Risk Management (MaRisk), the German Banking Act (KWG), the German Securities Trading Act (WpHG), the Anti Money Laundering Act (GwG) as well as the Minimum Requirements for Compliance (MaComp).

Besides the regular updates of compliance risk results, ad hoc assessments are carried out in order to reflect newly arising risks. The opening of a new business line and/or structural changes within the bank are examples which could trigger a re-assessment. Risk results are reported on a quarterly basis to the Management Board of HVB. Based on the risk-results, activities within Compliance are managed, such as inter alia second-level controls, advice activities, subject-specific training courses etc. However, cases of non-compliance (e.g. fraud) could occur in the future and cause financial losses as well as a negative public perception of HVB Group.

4.3 Legal and tax risks

With regard to legal risks HVB and other companies belonging to HVB Group are involved in various legal proceedings at the date of this Registration Document. HVB and other companies belonging to HVB Group are required to deal appropriately with various legal and regulatory requirements. Failure to do so may lead to litigation and administrative proceedings or investigations, and subject HVB and other companies belonging to HVB Group to damage claims, regulatory fines or other penalties.

In many cases, there is substantial uncertainty regarding the outcome of the proceedings and the amount of possible damages. These cases include criminal or administrative proceedings by the relevant authority and claims in which the claimant has not specifically quantified the amounts in dispute.

In that regard, HVB Group has processes in place to ensure adequate analysis of procedures and risks as a basis for deciding whether provisions for legal risks must be increased in specific cases or whether they are appropriate under the current circumstances. Following an analysis in each case, HVB Group has created appropriate provisions for legal risks for ongoing proceedings. However, the possibility that the existing provisions are inadequate cannot be ruled out. As of 31 December 2019, the provisions (included in the 2019 annual report) are equal to 801 million. Included in this amount are 312 million in the subitem "other provisions" and therein are 217 million provisions which include legal risks, litigation fees and damage payments.

Regarding tax risks, at the date of this Registration Document external tax audits of HVB and other HVB Group companies are taking place. It cannot be ruled out that these external tax audits of HVB Group will lead to supplementary payments of taxes and interest. Such additional payments could have negative effects on the operating results of HVB Group and/or its business performance and financial situation.

Moreover, if an HVB Group company should violate or be alleged to violate tax laws of one or more of the countries in which HVB Group does business, HVB Group could be exposed to additional tax risks and other risks. This would in turn increase the probability of additional tax proceedings and other official proceedings and could damage the reputation of HVB Group.

5. Strategic and macroeconomic risks

5.1 Strategic risk

HVB Group as a universal bank focuses on the regional management of the German market and also acts as the centre of competence for the investment banking activities of UniCredit as a whole. As a consequence, the profitability and risk profile of HVB Group are influenced in particular by economic developments in Germany and by developments on the international financial and capital markets. In this context, strategic risk results from management either not recognising early enough or not correctly assessing significant developments or trends in the Bank's environment. As a consequence fundamental management decisions could, in retrospect, prove to be disadvantageous in terms of the Bank's long-term goals. In addition, some decisions may be difficult to reverse or cannot be reversed at all.

Presently the following areas determined as relevant for the occurrence of strategic risk:

- Economic environment If, among other things, the stabilising measures of the German government and central banks in the eurozone in particular related to COVID-19 do not take effect and economic growth in Europe permanently slows down, this could have a significant impact on HVB Group's profit situation.
- Strategic orientation of HVB Group's business model For example, the persistently low interest rate environment could lead to imbalances in the earnings contributions of the business areas.
- Banking industry specific risks The intensification of competitive conditions in the financial sector could, for example, lead to further shifts in market shares.
- Regulatory and legal environment The failure of HVB or one of its subsidiaries to fully satisfy the regulatory requirements of the supervisory authorities could lead to the responsible authority imposing sanctions.
- UniCredit Bank AG's rating A rating downgrade could make funding costs higher for HVB or have a negative impact on the business opportunities of HVB as a counterparty in the interbank market or with rating-sensitive customers.

5.2 Macroeconomic risk

Based on the strategic orientation of HVB Group with the business segments Commercial Banking and Corporate & Investment Banking (CIB), their offering of products and concentration on the core market Germany, general economic developments in Germany, in combination with developments on the international financial and capital markets are of great importance for the assets, liabilities, financial position and profit or loss of HVB Group.

It can be expected that the global spread of the coronavirus (COVID-19) will significantly slow down global economic growth in the first half of the year. It is also possible that the burden will last longer depending on the course of the pandemic. However, the strong decline in the first half of the year will lead to a recession in many countries. The negative factors are disruptions in global supply chains as well as a drop in demand due to purchasing restraints in affected countries and quarantine measures among others. Based on current information, the effects on the German economy are still difficult to assess.

Further, it can be expected that global economic growth to slow markedly in the year 2020. In addition to a significant slowdown in the economic development of the US, activity in the eurozone is also likely to decline in the first half of the year before a recovery is expected to set in as the pandemic is pushed back. Many emerging and developing countries will probably also lose momentum initially due to weaker global trade and the economic downturn in the US. A further negative factor for the global economy is expected to be weaker growth in China, which will be dampened by the coronavirus as well as the ongoing transformation of the economy and the normalization process in the Chinese real estate market. Further risks are the unforeseeable consequences of an escalation of protectionist measures by the US government and a hard Brexit.

In Germany, the effects of the coronavirus are likely to have a severe impact on private consumption, investment and export activity in the first half of 2020, possibly even longer depending on the development of the pandemic. In addition, manufacturing companies in particular could suffer from a renewed escalation of trade conflicts in the triad US-China-Europe.

In 2020, political uncertainties will also continue to be at the forefront. These are shaped by US foreign policy and the ongoing Brexit process. In addition to the ongoing effects of the European sovereign debt crisis, there will be increasing political and economic uncertainties concerning the further development of the European Union as a whole. Existing tensions between the European Union (EU) and Turkey, and also with Russia, as well as continuing geopolitical conflicts, especially in Syria, and increasingly frequent terrorist attacks pose further risks with regard to the security, monetary and economic policy situation throughout Europe.

Extremely low interest rates will continue to be one of the main challenges for the financial sector. It is still not foreseeable to what extent and intensity financial markets will react to the overall developments.

If, for example, the stabilising measures in the eurozone fail to have the intended effect, or economic growth increasingly slows down, or further turbulence occurs on the financial and capital markets, this could also have a negative impact on the assets, liabilities, financial position, and profit or loss of HVB Group. Due to the continuing high level of uncertainty in the macro-political environment and the resulting high volatility in financial and capital markets, forward-looking statements regarding future business performance are subject to a high degree of uncertainty.

B. PERSONS RESPONSIBLE

UniCredit Bank AG having its registered office at Arabellastrasse 12, 81925 Munich (acting through its head office or one of its foreign branches) accepts responsibility for the information contained in this Registration Document. UniCredit Bank AG declares that the information contained in this Registration Document is, to the best of its knowledge, in accordance with the facts and that the Registration Document makes no omission likely to affect its import.

C. STATUTORY AUDITORS

The independent auditors (*Wirtschaftsprüfer*) of UniCredit Bank AG for the financial years 2019 and 2018 have been Deloitte GmbH Wirtschaftsprüfungsgesellschaft, Rosenheimer Platz 4, 81669 Munich. Deloitte is a member of the Chamber of German Public Accountants, an institution incorporated under public law (*Wirtschaftsprüferkammer, Körperschaft des öffentlichen Rechts*), Rauchstrasse 26, 10787 Berlin.

D. UNICREDIT BANK AG

1. Information about HVB, the parent company of HVB Group

UniCredit Bank AG, formerly Bayerische Hypo- und Vereinsbank Aktiengesellschaft ("**HVB**", and together with its consolidated subsidiaries, the "**HVB Group**") was formed in 1998 through the merger of Bayerische Vereinsbank Aktiengesellschaft and Bayerische Hypotheken- und Wechsel-Bank Aktiengesellschaft. It is the parent company of HVB Group, which is headquartered in Munich, Federal Republic of Germany. HVB has been an affiliated company of UniCredit S.p.A., Milan, Italy ("**UniCredit S.p.A.**" and together with its consolidated subsidiaries, "**UniCredit**") since November 2005 and hence a major part of UniCredit from that date as a sub-group. UniCredit S.p.A. holds directly 100 per cent. of HVB's share capital.

HVB's legal name is UniCredit Bank AG, the brand name is "HypoVereinsbank". The Legal Entity Identifier (LEI) is 2ZCNRR8UK83OBTEK2170.

HVB has its registered office at Arabellastrasse 12, 81925 Munich and is registered with the Commercial Register at the Local Court (*Amtsgericht*) in Munich under number HRB 42148, incorporated as a stock corporation under the laws of the Federal Republic of Germany. It can be reached via telephone under +49-89-378-0 or via www.hvb.de (whereby the information contained on such website shall not form part of this Registration Document, unless specified differently in the section "*General Information – Information incorporated by reference*" below).

As set out in Section 2 of the Articles of Association, the object and purpose of the company is to transaction all kinds of banking transactions and the business of a Pfandbrief bank, to provide financial services and perform all other principal and ancillary activities a credit institution or Pfandbrief bank may perform, both for its own account or for the account of a third party.

Expected financing of the HVB's activities: HVB finances its activities using the usual sources of funding, in particular, the issuances of debt securities and deposits from banks and customers.

2. Ratings

UniCredit Bank AG is rated by Fitch Ratings ("**Fitch**"), Moody's Investors Service ("**Moody's**") and S&P Global Ratings ("**S&P**"), which are established in the European Economic Area or have relevant subsidiaries which are established in the European Economic Area and have been registered in accordance with Regulation (EC) No. 1060/2009 of the European Parliament and of the Council of 16 September 2009 on credit rating agencies, as amended and are included in the list of registered credit rating agencies published on the website of the European Securities and Markets Authority at https://www.esma.europa.eu/supervision/credit-rating-agencies/risk:

Moody's	A2 / P-1 (negative)		
S&P BBB+ / A-2 (negative)			
Fitch	BBB / F2 (negative)		

3. Programme Transform 2019 and Team 23

The three-year group-wide Transform 2019 strategic plan has been implemented. The new four-year Team 23 strategic plan focuses on growth. It is aimed at increasing and strengthening the customer base and at increasing productivity. In this regard, the intention is to deliver sustainable yields – in particular with a view to dealing with resources and the environment.

In the next four years, investments are scheduled in further digitalisation, automation and process optimisation, for example through end-to-end activities. In addition, growth opportunities through greater interaction between business segments and the standardisation of customer platforms shall be created. At the same time, a further adjustment of staffing levels is planned –through socially compatible measures, i.e. to a large extent via natural fluctuation and partial and early retirement solutions. Moreover, new employment prospects will be created by continuing to promote existing initiatives; severance packages will be concluded where this is not possible. An agreement to this effect was concluded between the senior management and the Central Works Council on 5 December 2019. The four-year planning is thus embedded in the group-wide Team 23 strategic plan, which is based on four pillars: grow and strengthen client franchise, transform and maximise productivity, disciplined risk management and controls as well as capital and balance sheet management.

E. BUSINESS OVERVIEW

1. Principal Activities

As a universal bank, HVB with its subsidiaries is one of the leading providers of banking and financial services in Germany. It offers a comprehensive range of banking and financial products and services to private, corporate and public-sector customers, international companies and institutional customers. This range extends from mortgage loans, consumer loans, savings-and-loan and insurance products, and banking services for retail customers through to business loans and foreign trade financing and investment banking products for corporate customers.

In the private banking and wealth management customer segments, HVB offers comprehensive financial and asset planning with needs-based advisory services by generalists and specialists.

HVB Group continues to be the centre of competence for the international markets and investment banking operations of the entire UniCredit. In addition, the Corporate & Investment Banking ("**CIB**") business segment acts as a product factory for customers in the Commercial Banking business segment.

2. Business segments of HVB Group

The activities of HVB Group are divided into the following business segments:

- Commercial Banking
- Corporate & Investment Banking
- Group Corporate Centre
- Other

Segment reporting is based on the internal organisation and management structure together with internal financial reporting.

Commercial Banking

The Commercial Banking business segment covers customers in Germany with standardised or individual service and advice across a wide range of banking services in the Private Clients Bank and Unternehmer Bank business units. Depending on the service approach, a needs-based distinction is made within Commercial Banking between retail customers, private banking clients, high net worth individuals/ultra high net worth individuals and family offices under Wealth Management, business and corporate customers, and commercial real estate customers.

Unternehmer Bank

Envisaged in Team 23 strategy of Unternehmer Bank (UBK) focused on coverage the range of German companies as well as companies operating in Germany, with anthreshold on revenues > EUR 5 mn, as well as private individuals with ties to such companies. With the exception of customers served by Multinational Corporates (MNC) and subsidiaries positioned in the CIB business segment due to their frequent needs for capital market products, customer relationships in the German "Mittelstand" segment and Commercial Real Estate are serviced within the Unternehmer Bank.

Clients of the Unternehmer Bank are divided into the following segments: Key Account (larger enterprises), Corporates and SME and Commercial Real Estate.

UBK pursues a growth strategy in which it seeks to position itself with clients as holistic and individual provider of solutions on all sales channels relevant to the client. This is established in the Mission Statement 2019 of Unternehmer Bank. Strategic developments for corporate clients are related to corporate succession, digitalisation, foreign trade, internationalization, sustainable finance and the intensified usage of capital market solutions.

The UniCredit Leasing Group comprises the equipment leasing-, hire-purchase and -financing business of Unternehmer Bank, a 100% subsidiary of UniCredit Bank AG.

Private Clients Bank ("PBK")

The Private Clients Bank serves private clients in the business segments "Retail" and "Private Banking", covering all banking needs with a focus on Affluent and Private Banking Customers. Specific sales channels and responsibilities take into account the sometimes divergent and individual needs of these customer segments, promoting the transition of wealthy investment customers into Private Banking while making efficient use of shared specialist, management and support units.

To respond to the challenging market environment, the attractive growth expectations in Wealth Management, Private Banking and Affluent as well as the increasing demand for digital financial solutions, a rethinking of the current PBK divisional perimeter is envisaged in Team 23 strategy, comprising the development of an integrated Private Banking & Wealth Management service model as well as the full exploitation of synergies stemming from overlapping customer needs and efficiencies for Business Clients (incl. Business Easy).

The route of modernization will be continued through a new seamless omni-channel service model, in particular for mass market customers based on the seamless integration among network, remote center and digital channels. Objective is to grow while lowering the cost-to-serve. This should be supported by highest individual consulting expertise, the valyou loyalty programme as well as front-to-back modernization of processes and technological capabilities. In particular, Private Banking & Wealth Management follow a clear growth strategy with the holistic advisory approach, a nationwide network and comprehensive product spectrum of investment and financing products.

The two subsidiaries WealthCap, and UniCredit Direct Services are supporting this strategy: WealthCap is a product factory for closed-end funds, with the focus on real estate and private equity funds. UniCredit Direct Services is the customer call and service centre of HVB Group. The primary focus of the service and sales activities is on customer relationship management by telephone, e-mail and internet.

Corporate & Investment Banking (CIB)

CIB is a global business division of UniCredit Group. It is organised in a matrix structure and has operations in the three major legal entities of the Group: UniCredit Bank AG, UniCredit Bank Austria AG and UniCredit S.p.A.

CIB's business success is based on the interaction between coverage and the product units, but also from cooperation with other countries and UniCredit Group business segments, as well as the responsible Credit Risk management units.

UniCredit Bank AG aims to build stable, strategic business partnerships by providing services and solutions in both corporate and investment banking.

The CIB is the competence centre of UniCredit Bank AG for international markets and investment banking. The local CIB strategy is closely aligned with the global CIB strategy to provide clients with consistent support.

UniCredit Bank AG serves local as well as international clients through its extensive network. The CIB division is active in the European markets and is also present in the top financial centres worldwide such as New York, Hong Kong, Singapore and Tokyo.

CIB Product Lines

Besides the coverage of corporate and institutional clients, the Corporate & Investment Banking division comprise three product lines: Global Transaction Banking (GTB), Financing & Advisory (F&A) and Markets. Through close collaboration between the CIB product specialists and the coverage units of CIB and the Commerical Bank, CIB products are being delivered to a broad client range from small and medium size enterprises to large and multinational corporate clients as well as institutional clients and financial sponsors.

Coverage is set up horizontally: Financial Institutions Group (FIG), Multinational Corporates (MNC) and Family Offices & Investment Holdings (GFO), CIB Americas and CIB Asia Pacific. Three Product lines are set up vertically:

<u>Global Transaction Banking (GTB)</u> offers traditional and innovative products in the area of Cash Management and Trade Finance. Based on these, it provides services with regard to payment transactions, account information, cash-flow optimisation, liquidity management and predominantly short-term import and export financing of transaction-oriented customers.

Key product areas in Cash Management are clearing and FX, client access through electronic access channels, payment products with funds transfers and account information, liquidity management with cash pooling and other optimisation methods, cash innovations with corporate customer cards and retailer solutions as well as sight deposits business.

Trade & Working Capital offers solutions along the value chain of customers' receivables and supply chain finance, as well as traditional Foreign Trade products such as Guarantees, Letters of Credit, Collections etc.

Financing & Advisory F&A supports the Financial Sponsors Solutions, Infrastructure & Power Project Finance, Natural Resources, Commodity Trade Finance, and Structured Trade and Export Finance customers at a global level. Further global business lines are Global Syndicate & Capital Markets and Corporate Finance Advisory. The local business units Corporate Structured Finance (CSF) and Real Estate Structured Finance (RESF) cooperate closely with the Commercial Banking business divisions. Global Shipping as a local unit follows transactions worldwide. Portfolio & Pricing Management (PPM) is responsible for management of all

UniCredit Group's LP (Leveraged and Project Finance, covered by the business lines Financial Sponsor Solutions, Infrastructure & Power Project Finance and Natural Resources) portfolio transactions. RESF and CSF portfolios are managed at UniCredit Bank AG level by PPM in conjunction with sales channel representatives. In addition, it offers support to the subsidiary Ocean Breeze Energy GmbH & Co KG.

<u>Sustainable Finance Advisory</u> is the new Global Function created in September 2019 for advising corporate clients, financial institutions and the public sector on all issues related to sustainability strategies.

<u>Markets</u> is a client driven business line which supports UniCredit Group's Corporate and Institutional Business as an integral part of the CIB value chain. The product unit covers all asset classes: Rates, Currencies, Commodities and Equity Derivatives. It provides risk management solutions and investment services for Institutional Clients, Corporations and Private Investors via own and external networks.

Group Corporate Centre

The Group Corporate Centre business unit includes profit contributions that do not fall within the jurisdiction of the individual business segments. Among other items, this includes the CFO, CRO and the CEO business units as well as the profits and losses of consolidated subsidiaries and non-consolidated holdings, provided they are not assigned to the other business segments. Furthermore, this business unit incorporates the net income from securities holdings for which the Management Board is responsible. Also incorporated in this business unit are the amounts arising from decisions taken by management with regard to asset/liability management. This includes contributions to earnings from securities and money trading activities involving UniCredit S.p.A. and its subsidiaries. The Group Corporate Centre business segment also includes the Real Estate Restructuring (RER) customer portfolio.

Other

The Other business segment encompasses the Chief Operating Office. It acts as a central internal service provider for customers and employees. The Chief Operating Office activities extend to purchasing, organisation, corporate security, logistics and facility management, cost management and back-office functions for credit, accounts, foreign exchange, money market and derivatives as well as in-house consulting. Payments, securities settlement, IT application development and IT operations have been outsourced. Strategic real estate management at HVB is similarly the responsibility of the Chief Operating Office business unit and is carried out by the Real Estate unit (GRE), HVB Immobilien AG, Munich and UniCredit Services S.C.p.A., Milan, respectively, as engaged by HVB Immobilien AG, Munich by way of an operating contract.

3. Principal Markets

In the opinion of HVB Group, it has a developed network of branches in Germany, particularly in Bavaria and the greater Hamburg area, which was modified to accommodate changed patterns of customer behaviour. As of 31 December 2019, HVB Group had 498 offices around the world (including 348 HVB branches in Germany) and 12,194 employees (in full-time equivalents, FTEs) (2018: 12,205).

F. MANAGEMENT AND SUPERVISORY BODIES

Like all German stock corporations, UniCredit Bank AG has a two-tier board system. The Management Board (*Vorstand*) is responsible for management and the representation of HVB with respect to third parties. The Supervisory Board (*Aufsichtsrat*) appoints and removes the members of the Management Board and supervises the Management Board's activities.

In accordance with Section 24 (1) sent. 2 of the German Act on the Co-determination of Employees in Connection with a Cross-border Merger (MgVG) in conjunction with Section 95 sent. 1 and 3 and Section 96 of the German Stock Corporation Act (AktG) and Section 8 of the Articles of Association, the Supervisory Board consists of 12 members, comprising an equal number of employee and shareholder representatives in accordance with the co-determination provisions. When new members of the Supervisory Board are appointed, care is taken to ensure that they have the required knowledge and skills and do not serve on governing bodies or perform advisory functions for key competitors. The members of the Supervisory Board are obliged to act in the interests of the company. Under the Supervisory Board's by-laws, any conflicts of interest must be disclosed to the Supervisory Board.

The Management Board is directly responsible for managing the company and works with the other bodies of the company and the employee representatives in the interests of the company. It develops the strategic orientation of the company, coordinates this with the Supervisory Board and is responsible for putting it into practice.

The members of the Management Board and the Supervisory Board of HVB may be contacted at their business address (UniCredit Bank AG, Arabellastrasse 12, 81925 Munich, Germany).

As of the date of this Registration Document, the composition of the Management Board and of the Supervisory Board of HVB and the functions and major activities performed by members of the Management Board outside HVB Group and the principal occupations of the members of its Supervisory Board are as follows:

Management Board

Management Board

As at the date of this Registration Document, there are no potential conflicts of interest between the duties to HVB of the above-mentioned members of the Management Board and members of the Supervisory Board of HVB and their private interests and/or other duties.

G. MAJOR SHAREHOLDERS

UniCredit S.p.A. holds directly 100 per cent. of HVB's share capital.

H. FINANCIAL STATEMENTS OF HVB

The audited consolidated financial statement in respect of the fiscal year ended 31 December 2018 of HVB Group and the audited unconsolidated financial statement of HVB as at 31 December 2018 (*HGB*) are incorporated by reference into this Registration Document (see "General Information – Information incorporated by reference" below), the audited consolidated financial statement in respect of the fiscal year ended 31 December 2019 of HVB Group and the audited unconsolidated financial statement of HVB as at 31 December 2019 (HGB) are part of this Registration Document in the form of F-Pages.

1. Income Statement

The following table sets in summary form the income statement of HVB, which has been extracted from the audited consolidated financial statements of HVB Group for the financial years ended 31 December 2019 and 31 December 2018, respectively.

	1/1/2019 – 31/12/2019	1/1/2018 – 31/12/2018
Net interest income	€2,388m	€2,484m
Net fees and commissions	€973m	€973m ¹
Credit impairment losses IFRS 9	€115m	€16m
Net trading income	€579m	€693m
Operating profit	€1,671m	€1,947m ¹
Profit after tax	€810m	€483m ¹
Earnings per share	€0.99	€0.58 ¹

1 For the changes in 2018 financial figures refer to the F-Pages 10 and hereafter.

2. Balance Sheet

The following table sets out in summary form the balance sheet which has been extracted from the audited unconsolidated financial statements of HVB Group for the financial years ended 31 December 2019 and 31 December 2018, respectively.

	1/1/2019 – 31/12/2019	1/1/2018 – 31/12/2018
Total assets	€303,598m	€287,334m ³
Senior debt ¹	€28,105m	€24,128m
Subordinated debt ²	€464m	€545m
Loans and receivables with customers (at cost)	€139,632m	€133,706m
Deposits from customers	€125,394m	€l21,038m
Total equity	€18,915m	€18,267m ³
Common Equity Tier 1 capital (CET1) ratio	17.5%	19.9%
Total Capital Ratio	18.1%	20.6%
Leverage Ratio calculated under applicable regulatory framework	4.3%	4.9%

1 Balance sheet item "Debt securities in issue" minus subordinated debt (31/12/2019: Debt securities in issue total €28,256m minus

subordinated capital €151m; 31/12/2018: Debt securities in issue total €24,360m minus subordinated capital €232m)

2 Comprised subordinated capital of the balance sheet items "Deposits from banks" and "Debt securities in issue".

 ${\bf 3}$ For the changes in 2018 financial figures refer to the F-Pages 10 and hereafter.

I. AUDIT OPINION OF THE AUDITORS

Deloitte, the independent auditors of HVB for the financial years 2019 and 2018 have audited the consolidated financial statements of HVB Group and the unconsolidated financial statements of HVB as of and for the years ended 31 December 2019 and 31 December 2018 and have issued an unqualified audit opinion thereon.

J. LEGAL AND ARBITRATION PROCEEDINGS

Legal risks

HVB and other companies belonging to HVB Group are involved in various legal proceedings. The following is a summary of cases against HVB or other companies belonging to HVB Group, which individually or collectively in the respective subject areas have a value in dispute exceeding 50 million or are of substantial significance for HVB for other reasons.

In many cases, there is substantial uncertainty regarding the outcome of the proceedings and the amount of possible damages. These cases include criminal or administrative proceedings by the relevant authority and claims in which the petitioner has not specifically quantified the amounts in dispute. In all proceedings where it is possible to reliably estimate the amount of possible losses, and the loss is considered likely, provisions have been set up based on the circumstances and consistent with IFRS accounting principles applied by HVB Group.

VIP 4 Medienfonds Fund

Various investors in Film & Entertainment VIP Medienfonds 4 GmbH & Co. KG to whom the Bank issued loans to finance their participation, brought legal proceedings against HVB. In the context of the conclusion of the loan agreements the plaintiffs claim that inadequate disclosure was provided by the Bank about the fund structure and the related tax consequences. A settlement was reached with the vast majority of the plaintiffs. An outstanding final decision with respect to the question of HVB's liability for the prospectus in the proceeding pursuant to the Capital Markets Test Case Act (*Kapitalanleger-Musterverfahrensgesetz*) which is pending at Munich Higher Regional Court, will affect only a few pending cases.

Derivative transactions

The number of complaints and lawsuits filed against HVB by customers in connection with inadequate advice in the context of the conclusion of derivative transactions is declining. Among other things, the arguments raised are that the Bank allegedly did not sufficiently inform the customer with respect to potential risks related to such transactions and especially did not inform the customer about a potential initial negative market value of the derivative. Experience gained so far shows that the characteristics of the relevant product and the individual circumstances of each case are decisive for assessing the risks. In particular, the statute of limitations, the client's economic experience and risk tolerance, and the actual investment advice given play a crucial role.

Proceedings related to claims for withholding tax credits

On 31 July 2014 the Supervisory Board of HVB concluded its internal investigation into the so-called "cum-ex" transactions (the short selling of equities around dividend dates and claims for withholding tax credits on German share dividends) at HVB. The findings of the Supervisory Board's investigation indicated that the bank sustained losses due to certain past acts/omissions of individuals. The Supervisory Board has brought proceedings for compensation against three individual former members of the management board, not seeing reasons to take any action against the current members. These proceedings are ongoing.

In addition, criminal investigations have been conducted against current or former employees of HVB by the Prosecutors in Frankfurt on the Main, Cologne and Munich with the aim of verifying alleged tax evasion offences on their part. HVB cooperated - and continues to cooperate - with the aforesaid Prosecutors who investigated offences that include alleged tax evasion in connection with cum-ex transactions both for HVB's own book as well as for a former customer of HVB. Proceedings in Cologne against HVB and its former employees were closed in November 2015 with, inter alia, the payment of a fine of O.8 million by HVB. The investigations by the Frankfurt on the Main Prosecutor against HVB under section 30 of the Administrative Offences Act (the Ordnungswidrigkeitengesetz) were closed in February 2016 by the payment of a fine of \oiint{O} million. The investigation by the Munich Prosecutor against HVB was closed in April 2017 with legally binding effect following the payment of a forfeiture of \oiint{O} million.

In December 2018, in connection with an ongoing investigation against former bank employees by the Cologne prosecutor, HVB was informed of the initiation of an investigation in connection with an administrative offence regarding "cum-ex" transactions involving Exchange Traded Funds ("ETF"). In April 2019 these investigations were extended to so called Ex/Ex-transactions, in which an involvement of the bank in the sourcing of cum/ex transactions of other market participants on the ex-day is suspected. The facts are examined internally. HVB cooperates with the authorities.

The Munich tax authorities are currently performing a regular field audit of HVB for the years 2013 to 2016 which includes, among other things, review of other transactions in equities around the dividend record date. During these years HVB performed, among other things, securities-lending transactions with different domestic counterparties which include, but are not limited to, different types of security transactions around the dividend date. It remains to be clarified whether, and under what circumstances, tax credits can be obtained or taxes refunded with regard to different types of transactions carried out close to the dividend record days, and what the further consequences for the bank will be in the event of different tax treatment. It cannot be ruled out that HVB might be exposed to tax-claims in this respect by relevant tax-offices or third party claims under civil law. HVB is in constant communication with relevant regulatory authorities and the competent tax authorities regarding these matters. HVB has made provisions.

Lawsuit for consequential damages

A customer had filed an action against HVB for consequential damages of 236 million for the following reasons: In 2010, HVB was ordered by Frankfurt Higher Regional Court to pay damages in the amount of $\oiint{4.8}$ million to the plaintiff due to the faulty handling of a bill of exchange and in addition to compensate further damages suffered by the plaintiff as a result of this deficiency. In 2011, the plaintiff filed an action against HVB with Frankfurt Regional Court for alleged consequential damages in the amount of $\oiint{33.7}$ million and extended this action several times to a total of $\Huge{236}$ million in the meantime. By ruling dated 31 August 2017, Frankfurt Regional Court dismissed the claim and followed HVB's opinion on the claim being unfounded and the allegations raised by the plaintiff being unreasonable. The appeal of the plaintiff against the court ruling filed with the Frankfurt Higher Regional Court was dismissed on 19. March 2019. The Frankfurt Higher Regional Court fully acknowledged the justification given by the Regional Court and did not permit an appeal. The plaintiff filed a complaint against not admitting the case to the third instance to the Federal Court of Justice, which was dismissed in December 2019.

Claim in relation to collateral enforcement

In late 2019, a holding company of a German industrial group brought a claim against HVB, in its capacity as security agent for a group of noteholders and lenders, aiming at obtaining the annulment and/or damages in relation to an allegedly fraudulent collateral enforcement. The alleged claim is still under evaluation.

Financial sanctions matters

In March 2011, HVB received a subpoena from the District Attorney for New York County ("DANY") relating to historical transactions involving certain Iranian entities designated by the U.S. Department of the Treasury's Office of Foreign Assets Control ("OFAC") and their affiliates. In the subsequent years, DANY, the U.S. Department of Justice ("DOJ"), OFAC, the New York State Department of Financial Services ("DFS"), and the Board of Governors of the Federal Reserve System and the New York Federal Reserve Bank ("Fed") (collectively "U.S. and New York authorities") initiated their own investigations respecting historical compliance by HVB with applicable U.S. sanctions laws and regulations.

HVB has each cooperated extensively with the U.S. and New York authorities, including conducting its own voluntary investigation of its U.S. dollar payments practices and its historical compliance with applicable U.S. financial sanctions, in the course of which certain historical non-transparent practices were identified. Even before the conclusion of these investigations, HVB initiated substantial and substantive remediation activities relating to policies and procedures, which are ongoing.

On 15 April 2019 HVB reached a resolution with the U.S. and New York authorities regarding these investigations. No further enforcement actions are expected relating to the subject of the resolved investigation.

As part of the settlements with the U.S. and New York authorities (DANY, OFAC, DOJ, DFS and Fed), HVB made certain commitments to implement remedial compliance controls and conduct risk assessments relating to the global business lines, to provide periodic reports and certifications concerning the implementation and effectiveness of the compliance program to the U.S. and New York authorities, and to engage an independent external party to conduct an annual review of the effectiveness of the compliance program whose findings will be shared with the U.S. and New York authorities. Most of these reporting requirements will expire after three to five years, but may be extended at the discretion of the U.S. and New York authorities.

Lehman Brothers Special Financing Claim

The Lehman Brothers Special Financing Claim (LBSF) relates to HVB's holding of: (A) 2005-1 EUR 19,000,000 Class A2-A9 notes issued by Ruby Finance PLC ("Ruby"), and (B) 2004-1 Upper Thames EUR 25,000,000 Credit-Linked Synthetic Portfolio Notes due in 2043 and issued by Quartz Finance PLC ("Quartz").

Both Ruby and Quartz entered into contracts for derivatives with Lehman Brothers Special Financing, Inc.. LBSF included these credit derivative transactions in omnibus avoidance proceedings commenced before the US Bankruptcy Court on 1 October 2010 (LBSF v Bank of America, N.A. et. al. Adv. Pro. No. 10-03547; the "Adversary Proceeding"). On 18 July 2012, LBSF amended its First Amended Complaint in the Adversary Proceeding, in order to, among other things, add the London Branch of HVB as a "Noteholder Defendant", in an attempt to claw-back distributions for the benefit of LBSF (as derivative counterparty) already made by both Ruby and Quartz to HVB (as noteholder).

The U.S. Bankruptcy Court held a hearing on 4 May 2016 on an omnibus motion to dismiss filed by the Noteholder Defendants, and on 28 June 2016 the decision of Bankruptcy Judge Chapman on the omnibus motion was issued. In her decision, Judge Chapman dismissed the case against HVB and the other Noteholder Defendants.

LBSF unsuccessfully appealed such decision to the US District Court for the Southern District of New York.

On 13 April 2018, LBSF filed notice of appeal to the Second Circuit Court of Appeals. The parties exchanged pleadings. The Appeal hearing was held on 26 June 2019 and judgement is awaited.

Euro-denominated bonds issued by EU Countries

On 31 January 2019, UniCredit S.p.A. and HVB received a Statement of Objections from the European Commission referring to the investigation by the European Commission of a suspected violation of antitrust rules in relation to European government bonds. The subject matter of the investigation extends to certain periods from 2007 to 2012, and includes alleged activities by HVB in a part of this period. The Statement of Objections does not prejudge the outcome of the proceeding; should the Commission conclude that there is sufficient evidence of an infringement, a decision prohibiting the conduct and imposing a fine could be adopted, with any fine subject to a statutory maximum of 10% of company's annual worldwide turnover.

HVB had access to the entirety of the European Commission's file on the investigation from 15 February 2019 onwards. As a result of the assessment of the files, the Bank regards it no longer remote but possible, even though not likely, that a cash outflow might be required to fulfill a potential fine arising from the outcome of the investigation. On the basis of the current information, it is not possible to reliably estimate the amount of any potential fine at the present date.

UniCredit S.p.A. and HVB have responded to the raised objections on 29 April 2019 and participated in a hearing before the European Commission on 22-24 October 2019. Proceedings are ongoing. There is no legal deadline for the Commission to complete antitrust inquiries.

On 11 June 2019, HVB and UniCredit Capital Markets LLC were named, among other financial institutions, as defendants in a putative class action already pending in the United States District Court for the Southern District of New York. The third amended class action complaint, filed December 3, 2019, alleges a conspiracy among dealers of Euro-denominated bonds issued by European central banks to fix and manipulate the prices of those bonds, among other things by widening the bid-ask spreads they quoted to customers. The putative class consists of those who purchased or sold Euro-denominated bonds issued by European central banks in the US between 2007 and 2012. The third amended class action complaint does not include a quantification of damages claimed. The proceedings are in their inception. Motions to dismiss — a procedural device contemplated by the

United States Federal Rules of Civil Procedure which provides defendants with an opportunity to challenge the legal sufficiency of a complaint and present arguments that the complaint should be dismissed —will likely be fully briefed before the end of the second quarter of 2020 and will likely include the argument that the complaint fails to state a claim.

K. PROCEEDINGS RELATED TO ACTIONS BY THE REGULATORY AUTHORITIES

Various regulators are exercising oversight of operations of HVB. The main authorities are BaFin and German Central Bank (Bundesbank) and, from 4 November 2014, responsibility for banking supervision was transferred from BaFin to the ECB under the scope of the Single Supervisory Mechanism (SSM). Besides this, the foreign branches of HVB are subject to the supervision of the respective locally competent regulatory authorities.

If there are any findings during the inspections conducted by these authorities, HVB will implement the corrective measures in compliance with the mitigation plans and the time scales agreed with the authorities and provide these authorities with information about the implementation status of the corrective measures on a quarterly basis or when requested.

L. GENERAL INFORMATION

1. BaFin Approval

This Registration Document has been approved by BaFin as competent authority under the Prospectus Regulation. BaFin only approves this Registration Document as meeting the standards of completeness, comprehensibility and consistency imposed by the Prospectus Regulation. Such approval should not be considered as an endorsement of the Issuer that is subject to this Registration Document.

2. Documents on Display

The up-to-date articles of association of HVB, the consolidated annual reports in respect of the fiscal years ended 31 December 2019 and 31 December 2018 of HVB and the unconsolidated annual financial statements of HVB in respect of the fiscal years ended 31 December 2019 and 31 December 2018 prepared in accordance with the German Commercial Code (*Handelsgesetzbuch*) will be available during usual business hours on any weekday (except Saturdays and public holidays) at the offices of HVB and can be found online under https://www.hypovereinsbank.de/hvb/ueber-uns/investor-relations-en. During the validity of this Registration Document, all documents from which information has been incorporated by reference herein will be available for collection in the English language, free of charge, at the office of HVB (Arabellastrasse 12, 81925 Munich).

3. Significant Changes in HVB Group's Financial Position and Trend Information

The performance of HVB Group will depend on the future development on the financial markets and the real economy in 2020 as well as other remaining imponderables. In this environment, HVB Group will continuously adapt its business strategy to reflect changes in market conditions and carefully review the management signals derived from this on a regular basis.

There has been (i) no significant change in the financial position of the HVB Group which has occurred since 31 December 2019, and (ii) no material adverse change in the prospects of the HVB Group since 31 December 2019, the date of its last published audited financial statements (Annual Report 2019).

4. Information incorporated by reference

The information specified below shall be deemed to be incorporated in, and to form part of, this Registration Document in accordance with Art. 19 of the Prospectus Regulation. The non-incorporated parts of the abovementioned documents are either not relevant for the investor or covered elsewhere in the Registration Document.

The 2019 profit available for distribution disclosed in the annual financial statements of HVB, which forms the basis for the appropriation of profit, amounts to \in 3,288 million. This consists of the net income of \in 1,051 million generated in the reporting year less the transfer to other retained earnings of \in 263 million and a withdrawal from other retained earnings of \in 2,500 million. We will propose to the Shareholders' Meeting to pass a resolution that a dividend totalling \in 3,288 million be paid to UniCredit S.p.A. (UniCredit), Milan, Italy. This represents a dividend of around \in 4.10 per share after around \in 0.65 for the 2018 financial year. The consolidated profit of \in 520 million reported in the previous year was distributed to UniCredit in accordance with a resolution adopted by the Shareholders' Meeting on 3 June 2019.

Legal basis

UniCredit Bank AG (HVB) is a universal bank with its registered office and principal place of business in Arabellastrasse 12, Munich, Germany. It is filed under HRB 42148 in the B section of the Commercial Register maintained by Munich District Court. HVB is an affiliated company of UniCredit S.p.A., Milan, Italy (ultimate parent company) in whose consolidated financial statements HVB Group is included. These are published on the UniCredit corporate group's website at the following address: <u>https://www.unicreditgroup.eu/en/investors/financial-reports.html</u>.

As a universal bank, HVB with its subsidiaries is one of the leading providers of banking and financial services in Germany. It offers a comprehensive range of banking and financial products and services to private, corporate and public-sector customers, international companies and institutional customers. Further information on the Bank's products and services is provided in the Note "Components of segment reporting by business segment" in the notes to these consolidated financial statements.

As a capital market-oriented company, HVB prepares its financial statements in accordance with the requirements of the International Accounting Standards Board (IASB) in the version adopted by the EU. This provides a reliable and internationally comparable basis for evaluating the assets, liabilities, financial position and profit or loss of HVB Group. Our value-based management is similarly based on these accounting principles.

The consolidated financial statements have been prepared in accordance with the International Financial Reporting Standards (IFRS) pursuant to EU Commission Regulation 1606/2002 of the European Parliament and of the Council of 19 July 2002 (IAS Regulation) together with further regulations regarding the adoption of certain IFRS within the framework of the EU endorsement in conjunction with Section 315e (1) of the German Commercial Code (Handelsgesetzbuch – HGB) as non-exempt consolidated financial statements compliant with Section 4 of the IAS Regulation. The present consolidated financial statements were prepared by HVB's Management Board on 12 March 2020 and will be submitted to the Supervisory Board on 20 March 2020 for approval. Besides the standards defined as IFRS, the IFRS also comprise the existing International Accounting Standards (IAS) together with the interpretations known as IFRICs and SICs of the IFRS Interpretations Committee (IFRS IC) and its predecessor organisation. All the standards and interpretations subject to mandatory application in the EU for the 2019 financial year have been applied. Section 315e HGB also contains national regulations to be applied alongside the IFRS by capital-market-oriented companies.

Management's Discussion and Analysis meets the requirements of Section 315 (1, 2 and 4) HGB. It also incorporates a risk report pursuant to Section 315 HGB.

Legal basis (Continued)

Compliant with Section 264b HGB, the following partnerships are exempted from the obligation to prepare a management report and publish their annual financial statements:

- A & T-Projektentwicklungs GmbH & Co. Potsdamer Platz Berlin KG, Munich
- Acis Immobilien- und Projektentwicklungs GmbH & Co. Oberbaum City KG, Grünwald

Accounting and Valuation

1 Reporting date/period

The amounts shown in the tables and texts below relate to the reporting date of 31 December for disclosures regarding balance sheet items and totals and the period from 1 January to 31 December of the respective year for disclosures regarding the income statement.

2 Uniform Group accounting policies

The separate financial statements of the domestic and foreign subsidiaries are incorporated in the consolidated financial statements of HVB Group in accordance with uniform principles of accounting and valuation. Where options have been exercised, the details are explained under the balance sheet items concerned.

3 Consistency

In accordance with the IFRS framework together with IAS 1 and IAS 8, we apply the accounting, valuation and disclosure principles consistently from one period to the next. We discuss the changes in accounting principles as follows: the first-time adoption of new IFRS accounting rules is described in the Note "Initial adoption of the die new IFRS accounting rules. Where significant accounting and valuation errors from earlier periods are corrected, the amounts involved are adjusted retroactively. Where retroactive adjustment is not possible in exceptional circumstances, the amounts involved are adjusted against retained earnings. Where we effect changes in accounting policies, any resulting adjustments are similarly recognised retrospectively.

As part of the optimisation of its payment transaction activities, HVB has decided to adjust the recognition of expenses for the purchase of certain payment transaction services (an external service provider carries out the activities required for the settlement of payment transactions on behalf of the Bank) and of services in connection with credit card payment or credit card management: these expenses are now recognised under commission expense instead of in operating costs. In view of the adjustments made in recent years to the pricing scheme for accounts and payment services, it is more appropriate to set off the expense for the purchase of the services as commission expense from commission income for these services. The change in recognition results in the financial statements providing more reliable and relevant information on the respective banking services. Consequently, \in 41 million was recognised as commission expense in the 2019 reporting period, whereas \in 41 million was shown as operating costs for the purchase of these services in 2018. On account of the retrospective application, the previous year's figures have been adjusted so that commission expense has increased by \in 41 million, while operating costs have decreased by \in 41 million.

Unfortunately, we made an error in the change in recognition referred to in the Half-yearly Financial Report for the period up to 30 June 2019, with regard to the presentation of the differences between spot and forward rates (swap rate) of forward exchange transactions; the swap rate was already accrued in the previous year and reported in the net interest. As a result, there is no change in recognition.

The two changes in accounting policies that took effect from 31 December 2019 are described below:

- change to the revaluation model for owner-occupied land and buildings and
- change to the fair value model for investment property

Change to the revaluation model for owner-occupied land and buildings

HVB Group has decided to change the subsequent measurement of the properties used by the Bank falling within the scope of IAS 16 which are classified as property, plant and equipment from the previous cost model to the revaluation model pursuant to IAS 16.31. Under IAS 8.14(b), such a change in the accounting method is permitted if it results in more meaningful and reliable information in the consolidated financial statements.

In recent years, HVB Group has intensified its management of properties used by the Bank. Essential properties were thus adjusted, among other things, to new office concepts or refurbished to meet new technical challenges posed by digitalisation in particular. To better reflect available or used resources, HVB Group has generally decided to change the measurement to report the fair value. This change results in a more transparent presentation of the asset situation as the substance available is now shown on the basis of current values and hidden reserves are disclosed. As a result, equity is also reported more transparently in the consolidated financial statements. The actual use of resources is also shown in relation to earnings as in future the depreciation entered is based on the actual resource input, i.e. generally the fair value of the properties used. In addition, the planned main measures implemented in real estate management are reflected promptly in full in the consolidated financial statements as these result in a revaluation of the properties.

Accounting and Valuation (CONTINUED)

Under the revaluation model, a revaluation is to be carried out at sufficiently regular intervals on the revaluation date and the carrying amount adjusted to the fair value of the asset. Scheduled depreciation continues to be recognised in the income statement on this basis over the expected useful life. If any deviations between the current carrying amount and the current fair value arise, another revaluation is to be carried out. This ensures that the carrying amount does not deviate significantly from the fair value.

In accordance with the rules of IAS 8.17 in conjunction with IAS 16.80A, the change to the revaluation model is to be undertaken prospectively and not retrospectively. As HVB Group has decided to apply the revaluation model with effect as of 31 December 2019, the carrying amounts have been adjusted to the fair value on the revaluation date of 31 December 2019. The revaluation method is applied to the following groups of property, plant and equipment: land and buildings. In the process, the carrying amounts for properties used by the Bank are broken down into separate carrying amounts for land and buildings, which are measured separately. If the fair value for an asset is higher than the previous carrying amount, the increase in value is recognised in other comprehensive income in conformity with IAS 16.39 and accumulated in equity within the revaluation surplus. If the fair value is lower than the existing carrying amount upon initial application, it is to be written down as an expense. Such a write-down is confined at the time of the first revaluation at 31 December 2019 to cases in which the allocation of carrying amounts to land and buildings results in a pro rata carrying amount which is lower than the fair value for the plot of land or building now valued separately.

For the revaluation of properties used by the Bank, valuation reports were generally prepared by independent external experts. HVB Group carried out the valuation itself only for non-essential properties. In the course of the initial revaluation, increases in value of €1,253 million were recognised in equity through other comprehensive income and depreciation of €36 million as depreciation and impairment losses on property, plant and equipment within operating costs. The carrying amounts of the owner-occupied land and buildings still reported under property, plant and equipment have increased by €1,217 million accordingly. This does not include owner-occupied properties in the process of being sold and thus recognised at 31 December 2019 as "Non-current assets or disposal groups held for sale". The valuation regulations of IFRS 5 are to be applied to these. Separate lines have been added to the development of property, plant and equipment included the notes to show the effects of the change to the revaluation method.

Change to the fair value model for investment properties

HVB Group has decided to change the subsequent measurement of the Bank's investment properties falling within the scope of IAS 40 which are classified as investment properties from the previous cost model to the fair value model pursuant to IAS 40.33. Under IAS 8.14(b), such a change in the accounting method is permitted if it results in more meaningful and reliable information in the consolidated financial statements.

In recent years HVB Group has intensified its management of these properties. The active management of the real estate portfolio includes disposals if attractive sales opportunities arise. To better reflect the available resources, HVB Group has decided to change the measurement to report the fair value. This change results in a more transparent presentation of the asset situation as the substance available is now shown on the basis of the current values and hidden reserves are disclosed. As a result, equity is also reported more appropriately in the consolidated financial statements. With regard to the profit and loss situation, the periods in which income/expenses are incurred through the measurement results also become clearer. It is thus no longer of importance that the hidden reserves are realised by a sale in order to be recognised through profit or loss. As a result, the real estate portfolio is recognised for the most part at fair value since the Bank has also changed to the revaluation model in accordance with IAS 16.31 for the properties used by the Bank.

The change to measuring investment properties at fair value through profit or loss was made retrospectively in accordance with IAS 8.19(b). The previousyear figures in the 2019 consolidated financial statements have been restated accordingly. This relates in detail to the following measures:

- First-time adoption effect from the measurement adjustment in equity under total other reserves as of 1 January 2018 (opening balance 2018) to
 recognise the measurement differences from the change in measurement method for the period before 1 January 2018.
- Adjustment of the 2018 consolidated income statement to the retrospectively changed measurement method; the increase in the reported consolidated
 profit reduces the amount withdrawn from total other reserves; such withdrawal was carried out in the 2018 consolidated financial statements as part
 of the appropriation of net profit.
- Adjustment of the 2019 consolidated income statement to the retrospectively changed measurement method leads to a higher consolidated profit for 2019.

Investment properties shown in the respective balance sheet item or classified as "Non-current assets or disposal groups held for sale" fall within the scope of application of the fair value measurement of investment properties in accordance with IFRS 5.5(d), the latter continues to be subject to measurement based on the fair value model pursuant to IAS 40. This item also includes the right-of-use assets received under leases, which represent investment property at HVB Group.

The fair values of investment properties were determined at the respective measurement dates by external appraisals. Only in the event of a sale close to the measurement date was the selling price used. The fair value changes are recognised in the consolidated income statement under the item "Net other expenses/income". Scheduled depreciation is no longer taken over the useful life of the property. On account of the change in measurement to fair value, it was also necessary to restate the results from the sale of investment properties.

Where the change in the measurement method resulted in the recognition of deferred taxes, these were posted accordingly (for first-time adoption effects, these were also recognised in equity under retained earnings; for adjustments in the consolidated income statement, these were recognised in tax expense). The following effects resulted from the change in accounting method:

As a first-time adoption effect as of 1 January 2018, there are changes of €395 million on account of remeasurement at fair value. This resulted in deferred taxes of €124 million, resulting in an amount of €271 million being recognised in equity under retained earnings.

Adjustments in the consolidated income statement for properties reported under the item "Investment properties":				
	2019	2018		
Remeasurement (adjusted to current fair value)	70	449		
Suspension of write-ups/extraordinary write-downs	(8)	(108)		
Total adjustments in the item "Net other expenses/income"	62	341		
Item "Operating costs": suspension of depreciation/amortisation	8	23		
Tax expense: recognition of deferred taxes	13	(105)		
Total	83	259		

Adjustments in the consolidated income statement for properties contained in the item "Non-current assets or disposal groups held for sale":

	(E minoris)
2019	2018
295	30
(615)	(50)
(320)	(20)
89	6
(231)	(14)
	295 (615) (320) 89

Accounting and Valuation (CONTINUED)

As a result, earnings per share (undiluted and diluted) for 2019 changed by minus €0.21 (previous year: plus €0.29) to €0.99 (previous year: €0.58).

In addition, the following adjustments were made to the carrying amounts in the consolidated balance sheet:	
---	--

	CARRYING AMOUNT BEFORE CHANGE IN MEASUREMENT METHOD	ADJUSTMENT	CARRYING AMOUNT AFTER CHANGE IN MEASUREMENT METHOD
Investment properties (31/12/2018)	256	307	563
Investment properties (31/12/2019)	185	168	353
Non-current assets or disposal groups held for sale:			
investment properties (31/12/2018)	667	433	1,100
Non-current assets or disposal groups held for sale:			
investment properties (31/12/2019)	21	208	229

(€ millions)

Changes in estimates have been recognised in net income for the period affected by the change in the estimation method. Provided the change in the estimation method does not affect the income statement, the carrying amount of the concerned asset or liability, or shareholders' equity position has been adjusted.

The consolidated financial statements are prepared under the assumption of a going concern. Accounting and valuation in accordance with IFRS contains values that have been determined reliably using estimates and assumptions. The estimates and assumptions applied are based on past experience and other factors such as budgets, expectations and forecasts regarding future events which seem appropriate under the present circumstances. This mainly affects the determination of the fair value of certain financial assets and liabilities, impairments in the lending business, deferred taxes, and the accounting and valuation of provisions. The actual values may differ from the assumptions and estimates made.

The following matters in particular are affected by estimates, assumptions and discretionary decisions:

- Measurement of goodwill:

The multi-year plan drawn up by HVB Group forms the main basis for the impairment test for goodwill. The multi-year plan contains forecasts of future trends in terms of both the Bank's respective business units and macroeconomic developments. This means that the impairment test for goodwill is also subject to estimates, assumptions and discretionary decisions.

- Determination of impairments (IFRS 9):

Scenarios of the anticipated cash flows of debt instruments serve as a basis for determining the expected credit default. This means that, to determine the impairments, assumptions and forecasts must be made regarding the payments that may still be received from the borrower and/or proceeds from the realisation of the collateral and the probability of occurrence of the respective scenario must be estimated. This is carried out collectively for debt instruments at Stage 1 and Stage 2 and for insignificant individual cases at Stage 3 while the assumptions and estimates are made individually for significant individual cases at Stage 3.

- Determination of fair value:

HVB Group employs internal models to determine the fair value of financial instruments for which no price is available on an active market. The application of these internal models presupposes assumptions and forecasts, among other things, the scope of which depends on the complexity of the financial instrument and the valuation parameters derived from market data.

Determining the fair value of real estate as non-financial assets also requires discretionary decisions to a certain degree. As self-occupied land and buildings, as well as investment properties, are unique, there is generally no observable market data available for such properties. As a result, the value of this real estate is periodically assessed, usually by independent external assessors, using recognised appraisal methods, and the valuation parameters, such as rents, are estimated based on market information.

Provisions:

Provisions are recognised for present or future obligations to cover the payments required to settle these obligations. In this context, it is necessary to estimate the amount of these expenses or costs and also the date at which the liabilities are expected to be settled. This involves making assumptions regarding the actual amount of the costs occurring and, in the case of long-term provisions, also determining possible cost increases up until the settlement date. If the settlement date is more than one year in the future, the forecast expenses and costs are discounted over the period until the liability is settled. If provisions are set up for future audits of tax returns by the tax authorities, the anticipated additional tax payments are not discounted. Instead the interest charged by the tax authorities on the additional amounts payable are added together. The uncertainties in making estimates are greater in this case as the interpretation of tax issues is constantly evolving and is also applied retrospectively.

- Deferred tax assets and liabilities:

Apart from a few exceptions defined in the standard, deferred tax assets and liabilities are recognised for all temporary differences between the values stated in accordance with IFRS and the values stated for tax-reporting purposes (liability method). Accounting and valuation are performed in accordance with IAS 12 on the basis of local tax regulations that are expected to apply to the period when an asset is realised or a liability is settled. The regulations and applicable local tax rates are assumed that are enacted or substantively enacted at the reporting date. Deferred tax assets are not recognised to the extent that it seems unlikely that sufficient taxable profit will be available in future periods. Furthermore, deferred tax assets are recognised for unused tax losses carried forward and unused tax credits to the extent that recoverability is demonstrated. This is done on the basis of a five-year plan for HVB Group, which is subject to segment-specific and macroeconomic assumptions and takes account of local tax regulations.

- Share-based compensation:

Assumptions must similarly be made to determine the cost of share-based compensation programmes. The costs for the instruments to be transferred are amortised over the vesting period or the beneficiaries' claims expire if they leave UniCredit first. This makes it necessary to forecast what proportion of employees will leave UniCredit during the vesting period. At the same time, the shares granted must be measured at fair value at the grant date. The comments made above regarding the determination of fair value are applicable analogously.

- Property, plant and equipment:

Depreciable items of property, plant and equipment are depreciated over their useful lives. Since the useful life is not independent of the usage of the actual asset in question, it must be estimated in the light of the circumstances in each case.

- Intangible assets:

With the exception of goodwill, intangible assets are amortised over their useful life. Here, too, suitable assumptions must be made to estimate the useful life.

Apart from this, the accounting, valuation and disclosure principles applied in the 2019 financial year are the same as those applied in the consolidated financial statements for 2018, with the exception of the new IFRS rules to be applied as described in the Note "Initial adoption of new IFRS accounting rules".

4 Initial adoption of new IFRS accounting rules

The amendments to the following standards newly published or revised by the IASB were mandatorily applicable in the European Union (EU) for the first time in the 2019 financial year:

Standards

IFRS 16 - "Leases"

Interpretations

IFRIC 23 - "Uncertainty over Income Tax Treatments"

Amendments and improvements

- Annual improvements to the IFRS 2015-2017 cycle (IFRS 3, IFRS 11, IAS 12 and IAS 23)
- Amendments to IFRS 9 "Financial Instruments" Prepayment Features with Negative Compensation
- Amendments to IAS 28 "Investments in Associates and Joint Ventures" Long-term Interests in Associates and Joint Ventures
- Amendments to IAS 19 "Employee Benefits" Plan Amendment, Curtailment or Settlement

The first-time application of the new IFRS 16 accounting standards had a material impact on the consolidated financial statements of HVB Group. A detailed description of the revised accounting and valuation methods with regard to the leases of HVB Group as lessee and lessor is included in the Note "Leasing Business". The nature and impact of the changes as a consequence of the first-time application of IFRS 16 are described below.

We have also implemented the other new or amended accounting principles. These did not impact or have any material effects on our consolidated financial statements.

For the effects of the first-time adoption of IFRS 9 included in the previous-year figures, please refer to the detailed explanations in the 2018 consolidated financial statements.

First-time adoption of IFRS 16 "Leases"

On 13 January 2016, the IASB published the new accounting standard IFRS 16 "Leases", which supersedes the previous standard for lease accounting IAS 17 "Leases" as well as the accompanying interpretations IFRIC 4 "Determining whether an Arrangement Contains a Lease", SIC 15 "Operating Leases – Incentives" and SIC 27 "Evaluating the Substance of Transactions Involving the Legal Form of a Lease". The incorporation of IFRS 16 into European law (endorsement) took place on 31 October 2017. Adoption of the standard is mandatory in the EU for financial years beginning on or after 1 January 2019.

IFRS 16 contains new or amended recognition, measurement, presentation and disclosure requirements for lease accounting. The amendments affect accounting by the lessee in particular; the requirements relating to accounting by the lessor have remained largely unchanged. The requirements of the new standard apply to leases of our property, plant and equipment and to investment properties. IFRS 16 does not apply to leases involving licence agreements.

HVB Group adopted IFRS 16 for the first time on 1 January 2019. The first-time adoption was carried out consistently for all of the leases in conformity with the transitional provisions based on the modified retrospective method pursuant to IFRS 16.C5(b), according to which the cumulative effect of the first-time adoption of IFRS 16 at the date of initial application is to be recognised as an adjustment of the opening balance of retained earnings. The comparative information for the previous year has not been restated and is presented in accordance with the rules of the previously applicable standard IAS 17 and the related interpretations. No first-time adoption effects to be recognised in equity arose at HVB Group level.

During the transition to the new lease standard, HVB Group made use of the accounting simplification option for lessees and lessors regarding the use of the new definition of lease agreements. Consequently, agreements in place prior to 1 January 2019 should not be re-evaluated at the time of initial application to determine whether they should be reclassified in whole or in part as leases in accordance with IFRS 16. The assessments reached in accordance with the previous rules of IAS 17 / IFRIC 4 were applied to the whole portfolio of agreements (grandfathering). In the case of existing agreements that establish or contain a lease, HVB Group generally accounted for each lease component separately from the non-lease components of the agreement as a separate lease.

According to the new lease definition of IFRS 16, an agreement is or contains a lease when it grants the right to control the use of an identified asset (the underlying asset) for a specified period in exchange for a fee. While the new definition in IFRS 16 is essentially based on the concept of control, IAS 17 / IFRIC 4 primarily focus on risks and rewards. The new definition in IFRS 16 will not significantly change the number of lease agreements held by the Bank.

For the lessee, IFRS 16 eliminates the previous classification of lease agreements as either operating leases or finance leases, and instead introduces a uniform lessee accounting model (right-of-use approach). According to this approach, for all these lease agreements the lessee generally recognises an asset for the right to use the underlying leased property and a corresponding lease liability for the obligation to make the outstanding lease payments, the only exception being short-term leases and leases for low-value assets. This means that previously unrecognised operating leases now have to be accounted for in a manner largely comparable to the recognition of finance leases in accordance with IAS 17. As a result, the capitalisation of the right-of-use assets and the recognition of the corresponding lease liability leads to an extension of the balance sheet for operating leases previously not recognised in the balance sheet. As at 1 January 2019, our total assets increased by €373 million due to the first-time adoption of IFRS 16.

The adoption of IFRS 16 also resulted in changes to the consolidated income statement. The lease payments previously made by the lessee under operating leases in accordance with IAS 17, which were recognised as an other operating expense or, if they were rental expenses, under operating costs on a straight-line basis over the lease term have now generally been replaced by depreciation expenses. Scheduled and unscheduled depreciation, impairments and write-ups on the right-of-use assets reported under property, plant and equipment are recognised under the item "Depreciation and impairment losses on intangible and tangible assets" within operating costs. Only for right-of-use assets that meet the definition of an investment property under IAS 40 and are measured at fair value are profits and losses arising from a change in the fair value recognised directly through profit or loss in the item "Net other expenses/income". While incentive payments (for example, rent-free periods) under IFRS 16 are taken into account in the course of measuring the right-of-use assets and lease liabilities, the lease incentives granted to the lessee were previously amortised on a straight-line basis as a reduction in the rental expenses pursuant to IAS 17.

Compounding of the lease liabilities contained in the balance sheet items "Deposits from customers" as well as "Deposits from banks" is carried out as interest expense.

In its transition to the new IFRS 16 standard for lessees, HVB Group proceeds as follows, whereby optional simplification options and practical aids afforded by the standard are explained, among other things:

- Leases ending on 31 December 2019 at the latest were treated as short-term leases regardless of the original term of contract. In line with the procedure for short-term leases, the Bank did not recognise a right of use and a lease liability. The lease payments related to these leases were recognised as an expense on a straight-line basis over the lease term in accordance with the previous treatment of operating leases pursuant to IAS 17.
- Each remaining lease was discounted separately at its individual interest rate and measured. The Bank did not use the option of applying a single discount rate for a portfolio of similarly structured lease agreements.
- For lease agreements previously classified as operating leases under IAS 17, the respective outstanding lease payments were discounted by the lessee at the time of initial application at the incremental borrowing rate at 1 January 2019 separately for each lease liability to be recognised and stated at their present value. The weighted average incremental borrowing rate was 2.36% p.a. The corresponding right-of-use asset was recognised in the amount of the lease liability.
- Rather than carry out an impairment review in accordance with IAS 36, the right-of-use asset at the time of initial application was reduced in a simplified manner by the amount as at 31 December 2018 recognised as a provision for onerous leases in accordance with IAS 37.
- The Bank did not use the retroactive determination and consideration of the initial direct costs in the measurement of the right-of-use asset at the time of initial adoption.
- In specifying the term of lease agreements, the exercise of options to extend or terminate the lease was assessed according to the current state of the facts rather than retrospectively determining the likelihood that these options would be exercised when the agreement was initiated.

Upon the first-time adoption of IFRS 16, previous obligations arising under operating leases pursuant to IAS 17 were recognised as right-of-use assets or lease liabilities in the consolidated balance sheet for the first time. A significant share of the newly recognised right-of-use assets of liabilities is accounted for by the real estate rented by HVB Group.

In addition, the right-of-use assets and lease liabilities contain leases which were previously accounted for as finance leases under IAS 17. For finance leases, the assets leased by HVB Group as the lessee were shown in the consolidated balance sheet under property, plant and equipment, and the corresponding obligation under deposits from customers or deposits from banks. On 1 January 2019, the previous finance lease agreements with their carrying amounts as at 31 December 2018 were recognised as right-of-use assets and lease liabilities, and as a result were accounted for in accordance with IFRS 16.

In the context of the transition to IFRS 16, lease liabilities of \notin 546 million were recognised. Based on the off-balance sheet operating lease obligations as at 31 December 2018, the following table shows the reconciliation to the opening balance of the lease liabilities carried as liabilities as at 1 January 2019:

(€ millions)

Off-balance sheet obligations from operating leases in accordance with IAS 17 as at 31/12/2018	289	
Application relief for short-term leases	(21)	
Application relief for leases of low-value assets		
Changes related to extend or terminate a lease	146	
Others	(3)	
Obligations from operating lease arrangements (gross amount undiscounted) as at 1/1/2019		
Effect from the discounting with the incremental borrowing rate as at 1/1/2019	(38)	
Obligation from operating lease arrangements (discounted) as at 1/1/2019		
Adoption in the consolidated balance sheet as additional recognised lease liabilities		
due to first-time application of IFRS 16 as at 1/1/2019	373	
Carrying amount of lease liabilities from finance leases in accordance with IAS 17 as at 31/12/2018	173	
Carrying amount of total lease liabilities in accordance with IFRS 16 as at 1/1/2019		

The figure of \notin 251 million recognised in the previous year as the initial value of off-balance-sheet obligations under operating leases in accordance with IAS 17 as at 31 December 2018 was adjusted by \notin 38 million to \notin 289 million based on the operating lease portfolio additionally identified in the contract analysis.

Upon the first-time adoption of IFRS 16, assets of €373 million were recognised for the right-of-use assets to the underlying leased property. As shown in the following table, the difference between the amounts stated for the right-of-use assets and the lease liabilities at 1 January 2019 is primarily due to the impairment losses recognised in previous years on the carrying amounts of the assets from a finance lease, the offsetting of right-of-use assets from provisions set up in connection with onerous leases as well as the derecognition of right-of-use assets to the leased item in the case of subleases classified by the intermediary as finance leases:

	(€ millions)	
Lease liabilities as at 1/1/2019	546	
Adoption as initial value for the recognition of right of use assets as at 1/1/2019	546	
Difference between the carrying amount of the leased assets and the lease liabilities		
from finance leases due to impairment losses in previous years	(123)	
Offsetting with provisions for onerous lease arrangements	(29)	
Derecognition in case of sub-leases classified as finance leases	(21)	
Others	—	
Carrying amount of right of use assets as at 1/1/2019	373	
of which: carrying amount of right-of-use assets from previous finance leases	50	

For lessor accounting, the rules of IAS 17 have essentially been incorporated unchanged into the new IFRS 16, such that the dual lessor accounting model which classifies lease agreements as either operating leases or finance leases is still applicable.

In the case of subleases that are recognised as separate contracts separately to the main lease in accordance with IFRS 16, HVB Group as the intermediate lessor at the date of the initial application of the new standard was required to again assess each existing operating lease to determine whether it is to be classified as an operating or a finance lease under the rules of IFRS 16. This assessment was made on the basis of the remaining terms of contract of the main lease and sublease with reference to the right of use to the leased property under the main lease (and not on the basis of the asset underlying the right of use as was the case under IAS 17). On account of this change, HVB Group has reclassified some of its subleases at the date of the first-time adoption of IFRS 16.

In addition, IFRS 16 stipulates changes and extensions regarding the disclosure requirements of the lessor.

5 Published IFRS that are not yet the subject of mandatory adoption and that have not been the subject of early adoption

As permitted, HVB Group has decided against the early voluntary adoption of the standards and interpretations adopted or revised by the IASB, which become the subject of mandatory adoption for the 2020 financial year or thereafter. HVB Group will apply these standards and interpretations in the financial year in which the new provisions in question become mandatorily applicable for EU-based enterprises for the first time.

The EU has adopted the following into European law:

- Framework concept for financial reporting changes in the references to the framework concept in IFRS standards. The provisions are subject to mandatory adoption for reporting periods beginning on or after 1 January 2020.
- Amendments to IFRS 9 "Financial Instruments". IAS 39 "Financial Instruments: Recognition and Measurement" and IFRS 7 "Financial Instruments: Disclosures" – Interest Rate Benchmark Reform. The provisions are subject to mandatory adoption for reporting periods beginning on or after 1 January 2020.
- Amendments to IAS 1 "Presentation of Financial Statements" and IAS 8. The provisions are subject to mandatory adoption for reporting periods beginning on or after 1 January 2020.

The EU has not yet adopted the following into European law:

- Amendments to IFRS 3 "Business Combinations" Definitions of a business. The provisions are subject to mandatory adoption for reporting periods beginning on or after 1 January 2020.
- Amendments to IAS 1 "Presentation of Financial Statements" Classification of Liabilities as Current or Non-current. The provisions are subject to mandatory adoption for reporting periods beginning on or after 1 January 2022.
- IFRS 17 "Insurance Contracts". The provisions are subject to mandatory adoption for reporting periods beginning on or after 1 January 2021.

We do not expect the remaining new or amended provisions to be applied in the future to have any significant effects on the consolidated financial statements.

6 Companies included in consolidation

The group of companies included in consolidation by HVB Group encompasses 135 (previous year: 139) controlled companies, of which 36 (previous year: 37) are classified as structured entities within the meaning of IFRS 12.

	2019	2018
Total controlled companies	290	307
Consolidated companies	135	139
of which: structured entities in accordance with IFRS 12	36	37
Non-consolidated companies	155	168
Joint ventures	2	3
of which: accounted for using the equity method	—	—
Associates	4	6
of which: accounted for using the equity method	2	5

At year-end 2019, we had a total of 159 (previous year: 172) controlled and associates, and joint ventures in HVB Group that were neither fully consolidated nor fully accounted for using the equity method as they are not of material importance to the Group.

The structured entities include two borrowers (previous year: three) over which HVB gained control during the course of restructuring or resolution. The borrowers are classified as structured entities within the meaning of IFRS 12 as, on account of their financial difficulties, they are controlled by their credit relationship with HVB and no longer by voting rights. Not all of the borrowers are disclosed in the Note "List of holdings", for data protection reasons. Two (previous year: three) of these borrowers have been consolidated; as in the previous year, there were no borrowers who have not been consolidated for materiality reasons.

The effects on the balance sheet of the contractual relationships between the Group companies and these non-consolidated companies are included in the consolidated financial statements. The aggregate amounts of net income for the year of these minor non-consolidated companies makes up 1.06% (previous year: 1.25%) of the consolidated profit of HVB Group, while such companies provide around 0.07% (previous year: 0.06%) of consolidated assets. The aggregate amounts of net income for the year of minor companies not accounted for using the equity method (joint ventures and associates) amounts to 0.03% (previous year: 0.07%) of the consolidated profit, their share in the Group capital is 0.0004% (previous year: 0.001%). Our interests in these companies are carried as "Financial assets at FVTPL" and loans extended under "Loans and receivables with customers (at cost)".

Controlled companies

The group of companies included in consolidation has been defined taking into account materiality criteria. In addition, smaller companies that are below the materiality thresholds have also been consolidated on account of the rules defined by the banking supervisory authorities that regulate UniCredit. The fully consolidated companies prepared their annual financial statements for the period ending 31 December 2019.

In accordance with IFRS 12, 36 (previous year: 37) fully consolidated controlled entities are classified as structured entities. Please refer to the Note "Disclosures regarding structured entities" for more information on structured entities.

There were significant restrictions on the ability of HVB Group to access assets of the controlled companies as follows:

- Subsidiaries classified as credit institutions or financial services institutions for supervisory purposes are subject to the provisions of the German Banking Act, the CRR and MaRisk/ICAAP regarding their capital base. The equity capital to be maintained under these provisions limits the ability of HVB Group to adopt resolutions regarding dividend distributions.
- Fully consolidated structured entities are not generally included in the consolidated financial statements on account of HVB Group's position as a shareholder. Accordingly, HVB Group has no ability to decide on dividend distributions and is bound by the contractual arrangements (such as lending agreements or derivative contracts).

The non-controlling interests at 31 December 2019 have no significant effects on the consolidated financial statements of HVB Group either individually or in aggregate. At 31 December 2019 third parties hold non-controlling interests in 44 (previous year: 47) fully consolidated companies. The non-controlling interests are shown separately in the consolidated balance sheet and generally participate in the profits and losses of the companies; their shareholders hold voting rights in the companies, but without breaking the controlling influence of HVB Group.

The following companies were newly added to the group of companies included in consolidation at HVB Group in 2019:

- Bayerische Wohnungsgesellschaft für Handel und Industrie Gesellschaft mit beschränkter Haftung, Munich
- Elektra Purchase No. 64 DAC, Dublin
- Elektra Purchase No. 71 DAC, Dublin
- Ice Creek Pool No. 1 DAC, Dublin
- Verwaltungsgesellschaft Katharinenhof mbH, Munich
- Wealthcap Immobilien Deutschland 44 GmbH & Co. geschlossene Investment KG, Munich
- Wealthcap Immobilienankauf Komplementär GmbH, Munich
- WealthCap Objekt Berlin II GmbH & Co. KG, Munich
- Wealthcap Objekt Dresden GmbH & Co. KG, Munich
- Wealthcap Objekt-Vorrat 25 GmbH & Co. KG, Munich
- Wealthcap Objekt-Vorrat 31 GmbH & Co. KG, Munich
- WealthCap Objekt-Vorrat 32 GmbH & Co. KG, Munich
- WealthCap Wohnen 1 GmbH & Co. KG, Munich
- Wealthcap Wohnen 1a GmbH & Co. KG, Munich
- Weicker S. à r.l., Luxembourg

Wealthcap Immobilien Deutschland 44 GmbH & Co. geschlossene Investment KG and WealthCap Objekt Berlin II GmbH & Co. KG were fully consolidated over the course of the year, and then deconsolidated.

The following companies left the group of companies included in consolidation of HVB Group in 2019 due to merger, sale, or imminent or completed liquidation:

- AGROB Immobilien AG, Ismaning
- Elektra Purchase No. 32 S.A. Compartment 2, Luxembourg
- Elektra Purchase No. 48 DAC, Dublin
- HVB Capital Partners AG, Munich
- Nautilus Tankers Limited, Valletta
- Ocean Breeze Asset GmbH & Co. KG, Bremen
- Ocean Breeze Energy GmbH & Co. KG, Bremen
- Ocean Breeze Finance S.A. Compartment 1, Luxembourg
- Ocean Breeze GmbH, Bremen
- Perikles 20092 Vermögensverwaltung GmbH, Bremen
- SwanCap Partners GmbH, Munich
- Wealthcap Immobilien Deutschland 44 GmbH & Co. geschlossene Investment KG, Munich
- WealthCap Los Gatos 131 Albright Way, L.P., Wilmington
- WealthCap Objekt Berlin II GmbH & Co. KG, Munich
- Wealthcap Objekte Grasbrunn und Ismaning GmbH & Co. KG, Munich
- WealthCap Portland Park Square L.P., Wilmington

The following companies left the group of companies included in consolidation in 2019 for materiality reasons:

- Delpha Immobilien- und Projektentwicklungs GmbH & Co. Großkugel Bauabschnitt Beta Management KG, Munich
- Life Management Erste GmbH, Munich
- paydirekt Beteiligungsgesellschaft privater Banken mbH, Berlin
- Transterra Gesellschaft für Immobilienverwaltung mbH, Munich
- Verwaltungsgesellschaft Katharinenhof mbH, Munich
- WealthCap Objekt-Vorrat 20 GmbH & Co. KG, Munich

Verwaltungsgesellschaft Katharinenhof mbH was deconsolidated, and then fully consolidated over the course of the year.

On account of the deconsolidation of the companies listed above, HVB Group realised a deconsolidation result in accordance with IFRS 10.25 recognised in the item "Net other expenses/income" of \in - million (previous year period: \in 6 million) and minus \in 12 million (previous year period: \in 28 million) in the item "Net gains/losses on disposals of investments" in the income statement.

Associates

No financial statements at 31 December 2019 were available for the associates listed below valued using the equity method when the consolidated financial statements were prepared. The following financial statements were used for valuation using the equity method:

- Comtrade Group B.V., Rotterdam
- Adler Funding LLC, Dover

30 September 2019 31 December 2018

There were no significant events at these companies between the date when the above financial statements were prepared and 31 December 2019 that could have an impact on the assets, liabilities, financial position, and profit or loss.

The group of consolidated companies does not include any companies for which the proportionate consolidation method is applied.

7 Principles of consolidation

An enterprise (or economically separate entity) is fully consolidated when it is controlled by HVB Group. Control is deemed to exist when the following three criteria defined in IFRS 10 are met: HVB Group must have power over the relevant activities of the company and be exposed to variable income from the enterprise. In addition, HVB Group must be able to use its power to influence the variable earnings it obtains from the enterprise.

Control is independent of the type of financial relationship between parent company and subsidiary and does not require any participation in the enterprise's capital. Control may also be derived from contractual arrangements or legal provisions.

To assess whether an enterprise is controlled by HVB Group, a detailed analysis must be carried out of the business purpose, the relevant activities of the enterprise, the parties involved and the distribution of the variable income from the enterprise. The analysis includes an assessment of whether HVB Group is acting as the principal and has delegated power over the enterprise to a third party (agent). This may be the case when the decision-maker who has power over the enterprise does not pursue own economic interests out of the enterprise or these are insignificant and the decision-maker merely exercises delegated decision-making powers for HVB Group.

An enterprise is initially consolidated as soon as HVB Group gains control over the enterprise. During initial consolidation, the assets and liabilities of the enterprise measured are included at their fair values at the effective date. The uniform Group accounting and valuation policies are then applied. Expenses and income of the respective company are included in the consolidated income statement from the effective date of initial consolidation. Participating interests in a consolidated company held by third parties are carried under minority interests, provided the criteria for disclosure as shareholders' equity are met. Otherwise, they are recognised as debt.

Consolidation is performed by offsetting the purchase price of a subsidiary company against the value of the interest held in the completely remeasured shareholders' equity at the time of acquisition, provided the transactions involved are not internal to UniCredit. This amount represents the difference between the assets and liabilities of the acquired company measured at the fair value at the time of initial consolidation. The difference between the higher acquisition cost and the remeasured balance of assets and liabilities is recognised as goodwill under intangible assets in the balance sheet on a prorated basis. Goodwill on companies accounted for using the equity method is carried under "Investments in associates and joint ventures". Compliant with IAS 36, scheduled amortisation is not taken on goodwill. The goodwill is allocated to the cash-generating units (CGU) that are expected to benefit from the synergies arising from the business combination. At HVB Group, these cash-generating units are the business segments. Where the commercial activities of a company span more than one segment, the goodwill is distributed in line with the expected contribution to results at the time of acquisition. The goodwill is tested for impairment at least once a year at cash-generating unit level. This involves comparing the carrying amount of the cash-generating unit with the recoverable amount defined as the maximum of the unit's value in use and the fair value less costs to sell.

The most recent multi-year plan approved by the Management Board normally covering a period of five years and created at segment level forms the basis for testing impairment. In this context, the earnings drivers are net trading income, net interest, net fees and commissions, operating costs and the projected net write-downs of loans and provisions for guarantees and commitments. To allow the earnings components to be planned, the multi-year plan includes an income budget as well as budgets for risk-weighted assets and loans and receivables with customers and deposits from customers. The budgets are based on forecasts by the UniCredit Economics department, with the forecasts for overall economic development (gross domestic product) and interest and inflation rates playing a crucial role. Furthermore, the multi-year plan also reflects the experience gained by management from past events and an assessment of the underlying economic conditions.

We have used the multi-year plan as the basis for determining appropriate values in use for the CGUs to which goodwill is allocated. The values in use are determined using the discounted cash flow method. The value in use represents the present value of the profit generated by the respective segment, which can be distributed or withdrawn. The figures for profit before tax from the segments' multi-year plans are included as cash flows. Furthermore, changes to the allocated capital are taken into account in the course of determining cash flows. If the addition of allocated capital is required for a business segment to cover the higher capital backing for business growth or a higher capital backing to comply with tighter regulatory capital requirements, this addition reduces the cash flows generated by the segment as a kind of profit retention must be carried out at this amount and these amounts are not available for distribution purposes. The cash flows of the previous year: 14.1%) for the Corporate & Investment Banking business segment and 12.8% (previous year: 13.2%) for the Commercial Banking business segment. No growth factor has been assumed for the perpetual annuity. The discount rates named are pre-tax interest rates.

These values in use are employed as recoverable amounts. If they exceed the carrying amount (including the goodwill) to be tested of the CGU, no impairment of goodwill is necessary. As the recoverable amount represents the higher amount of value in use and the selling price less costs to sell, it is not necessary to estimate the selling price, unless the value in use is lower than the carrying amount. In the reporting year, the value in use for the Commercial Banking business segment is lower than the carrying amount to be tested (including the goodwill allocated to this business segment), so that the goodwill assigned to it has to be written down. The Commercial Banking business segment is the only business segment to which goodwill was allocated in the reporting year, following the write down of the goodwill allocated to the CIB business segment in the previous year. In view of the fact that the value in use has already been determined on the basis of a discounted cash flow model and there is no comparable market price available for the Commercial Banking business segment, the fair value would need to be calculated on the basis of a valuation model, such as a discounted cash flow model. In the final analysis, a fair value will not be higher than the value in use which means that the recoverable amount equals the value in use. More extensive write-downs on assets of the company relevant in this case (mostly real estate used by the Bank), which are allocated to the CGU, are not necessary as pursuant to IAS 36.105 ff, such a write-down is required only if the carrying amount is higher than the fair value less costs to sell of the assets concerned. This is not the case because the assets concerned do not entail any hidden charges.

IFRS 3 is not applicable to combinations of businesses under common control (IFRS 3.2 (c)). IAS 8.10 requires an appropriate accounting and valuation method to be developed accordingly for such cases. Given that HVB Group is part of UniCredit, the carrying amounts of the parent company are retained for business combinations within UniCredit. Any difference between the purchase price paid and the net carrying amount of the company acquired is recognised in equity under reserves.

Compliant with IAS 28, shares in associates are accounted for using the equity method or the capital share method and disclosed in the balance sheet accordingly. HVB is able to exercise significant influence over associates without being able to control them. Significant influence is assumed when a company holds more than 20% but less than 50% of the voting rights in an associate. This assumption of association can be refuted where a qualitative analysis demonstrates that significant influence over the financial and strategic decisions of the associate is not possible. Shares in associates are recognised at cost upon initial inclusion in the consolidated financial statements. For the purposes of subsequent measurement, the carrying amount increases or decreases in accordance with the share of HVB in the profit or loss of the associate. This share of the associate's profit or loss attributable to HVB is measured on the basis of the fair values of the associate's assets, liabilities and contingent liabilities when the shares were acquired. The accounting and valuation principles of HVB Group are applied for subsequent measurement.

Business transactions between consolidated companies are eliminated. Any profits or losses arising from intercompany transactions are also netted.

8 Financial instruments

A financial instrument is any contract that gives rise to both a financial asset of one company and a financial liability or equity instrument of another company.

The classes required by IFRS 7.6 are defined as follows:

- Cash and cash balances
- Financial assets and liabilities held for trading
- Financial assets at FVTPL
- Financial assets at FVTOCI
- Loans and receivables with banks (at cost)
- Loans and receivables with customers (at cost)
- Receivables under finance leases
- Hedging derivatives
- Other deposits from banks
- Other deposits from customers
- Other debt securities in issue
- Financial liabilities at FVTPL
- Financial guarantees and irrevocable credit commitments

With regard to the classes, the balance sheet disclosures and profit contributions of the financial instruments, among other things, must be presented separately in accordance with IFRS 9 valuation categories. In the present consolidated financial statements, we have included these in the explanatory notes to the balance sheet and the income statement. The information required by IFRS 7 regarding risks in connection with financial instruments is also provided in the Risk Report within Management's Discussion and Analysis. Compliant with IFRS 7.36 (a), the maximum credit exposure is the same as the carrying amount of the risk-bearing financial instruments or, in the case of financial guarantees and credit commitments, the nominal amount disclosed in the Note "Fair values of financial instruments compliant with IFRS 7" for the guarantee/amount of the credit commitments not yet utilised.

IFRS 9 requires all financial instruments to be recognised in the balance sheet, classified in the given valuation or portfolio categories and measured in line with this classification. In addition, debt instruments must be allocated to a business model.

Financial assets and liabilities are initially recognised from the date on which the corporate group becomes a contractual party to the financial instrument in question. HVB Group normally recognises customary market purchases and sales of financial assets (known as regular way contracts) at the settlement date. Derivatives are recognised at the trading date.

Financial assets and liabilities are derecognised when either the contractual rights or obligations to pay have expired, e.g. through repayment, or all the opportunities and risks have essentially been transferred to third parties. HVB Group did not carry out any transactions in which all the opportunities and risks were essentially either transferred or retained. If the contractual rights to an asset or liability are transferred to third parties but the opportunities and risks are essentially retained, the assets or liabilities are not derecognised.

The regulations set forth in IFRS 9 on reclassification were observed. No reclassifications were carried out.

Financial assets and liabilities at fair value through profit or loss

The "at fair value through profit or loss" category is subdivided into the following categories:

- Financial assets and liabilities held for trading:

Financial assets and liabilities classified as held for trading at the time of initial recognition are financial instruments acquired or incurred for the purpose of short-term profit-taking as a result of changes in market prices or of realising a profit margin. This category also includes all derivatives (apart from hedging derivatives) which qualify for hedge accounting. These are disclosed in the item "Financial assets held for trading" and "Financial liabilities held for trading".

In accordance with the provisions of IAS 32 (IAS 32.42 in conjunction with IAS 32.48), the positive and negative fair values of OTC derivatives that offset each other at currency level were netted for OTC derivatives concluded with the same central counterparty (CCP).

- Assets subject to the requirement of measurement at fair value through profit or loss with the exception of held-for-trading portfolios: In accordance with the specifications, both shareholdings and assets that are neither allocated to the "Hold to maturity" nor to the "Held for sale" business model are generally subject to measurement at fair value through profit or loss. HVB Group did not exercise the option of measuring shareholdings at fair value without affecting profit or loss. As all assets measured at fair value through profit or loss are also managed on a fair value basis, any allocation of assets that do not meet cash flow criteria to the "Hold to maturity" business model is ruled out. These are to be allocated to the "Other" business model and are consequently subject to the requirement of measurement at fair value through profit or loss.
- HVB Group does not exercise the option to designate financial assets pursuant to IFRS 9.1.5 as measured at fair value through profit or loss: HVB Group only uses the fair value option for certain financial liabilities designated as "at fair value through profit or loss" upon initial recognition. Financial instruments are designated on the basis of the fair value-based management of the portfolios concerned.

Financial assets and liabilities at fair value through profit or loss are disclosed upon initial recognition at their fair value without any transaction costs.

Consequently, held-for-trading portfolios, assets subject to the requirement of measurement at fair value through profit or loss and liabilities allocated to the fair value option are measured at fair value. Changes in value are recognised in the income statement.

Assets measured at fair value without affecting profit or loss

Certain securities holdings that are either held to maturity or can be sold have been allocated to the "Held for sale" business model. As these securities also meet cash flow criteria, the conditions for measurement at fair value without affecting profit or loss have been met. These holdings are reported under the balance sheet item named "Financial assets at FVTOCI".

Loans and receivables measured at cost

In the lending business, HVB Group focuses on customer care and customer relationships so the intention is generally to hold extended loans to maturity. If, in exceptional cases, there is no intention to hold loan receivables to maturity at the time of their addition, these are allocated to the "Other" business model. Provided the loans also meet cash flow criteria, these are allocated to the "Hold-to-maturity" business model and measured at amortised cost. In addition, securities holdings that meet cash flow criteria and are intended to be held to maturity are also measured at amortised cost. Premiums and discounts are taken to the income statement under net interest over the term of the underlying items. This is done using the effective interest method. These assets are disclosed upon initial recognition at their fair value including any transaction costs.

As the intention is generally to hold to maturity, debt instruments allocated to the "Hold-to-maturity" business model may be sold only in the following exceptional cases:

- sales occur infrequently or irregularly even if they are of significant value in this case,
- sales, if they occur frequently, are individually or in the aggregate of insignificant value,
- sales occur just before the final maturity date and the sales proceeds equal the outstanding contractual payments for the most part or
- sales are made as a result of an increase in the credit default risk.

Depending on the allocation of the debtor, the loans and receivables measured at cost are reported under the balance sheet item "Loans and receivables with banks (at cost)" or "Loans and receivables with customers (at cost)".

HVB Group did not exercise the option of designating an asset to be measured at fair value through profit or loss. The Bank also waived measuring credit exposures at fair value through profit or loss.

Determination of fair value

We can normally reliably determine the fair value of financial instruments measured at fair value. IFRS 13 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction (no forced liquidation or distress sale) between market participants at the measurement date. Thus, the fair value based on a notional transfer corresponds to a selling or, in the case of a liability, the transfer price (exit price).

The fair value is determined using the same three-level fair value hierarchy under IFRS 13 as is applicable for the disclosures regarding the fair value hierarchy (Note "Fair value hierarchy"):

- Level 1: Financial instruments measured using (unadjusted) quoted prices in active markets for identical assets or liabilities that the entity can access at the measurement date
- Level 2: Assets or liabilities for which no price can be observed on an active market and whose valuation is derived from directly observable (prices) or indirectly observable (derived from prices) valuation parameters
- Level 3: Assets or liabilities for which the fair value cannot be measured exclusively on the basis of observable market data; but also on valuation parameters based on model assumptions (non-observable valuation parameters)

Suitable adjustments are applied to the fair value determined in this way in order to reflect further factors affecting the fair value (such as the liquidity of the financial instrument or model risks when the fair value is determined using a valuation model). When determining these valuation adjustments, we have exercised the option permitted by IFRS 13 under certain circumstances to determine fair value on a portfolio basis.

The risk of a counterparty defaulting on derivatives is covered by credit valuation adjustments (CVAs). Funding valuation adjustments (FVAs) are also set up for derivatives that are not fully covered by relevant collateral.

The own credit spread is also included in the underlying valuation parameters for liabilities held for sale and liabilities designated at fair value through profit or loss.

Further disclosures regarding fair values and the fair value hierarchy are given in the Note "Fair value hierarchy", and the Note "Fair values of financial instruments compliant with IFRS 7".

Financial guarantees

A financial guarantee is a contract that requires the issuer to reimburse the holder for a loss it incurs because a specific debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

Viewed overall, the fair value of a financial guarantee is zero when the contract is concluded because the value of the premium received will normally match the value of the guarantee obligation in standard market contracts. The guarantee premium is recognised on a pro-rata basis. The existence of an impairment is checked during the subsequent measurement.

Credit derivatives, and most notably standardised credit default swaps (CDS), are measured at fair value through profit or loss as they are considered derivatives held for trading and not financial guarantees.

Credit commitments

Credit commitments represent declarations made to the customer to extend loans, buy securities or provide guarantees and acceptances. If these have not yet been utilised, they are generally shown as contingent liabilities in the notes. Necessary impairments are recorded as provisions. An exception to this are credit commitments where the assets resulting from the drawdown are usually sold shortly after the loan has been extended. The latter are recognised at fair value through profit or loss.

Hedge accounting

The Bank exercised the option of continuing to apply the provisions of IAS 39 on Hedge Accounting.

Hedges between financial instruments are recognised almost exclusively in accordance with the forms of the fair value hedge described in IAS 39. In 2008 and 2009, HVB Group changed the previously applied macro cash flow hedge accounting to the fair value hedge similarly permitted by IAS 39 for interest rate risk at portfolio level in large areas of asset/liability interest rate risk management. This is described additionally below alongside the principles covering general fair value hedges.

Besides the portfolio fair value hedge, HVB Group has other micro fair value hedges for individual financial instruments as well as a cash flow hedge in which HVB Group designated a smaller portfolio of securities as a cash flow hedge in 2018. Furthermore, the amortisation of the cash flow hedge reserve for two cash flow hedges, which have since been terminated, will be carried out.

A micro fair value hedge is generally a hedge of the exposure to changes in the fair value of a recognised asset, liability or an unrecognised firm commitment – or an identified portion thereof – that is attributable to a particular risk and that might affect net income for the period. In this respect, a high level of effectiveness is required, with the changes in the fair value of the hedged item with regard to the hedged risk and hedging derivative compensating each other within a range of 80% to 125%. Under this method, the hedging instrument is measured at fair value through profit or loss. The carrying amounts of the hedged item are adjusted by the valuation results relating to the hedged risk in a way that affects the income statement.

At our Bank, we designated micro fair value hedges for interest rate risks. For fixed-interest European government bonds or bonds of issuers with a similar risk allocated to the "Held for sale" business model, the interest rate risk of which was hedged individually and completely with interest rate swaps, we set up a separate micro fair value hedge for each transaction.

We apply the fair value hedge accounting for a portfolio hedge of interest rate risk for the accounting treatment of interest rate risk in asset/liability interest rate risk management. Recognising a fair value hedge for a portfolio of interest-bearing financial assets and liabilities using interest rate derivatives makes it possible to largely reflect the standard bank risk management procedures for the hedging of fixed interest rate risks in the accounts.

Under this accounting treatment of hedges across several items, the changes in the value of the hedged amount of the hedged items attributable to the hedged risk are carried altogether as a separate asset or liability item and not as an adjustment to the carrying amount of individual items as is the case with micro hedges. The hedged amount of the hedged items is determined as part of interest rate risk management and cannot be directly allocated to individual assets or liabilities. Where the hedge conditions are met, the offsetting changes in value of the hedged amount of the hedged items and the hedging instruments (interest derivatives) are recognised directly in profit and loss. Hedge inefficiencies arising within the necessary hedge efficiency thresholds of 80% to 125% are recognised as profit or loss in net hedging income.

Furthermore, for economic reasons cross-currency interest rate swaps (CCIRS) have been used in the refinancing of loans denominated in foreign currency. The CCIRS exchange longer dated fixed-interest positions denominated in euros for variable-yield positions denominated in foreign currency. This serves to hedge the hedged item against interest rate risk as part of the fair value hedge portfolio accordingly.

The cash flow hedge reserve existing at the changeover date and the offsetting clean fair values (fair values excluding the related accrued interest) of the existing cash flow hedge derivatives are amortised over the remaining term in net interest. This means that the amortisation of the cash flow hedge reserve existing at the changeover date will have no overall impact on profit or loss in the future until they are fully amortised. The changes in value of the same hedged items and hedging derivatives, together with all new contracts arising after the changeover date, are treated in accordance with the new fair value hedge portfolio model.

Generally, a cash flow hedge is employed to hedge the risk arising from volatile cash flows resulting from a recognised asset, recognised liability or planned transaction to be taken to the income statement. For example, derivatives are deployed in cash flow hedge accounting to hedge future streams of interest payments. In this context, payments arising from variable-interest assets and liabilities are swapped for fixed payments primarily using interest rate swaps. Hedging instruments are measured at fair value. The valuation result is divided into an effective and an ineffective portion. The effective portion of the hedging instruments is recognised in a separate item within shareholders' equity (hedge reserve) without affecting reported profit or loss. The ineffective portion of the hedging derivatives is recognised directly in profit and loss. The hedged item is recognised at amortised cost.

HVB Group reported the hedging of the planned borrowing in advance through a forward interest rate swap in the form of a micro cash flow hedge for future transactions within the framework of the participation of our subsidiary at the time UniCredit Luxembourg S.A. in the TLTRO I and II of the European Central Bank (ECB). Upon receiving the borrowed funds from the ECB, this hedge was terminated. The cash flow hedge reserve existing on termination of the hedge and the offsetting equally high fair value of the interest rate swap are reversed periodically over the term of the hedged borrowings in the income statement. The borrowings effected and the interest rate swaps were included in the general portfolio fair value hedge for interest rate risks.

9 Financial assets held for trading

This item includes securities held for trading purposes and positive fair values of traded derivatives. All other derivatives not classified as hedging derivatives (which are shown separately in the balance sheet) are similarly considered held for trading. Provided they are held for trading purposes, promissory notes, registered bonds and treasury bills are carried as other financial assets held for trading.

Financial assets held for trading purposes are carried at fair value. Gains and losses arising from the valuation and realisation of financial assets held for trading are taken to the income statement as gains less losses arising from trading securities.

With interest rate swaps, the two offsetting streams of interest payments are aggregated for each swap contract and reported in net terms as interest income or interest expense. In the case of pure derivatives trading portfolios, we report the netted interest payments under net trading income.

10 Financial assets at FVTPL

The item "Financial assets at FVTPL" is shown for the first time in the 2018 financial year in order to reflect the new measurement category introduced by IFRS 9 and contains all the assets subject to the IFRS requirement of measurement at fair value with the exception of the held-for-trading portfolios. This item thus contains all the debt instruments subject to measurement at fair value through profit or loss based on the "Other" business model as well as the shareholdings also subject to measurement at fair value through profit or loss. This includes debt instruments to be held to maturity that do not meet cash flow criteria and are thus managed on a fair value basis in line with the Bank's specifications.

The majority of debt instruments are hedged against interest rate risks with interest rate swaps. The changes in fair value of the assets and hedging derivatives are reported in the item "Net gains/losses on financial assets and liabilities at fair value" in the income statement. Current interest income from debt instruments is recorded as interest income and profit distributions from shareholdings in the item "Dividends and other income from equity investments".

11 Financial assets at FVTOCI

The balance sheet item "Financial assets at FVTOCI" is shown for the first time in the 2018 financial year in order to reflect the new measurement category introduced by IFRS 9. It contains all the assets measured at fair value through other comprehensive income on the basis of the "Held for sale" business model and the fulfilled cash flow criteria.

This item only contains interest-bearing assets that are deferred at the effective interest rate. Upon addition, they are posted at their fair value including transaction costs (acquisition cost). Current interest income is recorded under the item "Interest income" in the income statement. Impairments are recorded through profit or loss in the income statement. The difference between the amortised cost calculated in this way and the fair value of the assets is entered directly in equity in the FVTOCI reserve, whereby the changes are recognised or derecognised through other comprehensive income. A gain or loss on disposal (repayment/sale) is shown under the item "Net gains/losses on financial assets and liabilities at fair value".

12 Loans and receivables

Debt instruments allocated to the "Hold to maturity" business model are shown under the balance sheet item "Loans and receivables with banks (at cost)" and "Loans and receivables with customers (at cost)". Assets allocated to a business model other than to the "Hold to maturity" business model are not included in the balance sheet items "Loans and receivables with banks (at cost)" and "Loans and receivables with customers (at cost)". In addition to loans and receivables from the lending business, these include securities allocated to the "Hold to maturity" business model. All the instruments allocated to the "Hold to maturity" business model are not included in the balance sheet items "Loans and receivables with banks (at cost)" and "Loans and receivables with customers (at cost)". In addition to loans and receivables from the lending business, these include securities allocated to the "Hold to maturity" business model. All the instruments allocated to the "Hold to maturity" business model meet the cash flow criteria and are carried at amortised cost, provided they are not hedged items of a recognised fair value hedge. The amount shown in the balance sheet has been adjusted for allowances for losses on loans and receivables.

13 Impairment of financial assets

Upon the introduction of IFRS 9, the method used to determine impairment losses was switched to the Expected Loss model. According to the criteria of IFRS 9, impairment losses have to be recognised for debt instruments that are measured at amortised cost or, alternatively, at fair value through equity. Furthermore, the rules applicable for determining an impairment are also to be applied to loan commitments or financial guarantee contracts that are not measured at fair value through profit or loss.

For the presentation of the measurement and management of credit risk, we refer to the statements made on credit risk in the Risk Report of this Management's Discussion and Analysis.

In the case of loans and receivables measured at cost, the impairment losses determined are posted to an impairment account and reduce the carrying amount; in the case of assets measured at fair value through equity, the impairment losses are determined in relation to the asset and, as a consequence of measurement at fair value, are recognised in the statement of total comprehensive income, whereas a provision is recognised for impairment losses on loan commitments and financial guarantee contracts.

HVB Group has not exercised the option of using the simplified approach pursuant to IFRS 9.5.5.15 for determining impairment losses on trade receivables, contract assets and lease receivables.

The method of calculating impairment losses is based on two pillars:

- the allocation of the asset to a stage
- the calculation of the expected loss associated with the asset.

In the process of determining the expected credit losses, not only reliable information on past events is taken into account but also the current conditions and forecasts of future economic parameters. The supervisory procedures for the determination of the probability of default (PD), loss given default (LGD) and exposure at default (EAD) represent the starting point in this connection. These are then adjusted to meet IFRS 9 requirements. The main adjustments are as follows:

- Conservative elements, which are owed purely to regulatory requirements, were removed.
- Parameters were adjusted in order to move from a regulatory calculation based on long-term averages ("through the cycle") to a more cut-off date approach ("point-in-time") which takes greater account of the current macroeconomic situation.
- In addition, forward-looking information on the macroeconomic development is taken into account in the parameters.
- The credit risk parameters were adjusted to the required multi-year horizon in Stage 2.

The following adjustments were made to the individual parameters:

- To determine a multi-year probability of default, which covers the lifetime of a financial instrument, PD curves based on long-term averages and calculated based on the default rates of the corresponding portfolios are determined as a first step. These PD curves are then adjusted to a more reference-date perspective using statistical methods and adjustments are made to integrate macroeconomic forecasts over the next three years.
- To calculate a multi-year probability of loss, the LGD used for regulatory purposes are adjusted for conservative elements, which are purely owing to regulatory requirements. Furthermore, a check is conducted to determine whether it is necessary to adjust the figures calculated based on long-term averages to current conditions and, where required, they are adjusted. In addition, the recovery rate is adjusted for the next three years on the basis of a macroeconomic forecast. For material collateral, macroeconomic forecasts are included in the market value forecast. Downturn adjustments required for regulatory purposes are not used. Nor are any internal costs of the Bank added to the loss ratio in the course of treating defaulting exposures.
- To determine the multi-year exposure at default (EAD), the parameters used by the regulatory authorities are adjusted for conservative elements arising purely from regulatory requirements. A parameter used from a regulatory perspective which covers drawdowns in excess of the existing credit line is not used under IFRS 9. An additional parameter was also introduced which reflects the expectations on average drawdowns of existing lines from the second year. Furthermore, a parameter representing an expected term for loans without a fixed term is modelled which determines the term over which an expected loss is calculated in Stage 2. For loans with existing repayment schedules, expected repayments are taken into account in determining the multi-year EAD.

The process for incorporating macroeconomic scenarios into estimates is consistent with other forecasting processes in risk management (e.g. as part of the EBA stress tests and the ICAAP framework) and benefits from UniCredit's independent research department.

Three macroeconomic developments to be expected in the future are identified. In addition to the probable scenario (baseline), a positive scenario and an adverse scenario are also estimated. The baseline scenario represents the central scenario and is considered to be the most likely to occur. The positive and the adverse scenarios represent other possible occurrences, each depicting better or worse economic developments in the countries relevant for the Bank compared to the baseline scenario. The individual scenarios are assigned probabilities of occurrence.

- The baseline scenario reflects the developments anticipated by HVB Group. It predicts continued positive economic growth albeit below the growth potential. The primary reason for this is the anticipated weakness in global trade, which will intensify in the second half of 2020, triggered mainly by a projected decline in the US economy. These challenging external conditions will put the resilience of the domestic factors influencing growth in the eurozone to the test. The monetary policy of the ECB is expected to be slightly expansive, but without any relevant influence on growth expected. In detail, annual real growth in eurozone GDP of 0.8% for 2020, 1.0% for 2021 and 1.5% for 2022 is forecast (for Germany up 0.7%, up 0.8% and up 1.8%). This scenario implies that the 3-month Euribor will remain slightly negative.
- The positive scenario is based on the hypothesis that growth in the gross domestic product at the European level in 2020 will remain stable for the most part and will rebound in 2021–2022. The key difference between this and the baseline scenario is that no slowing of the US economy is expected and thus no pressure on global trade. The monetary policy of the ECB normalises in this scenario which is reflected in an increasing deposit rate, for instance. In detail the annual real growth in GDP for the eurozone would be 1.1% in 2020, increasing to 1.6% in 2021 and 1.7% for 2022 (for Germany up 1.0%, up 1.4% and up 2.0% in 2022). This scenario implies that the 3-month Euribor will remain slightly negative. The occurrence of such a scenario should be deemed plausible and suitable at the time this scenario was defined in order to quantify an economic trend that is better than the one assumed in the baseline scenario.
- The adverse scenario reflects one of the scenarios that is used in the evaluation process for capital adequacy (ICAAP). In compliance with the ICAAP framework, the scenario has been chosen in such a way that it represents the macroeconomic and financial risks that HVB Group sees as being most relevant. In this respect, the focus is placed on countries in which the Group operates and on the business operations of HVB Group. The "widespread contagion" scenario is built on the hypothesis of intensifying political risks in the European Union caused by the burgeoning influence of populist parties in Italy, Germany and France in conjunction with, among other things, a broadening of the tensions between the Spanish government and the region of Catalonia. This context would lead to a rise in the risk premiums for various investment classes and a slowing in the economic growth both in the eurozone (in comparison to the baseline scenario, a cumulative 3.8 percentage points lower for the real growth in gross domestic product in the three-year horizon). In detail, the annual real growth of the gross domestic product in the eurozone would stand at minus 0.6% in 2020, minus 0.6% in 2021 and up 0.7% in 2022 (for Germany at minus 0.2% in 2020, minus 0.2% in 2021 and up 1.3% in 2022). In this context, it is assumed that short-term interest rates (3-month Euribor) will remain negative over the entire three-year horizon, based on the hypothesis that the ECB would prolong liquidity support for the market in such a market environment. The occurrence of such a scenario is deemed plausible and suitable at the time it was defined in order to quantify adverse economic developments. In line with the scenario and the extent of the deviation from the baseline scenario, the assumption made is that the adverse scenario is less likely than the positive scenario.

Models from the Group's central stress test area are used to adjust the "probability of default" and "loss ratio" parameters in order to calculate the expected loss. These model the relationship between macroeconomic development and the resulting development of PDs and LGDs. The parameters are adjusted on the basis of the baseline scenario by the respective differences determined for the three forecast years.

Moreover, the expected loss is adjusted with a factor that compensates for the partial non-linearity that might be included in the correlation between macroeconomic changes and the change in the expected loss. This means that an adjustment factor is calculated from the three scenarios, taking account of their weighting, which is applied directly to the expected loss.

The HVB Group units responsible for the restructuring or workout of non-performing exposures determine the future incoming payments for non-performing exposures which are significant in terms of amount based on the circumstances in each case. Consequently, specific allowances are recognised for these exposures while a collective allowance is recognised on a parameter basis for non-performing exposures which are insignificant in terms of amount in line with the method used in determining the expected credit losses.

The following applies to the allocation to stages:

- Stage 1 contains newly issued credit balances, financial instruments for which there has been no significant deterioration in the creditworthiness since they were first issued and securities with a low credit risk (low credit risk exemption).
- Stage 2 contains financial instrument which, although not yet in default, have undergone a significant deterioration in terms of their creditworthiness since they were first issued.
- Stage 3 contains financial instruments in default.

An impairment loss is generally recognised at the amount of the expected 12-month credit loss for a financial instrument upon initial recognition (Stage 1). Financial assets already impaired upon initial recognition are an exception to this rule as, in these cases, the expected credit losses have already been taken into account in the fair value at which such an asset is posted.

If the credit default risk has increased significantly since initial recognition, an impairment loss must be recognised in the amount of the (residual) loss expected over the term to maturity (Stage 2). HVB Group uses an internal model to determine when a significant increase in the credit default risk has occurred. Key factors in this context are:

- a comparison of PD upon initial recognition and at the reporting date at the level of each individual transaction whereby trigger levels to be exceeded for a significant increase are defined that take account of material elements for determining an expected change in the credit default risk such as maturity, age, PD level upon initial recognition,
- absolute thresholds like the "backstops" required by the standard, such as arrears of 30 days or more,
- further internal attributes such as renegotiations of financial instruments on account of financial difficulties (forbearance measure).
- If the credit default risk is no longer significantly higher on the reporting date, the asset is transferred back to Stage 1.

A statistical model for quantile regression was introduced to implement the quantitative component for the allocation to a stage. This defines a threshold that determines the maximum change between the probability of default upon addition of the financial instrument and the current reference date. An important part of this model is defining the quantile that determines the expectation concerning the share of instruments in Stage 2 in long-term funds. As the consideration of individual influencing factors differs (such as rating upon issuance, age), the quantiles also vary depending on the portfolio. Essentially, the historical default rate of the portfolio concerned is used as a basis to determine the quantile and is supported by further absolute Stage allocation criteria, such as the share of instruments with 30 days default.

The actual share of financial instruments in Stage 2 varies by the long-term average of the quantile, depending on the current macroeconomic situation and expectations of developments in the economic cycle.

HVB Group has exercised the option for securities pursuant to IFRS 9.5.5.10 according to which it can be assumed in the case of debt instruments with a low credit default risk that no significant increase in the credit default risk has occurred. Securities of this kind with an investment grade rating are generally allocated to Stage 1.

If the borrower of a debt instrument has defaulted, such credit impaired assets are allocated to Stage 3. For these assets, interest income is recognised only in the amount of the interest on the basis of the net carrying amount. As in the past, default is when a material liability of the borrower is overdue by more than 90 days or HVB Group believes the borrower is unable to meet his payment obligations in full without steps to realise collateral being taken. This presupposes that there is objective evidence that the financial asset is impaired. Objective evidence of impairment refers to events that normally lead to an actual impairment. In the case of debt instruments, these are events that could result in the borrower not being able to settle his obligations in full or at the agreed date. Objective evidence is provided only by events that have already occurred, not by events expected in the future. The assessment of the borrower's creditworthiness using internal rating processes is applicable. This assessment is reviewed periodically and when negative events occur. If the borrower is 90 days in arrears this is considered objective evidence of an impairment, similarly leading promptly to a review of the borrower's individual rating on account of the occurrence of a negative event involving the borrower. Based on internal procedures, the classification of the borrower is updated to "in default". As a result, the assessment of the borrower's creditworthiness is always assessed with regard to his ability to meet outstanding liabilities.

At Stage 3, the impairment is calculated as the difference between the carrying amount and the present value of the expected future cash flow. These figures are estimated by HVB Group and discounted using the corresponding interest rate. In doing so, different, realistic scenarios are estimated whereby the impairment loss is obtained from the expected value of the credit defaults weighted by the probability of occurrence for each scenario. The impairment loss calculated in this way likewise corresponds to the expected credit losses for the debt instrument but, deviating from Stage 1 and Stage 2, the probability of default is no longer taken into account as default has already occurred.

As the debt instrument is in default, it is put on a non-accrual basis, i.e. the contractual interest payments are no longer recognised in the income statement. Instead the interest income is determined on the basis of the net carrying value. For this purpose, the net carrying amount from the previous period is compounded at the original interest rate of the debt instrument over the reporting period and the impairment loss, which is calculated as the difference between the present value of the expected cash flow (net carrying amount) and the gross carrying amount, is recognised in interest income at the compounded amount through profit or loss. Furthermore, the amounts put on a non-accrual basis are recorded both in the gross carrying amount and in the impairment losses without affecting income. As, in doing so, the gross carrying amount and the impairment losses are increased by the same amount, the net carrying value does not change.

As soon as the reasons for the default no longer apply, the assets are transferred back to Stage 1 or 2, respectively, depending on whether the credit default risk is still significantly higher or not in comparison to when the assets were first acquired.

In the case of financial guarantees and irrevocable credit commitments made to a borrower in default, a possible impairment is determined in the same way; the impairment loss is recognised as a provision.

If a receivable is considered uncollectible, the amount concerned is written off, which leads to the receivable being derecognised. The amount is derecognised if the receivable in question is due, any available collateral has been realised and further attempts to collect the receivable have failed. Acute country-specific transfer risks are taken into account in the process.

For financial assets that were already in default upon initial recognition (purchased or originated credit impaired assets – POCI), the interest income is likewise recognised only at the amount of interest based on the net carrying amount. Only those new additions are recognised as POCI assets that result in more than only an insignificant increase in the existing exposure, i.e. exceed 20% of the existing net exposure (exposure after deduction of recoverable collateral). Credit losses expected upon initial recognition are already taken into consideration in the fair value when posting assets so that no impairment is recorded for POCI assets upon initial recognition. With regard to subsequent measurement, these assets are measured on the basis of the loss anticipated over the (residual) term to maturity; in the case of higher expected additions than assumed upon initial recognition, however, the assets can be written up to amounts in excess of the acquisition cost.

Modification of financial assets measured at amortised cost

If the contractual terms of financial assets are modified, it is necessary to review whether such modifications are significant or insignificant. Whereas significant modifications result in the derecognition of the existing asset and the posting of a new, significantly modified asset, in the case of insignificant modifications, only the agreed modifications to the contractual cash flows are discounted and the difference between the present value of the modified contractual payments determined in this way and the carrying amount (present value of the contractual payments before modification) are recognised through profit or loss.

A significant modification to the contractual terms has occurred where compliance with cash flow conditions has changed or where conditions have been adjusted to general market terms without this adjustment being seen as a concession made to the borrower based on the borrower's credit rating. In such cases, the existing loan is derecognised and the modified loan posted as a newly extended loan.

In addition, lending agreements can be modified to ease the burden on borrowers in poor financial situations and improve the probability of the loans being serviced (forbearance). Various strategies may be used to ease the burden on the borrower. Possible measures include deferrals and temporary moratoriums, longer periods allowed for repayment, reduced interest rates and rescheduling, and even debt forgiveness.

Where the Bank waives payments by the borrower (such as waived fees, reduction of contractual interest rates, etc.) due to a deterioration in creditworthiness, such a waiver represents objective evidence of the borrower defaulting. The derecognition of payments due or of future repayments caused by an issued waiver is recognised in the income statement as an impairment, provided an allowance had not already been set up for this in the past or recognition was waived on account of the borrower defaulting (such as putting a loan on an internal non-accrual basis).

If the modification of the agreement does not give rise to derecognition of the receivable or part of the receivable on account of the waiver of payments due or of future repayments but merely to an adjustment of future cash flows, for example through a prospective reduction in the interest rate as of the date of the modification, the gross carrying amount has to be adjusted accordingly. For this purpose, the newly agreed cash flows have to be discounted at the original effective interest rate and this present value deducted from the gross carrying amount (prior to the modification to the agreement). The difference determined in this way is recorded as modification gain or loss through the income statement. As this primarily affects non-performing, impaired receivables, the modification gain or loss is reported under the income statement item "Credit impairment losses IFRS 9".

14 Investments in associates and joint ventures accounted for using the equity method

Investments in joint ventures and associates are accounted for using the equity method.

15 Property, plant and equipment

In the reporting year as in previous years, property, plant and equipment is valued at acquisition or production cost less depreciation – insofar as the assets are depreciable – which is reduced by scheduled straight-line depreciation based on the assets' useful lives. For the wind farm, the residual carrying amount is distributed over the expected residual useful life based on the prorated consumption of value of the economic benefit potential. The wind farm was classified as "Non-current assets or disposal groups held for sale" as of 30 June 2019 and sold shortly before the end of 2019. Fixtures in rented buildings are depreciated over the term of the rental contract, taking into account any extension options, if this is shorter than the normal useful life of the asset concerned.

PROPERTY, PLANT AND EQUIPMENT	ECONOMIC LIFE
Buildings	25–60 years
Fixtures in buildings not owned	10–25 years
Plant and office equipment	3–25 years
Other property, plant and equipment	
Wind farm	28 years
Other property, plant and equipment	10–20 years

The estimated useful lives of property, plant and equipment are reviewed once a year and adjusted as appropriate should the expectations differ from earlier estimates.

Unscheduled impairments are taken in accordance with IAS 36 on property, plant and equipment whose value is impaired. An asset is considered impaired when its carrying amount exceeds its recoverable amount. The recoverable amount is normally determined on the basis of the value in use. Should the reasons for the unscheduled impairment no longer apply, a subsequent write-up is taken to the income statement; the amount of this subsequent write-up must not increase the value of the property, plant and equipment to a level in excess of the amountised acquisition or production cost.

Scheduled and unscheduled depreciation and write-ups on items of property, plant and equipment are recognised in the consolidated income statement under amortisation, depreciation and impairment losses on intangible and tangible assets within operating costs.

Subsequent expenditure relating to an item of property, plant and equipment is capitalised, provided additional future economic benefits will flow to the Bank. Expenditure on repairs or maintenance of property, plant and equipment is recognised as expense in the year in which it is incurred.

Government grants for items of property, plant and equipment (IAS 20.24) are deducted from the acquisition or production cost of the underlying assets on the assets side of the balance sheet.

With effect from 31 December 2019, the accounting method for land and buildings occupied by the bank was changed from the previous measurement at cost to the revaluation model in accordance with IAS 16.31. Details on the adjustment of the accounting method are described in the note "Consistency". Compliant with the specifications contained in IAS 8.17, the change in method is prospective. Consequently, the owner-occupied land and buildings were measured at amortised cost for the period up to and including 31 December 2019. Based on the carrying amounts thus determined, a revaluation was carried out, with effect from 31 December 2019, which involved a separation of assets into buildings and land, which are then separately measured.

If the fair value of the land or building exceeded the previous carrying amount, the increase in value was recognised in other comprehensive income and the newly created revaluation reserve allocated to shareholders' equity. If the fair value of the land or building was below the previous carrying amount, the decrease in value was recognised in consolidated profit and loss under the item "Amortisation, depreciation and impairment losses on intangible and tangible assets".

16 Lease operations

As described in the Note "Initial adoption of the new IFRS accounting rules", HVB Group has applied the new leasing standard IFRS 16 in accordance with the transitional provisions under the modified retrospective approach and has therefore not adjusted the comparative information. This means that the previous-year figures will continue to be reported in accordance with the accounting and valuation principles applicable prior to 1 January 2019, based on the previous leasing standard IAS 17 including the associated interpretations. Consequently, the material accounting policies for the prior periods are also disclosed separately.

Accounting and valuation applied from 1 January 2019 (IFRS 16)

For new agreements concluded on or after 1 January 2019, HVG Group assesses at the inception of the agreement whether the agreement constitutes or contains a lease. This is the case when the agreement gives the right to control the use of an identified asset for a specified period of time in return for a fee. HVB Group assesses whether the definition of a lease and the related guidelines in IFRS 16 are met primarily on the basis of the following criteria:

- the agreement contains an identified asset which is either explicitly specified in the agreement or implicitly specified by the fact that the asset is
 made available for use by HVB Group at a certain point in time;
- HVB Group is essentially entitled to derive all the economic benefits associated with the use of the identified asset throughout the period of use, taking into account the rights set out in the agreement;
- HVB Group is entitled to decide on the use of the identified asset throughout the period of use. This is particularly the case if HVB Group has the right to determine how and for what purpose the asset is used.

Furthermore, it is only necessary to reassess whether an agreement constitutes or contains a lease if the terms of the agreement change.

HVB Group as lessee

In the case of agreements which constitute or contain a lease, HVB Group as the lessee generally recognises as a lease each lease component separately from the non-lease components of the agreement. In doing so, the contractually agreed consideration is allocated to the individual contractual components on the basis of the relative individual selling prices. HVB Group does not make use of the practical facilitation option, according to which a lessee can decide for individual classes of underlying assets not to separate the non-lease components and instead to account for lease and non-lease components as a single lease component.

As of 1 January 2019, leases will be accounted for by the lessee using a uniform accounting model (right of use approach); the previous classification of lease agreements under lessees as operating and finance leases was abolished upon the introduction of IFRS 16. Under the new model, HVB Group as the lessee generally recognises an asset for the right granted to use the underlying leased asset and a corresponding lease liability for the obligation to make the outstanding lease payments at the commencement date of the lease.

However, IFRS 16 provides lessees with the option of exempting short-term lease agreements with a term of up to 12 months and leases of low-value assets from recognition. HVB Group has elected to apply the simplified presentation option to all such leases and recognises the related lease payments on a straight-line basis over the term of the lease as an expense in the consolidated income statement. Leases which had a residual term of up to 12 months at the time of the first-time adoption of IFRS 16 are shown together with the short-term leases.

The right-of-use assets recognised in the consolidated balance sheet are initially measured at cost. Such cost includes the present value of all future lease payments (the amount resulting from the initial measurement of the lease liability), plus payments made on or before the commencement date of the lease, initial direct costs and estimated costs of dismantling or restoring the underlying asset or the site where it is located (to the extent that such dismantling costs give rise to an obligation that is recognised and measured in accordance with IAS 37) less any lease incentives received.

The right-of-use assets reported under property, plant and equipment are subsequently measured using the cost model. In accordance with the depreciation rules of IAS 16, the right-of-use assets are amortised on a straight-line basis over the shorter of the two useful life periods of the underlying asset and the term of the lease. If the lease payments to be taken into account also include the transfer of ownership of the leased asset at the end of the lease term, or if the cost of the right-of-use asset takes into account the fact that the lessee will exercise a purchase option, the write-downs of the right-of-use asset are made over the economic life of the underlying asset. Otherwise, the right-of-use asset is amortised over the term of the lease. Existing term and call options are taken into account if their exercise is deemed sufficiently certain. In addition, the right-of-use asset is continually tested for impairment in accordance with IAS 36, adjusted if necessary and adjusted for certain remeasurements of the lease liability. While HVB Group will in future value its land and buildings reported under property, plant and equipment in accordance with the revaluation model of IAS 16, it has decided not to apply this valuation model to the right-of-use assets relating to these investment classes.

In contrast, the fair value model is applied to right-of-use assets that meet the definition of investment properties in IAS 40 and are reported under investment properties, as this model is now also used for the subsequent measurement of investment properties in HVB Group. Consequently, HVB Group measures the right-of-use asset it has to an investment property at fair value and not at the underlying value of the asset.

The initial measurement of the lease liability is based on the present value of the lease payments not yet made on the commencement date. Lease payments comprise fixed payments (including de facto fixed payments) variable lease payments linked to an index or (interest) rate applicable on the commencement date), the amounts expected to be paid under a residual value guarantee and the exercise price of a purchase option if the lessee is reasonably certain to exercise it. Penalties for premature termination of the lease are only included in the lease payments if the lessee is reasonably certain to terminate the lease prematurely. All lease incentives expected to be received are deducted from this.

Lease payments are discounted at the interest rate underlying the lease (interest rate implicit in the lease) if it can be readily determined. Otherwise they are discounted at the lessee's incremental borrowing rate. The latter is the interest rate that a lessee would have to pay to raise funds in a similar economic environment in order to obtain an asset of similar value at comparable conditions. In order to determine the incremental borrowing rate, HVB Group uses a fixed interest rate curve based on a swap rate (base rate) and the Bank's funding premium, which reflects the nature of the lease obligations. According to this method, the lease payments not yet made are discounted to the present value at current interest rates taking into account the internally determined funding premiums. The funding premiums correspond to the parameters that the Bank uses when setting the prices for its own borrowings. As a rule, we apply the incremental borrowing rate for discounting because the interest rate implicit in the lease is generally not available to us.

Variable lease payments that are not linked to an index or (interest) rate and are therefore not taken into account in the measurement of the lease liability are recognised by lessees as an expense in the period in which they arise.

In the course of the subsequent measurement, the lease liability is updated using the effective interest method from accounting mathematics. The carrying amount of the lease liability is compounded and reduced by the amount of the lease payments made with no effect on income.

The lease liability is remeasured if future lease payments change due to a change in the index or (interest) rate, if the estimate of the expected payments under a residual value guarantee is adjusted, if the estimate of the exercise of a purchase, extension or termination option changes or if the de facto fixed lease payment changes. Accordingly, the right-of-use asset is to be adjusted by the amount resulting from the revaluation of the lease liability. If the reduction in the lease liability exceeds the carrying amount of the right-of-use asset, the resulting residual amount (difference between amount of the reduction in the lease liability and the carrying amount of the right-of-use asset) is recognised in profit or loss.

Disclosure in the consolidated financial statements of HVG Group is as follows:

- In the consolidated balance sheet we report right-of-use assets that do not meet the definition of investment property under property, plant and equipment. In contrast, right-of-use assets that meet this definition are presented in the balance sheet as investment properties. Lease liabilities are presented in the balance-sheet item "Deposits from customers" or "Deposits from banks".
- In the consolidated income statement, scheduled and unscheduled amortisation and write-downs, as well as write-ups on the right-of-use assets contained in property, plant and equipment are generally recognised in the item "Amortisation, depreciation and impairment losses on intangible and tangible assets" within operating costs. A gain or loss arising from a change in the fair value of rights to use investment properties is recognised directly in the income statement in the item "Net other expenses/income". The accrued interest on the lease liabilities contained in the deposits from customers and deposits from banks is recognised under interest expense. Expenses in connection with short-term lease agreements, leases based on a low-value assets and variable lease payments not taken into account in the measurement of the lease liabilities are recognised in the item "Other administrative expenses".

HVB Group acts as seller/lessee in sale-and-leaseback transactions in which it sells assets (properties) to another company (buyer/lessor) which it then leases back from that company. The provisions of IFRS 15 are applied in determining whether the transfer of the assets is to be accounted for as a sale. If the transfer of the asset as a result of the transfer of control constitutes a sale, the seller/lessor must recognise the right-of-use asset relating to the leaseback at that portion of the former carrying amount relating to the right-of-use asset retained by it. Accordingly, any gain or loss on the transaction is recognised only to the extent that it relates to the rights transferred to the buyer/lessor. The pro rata unrealised gain on the sale resulting from the adjustment of the initial measurement of the right-of-use asset is subsequently recognised as a reduction of the ongoing write-downs of the right-of-use asset over the term of the leaseback.

If the transaction is not carried out at fair value or at standard market conditions but, for example, a purchase price premium is compensated by higher lease payments, the differences are considered to be financing transactions. Accordingly, the acquisition cost of the right-of-use asset is reduced by these financing components in order to recognise the right-of-use asset and the income from the sale of the asset. However, if the transfer of the assets does not constitute a sale because control is not transferred, the transaction is presented in the balance sheet of the seller/lessee as a financing transaction. The seller/lessee continues to recognise the transferred assets and recognises the financial liability in the amount of the income from the transfer in accordance with IFRS 9.

HVB Group as lessor

In the case of agreements that constitute or contain a lease, HVB Group as a lessor reports as a lease each lease component separately from the nonlease components of the agreement and applies the respective regulations of IFRS 15 to the distribution of the contractually agreed compensation between the individual components.

Leases in which HVB Group appears as the lessor are classified as either finance or operating leases on commencement of the lease. If the terms of the lease essentially transfer all the risks and rewards incidental to ownership to the lessee, the lease is classified as a finance lease. All other leases are classified as operating leases. The classification is only reassessed in the event of a change in the lease agreement.

In the case of a sublease, HVB Group acts as an intermediate lessor and accounts for the principal lease and the sublease as two separate agreements. The classification of the sublease as a finance or operating lease is based on the right-of-use asset and not on the asset from the principal lease underlying the lease. If the principal lease is a short-term lease to which HVB Group applies the above described exemption, HVB Group classifies the sublease as an operating lease.

- Operating leases

In the case of operating leases, the lessor, as the beneficial owner, recognises the underlying asset in its consolidated balance sheet. The leased assets are carried under property, plant and equipment or investment properties and measured in accordance with the relevant methods. Lease income from operating leases is recognised on a straight-line basis over the term of the respective lease and shown under other operating income. Initial direct costs incurred in negotiating and agreeing a lease are added to the carrying amount of the leased asset and allocated on a straight-line basis over the term of the lease.

- Finance leases

If the lessor transfers the underlying asset to the lessee for use under a finance lease, the lessor must derecognise it from its consolidated balance sheet on the commencement date and recognise a finance lease receivable from the lessee. The initial measurement of the finance lease receivable included in the item "Loans and receivables with customers (at cost)" or "Loans and receivables with banks (at cost)" is carried at the net investment in the lease using the lessor's interest rate underlying the lease. Initial direct costs are included in the initial measurement of the net investment in the lease and reduce the income recognised over the lease term. The lease payments to be included in the amount receivable under the lease generally correspond to the payments that must also be taken into account upon the initial measurement of a lessee's lease liability. Subsequently, the lease payments received by the lessee are divided into an interest portion recognised in the income statement and a redemption portion. Interest income is recognised over the term of the lease using the effective interest method; the redemption portion reduces the outstanding receivable as a repayment of the principal. Derecognition and impairment provisions of IFRS 9 are to be applied to the amounts receivable under the lease. If the estimated unguaranteed residual values are used in the calculation of the gross investment in the lease, the lessor shall periodically review these values.

Variable lease payments are recognised as income by the lessor in the period in which they arise.

Accounting and valuation applied prior to 1 January 2019 (IAS 17)

For contracts concluded before 1 January 2019, HVB Group assessed whether an agreement constitutes or contains a lease on the basis of the definition criteria applicable to date. In accordance with IAS 17 / IFRIC 4, a lease is an agreement in which the lessor transfers the right to use an asset to the lessee for an agreed period of time in return for payment or a series of payments. The determination whether an agreement constitutes or contains a lease was based on the economic content of the agreement. Accordingly, HVB Group nevertheless accounted for agreements that did not take the legal form of a lease as leases, provided compliance with the agreement depended on the use of a specific asset and the agreement transferred the right to use the asset. In the case of agreements that constituted or contained a lease, HVB Group generally separated the lease payments from the other payments based on their relative fair values and generally accounted for each lease component as an individual lease separately from the non-lease components of the agreement.

Lease agreements are to be classified as finance and operating leases. A lease is classified as an operating lease if the lessor essentially retains a significant portion of the risks and rewards incidental to ownership of the leased asset. By contrast, agreements are considered to be a finance lease if all the risks and rewards incidental to ownership of the asset are essentially transferred to the lessee. It is hereby irrelevant whether civil law ownership of the leased asset is transferred.

At HVB Group, leased assets include both real estate and moveable assets.

HVB Group as lessee

- Operating leases

Lease payments made by the lessee under operating leases are recognised as an expense on a straight-line basis over the lease term and carried under other operating expenses or operating costs if they represent lease expenses. Lease incentives received are recognised as a component of total lease expense over the lease term. The lease term commences as soon as the lessee controls the physical use of the leased asset. The corresponding leased assets are not capitalised in in the lessee's consolidated balance sheet.

- Finance leases

In the case of finance leases, the lessee reports the leased assets separately in its balance sheet under property, plant and equipment, investment properties or intangible assets, and a liability under liabilities. The asset and the corresponding liability are each initially recognised at the fair value of the leased asset at the inception of the lease, or if, lower, the present value of the minimum lease payments. Minimum lease payments are those payments that the lessee has to make over the term of the lease, with the exception of conditional lease payments (contingent rental payments). The internal rate of return underlying the lease is used to calculate the present value of the minimum lease payments. After initial recognition, the asset is accounted for in accordance with the accounting policy applicable to it. The lease payments made under a finance lease are divided into an interest portion and a redemption portion. The redemption portion reduces the residual debt while the interest portion is treated as interest expense.

HVB Group as lessor

- Operating leases

Assets leased to the lessee under an operating lease are considered held by the lessor, who should continue to account for them. The leased assets are carried in the consolidated balance sheet under property, plant and equipment, investment properties or intangible assets and measured in accordance with the relevant methods. The lease proceeds are recognised on a straight-line basis over the lease term and disclosed under other operating income.

- Finance leases

Where assets are transferred under a finance lease, the lessor is required to remove the leased asset from its balance sheet and recognise a receivable from the lessee. The receivable is carried at the amount of the net investment in the lease when the lease agreement was concluded. The lease payments received are divided into an interest portion recognised in the income statement and a redemption portion. The interest income is recognised over the period of the lease in such a way that it essentially reflects a constant periodic return on the net investment in the lease; the redemption portion represents a repayment of the principal that reduces the amount of the still outstanding receivable.

Conditional lease payments (contingent rental payments) made in connection with operating and finance leases are recognised as an expense by the lessee and as income by the lessor in the period in which they accrue.

For more information, please refer to the Note "Information regarding lease operations".

17 Investment properties

Real estate (land and buildings) that HVB Group holds as investment property to earn rental income and/or for capital appreciation over the long term is measured using the fair value model in accordance with IAS 40.30 in conjunction with IAS 40.33. This also applies to the rights of use under leases that are classified as investment property. There is no scheduled depreciation over the economic life. Accordingly, changes in the fair value are recognised in the income statement under the item "Net other expenses/income". Current expenses and rental income for land and buildings held as an investment is also reported in this item.

The fair value of investment properties is determined as follows: the properties to be measured are always unique, so that there are no prices that are observable for these properties. Consequently, fair value is to be determined on the basis of recognised valuation methods (Stage 3). Only in exceptional cases can binding offers or non-binding reliable offers for a property be made in the course of a sale process (such as for investment properties classified as non-current assets or disposal groups held for sale), so that fair value can be determined on the basis of prices observable on the market (Stage 2). The valuation shall be carried out at regular intervals.

The appraisals prepared to calculate the fair values are based on recognised appraisal methods used by independent external assessors, primarily taking the form of asset value and income approach. In the income approach, current market rents, management and maintenance costs and property yields are applied in the case of developed land. Where necessary, property-specific considerations are also taken into account when determining the value. Among other things, these property-specific factors include vacancy rates, deviations between current contractual rents and current market rents, as well as the condition of the buildings' technical systems. In the case of undeveloped land, figures for sales of nearby land that have been completed are normally taken as a basis; where these are not available, the standard land value is employed as a benchmark, with adjustments made for the individual location, size and layout of the land, among other factors.

In some cases, it may prove difficult to classify a property as an investment property rather than property, plant and equipment. Classification is especially difficult if part of the property is held by the Group as an investment while another part is used for the Bank's own purposes as an administration building, and the parts of the property cannot be sold separately or leased out under a finance lease, such that the two parts will not be accounted for separately. In such cases, HVB Group classifies a mixed usage property in full as an investment property if more than 90% of the property is leased to an external third party and the part of the property used by the Bank is of subordinate importance. The whole property is classified as property, plant and equipment if the part of the property leased externally totals 90% or less.

18 Intangible assets

The main items included in intangible assets are goodwill arising from the acquisition of fully consolidated subsidiaries and software. An intangible asset will only be recognised if it is probable that the expected future economic benefits attributable to the asset will flow to the entity and the cost of the asset can be measured reliably.

Goodwill has an indefinite useful life and is therefore not subject to scheduled amortisation. Consequently, it is only tested for impairment compliant with IAS 36 and not amortised (impairment only approach). The value of goodwill is tested annually and where there is an indication of impairment. Unscheduled impairment losses are taken where necessary. It is not permitted to write up in subsequent periods any impairment losses recognised on goodwill.

Software has a limited useful life and is valued at amortised acquisition or production cost. Scheduled amortisation is taken on a straight-line basis over an expected useful life of three to five years. Other intangible assets are also recognised at amortised acquisition or production cost less cumulative amortisation, as they have a limited useful life. Scheduled amortisation is taken on a straight-line basis over an expected useful life of up to ten years.

Where intangible assets additionally suffer impairment, we recognise an unscheduled impairment loss compliant with IAS 36. Should the reason for the unscheduled impairment no longer apply, write-ups are taken to the income statement in an amount no more than the amortised acquisition or production cost.

Unscheduled impairment losses on goodwill are shown in a separate item in the income statement.

Scheduled and unscheduled amortisation, impairments and write-ups on software and other intangible assets are recognised in the income statement under the item "Amortisation, depreciation and impairment losses on intangible and tangible assets" within operating costs.

19 Non-current assets or disposal groups held for sale

Under IFRS 5, non-current assets or disposal groups held for sale which are expected to be sold within one year are to be recognised as non-current assets or disposal groups held for sale. Upon reclassification, these are generally carried at the lower of the carrying amount or fair value less costs to sell at the reporting date. Upon subsequent measurement following reclassification, the non-current assets or disposal groups held for sale are, if necessary, written down to a lower fair value less costs to sell if this has fallen at subsequent reporting dates. Should the fair value increase, the total may be written up to an amount that is no more than the cumulative impairment loss.

Financial instruments as defined by IFRS 9 and non-current assets measured according to the fair value model in IAS 40, for which the measurement requirements of the corresponding IFRS apply, are among the items exempt from the IFRS 5 measurement requirements.

20 Liabilities

Deposits from banks and customers, and debt securities in issue that are not hedged items of an effective micro fair value hedge are reported at amortised cost. Upon initial recognition, they are disclosed at their fair value including any transaction costs.

21 Financial liabilities held for trading

This item includes the negative fair values of traded derivatives and all other derivatives that are not classified as hedging derivatives (which are recognised separately). Also included here are warrants, certificates and bonds issued by our trading department, liabilities under repurchase agreements as well as delivery obligations arising from short sales of securities held for trading purposes.

Financial liabilities held for trading are carried at fair value. Gains and losses arising from the valuation and realisation of financial liabilities held for trading are taken to the income statement as net trading income. We act as market maker for the structured products we issue.

With interest rate swaps, the two offsetting streams of interest payments are aggregated for each swap contract and reported in net terms as interest income or interest expense. In the case of pure derivatives trading portfolios, we report the netted interest payments under net trading income.

22 Financial liabilities at FVTPL

HVB Group designated certain liabilities as financial instruments to be measured at fair value through profit and loss (fair value option) upon initial recognition. In this context, financial instruments issued are designated on the basis of fair value-based management of the portfolios concerned.

Financial liabilities at fair value through profit or loss are disclosed upon initial recognition at their fair value without any transaction costs. Upon subsequent measurement, changes in fair value are recognised through profit or loss in the item "Net gains/losses on financial assets and liabilities at fair value". If part of the change in fair value is attributable to changes in own credit spread, this partial amount is corrected again in the income statement and then recognised through other comprehensive income. This procedure does not lead to any accounting anomaly in the income statement.

In equity, the reserve for the own credit spread is introduced under "Other reserves". If there are any changes in the financial liabilities at FVTPL in the course of measurement at fair value on account of the own credit spread, these changes are recognised through other comprehensive income. If this reserve still contains amounts on the date of disposal of the liability, the relevant amounts are not recognised in the income statement and are generally reclassified to retained earnings.

23 Hedge adjustment of hedged items in the fair value hedge portfolio

Net changes in the value of the hedged amount of hedged items are carried in this hedge adjustment of the fair value hedge portfolio to be shown separately (see the Note "Hedge adjustment of hedged items in the fair value hedge portfolio").

24 Other liabilities

Compliant with IAS 37, accruals and other items are shown under other liabilities. These reflect future expenditure of uncertain timing or amount, but the uncertainty is much less than for provisions. Accruals are liabilities for goods and services received that have been neither paid for nor invoiced by the supplier, nor formally agreed. This also includes current liabilities to employees, such as flexi-time credits and holiday entitlements. Accruals are carried at the amount likely to be used.

25 Provisions

Present legal or constructive obligations as a result of past events involving a probable outflow of resources, and whose amount can be reliably estimated, are recognised as provisions.

When assessing provisions for uncertain liabilities and anticipated losses on onerous transactions, we use the best estimate compliant with IAS 37.36 ff. Long-term provisions are discounted.

In accordance with IAS 19, provisions for pensions and similar obligations arising from defined benefit plans are recorded on the basis of external actuarial reports by applying the projected unit credit method, with each pension plan being valued separately. This accrued benefit method pro-rated on service takes into account dynamic considerations when determining the expected pension benefits upon retirement and distributes these over the beneficiaries' entire period of employment. This means that the measurement of the defined benefit obligation is based on an actuarially calculated present value of the future benefit entitlement for services already rendered (vested benefit entitlements), taking into account the expected compensation increases including career trends and forecast pension progression. The actuarial assumptions to be defined when measuring the benefit obligation vary in line with the economic and other underlying conditions in the country in which the plans exist.

The underlying valuation assumptions may differ from the actual developments as a result of changing market, economic and social conditions. The actuarial gains or losses resulting from the change to the valuation parameters may have a significant impact on the amount of the obligations for pensions and similar post-employment benefits.

The discount rate used to discount the defined benefit obligations (actuarial interest rate) is determined by reference to yields recorded on the market at the reporting date for high quality, fixed-rate corporate bonds and with maturities and currencies that match the obligations to be measured. A basket of AA-rated corporate bonds denominated in euros serves as the data basis for determining the discount rate for the obligations. These individual bond data are translated into a yield curve which forms the basis for determining the discount rate by using a numerical compensation technique.

Funded pension obligations differ from unfunded pension obligations in that plan assets are allocated to cover the entitlements of the beneficiaries. The beneficiaries include active employees, former employees with vested benefit entitlements, and pensioners and their surviving dependants. Both HVB and a number of subsidiaries have set up plan assets in external, restricted-access pension organisations to fund their pension obligations.

If the beneficiaries' benefit entitlements or the Group's benefit obligations are not funded by assets, HVB Group recognises a pension provision in the amount of the present value of the defined benefit obligation (DBO) in its consolidated balance sheet.

In the case of funded pension obligations, by contrast, the present value of the defined benefit obligation is set against the fair value of the plan assets to determine the net defined benefit liability or net defined benefit asset from the defined benefit plans. The net amount is recognised in the consolidated balance sheet as a pension provision in the event of an excess of liabilities over assets or under other assets in the event of an excess of assets over liabilities adjusted for any effects of the asset ceiling. In the event of excess allocations to the plan, the amount of the net defined benefit asset recognised in the balance sheet is limited to the present value of the economic benefits associated with the surplus plan assets.

In the case of defined benefit obligations, actuarial gains and losses are recognised immediately and in full in other comprehensive income (OCI) in the period in which they accrue. Consequently, the pension provision or other asset recognised in the consolidated balance sheet corresponds to the actual deficit or surplus for a given commitment.

Under the net interest approach, the net interest to be recognised in profit or loss for the period is calculated by multiplying the net defined benefit liability (asset) from defined benefit plans by the discount rate underlying the measurement of the defined benefit obligation. Since any plan assets are deduced from the net defined benefit liability (asset), this calculation method implicitly assumes the return on plan assets in the amount of the discount rate.

If the present value of a defined benefit obligation changes as a result of a plan amendment or plan curtailment, the Group recognises the ensuing effects in full as past service cost in the profit or loss for the period. The amount is normally recognised at the date when the plan amendment or plan curtailment occurs. The gains and losses when a plan is settled are also recognised directly in profit or loss when the settlement occurs.

The net pension expense of defined benefit obligations consists of a service cost component, a net interest component and a remeasurement component. This is recognised in the consolidated income statement and consolidated statement of total comprehensive income as follows:

The service cost component consists of the current and past service cost including the gains and losses on plan settlements. The net interest component comprises the interest expense on the defined benefit obligation, the interest income on plan assets and, in the event of excess allocations to the plan, the interest on any effects arising from the adjustment of the asset surplus to reflect the asset ceiling. The service cost and net interest components are taken to the consolidated income statement in profit or loss for the period. HVB Group also recognises the net interest component under pension and other employee benefit costs in payroll costs alongside the service cost component.

The remeasurement component encompasses the actuarial gains and losses arising from the valuation of the defined benefit obligation, the difference between the typical return on plan assets assumed at the beginning of the period in the amount of the discount rate and the actual return realised on plan assets and, in the event of excess allocations to the plan, any adjustment of the asset surplus to reflect the asset ceiling, excluding the amounts already recognised in net interest. This component is recognised immediately in shareholders' equity without affecting profit or loss. The remeasurements recognised in other comprehensive income in the consolidated statement of total comprehensive income may not be reclassified in later periods in profit or loss (no recycling).

The disclosure requirements for defined benefit plans contain a principles-based disclosure concept requiring companies to make judgements regarding the necessary level of detail or any emphases in the disclosures pertaining to defined benefit plans. The reporting is intended to meet the information needs of the users of the financial statements and give them a wide-ranging understanding of the risk structure and risk management of the pension plans (pension governance).

In contrast to defined benefit plans, no provisions for pensions and similar obligations are recognised for defined contribution plans. The amounts paid are recognised in the period of the payment taken to the income statement under payroll costs.

The provisions for pensions and similar obligations are described in detail in the Note "Provisions".

In accordance with IAS 19, the provisions for partial retirement and similar benefits recognised under other provisions are measured on the basis of external actuarial reports.

The top-up amounts promised under partial-retirement agreements are accounted for as other long-term employee benefits and the associated expenses accrued over their vesting period. HVB Group applies the first-in first-out (FiFo) method for the straight-line accrual of top-up benefits. The benefits are discounted to determine their present value. Remeasurements are recognised in profit or loss in the period in which they arise.

The other long-term employee benefits also include the deferred employee compensation under the Group's bonus programmes, if not expected to be settled wholly before twelve months after the end of the reporting period. The Group has a net liability in the amount of the future benefits to which the employees are entitled in exchange for the work performed in the current period and earlier periods. HVB Group recognises a bonus provision in the amount of the present value of these benefits in its consolidated balance sheet, with allocations made to the promised bonus amounts over the respective vesting period on a pro rata basis. Remeasurements of the net liability are recognised directly in profit or loss for the period.

The employee compensation schemes are described in detail in the Note "Operating costs".

26 Foreign currency translation

The consolidated financial statements are prepared in euros, which is the reporting currency of the corporate group. Amounts in foreign currency are translated in accordance with the principles set forth in IAS 21. This standard calls for monetary items not denominated in the respective functional currency (generally the local currency in each case) and cash transactions not completed at the valuation date to be translated into euros at the reporting date using current market rates. Non-monetary items carried at fair value are similarly translated into euros using current market prices at the valuation date. Non-monetary items carried at cost are translated using the historic rate applicable at the time of acquisition.

Income and expense items arising from foreign currency translation at the individual Group companies are stated under net trading income in the income statement.

Where they are not stated in euros, the assets and liabilities reported by our subsidiaries are translated using current market rates at the reporting date in the consolidated financial statements. Average rates are used to translate the income and expenses of these subsidiaries.

Exchange rate differences resulting from the translation of financial statements of international business units are recognised in shareholders' equity without affecting profit or loss and are only taken to the income statement if the operation is sold in part or in full.

27 Income tax for the period

Income tax for the period is accounted for in accordance with the principles set forth in IAS 12. Current taxes are determined taking into account local laws in the respective tax jurisdictions concerned. Apart from a few exceptions allowed for in the standard, deferred tax assets and liabilities are recognised for all temporary differences between the values stated in accordance with IFRS and the values stated for tax-reporting purposes (balance sheet approach). Deferred tax assets arising from unused losses carried for ward for tax-reporting purposes are shown where permitted by IAS 12.

Since the concept is based on the approach using future tax assets and liabilities under the liability method, the assets and liabilities are computed using the relevant local tax rates that are expected to apply when the differences are reversed. Deferred tax assets and liabilities are offset provided the offset-ting requirements defined in IAS 12 are met.

Segment Reporting

28 Method of segment reporting by business segment

In segment reporting, the activities of HVB Group are divided into the following business segments:

- Commercial Banking
- Corporate & Investment Banking (CIB)
- Group Corporate Centre
- Other

For the first time in 2019, Other is reported as a separate business segment separately from consolidation effects. The previous-year figures have been adjusted accordingly. In the past, both segments were presented together as the "Other/consolidation" business segment.

Segment reporting is based on the internal organisational and management structure together with internal financial reporting. In accordance with IFRS 8 "Operating Segments", segment reporting thus follows the Management Approach, which requires segment information to be presented externally in the same way as it is reported to the Management Board, as the responsible management body, and is used for the allocation of resources (such as risk-weighted assets compliant with CRR II) to the business segments and for assessing the profitability. In this context, the segment data are determined in accordance with International Financial Reporting Standards (IFRS).

In segment reporting, the business segments operate as autonomous companies with their own equity resources and responsibility for profits and losses. The business segments are delimited by responsibility for serving customers. For a description of the customer groups assigned to the individual business segments and the main components of the segments, please refer to the section entitled "Components of the business segments of HVB Group".

The income statement items of net fees and commissions, net trading profit and net other expenses/income shown in the business segments are based almost exclusively on transactions involving external customers. Net interest is assigned to the business segments in accordance with the market interest calculation method on the basis of the external interest income and interest expenses. For this reason, a separate presentation broken down by external/ internal revenues (operating income) has not been included.

The equity capital allocation used to calculate the return on investment on companies assigned to several business segments (HVB and, until the merger effective as of 1 July 2018, UniCredit Luxembourg S.A.) is based on a uniform core capital allocation for each business segment. Pursuant to CRR II, this involves allocating 12.5% (previous year: 12.5%) of core capital from risk-weighted assets to the business segments. The average tied-up core capital calculated in this way is used to compute the return on investment, which is disclosed under net interest. The percentage used for the return on the equity capital allocated to the companies HVB and, until the merger as of 1 July 2018, UniCredit Luxembourg S.A. equals the base rate plus a premium in the amount of the average spread curve for the medium and long-term lending business of HVB. This rate is set for one year in advance as part of each budgeting process. The percentage changed to 0.98% in financial year 2019 after 1.07% in the previous financial year. Equity capital is not standardised for the other companies included in the consolidated financial statements.

Operating costs, which contain payroll costs, other administrative expenses as well as amortisation, depreciation and impairment losses on tangible and other intangible assets (without goodwill), are allocated to the appropriate business segment according to causation. The Chief Operating Office (Other) and the Group Corporate Centre business units are treated as external service providers, charging the business segments for their services at a price which covers their costs. The method of calculating the costs of general banking services involves employing a weighted allocation key (costs, income, FTEs, base amount) for each business segment to determine the assigned costs that cannot be allocated directly. The majority of the depreciation and impairment losses taken on property, plant and equipment are posted for the BARD Offshore 1 wind farm allocated to the Corporate & Investment Banking business segment and the real estate companies of HVB Group included in the Chief Operating Office business unit (Other).

At the beginning of the 2019 financial year, the return on investment was recalculated. As a result, shifts occurred in net interest in the income statement, broken down by business segment. In addition, adjustments were made within income in the items "Dividends and other income from equity investments", "Net other expenses/income" and "Net trading income". In the second half of 2019, the valuation of investment properties was changed to fair value measurement through profit or loss. The presentation of net income from investments was changed accordingly.

The previous-year figures affected by this reorganisation have been adjusted accordingly.

The profit of $\in 1$ million (previous year: $\in 4$ million) from shares in associates relates to the company Comtrade Group B.V., Rotterdam, accounted for using the equity method. The company is assigned to the CIB business segment. The disclosure in profit and loss is made under the item "Dividends and other income from equity investments" in the income statement. The carrying amount of the companies accounted for using the equity method is $\in 10$ million (previous year: $\in 23$ million). The companies Nautilus Tankers Limited, Valetta and paydirekt Beteiligungsgesellschaft privater Banken mbH, Berlin accounted for in the previous year using the equity method and SwanCap Partners GmbH, Munich recognised under "Non-current assets or disposal groups held for sale" were sold in 2019. The net income of $\in 16$ million from the sale is recognised in the Consolidated Income Statement under the item "Net income from investments" and allocated to the CIB business segment.

29 Components of segment reporting by business segment

Commercial Banking business segment

The Commercial Banking business segment serves all customers in Germany with a need for standardised or personalised service and advice. In this context, its Private Clients Bank and Unternehmer Bank business units offer a wide range of banking services. Depending on the service approach, a needs-based distinction is made within Commercial Banking between retail customers, private banking clients, high net worth individuals/ultra high net worth individuals and family offices under Wealth Management, business and corporate customers, and commercial eat estate customers. At the same time, the Commercial Banking business segment builds on a shared "HypoVereinsbank" brand and a largely identical sales network.

In line with the universal bank model, the range of products and services of Commercial Banking enables comprehensive customer support to be provided. This extends from payment services, mortgage loans, consumer loans, savings-and-loan and insurance products and banking services for retail customers through to business loans and foreign trade financing for corporate customers, fund products for all asset classes, advisory and brokerage services in the securities business and liquidity and financial risk management, advisory services for high net worth private customers through to investment banking products for companies requiring capital-market access. The wealth management approach includes not only customised portfolio concepts and financing solutions for high net worth private customers with an entrepreneurial background but also the brokerage of shareholdings.

The Private Clients Bank business unit serves retail customers in the Retail Banking business and the Private Banking business in all areas of demand. In this context, we are continuing along the path already taken towards a root-and-branch modernisation of the retail customer business by expanding our digital offering and are thus underlining our positioning as a provider of quality services. Our aspiration is to be the best customer bank in Germany: in terms of quality, innovation and empathy. To achieve this, we set high standards for the quality of advice given and services provided involving a modern approach and an innovative omni-channel business model. In the retail customer business, HVB's financial concept promotes a high standard of quality in advisory services and is one of the most innovative forms of personal advice provided in Germany. In the Private Banking relationship model, very high net worth clients are served by advisors and a network of highly qualified specialists based on a 360-degree advisory approach with the aim of achieving a sustainable increase in the prosperity of our customers and thus maintaining long-term, trusting customer relationships.

The Unternehmer Bank business unit bundles the corporate banking business in Germany. In this respect, Unternehmer Bank is one of the largest lenders to the German Mittelstand and their first choice from among the banks for Mittelstand companies. The corporate banking business is the place where companies requiring complex advisory services on the Key Account relationship model find the right address for customised solutions, also in particular for large transaction volumes, capital market transactions and international issues.

Segment Reporting (CONTINUED)

In the Mid & Small Cap relationship model for corporate and business customers, the product portfolio covers tailored financing offers, for example through the use of subsidies or leasing offers as well as solutions for the management of financial risks, in addition to the traditional bank services of payments and lending. Furthermore, the services provided for special target groups, such as insolvency administrators, healthcare professionals or public sector workers, are being continuously refined.

The distinguishing features of the Real Estate relationship model are individual solutions for commercial real estate customers, institutional investors, residential construction firms, property developers and building contractors. In this context, customers benefit particularly from specific financing expertise, for example in the Real Estate Structured Finance and Loan Syndication product areas.

The Commercial Banking business segment is run by two members of the Management Board who bear joint responsibility. The business management and support functions are performed by a staff unit assigned to each of the business units. Reciprocal cross-servicing ensures that the products required are maintained only once.

The market environment for Commercial Banking is characterised by persistently low interest rates, a fragmented competitive situation with a growing number of digital competitors and rising regulatory costs. In addition, increasing digitalisation is causing a lasting change in customer requirements, which is characterised by greater demand for omni-channel solutions and seamless customer experience. HVB Group is facing up to the challenges posed by this framework in Commercial Banking with a premium positioning and a diverse set of measures of growth and efficiency activities, which also include clearly defined digitalisation initiatives.

Corporate & Investment Banking business segment (CIB)

CIB is a business segment of UniCredit with global operations. It has a matrix organisational structure and has business activities at the three most important group companies: UniCredit Bank AG, UniCredit Bank Austria AG and UniCredit S.p.A.

The success of CIB's business stems not only from the close cooperation and coordination between customer care and the product units but also from collaboration with other countries and business segments of UniCredit as well as the pertinent credit risk management units.

As CIB acts as a global business segment, all statements and definitions apply both to CIB within HVB Group and CIB at a global level. In the form of its CIB business segment, which acts as a centre of competence for international markets and investment banking operations, HVB Group takes a share in structuring the global strategy of CIB. The member of UniCredit Bank's Management Board responsible for CIB has decided to apply the global CIB strategy to UniCredit Bank AG's CIB business in order to ensure a uniform approach worldwide for our customers.

CIB offers its customers:

- corporate banking and transaction services
- structured finance, capital markets and investment products
- access to Western, Central and Eastern Europe

	Corporate & Investment Banking							
			Product Lines					
			Financing & Global Advisory Transaction Banking		Mar	kets		
	Financial Institutions Group							
Coverage	Multinational Corporates/ Investment Holdings							
Cove	CIB Americas							
	CIB Asia Pacific							

Service is organised horizontally:

Financial Institutions Group (FIG), Multinational Corporates (MNC) and Investment Holdings (GFO), CIB Americas and CIB Asia Pacific.

Vertically, there are three product factories:

Financing & Advisory (F&A) provides customer support worldwide in the areas of Financial Sponsor Solutions (FSS), Infrastructure & Power Project Finance (IPPF), Natural Resources (NR), Commodity Trade Finance (CTF) and Structured Trade and Export Finance (STEF). Further global business lines include Global Syndicate & Capital Markets (GSCM) and Corporate Finance Advisory (CFA). The local business units Corporate Structured Finance (CSF) and Real Estate Structured Finance (RESF) cooperate closely with the Commercial Banking business segment. The local unit Global Shipping (GLOS) conducts transactions worldwide. Portfolio & Pricing Management (PPM) is responsible for the management of all LP (Leveraged and project finance, covered by the Financial Sponsor Solutions, Infrastructure & Power Project Finance and Natural Resources business lines) portfolio transactions within UniCredit Group. RESF and CSF portfolios are managed by PPM in cooperation with representatives of the sales channels at the level of UniCredit Bank AG.

Global Transaction Banking (GTB) offers a broad array of innovative products in the areas of cash management and trade finance, thus meeting customer needs in connection with transactions in the areas of payment services, account information, cash flow optimisation, liquidity management and mainly short-term import and export financing services.

The main product areas in cash management include clearing and foreign currency products, client access through electronic channels of access, payment products with payment services and account information, liquidity management with cash pooling and other optimisation procedures, cash innovations with company customer cards and dealer solutions and the business with sight deposits.

Trade finance offers supply chain finance solutions and conventional international trade products such as guarantees, letters of credit, collection services, etc. along the customer's value chain.

Segment Reporting (CONTINUED)

Markets is a customer-oriented business that supports the corporate and institutional business of UniCredit as an integral part of the CIB value chain. This product area extends over all asset classes: interest, foreign exchange, commodities and equity derivatives. It offers institutional customers, business customers and private investors risk management solutions and investment products through the Group's own or external networks.

With a view to achieving its objectives, CIB developed and implemented several key strategic initiatives last year, the basic purpose of which is to provide support to the relationship managers in their customer care tasks:

- value chains, growing importance of the approach of an integrated value chain across team boundaries
- shared goals, a structured objective-setting process between customer care and product lines
- senior bankers who serve selected key corporate and institutional customers as well as investment holdings/family offices
- capital structure advisory which enables the Bank to hold a focused and discerning strategic dialogue with customers

We are aiming to further expand our central role with core CIB customers, exploit opportunities with Mittelstand customers and become Europe's powerhouse for trade finance. We wish to increase our international footprint by selling our international services to customers in our core countries, strategically expand our presence in countries given special priority as well as standardising and refining our operating platform.

At the same time, we are planning to expand our presence along the future developments of trade flows and to win as customers the best international actors outside of our home markets. Furthermore, we would like to become the "go-to bank" for business customers by expanding the cross-selling opportunities as well as the underwriting and distribution capacities. We are also striving to heighten the service commitment for banks.

In addition, CIB maintains a close cooperation with Commercial Banking. With a view to promoting the realisation of synergies within the UniCredit corporate group and the "One Bank" approach, the UniCredit International Centres ("UIC") concept was extended from Commercial Banking to CIB. The Head of UIC Germany reports to the Management Board members responsible for CIB and Unternehmer Bank (UBK) in order to ensure an end-to-end and systematic approach to international business. The duties of the International Centre extend from serving inbound customers through to support for and coordination of outbound activities.

Group Corporate Centre business segment

The Group Corporate Centre business segment includes profit contributions that do not fall within the jurisdiction of the individual business segments. Among other items, this includes the CFO, CRO and the CEO business units as well as the profits and losses of consolidated subsidiaries and nonconsolidated holdings, provided they are not assigned to the other business segments. Furthermore, this business unit incorporates the net income from securities holdings for which the Management Board is responsible. Also incorporated in this business unit are the amounts arising from decisions taken by management with regard to asset/liability management. This includes contributions to earnings from securities and money trading activities involving UniCredit S.p.A. and its subsidiaries. The Group Corporate Centre business segment also includes the Real Estate Restructuring (RER) customer portfolio.

Other business segment

The Other business segment encompasses the Chief Operating Office. It acts as a central internal service provider for customers and employees. The Chief Operating Office activities extend to purchasing, organisation, corporate security, logistics and facility management, cost management and back-office functions for credit, accounts, foreign exchange, money market and derivatives as well as in-house consulting. Payments, securities settlement, IT application development and IT operations have been outsourced. Strategic real estate management at HVB is similarly the responsibility of the Chief Operating Office business unit and is carried out by the Real Estate unit (GRE), HVB Immobilien AG, Munich and UniCredit Services S.C.p.A., Milan, respectively, as engaged by HVB Immobilien AG, Munich by way of an operating contract.

Information on products and services at company level

The information required by IFRS 8.32 on income from external customers generated from the products and services of HVB Group are contained under the disclosures regarding the income statement in these notes to the consolidated financial statements.

Cost-income ratio in %1	72.2	72.

1 Ratio of operating costs to operating income.

In 2019, the Commercial Banking business segment generated an operating profit (before net write-downs of loans and provisions for guarantees and commitments) of €628 million and is thus roughly at the previous year's level (down €7 million or 1.1%).

At $\[equiveleq$

Compared with the previous-year period, net fees and commissions fell, solely due to changes in accounting methods and non-recurrent effects in 2018, by €39 million, or 5.1%, to €722 million and net trading income by €6 million, or 8.7%, to €63 million. The decline in net trading income was mainly due to negative effects of the change in the credit value adjustment of interest rate derivatives with corporate clients. Net other expenses/income totalled €4 million in 2019. The increase in this expense compared with the previous-year period (€11 million) is attributable to a higher charge for the European bank levy and falling profit contributions from our WealthCap subsidiary. This item also includes a non-recurrent effect of €5.5 million resulting from the derecognition of savings accounts that have not generated revenue for several decades and which are unlikely to be claimed with a degree of certainty. The underlying legal claim of the customers vis-à-vis the Bank for payment of the credit balances continues to exist. Dividends and other income from equity investments contributed €2 million to operating income in 2019 (previous-year period: minus €1 million).

As expected, a reduction of 2.7%, or \in 43 million, to \in 1,629 million was achieved in operating costs in 2019. This is attributable to lower other administrative expenses, which fell by 4.4%, or \in 45 million, to \in 1,057 million compared with the previous-year period. This decline is due to lower internal charges from other service units of the Bank, for example for IT and payment transaction expenses, and partly also to changes in accounting methods.

The cost-income ratio decreased slightly to 72.2% in the current reporting period compared with 72.5% in 2018.

In 2019, there was a net addition of €112 million to net write-downs of loans and provisions for guarantees and commitments compared with €197 million in the previous-year period.

There was a strong increase of €78 million, or 17.8%, to €516 million in net operating profit in the 2019 reporting year (previous-year period: €438 million). The decrease in net write-downs of loans and provisions for guarantees and commitments more than offset the lower operating income.

In 2019, there was net income of \notin 111 million from the reversal of provisions after additions of \notin 298 million in the previous year. In April 2019, the Bank reached a settlement with the US and New York authorities to conclude the proceedings for violations of US economic sanctions in the period from 2002 to 2012. The amounts payable according to the settlement are lower than the provisions set aside for it, which means that the excess was able to be reversed. Net additions to provisions for risks and charges in 2018 are largely due to the increase in provisions for this matter.

In the reporting year, net restructuring costs of \in 118 million arose in connection with the implementation of the Team 23 four-year strategic plan. These provisions essentially contain provisioning requirements for early retirement schemes or severance payments. In the previous year, net restructuring costs of \in 30 million were reported.

At €14 million, net income from investments is higher than the figure in the previous year (€10 million).

Overall, the Commercial Banking business segment generated a profit before tax of €523 million in 2019, which is significantly higher than the previousyear figure of €120 million.

The income tax expense for the reporting period increased substantially by €125 million to €189 million compared with 2018.

The Commercial Banking business segment reports a profit after tax of €334 million for 2019, which is significantly above the previous year's comparative figure of €56 million.

In the reporting year, the remaining goodwill of €130 million for the Commercial Banking business segment was completely written off.

Cost-income ratio in %1	76.6	63.

1 Ratio of operating costs to operating income.

In the current 2019 financial year, the Corporate & Investment Banking business segment generated operating income of €1,927 million and thus remained 2.9% lower than the year-ago figure of €1,985 million.

The primary cause of this development in 2019 is the decline in net interest, which is down by 10.1%, or \leq 100 million, to \leq 891 million compared with the previous-year period. This trend is primarily attributable to the persistently low interest rate environment. In addition, there was a significant decrease in trading-induced interest compared with the previous-year period in connection with CIB's current trading strategy.

At €258 million, net fees and commissions were €5 million, or 1.9%, lower than in the previous-year period. This development is due to lower commissions and advisory fees, which despite greater demand from companies for equity or borrowings using capital market products, such as bonds or share issues, were unable to be offset.

Net other expenses/income fell significantly to \leq 141 million (previous-year period: \leq 198 million) whereby the previous-year total includes a positive non-recurring effect in connection with the BARD Offshore 1 wind farm. There were no dividends and other income from equity investments in 2019 (previous-year period: \leq 6 million).

Net trading income was up compared with the previous-year period, increasing a significant \in 109 million, or 20.7%, to \in 636 million. This increase is due in particular to the areas of fixed income products as well as equity and commodity products. The key drivers in this context are a positive development in the customer business coupled with an improved market environment. By contrast, valuation adjustments, which primarily include credit value adjustments and funding value adjustments, made a negative contribution to net trading income.

Operating costs rose a sharp \in 225 million, or 18.0%, to \in 1,477 million compared with the previous-year period. This is mainly due to the unscheduled write-down of \in 315 million on the BARD Offshore 1 wind farm, which was classified as "Non-current assets or disposal groups held for sale" at 30 June 2019. The carrying amount was thus to be written down to the expected selling price. Furthermore, payroll costs rose year on year by a slight \in 5 million, or 1.3%, to \in 392 million as a result of a positive non-recurring effect in the previous year whereas other administrative expenses fell by \in 54 million, or 7.2%, to \in 696 million.

The cost-income ratio rose to 76.6% in the reporting period compared with 63.1% in the 2018 financial year on account of the decline in the earnings trend and the unscheduled write-down. Operating profit fell by €283 million, or 38.6%, to €450 million.

In the 2019 financial year, there was a net addition of €15 million in net write-downs of loans and provisions for guarantees and commitments after a net reversal of €130 million was reported in the previous-year period.

In the 2019 financial year, there was net income of \in 199 million from the reversal of provisions for risks and charges after net additions of \in 620 million in the previous-year period. In April 2019, the Bank reached a settlement with the US and New York authorities to conclude the proceedings for violations of US economic sanctions in the period from 2002 to 2012. The amounts payable according to the settlement are lower than the provisions set aside for it, which means that the excess was able to be reversed. Net additions to provisions for risks and charges in the 2018 financial year are largely due to the increase in provisions for this matter. Net income from investments totalled \in 6 million in the 2019 financial year after no significant contribution to profit was recorded in the previous-year period.

The Corporate & Investment Banking business segment generated profit before tax of €582 million in the 2019 financial year, which, however, is significantly higher than the previous-year figure of €242 million.

The income tax expense for the reporting period increased by €108 million, or 79.4%, to €244 million compared with the 2018 financial year.

The Corporate & Investment Banking business segment reports a profit after tax of €338 million for the 2019 financial year and was thus significantly higher than the previous-year figure of €106 million.

1 Ratio of operating costs to operating income.

In the reporting period, the Group Corporate Centre business segment generated operating income of \in 134 million, therefore falling by \in 27 million, or 16.8%, compared with the previous-year period.

In the 2019 financial year, net interest improved by \in 4 million to \in 60 million compared with \in 56 million in the previous-year period. This slight increase is primarily due to asset/liability management. Dividends and other income from equity investments totalled \in 1 million in the reporting period. Net fees and commissions were up by \in 1 million compared with 2018 and report a commission expense of \in 6 million for the current reporting period. Net trading income fell by \in 20 million, or 83.3%, from \in 24 million in the previous year to \in 4 million in 2019 on account of IFRS 9 fair value adjustments. With a decrease of \in 1 million in operating costs compared with the previous-year period, the operating profit amounted to \in 94 million after \in 120 million in the previous year.

There were net reversals of ≤ 12 million in net write-downs of loans and provisions for guarantees and commitments in the reporting period and of ≤ 51 million in the previous-year period, representing a decline of 76.5%. In the reporting year, net operating profit thus totalled ≤ 106 million after ≤ 171 million in 2018.

At \in 313 million, net income from investments was \in 130 million lower than in the previous-year period (\in 443 million). This mainly relates to the IAS 40 fair value adjustments in connection with the sale of the properties recognised in the balance-sheet item "Non-current assets or disposal groups held for sale" which were held by our companies Acis Immobilien und Projektentwicklungs GmbH & Co. Oberbaum City KG and NF Objekte Berlin GmbH as well as the disposals of AGROB and EOF.

Particularly on account of the net income from investments and restructuring costs, the profit before tax of the Group Corporate Centre business segment, at \in 344 million in the reporting period, was significantly lower than the profit before tax of \notin 621 million in the previous year. For the reporting period, the income tax expense increased significantly by \notin 65 million to \notin 107 million compared with 2018.

The Group Corporate Centre business segment reports a profit after tax of \in 237 million for the 2019 reporting year, which is a sharp \in 342 million lower than the comparable figure of \in 579 million in the previous year. There were no expenses for the impairment of goodwill.

As a result of the lower operating income year on year, operating costs at the previous year's level, restructuring costs and lower net income from investments, the cost-income ratio for the reporting period deteriorated to 29.9% compared with 25.5% in 2018.

1 Ratio of operating costs to operating income.

The Other business segment, which is shown separately for the first time in the reporting period, generated operating income of \in 69 million in 2019 and is thus \notin 7 million, or 9.2% lower, than the previous year's figure of \notin 76 million.

The change in operating costs by ≤ 32 million, or 53.3%, to ≤ 28 million is largely due to an increase of ≤ 32 million, or 26%, to ≤ 153 million in other administrative expenses in 2019 compared with ≤ 121 million in the previous-year period. As expected, payroll costs fell by ≤ 1 million to ≤ 109 million. Amortisation, depreciation and impairment losses on intangible and tangible assets come to ≤ 72 million in the reporting period and are thus a marginal 1.4% higher than the ≤ 71 million reported in the previous-year period.

As a result of lower operating costs, the Other business segment generated operating profit of €41 million in the reporting period after €16 million in the previous-year period.

Together with operating income at the previous year's level, the cost-income ratio improved to 40.6% in the reporting period compared with 78.9% in 2018.

In the Other business segment, no expenses arose for net write-downs of loans and provisions for guarantees and commitments in the reporting period or in the previous-year period. Net operating profit thus totalled €41 million in the reporting period.

In the current reporting period, "Provisions for risks and charges" come to \in 23 million and are thus \in 21 million up on the previous-year period. "Restructuring costs" amount to \in 86 million and have thus increased by \in 96 million compared with 2018.

Net income from investments posted a year-on-year increase from €69 million to €111 million.

Overall, the Other business segment generated profit before tax of €43 million in 2019, which represents a decline of €50 million, or 54%, compared with the previous-year period.

Income tax expense for the reporting period fell to €12 million compared with 2018.

For 2019, the Other business segment reported profit after tax of \in 31 million, which represents a substantial \in 35 million decrease compared with the previous year's figure (\in 66 million).

	2019	2018
Net gains on financial assets held for trading ¹	579	693
Total	579	693

1 Including dividends on financial instruments held for trading.

The net gains on holdings at fair value through profit or loss generally only contain the changes in fair value disclosed in the income statement.

For hedged forward exchange transactions in the non-trading portfolio used for liquidity management of foreign currency holdings, the swap rate is accrued or deferred over the remaining term of the transactions and reported in net interest.

The interest income from trading portfolios is normally disclosed under net interest. To ensure that the full contribution of these activities to profits is disclosed, the interest cash flows are carried in net trading income for the interest rate swap trading book, which exclusively contains interest rate derivatives.

Hedge result								_
Hedged items								54
Hedging transactions								(54)

The table above compares the nominal amounts of the hedged items and the hedging transactions. In addition, the interest rate sensitivities are stated in basis point values (BPV). This means that if the interest rate changes by one basis point (0.01%), the fair value will change by the amount stated in euro millions. The statement of interest sensitivities in BPV is a suitable instrument for describing the effectiveness of a hedge.

Securities holdings, which are allocated to the balance sheet item "Financial assets at FVTOCI", are separately hedged against interest rate risks for each transaction through a hedging transaction. This includes up-front payments on conclusion of the interest rate swaps to compensate for premiums and discounts in the purchase price of the securities which means that their fair value is not equal to zero at the inception of the hedge. Furthermore, the fair value of the derivatives also contains accrued interest (dirty fair value) whereas accrued interest for the hedged items is allocated to these directly and is thus not included in the cumulative amount of the hedge-related adjustments to the carrying amount of the hedged items. Consequently, the net fair value of the hedging derivatives does not reflect the cumulative amount of the hedge-related adjustments to the carrying amount of the hedged items.

HVB Group has exercised the option of continuing to apply the provisions of IAS 39 on hedge accounting. The portfolio fair value hedge will thus be continued.

In line with the standard bank risk management procedures for the hedging of fixed interest rate risks, the interest rate risks entailed in the hedged items are managed on a cross-item basis in the portfolio fair value hedge. For this purpose, the interest-relevant cash flows of the hedged items are allocated separately by currency to maturity buckets and the net position is determined. The interest rate hedging derivatives concluded thus relate to net interest rate risk positions across several items in the respective maturity buckets and not to specific hedged items. As a hedged item may thus have different effects in the respective maturity bucket, the effects of hedge accounting are presented by reference to interest sensitivity. The statement of interest sensitivity by maturity bucket represents an adequate measure for determining the hedged interest rate risks. The table shows the changes in fair value in \in millions if the interest rate changes by one basis point (BPV or 0.01%).

With regard to recognition of rental income and current operating expenses for investment properties, we have switched to the gross method of recognition. Formerly, the rental income was reduced by the current expenses and only the net amount was recognised as other income, while the breakdown was disclosed in the notes to the table. With the adjustment to the table for reporting year 2019, rental income from investment properties and mixed usage buildings of \in 139 million was recognised as other income and current expenses for investment properties of \notin 28 million as other expenses. The figures for the previous year were adjusted accordingly such that other income increased by \notin 55 million and other expenses increased by the same amount.

Net other expenses/income contains income of €242 million (previous year: €263 million) in the item "Other" and expenses of €59 million (previous year: €75 million) in "Other" in connection with the BARD Offshore 1 wind farm.

The line item "Valuation/disposals of investment properties" includes either income from valuation gains and disposals or expenses due to valuation losses and sales. Due to measurement at fair value through profit or loss of investment properties, the measurement generally has to be adjusted to the anticipated gain from the sale even before the derecognition of the asset because a certain amount of time elapses between the receipt of a binding offer for purchase/conclusion of a purchase agreement and the transfer of rights and obligations vis-à-vis the property (derecognition) in which the measurement must be adjusted at fair value through profit or loss. To that extent, both items are shown in a single line.

Share-based payment compliant with IFRS 2

Share-based payments were granted primarily under the Group Incentive System in the reporting period. In addition, UniCredit has two further schemes under which shares or stock options are granted that are also accounted for in accordance with IFRS 2: the Long-term Incentive Programme, the Long-term Incentive Plan (LTI 2017–2019).

Group Incentive System

The Group Incentive System has governed variable compensation payable to selected staff since the 2010 financial year. This system is built around the principle that the variable compensation is granted partially in shares and scheduled for disbursement over a number of years.

Employees whose duties have a significant impact on the Bank's risk profile are beneficiaries of the Group Incentive System. Under the Group Incentive System, the bonus granted for the respective reporting period is split into a cash component and a share component. The cash component is accounted for in accordance with IAS 19, whereas the share component is compliant with IFRS 2.

The cash component is disbursed in tranches over a period of up to five years. Accordingly, this group of employees receives 20% to 30% of the bonus for 2019 in cash with the commitment at the beginning of 2020, and a further 5% to 20% will be disbursed after financial year-end 2020, 2021, 2022 and 2024.

At the beginning of 2020, the beneficiaries receive for the remaining bonus a commitment for an allocation of shares in UniCredit S.p.A. as part of the bonus for 2019, to be transferred to the beneficiaries after financial year-end 2020 to financial year-end 2024.

The deferred payment after year-end 2020, 2021, 2022 and 2024 and the transfer of shares after year-end 2021 to 2024 to the beneficiaries is subject to the provision that, as part of a malus arrangement, it is ensured that no loss has been recorded at the level of UniCredit or at the level of the individual beneficiary, or a significant reduction in the results achieved. This deferring of the allocation therefore also determines the length of the vesting period of the individual tranches.

The fair value of the granted shares is calculated using the average stock market price of UniCredit S.p.A. shares in the month prior to the resolution by the Board of Directors in March 2020 regarding the granting, adjusted for a discount for expected dividends during the vesting period.

In the reporting period, 2.6 million UniCredit S.p.A. shares were committed as a component of the bonus granted for 2018, with a fair value of €24.9 million. If a corporate action is implemented after the grant date, the number of shares granted will be adjusted accordingly. The shares granted in 2019 as part of the bonus for 2018 will be transferred to 2021, 2022, 2023 and 2024.

The following table shows the fair values per share at the time of granting:

	2019
Fair value of the shares to be transferred in 2021 (€ per share)	10.107
Fair value of the shares to be transferred in 2022 (€ per share)	9.458
Fair value of the shares to be transferred in 2023 (€ per share)	8.686
Fair value of the shares to be transferred in 2024 (€ per share)	7.778

The granted bonuses are recognised in the income statement on a pro rata basis over the respective vesting period.

Cash component bonuses for the 2019 financial year falling due for disbursement in 2020 are recognised in full as an expense. Where cash payments are made at a later date, such payments are subject to the condition that the eligible employees remain employed by UniCredit or partly subject to further performance targets. Accordingly, the vesting period for the promised bonus consists of several financial years (target achievement plus waiting period) and is to be deferred over this period compliant with IAS 19.153 in conjunction with IAS 19.68. Thus, deferred cash payments under the bonus promised for 2019 are recognised as expense in the respective period (starting with the 2019 financial year to the end of the financial year in which the waiting period for the respective tranche ends) on a pro rata basis.

UniCredit S.p.A. delivers shares to the employees for commitments made by HVB Group once the conditions for granting shares have been met. HVB Group reimburses to UniCredit S.p.A. the expenses accruing in this regard. The expense for the shares transferred corresponds to the fair value of the shares at the grant date.

Notes to the Income Statement (CONTINUED)

Long-term Incentive Plan (LTI 2017–2019)

The Long-term Incentive Plan 2017–2019, introduced in 2017 constitutes a further component of the remuneration system in place at UniCredit for top management (Executive Vice Presidents and above) and key players at UniCredit Bank AG. This introduces a situation where a portion of the variable compensation of top management is not specified until after an assessment period of several years. The plan consists of a performance period of three years followed by a three-year retention period with an additional obligatory holding period. The grant is wholly based on UniCredit shares. The respective tranches are subject to malus terms and a claw back arrangement which makes it possible to reclaim each individual share tranche up to 4 years after vesting.

Altogether, 10,350 UniCredit S.p.A. shares with a fair value of $\notin 0.1$ million were conditionally granted for the first time in the reporting period as a component of the LTI 2017–2019. If a capital measure is carried out after the date of grant, the number of shares granted will be adjusted accordingly.

The fair value of the conditionally granted shares is calculated using the average stock market price of UniCredit S.p.A. shares in the month prior to the resolution by the Board of Directors in January 2017 regarding the granting, adjusted for a discount for expected dividends during the vesting period.

The decision on the scope to which these shares are actually granted is made at the end of the performance period, i.e. after the end of the 2019 financial year. UniCredit Bank AG bears the costs of implementation of the Long-term Incentive Plan within HVB.

	2019
Fair value of the shares to be transferred in 2020 (€ per share)	13.253
Fair value of the shares to be transferred in 2021 (€ per share)	12.821
Fair value of the shares to be transferred in 2022 (€ per share)	12.391
Fair value of the shares to be transferred in 2023 (€ per share)	11.963

UniCredit S.p.A. delivers shares to the employees for commitments made by HVB Group once the conditions for granting shares have been met. HVB Group reimburses the expenses accruing in this regard to UniCredit S.p.A. The expense for the shares transferred corresponds to the fair value of the shares at the grant date.

Analysis of outstanding shares (Group Incentive System: LTI 2017–2019):

	201	9	2018	3
	TOTAL	AVERAGE MATURITY	TOTAL	AVERAGE MATURITY

Transferred shares	1,608,422	May 2019	1,738,152	May 2018
From corporate transfers	283,117	May 2021	135,328	February 2020
Expired shares	60,101	August 2021	—	_
Total at end of period	7,135,138	August 2021	6,451,681	September 2020

In the 2019 financial year, prorated expenses of \in 28 million (previous-year period: \in 29 million) accrued for the share component arising from the bonuses promised for 2014 to 2019 in the form of share-based payments compliant with IFRS 2. These expenses are recognised under payroll costs. The provision set up totalled \in 119 million (previous-year period: \in 123 million).

Stock options as a part of share-based payment:

In the years prior to 2012, HVB also used stock options for UniCredit S.p.A. shares within the scope of UniCredit's programme relating to share-based payment, where the strike price was determined before the options were issued to the beneficiary. On account of the corporate actions carried out by UniCredit S.p.A. subsequent to the issue of the options (specifically capital consolidation), these were not exercised and have lapsed. Correspondingly, there are no provisions in place as at year-end 2019 – as was the case in previous years. This also means that there are no longer any effects on operating costs. The stock of 1 million options exercisable at end of 2018 lapsed at the end of 2019. No stock of options remains.

43 Provisions for risks and charges

In reporting year 2019, there was income of \in 313 million from the reversal of provisions for risks and charges after net additions of \notin 919 million in the previous-year period. In April of 2019, the Bank reached a settlement with the US and New York authorities to conclude the proceedings for violations of US economic sanctions in the period from 2002 to 2012. The amounts payable according to the settlement are lower than the provisions set up for it, which means that the amount in excess was able to be reversed. The net additions to provisions for risks and charges in the first half of 2018 are largely due to the increase in provisions for this matter.

(€ millions)

Notes to the Income Statement (CONTINUED)

44 Restructuring costs

Restructuring costs of €363 million were incurred in the reporting period (previous-year period: €14 million).

There will be an adjustment to staffing levels in the framework of implementing the Team 23 four-year strategic plan. If this is not possible through natural fluctuation or further qualification of employees for new tasks, severance agreements will be concluded. For this purpose, a new restructuring provision of \in 324 million has been set aside and in return, the existing restructuring provisions of \in 109 million will be reversed.

HVB Group has transferred its IT activities and certain back-office activities to UniCredit Services S.C.p.A., a subsidiary of UniCredit S.p.A. To that extent, the service provider is a closely associated company. UniCredit Services S.C.p.A. generally bills HVB Group at own cost for services rendered. In the context of the reorientation of the Group through Team 23, restructuring is also planned in the business areas of UniCredit Services S.C.p.A., which provides services for HVB Group. HVB Group has therefore decided to bear costs of €133 million in these areas. This one-off payment will be offset by significant cost reductions in the future, as UniCredit Services S.C.p.A. will in future be able to provide services of equal value at lower cost. This does not place HVB Group at a disadvantage.

45 Net gains/losses on disposals of investments		(€ millions)
	2019	2018
Shares in affiliated companies	(28)	28
Disposal of companies accounted for using the equity method	16	_
Writedowns	(3)	(2)
Total	(15)	26

The income from the sale of shares in affiliated companies includes the losses on disposals of investments for the sale of the subsidiary Ocean Breeze Energy GmbH & Co. KG in the amount of \in 23 million and for the sale of shares in the subsidiary AGROB Immobilien AG in the amount of \notin 8 million. In this regard, it should be noted that up to the point of the transfer of the shares to the purchaser both subsidiaries are recognised, with their income and expenses under the respective items on the income statement. For instance, among other things, unscheduled write-downs are recognised under "Operating costs" for the wind farm held by the subsidiary Ocean Breeze Energy GmbH & Co. KG, while those of AGROB Immobilien AG are recognised as at fair value through profit or loss and the valuation results arising therefrom are included in the item "Net other expenses/income" in the reporting year and in previous years.

The disposal of companies accounted for using the equity method contains the gain of €15 million on the sale of our associated company SwanCap Partners GmbH, Munich.

In the previous year, shares in affiliated companies included the gains of €28 million on the sale of our subsidiary Mobility Concept GmbH, Oberhaching.

46 Impairment on goodwill

In the reporting year, goodwill of €130 million was written off completely for the Commercial Banking business segment. The impairment test to be carried out at least once a year according to IAS 36 showed that the higher of the value in use or fair value less costs to sell is lower than the business segment's carrying amount to be tested (including the goodwill) so that the goodwill allocated to this business segment must be amortised. The decline in the value in use is essentially based on an adjustment of the expected interest scenario: the assumption is now that interest rates will remain negative until the end of the planning horizon. As such, the expected net interest has been adjusted downward. As only part of this decline in projected earnings can be compensated for through cost reductions in the Commercial Banking business segment, there is a consequent decline of value in use for the segment because the value in use corresponds to the discounted surplus cash flows.

In the previous year, goodwill of €288 million was written off for the CIB business segment. This was mainly due to the fact that the value in use for the business segment was lower compared with 2017. Mostly as a result of the increased capital requirements under Basel III and the related additions of allocated equity, the recoverable surplus of the cash flows of the business segment decreases, resulting in a lower value in use (present value of the recoverable surplus of the cash flows) for the business segment.

47 Income tax for the period

	2019	2018
Current taxes	(451)	(29)
Deferred taxes	(100)	(224)
Total	(551)	(253)

The current tax expense for 2019 includes tax income totalling €54 million for previous years (previous-year period: €112 million).

The deferred tax expense in the reporting period contains income totalling \in 28 million arising from value adjustments of deferred tax assets on tax losses carried forward and temporary differences. The counteracting deferred tax expense of \in 128 million resulted overall from the origination and reversal of temporary differences and the utilisation of tax losses. The deferred tax expense of the previous year has increased by \in 99 million to \in 253 million due to the retroactive adoption of IAS 40.33 in conjunction with IAS 18.19(b) for 2018 and arises from income from the value adjustment of deferred tax assets on tax losses carried forward and temporary differences as well as an expense arising from the occurrence and reversal of temporary differences and the utilisation of tax losses.

The differences between computed and recognised income tax are shown in the following reconciliation.

		(€ millions)
	2019	2018
Profit before tax	1,361	736
Applicable tax rate	31.4%	31.4%
Computed income taxes	(427)	(231)
Tax effects		
arising from previous years and changes in tax rates	(7)	47
arising from foreign income	24	15
arising from non-taxable income	25	30
arising from different tax laws	1	(8)
arising from non-deductible expenses	(165)	(138)
arising from value adjustments and the non-recognition of deferred taxes	38	121
arising from amortisation of goodwill	(41)	(90)
arising from other differences	1	1
Recognised income taxes	(551)	(253)

The tax reconciliation 2018 was also adjusted as a result of the retroactive adoption of IAS 40.33 in conjunction with IAS 8.19(b) for 2018. Profit before tax has increased from \in 392 million to \notin 736 million. As a result, the corresponding computed income tax increased from minus \notin 123 million to minus \notin 231 million. With the exception of the item "Arising from different tax laws" (reduction from minus \notin 17 million to minus \notin 8 million), no additional adjustments to the tax reconciliation were necessary.

As in the previous year, an applicable tax rate of 31.4% has been assumed in the tax reconciliation. This comprises the current rate of corporate income tax in Germany of 15.0%, the solidarity surcharge of 5.5% and an average trade tax rate of 15.6%. This reflects the fact that the consolidated profit is dominated by profits generated in Germany, meaning that it is subject to German corporate income tax and trade tax.

Notes to the Income Statement (CONTINUED)

The effects arising from tax on foreign income are in particular a result of different tax rates applicable in other countries.

Non-taxable income includes effects of gains on the disposal of investments (see Note "Gains/losses on disposal of investments").

The item "Tax effects arising from different tax laws" comprises the municipal trade tax modifications applicable to domestic companies and other local peculiarities.

(€ millions)

The deferred tax assets and liabilities are allocated to the following items:

	2019	2018
Deferred tax assets		
Other financial instruments at FVTPL	255	255
Financial instruments at FVTOCI	11	3
Loans and receivables with banks (at cost) and customers (at cost) /		
Deposits from banks/customers	79	50
Hedging derivatives and Hedge adjustment of hedged items in the fair value hedge portfolio (P&L)	282	286
Property, plant and equipment / intangible assets	103	79
Other assets / other liabilities	56	42
Provisions, pension fund and similar	850	736
Losses carried forward / tax credits	115	283
Other	3	3
Total deferred tax assets	1,754	1,737
Effect of offsetting	(673)	(588)
Recognised deferred tax assets	1,081	1,149
Deferred tax liabilities		
Other financial instruments at FVTPL	216	206
Financial instruments at FVTOCI	11	5
Loans and receivables with banks (at cost) and customers (at cost) /		
Deposits from banks/customers	18	17
Hedging derivatives and Hedge adjustment of hedged items in the fair value hedge portfolio (P&L)	290	290
Hedging derivatives and Hedge adjustment of hedged items in the fair value hedge portfolio (OCI)	9	11
Property, plant and equipment / intangible assets	566	240
Other assets / other liabilities	73	70
Other	4	33
Total deferred tax liabilities	1,187	872
Effect of offsetting	(673)	(588)
Recognised deferred tax liabilities	514	284

As a result of the retroactive adoption of IAS 40.33 in conjunction with IAS 8.19(b), the previous year figures for deferred tax assets (reduction by \in 37 million from \in 116 million to \in 79 million) and deferred tax liabilities (increase by \in 186 million from \in 54 million to \in 240 million) were adjusted for the corresponding item property, plant and equipment/intangible assets. This adjustment includes the effects of first time adoption from IAS 40.33 of \in 124 million, which were recognised directly in equity and which led to a reduction of deferred tax assets or an increase in deferred tax liabilities.

Deferred taxes are normally measured using the local tax rates of the respective tax jurisdiction. German corporations use the uniform corporate income tax rate that is not dependent on any dividend distribution of 15.8%, including the solidarity surcharge, and the municipal trade tax rate dependent on the applicable municipal trade tax multiplier. As last year, this resulted in an overall valuation rate for deferred taxes of 31.4% for HVB in Germany. The applicable local tax rates are applied analogously for other domestic and foreign units. Changes in tax rates have been taken into account, provided they had already been enacted or substantially enacted by the end of the reporting period.

All in all, deferred tax assets of \in 347 million (previous-year period: \in 550 million) were recorded directly in equity. On the one hand, these mainly arise from deferred tax assets of \in 759 million (previous-year period: \in 564 million) in connection with the accounting for pension commitments in accordance with IAS 19, which are included in the aforementioned item "Provisions, pension fund and similar" and have been offset against reserves. On the other hand, they are the result of deferred tax liabilities of \in 402 million in connection with the valuation of real estate in accordance with IAS 16.31 and are recognised in the aforementioned item "Property, plant and equipment/intangible assets". Further deferred taxes are listed separately in the aforementioned items "Financial instruments at FVTOCI" and "Hedging derivatives and Hedge adjustment of hedged items in the fair value hedge portfolio (OCI)".

Compliant with IAS 12, no deferred tax assets have been recognised for further corporate tax loss carryforwards, of HVB Group of €919 million (previousyear period: €935 million), most of which do not expire, and trade tax carryforwards of €1,095 (previous year period: €1,195 million), as well as for deductible temporary differences of €948 million (previous-year period: €1,007 million).

The deferred tax assets were calculated using plans of the individual business segments, which are based on segment-specific and general macroeconomic assumptions. The amounts were measured taking into account appropriate valuation discounts. The planning horizon remained unchanged at five years. Measurement was carried out taking into account possible restrictions of local regulations regarding timing and any rules on minimum taxation for tax losses carried forward. Estimation uncertainties are inherent in the assumptions used in any multi-year plan. Where changes are made to the multiyear plan over time, this may have an impact on the valuation of the volume of deferred tax assets already capitalised or to be capitalised.

Total	31,842	33,648

As part of credit risk management notably with regard to the counterparty risk arising from derivatives, master netting arrangements are frequently concluded that, in the event of default by the counterparty, permit all derivatives with this counterparty to be netted and positive and negative fair values of the individual derivatives to be set off to create a net receivable. Such net receivables are normally secured by cash collateral to further reduce the credit risk. This involves the debtor of the net receivable transferring money to the creditor and pledging these cash balances. The amount of the cash collateral is adjusted at regular intervals to reflect the current amount of a potential net receivable, although a receivable arising from cash collateral provided can become a liability arising from cash collateral received and vice versa depending on the balance of the potential net receivable.

Other loans to banks consist mostly of term deposits and bonds.

"Loans and receivables with banks (at cost)" include €2 thousand in subordinated assets as at the reporting date and in the previous year.

1 Mainly due from UniCredit Bank Austria AG.

(€ millions)

Notes to the Balance Sheet (CONTINUED)

54 Loans and receivables with customers (at cost) (€ millions) 2018 2017 Current accounts 7,154 6,641 2,770 Cash collateral and pledged cash balances 2,652 Reverse repos 3,685 3,842 Mortgage loans 48,967 46,635 1.847 Finance leases 1,767 Securities 11,248 13,221 of which: asset-backed securities (ABS) 10,216 8,266 Other loans and receivables 60,853 59,477 Non-performing loans and receivables 1,215 1,364 Total 139,632 133,706

Other loans and receivables largely comprise miscellaneous other loans, instalment loans, term deposits and refinanced special credit facilities.

As part of credit risk management notably with regard to the counterparty risk arising from derivatives, master netting arrangements are frequently concluded that, in the event of default by the counterparty, permit all derivatives with this counterparty to be netted and positive and negative fair values of the individual derivatives to be set off to create a net receivable. Such net receivables are normally secured by cash collateral to further reduce the credit risk. This involves the debtor of the net receivable transferring money to the creditor and pledging these cash balances. The amount of the cash collateral is adjusted at regular intervals to reflect the current amount of a potential net receivable, although a receivable arising from cash collateral provided can become a liability arising from cash collateral received and vice versa depending on the balance of the potential net receivable.

Loans and receivables with customers (at cost) include an amount of €4,887 million (previous year: €4,282 million) funded under the fully-consolidated Arabella conduit programme. This essentially involves buying short-term accounts payable and medium-term receivables under lease agreements from customers and funding them by issuing commercial paper on the capital market. The securitised loans and receivables essentially reflect loans and receivables of European borrowers, with the majority of the loans and receivables relating to German borrowers.

In the reporting year, loans and receivables with customers (at cost) include €103 million (previous year: €34 million) in subordinated assets.

The amount outstanding from assets written off in the reporting period which are subject to an enforcement measure totals €325 million (previous year: €174 million).

Loans and receivables with related parties

The item "Loans and receivables with customers (at cost)" includes the following amounts attributable to related parties:

	2019	2018
Non-consolidated affiliated companies	4	6
of which:		
sister companies	2	3
subsidiaries	2	3
Joint ventures	11	15
Associates	45	115
Other participating interests	422	473
Total	482	609

Amounts receivable from customers under lease agreements (receivables under finance leases)

The amounts receivable under finance lease agreements contained in the item "Loans and receivables with customers (at cost)" are described in more detail in the Note "Information regarding lease operations".

55 Forbearance

The European Banking Authority (EBA) defines forborne exposures as debt contracts in respect of which forbearance measures have been extended. Forbearance measures consist of concessions towards a debtor facing or about to face difficulties in meeting its financial commitments that the lender would not have been prepared to grant under other circumstances. Possible measures range from deferrals and temporary moratoriums, longer periods allowed for repayment, reduced interest rates and rescheduling, and even partial debt forgiveness. It should be noted, however, that not every modification of a lending agreement is due to financial difficulties on the part of the borrower and represents forbearance.

Forborne exposures may be classified as performing or non-performing under the EBA definition. The non-performing portfolio encompasses exposures for which the counterparty is listed at Stage 3 and exposures that do not yet satisfy the EBA's strict criteria for returning to the performing portfolio. The following table shows the breakdown of the forborne exposure portfolio at the reporting date:

						(€ millions)
		2019			2018	
	CARRYING AMOUNT BEFORE ALLOWANCES	ALLOWANCES	CARRYING AMOUNT	CARRYING Amount Before Allowances	ALLOWANCES	CARRYING AMOUNT
Performing exposures	414	(4)	410	530	(8)	522
Non-performing exposures	1,493	(831)	662	1,577	(882)	695
Total	1,907	(835)	1,072	2,107	(890)	1,217

An amount of $\in 1,072$ million is carried as forborne exposures under "Loans and receivables with customers (at cost)" (previous year: $\in 1,217$ million). No forborne exposures are contained in the "Loans and receivables with banks (at cost)", as was the case in the previous year. No securities with forbearance measures were held at the reporting date, as was the case in the previous year.

If allowances have not already been set up for forborne exposures, the loans involved are exposed to increased default risk as they have already become conspicuous. They are thus allocated to Stage 2. Such exposures are closely tracked by the restructuring units or subject to strict monitoring by the back-office units.

56 Hedging derivatives

		. ,

Also including capital increases.
 Also including changes in the group of companies included in consolidation.

None of the companies included in the consolidated financial statements using the equity method is individually significant for the consolidated financial statements of HVB Group. The following table shows in aggregate form the main items in the income statements of the companies accounted for using the equity method:

	2019	2018
Net interest	(2)	(5)
Net gains/(losses) on financial assets and liabilities at fair value	_	(6)
Net other expenses/income	85	104
Operating costs	(75)	(102)
Profit/(loss) before tax	8	(9)
Income tax	(2)	(1)
Consolidated profit/(loss)	6	(10)
Other comprehensive income	_	—
Total comprehensive income	6	(10)

There were no changes in volume arising from other comprehensive income and other equity items at companies accounted for using the equity method. There was no prorated loss during the reporting period or the previous year from companies accounted for using the equity method. Furthermore, there were no prorated cumulative losses in the reporting period or the previous year from companies accounted for using the equity method.

There are no material commitments arising from contingent liabilities of associates.

(€ millions)

58 Property, plant and equipment (€ millions) 2019 2018 Land and buildings 1,915 922 Plant and office equipment 307 329 Right-of-use assets (leases) 285 n/a of which: land and buildings 273 n/a Other property, plant and equipment 1.238 Total 2,507 2,489

Other property, plant and equipment essentially includes the BARD Offshore 1 wind farm owned by the subsidiary Ocean Breeze Energy GmbH & Co. KG.

This item also includes grants of €53 million provided by the European Union in previous years that are classified as government grants in accordance with IAS 20. Compliant with IAS 20.24, these grants have been deducted from the initial cost of the other property, plant and equipment on the assets side of the balance sheet. The cash funds were granted on condition that specific expenses could be demonstrated by Ocean Breeze Energy GmbH & Co. KG. The company has provided the necessary evidence.

The quantity of land and buildings has been reduced due to the reclassification at the half-year of certain properties ("Am Tucherpark" site) as "Noncurrent assets or disposal groups held for sale". As a result of the change in valuation according to the revaluation model in line with IAS 16 and the associated revaluation, undisclosed reserves have been increased and the carrying amount adjusted to the fair value as of 31 December 2019. Whereas for the reporting year the land and buildings were valued at amortised cost (including possible unscheduled write-downs or write-ups), the revaluation method was adopted prospectively with effect from 31 December 2019. The effect of the revaluation recognised in development of property, plant and equipment includes both capital gains in the amount of \in 1,253 million recognised in other comprehensive income and the impairment losses of \in 36 million posted at fair value through profit and loss. Whereas, in the context of measurement at cost, the recoverable amount to be written down in the event of an impairment is based on the property itself (land or building), the revaluation model breaks down carrying amounts into land and buildings. The result was that in some exceptional cases, there were write-downs on land or buildings due to the revaluation, while there was a corresponding write-up on the buildings or land for the same property.

The BARD Offshore 1 wind farm (including other assets) belonging to the Ocean Breeze Energy GmbH & Co. KG subsidiary, which was recognised under other property, plant and equipment, was reclassified to the item "Non-current assets or disposal groups held for sale" with effect from 30 June 2019. As a result of the sale of the Ocean Breeze Energy GmbH & Co. KG subsidiary at the end of 2019, these assets were derecognised.

Including leased assets. More information about leases is contained in Note "Information regarding lease operations".
 Including changes in the group of companies included in consolidation.

59 Investment properties

Investment properties are measured at fair value. As each property is unique and the fair value is determined by expert opinions that take into account the special features of the property being valued, all fair values for investment properties reported in this balance sheet item are allocated to Level 3.

The net carrying amount of right-of-use assets from lease agreements classified as investment properties under investment properties is €61 million at the reporting date (previous year: €56 million).

61 Non-current assets or disposal groups held for sale		(€ millions)
	2019	2018
Cash and cash balances	—	—
Financial assets at FVTPL	_	—
Financial assets at FVTOCI	_	_
Loans and receivables with banks (at cost)	_	_
Loans and receivables with customers (at cost)		_
Investments in associates and joint ventures accounted for using the equity method	—	9
Property, plant and equipment	215	66
Investment properties	229	1,100
Tax assets		_
Other assets		_
Total	444	1,175

With regard to the previous-year figures, a reclassification of €66 million from investment properties to property, plant and equipment was made in the table. This relates to two properties that were originally let to third parties but are now partly used by the Bank so that they no longer meet the criteria for classification as investment property. Non-strategic real estate held for sale is reported under investment properties.

As at 30 June 2019, property, plant and equipment totalling €1,151 million was classified as non-current assets or disposal groups held for sale. This related to the planned disposal of the subsidiary Ocean Breeze Energy GmbH & Co. KG, Bremen, which operates the BARD Offshore 1 wind farm, and other land and buildings. Furthermore, the carrying amount of an associate accounted for using equity method, the disposal of which was completed in the second half of the year, has been reclassified according to IFRS 5.

In the reporting year, all assets classified as "Non-current assets or disposal groups held for sale" were generally disposed of, except for the buildings reclassified at half-year 2019 at the "Am Tucherpark" site as well as three smaller properties. Apart from a small property, which is targeted for sale in the third quarter of 2020, the properties shown in this balance sheet item were sold at the beginning of 2020.

In the reporting year, write-downs of €317 million were recognised on assets classified as non-current assets held for sale or disposal groups for the first time in the reporting period. The write-downs related almost exclusively to the BARD Offshore 1 wind farm, which was written down to the expected proceeds from the disposal. No write-downs were necessary in the previous year.

Fair value level hierarchy

Assets or liabilities whose valuation is derived from directly observable (prices) or indirectly observable (derived from prices) input data (valuation parameters) are generally shown in Level 2. No price can be observed on an active market for the assets or liabilities concerned themselves. As real estate represents a unique item, no trading is conducted in the same property. Nor is there an observable price available on an active market. However, offers submitted within the scope of a selling process constitute observable input data for a fair value calculation, as the real estate may be sold at this price on the basis of binding or reliable non-binding offers.

Level 3 fundamentally relates to assets or liabilities, whose fair value is not calculated exclusively on the basis of observable market data (non-observable input data). External valuation reports are based on generally recognised valuation procedures that refer to parameters for the property that are determined by external assessors (such as the current market rent assumed for the property). The respective fair values therefore feature valuation parameters that are based on model assumptions.

The following table shows the allocation of the investment properties measured at fair value to the respective fair value level hierarchy: (€ millions)

	FAIR VALUE BAS Parameters observed	ED ON VALUATION D ON THE MARKET (LEVEL 2)	PARAMETERS NOT 0	ED ON VALUATION BSERVED ON THE MARKET (LEVEL 3)
	31/12/2019	31/12/2018	31/12/2019	31/12/2018
Investment properties, classified as non-current assets				
or disposal groups held for sale	229	415	_	685

Development of investment properties allocated to Level 3:

	2019	2018
Carrying amount at 1/1	685	244
Additions to the portfolio (classified as Level 3)	_	552
Additions due to reclassification from Level 2 to Level 3	—	—
Disposals from the portfolio (classified as Level 3)	—	—
Disposals due to reclassification from Level 3 to Level 2	(685)	(111)
Carrying amount at 31/12	—	685

Reclassification from Level 3 to Level 2 concerns properties for which the fair value is not determined on the basis of external valuation reports but on the basis of binding or reliable non-binding offers received in the course of the selling process.

There were no reclassifications from Level 2 to Level 3.

62 Other assets

Other assets include prepaid expenses of €124 million (previous year: €131 million).

This item also includes real estate of \leq 388 million (previous year: \leq 306 million) which is purchased by the WealthCap group belonging to HVB in order to either transfer it to funds and place the fund units with investors or sell it directly to institutional investors. These assets are recognised at cost. There are no reasons for a write-down to lower disposal proceeds.

63 Own securitisation

The Bank has securitised its own loan receivables for the purpose of obtaining favourable funding terms on the capital market and generating securities for use as collateral in repurchase agreements.

This involves structuring the cash flows of the underlying loan portfolio, meaning that at least two hierarchical positions (tranches) are formed when dividing up the risks and cash flows. In the case of traditional securitisations (true sale), receivables are sold to a special purpose entity which in turn issues securities.

In the case of the true sale transactions Rosenkavalier 2008 (\in 3.1 billion), Rosenkavalier 2015 (\in 3.5 billion) and Geldilux 2015 (\in 2.1 billion) HVB retained all of the tranches issued by the special purpose entity. The senior positions (or senior tranches) of securities generated in this way can, if required, be used as collateral for repurchase agreements with the European Central Bank (ECB). The underlying receivables continue to be recognised by HVB and the special purpose entities set up for this purpose are fully consolidated in accordance with IFRS 10. The risk-weighted assets have not been reduced.

64 Deposits from banks

Total	70,321	62,943

As part of credit risk management notably with regard to the counterparty risk arising from derivatives, netting arrangements are frequently concluded that, in the event of default by the counterparty, permit all derivatives with this counterparty to be netted and positive and negative fair values of the individual derivatives to be set off to create a net receivable. Such net receivables are normally secured by cash collateral to further reduce the credit risk. This involves the debtor of the net receivable transferring money to the creditor and pledging these cash balances. The amount of the cash collateral is adjusted at regular intervals to reflect the current amount of a potential net receivable, although a receivable arising from cash collateral provided can become a liability arising from cash collateral received and vice versa depending on the balance of the potential net receivable.

Lease liabilities contain liabilities from leases previously classified as operating leases in accordance with IAS 17 and which are recognised for the first time in the course of the implementation of IFRS 16. These are shown here together with existing liabilities from finance leases. Liabilities from new leases entered into in 2019 are also included.

As part of credit risk management notably with regard to the counterparty risk arising from derivatives, netting arrangements are frequently concluded that, in the event of default by the counterparty, permit all the derivatives with this counterparty to be netted and positive and negative fair values of the individual derivatives to be set off to create a net receivable. Such net receivables are normally secured by cash collateral to further reduce the credit risk. This involves the debtor of the net receivable transferring money to the creditor and pledging these cash balances. The amount of the cash collateral is adjusted at regular intervals to reflect the current amount of a potential net receivable, although a receivable arising from cash collateral provided can become a liability arising from cash collateral received and vice versa depending on the balance of the potential net receivable.

The effects arising from changes in the discount rate and compounding led to an increase of $\in 2$ million (previous year: $\in 3$ million) in provisions recognised in the income statement in the reporting period. The effect arising from changes in the discount rate used for pension provisions is recognised in OCI.

Provisions for pensions and similar obligations

HVB Group grants its employees post-employment benefits that are structured as defined benefit plans or defined contribution plans.

In the case of defined benefit plans, the Bank undertakes to pay a defined future pension. The financial resources required to do so in the future can be accrued within the company (internal financing) or by payment of specific amounts to external pension funds (external financing).

In the case of defined contribution plans, the Bank undertakes to pay defined contributions to external pension funds which will later make the pension payments. Apart from paying the periodic contributions, the company has de facto no further obligations.

Defined benefit plans

Characteristics of the plans

The provisions for pensions and similar obligations include the direct commitments to HVB Group employees under company pension plans. These defined benefit plans are based in part on final salaries and in part on building-block schemes involving dynamic adjustment of vested rights. Fund-linked plans with a guaranteed minimum rate of interest of 2.75% have been granted in Germany since 2003.

The obligations financed by Pensionskasse der HypoVereinsbank VVaG (HVB Pensionskasse) are included in the disclosures regarding pension obligations (the total includes the obligations of HVB Unterstützungskasse e.V. reinsured by HVB Pensionskasse). The standard HVB Group valuation parameters are used when calculating these obligations. Any plan surplus is subject to the rules governing the asset ceiling, as the assets belong to the members of HVB Pensionskasse.

HVB Group set up plan assets in the form of contractual trust arrangements (CTA). This involved transferring the assets required to fund its pension obligations to legally independent trustees, including HVB Trust e.V., which manage the assets in line with the applicable trustee contracts.

There are no legal or regulatory minimum funding requirements in Germany.

HVB Group reorganised its company plans for pensioners (direct commitments) in 2009. HVB Trust Pensionsfonds AG (pension fund) was set up in this process. Both the pension obligations to pensioners who in October 2009 had already received pension benefits from the Bank and the assets required to cover these obligations were transferred to the pension fund. In December 2016, pension commitments and obligations of the Bank were again transferred to the pension fund for further beneficiaries who in October 2016 had already received pension benefits and the corresponding plan assets to cover the beneficiaries' claims. The pensioners' pension claims are not affected by the transfer; HVB continues to guarantee the pension. The pension fund is a legally independent institution regulated by the German Federal Financial Supervisory Authority (BaFin).

HVB Group is exposed to various risks in connection with its defined benefit plans. Potential pension risks exist with regard to both the benefit obligations (liabilities side) and the plan assets allocated to cover the beneficiaries' claims (assets side). The defined benefit obligations are exposed to actuarial risks such as interest rate risk, longevity risk, salary- and pension-adjustment risk and inflation risk. In the case of fund-linked pension obligations, there is the risk that it will prove impossible in the long run to generate the guaranteed interest rate of 2.75% from the funds allocated to the pension commitments, given persistently low interest rates. With regard to the capital investment, the assets are primarily exposed to market risk such as price risks in securities holdings or changes in the value of real estate investments.

The major pension risk is thus expressed as a deterioration in the funded status as a result of unfavourable developments of defined benefit obligations and/or plan assets, since the sponsoring companies are required to act to service the beneficiaries' claims in the event of any plan deficits. No unusual, company-specific or plan-specific risks or material risk concentrations that could affect the Group's pension plans are currently identifiable.

Reconciliations

The amounts arising under defined benefit plans for post-employment benefits recognised in the consolidated balance sheet can be derived as follows:

		(C minoria)
	2019	2018
Present value of funded pension obligations	5,641	4,859
Fair value of plan assets	(4,314)	(4,073)
Funded status	1,327	786
Present value of unfunded pension obligations	12	15
Net liability (net asset) of defined benefit plans	1,339	801
Asset ceiling	_	—
Capitalised excess cover of plan assets		_
Recognised pension provisions	1,339	801

The following tables show the development of the present value of the total (funded and unfunded) pension obligations, the fair value of the plan assets and the net defined benefit liability (net assets) from defined benefit plans resulting from the offsetting of these totals. The tables also show the changes in the effects of the asset ceiling during the reporting period and the reconciliations from the opening to the closing balance of the capitalised excess cover of plan assets and the recognised provisions for pensions and similar obligations:

At the end of the reporting period, 33% (previous year: 32%) of the present value of the defined benefit obligations of \in 5,653 million (previous year: \notin 4,874 million) was attributable to active employees, 25% (previous year: 23%) to former employees with vested benefit entitlements and 42% (previous year: 45%) to pensioners and surviving dependants.

Actuarial assumptions

The main actuarial assumptions used to determine the present value of the defined benefit obligation are listed below. The summarised disclosure for several plans takes the form of weighted average factors:

listed below. The summarised disclosure for several plans takes the form of weighted average factors:		
	2019	2018
Actuarial interest rate	1.20	2.10
Rate of increase in pension commitments	1.50	1.70
Rate of increase in future compensation and over career	2.00	2.00

The mortality rate underlying the actuarial calculation of the present value of the defined benefit obligation is based on the modified Heubeck 2018 G tables (generation tables) that allow for the probability of mortality to fall to 95% (previous year: 95%) for women and 80% (previous year: 80%) for men.

HVB Group similarly reduces the probability of disability based on these guidance tables to 80% (previous year: 80%) for women and men equally. Since any changes in the actuarial assumptions regarding disability fundamentally only have a minor impact on the present value of the defined benefit obligation, HVB Group does not calculate any sensitivities for this valuation parameter.

In addition, the present value of the defined benefit obligation is influenced by assumptions regarding future inflation rates. Inflation effects are normally taken into account in the assumptions listed above.

Sensitivity analyses

The sensitivity analyses discussed below are intended to show how the present value of the defined benefit obligation would change given a change to an actuarial assumption in isolation with the other assumptions remaining unchanged compared with the original calculation. Possible correlation effects between the individual assumptions are not taken into account accordingly. The sensitivity analyses are based on the changes to the actuarial assumptions expected by HVB Group at the reporting date for the subsequent reporting period.

An increase or decrease in the significant actuarial assumptions in the amount of the percentage points shown in the table would have had the following impact on the present value of the defined benefit obligation at the reporting date:

	CHANGES OF THE ACTUARIAL ASSUMPTIONS	IMPACT (OF PEN		
		PRESENT VALUE OF LIABILITY	ABSOLUTE CHANGES	RELATIVE CHANGES
		€ millions	€ millions	in %
Sensitivities at 31/12/2019				
	Basic value of the calculation of sensitivity	5,653		
Actuarial interest rate	Increase of 25 basis points	5,403	(250)	(4.4)
	Decrease of 25 basis points	5,922	269	4.8
Rate of increase in pension	Increase of 25 basis points	5,824	171	3.0
commitments	Decrease of 25 basis points	5,491	(162)	(2.9)
Rate of increase in future	Increase of 25 basis points	5,658	5	0.1
compensation/career trend	Decrease of 25 basis points	5,648	(5)	(0.1)
Sensitivities at 31/12/2018				
	Basic value of the calculation of sensitivity	4,874		
Actuarial interest rate	Increase of 25 basis points	4,672	(202)	(4.1)
	Decrease of 25 basis points	5,090	216	4.4
Rate of increase in pension	Increase of 25 basis points	5,012	138	2.8
commitments	Decrease of 25 basis points	4,742	(132)	(2.7)
Rate of increase in future	Increase of 25 basis points	4,879	5	0.1
compensation/career trend	Decrease of 25 basis points	4,869	(5)	(0.1)

The observable decline in mortality rates is associated with an increase in life expectancy depending on the individual age of each beneficiary. In order to determine the sensitivity of the mortality or longevity, the lifetime for all beneficiaries was increased by one year. The present value of the defined benefit obligation at 31 December 2019 would rise by \in 205 million (3.6%) to \in 5,858 million (previous year: by \in 163 million (3.3%) to \in 5,037 million) as a result of this change. HVB Group considers an opposite trend, that is an increase in mortality or a decrease in life expectancy, to be unlikely and has therefore not calculated a sensitivity for this case in the reporting period (or in the previous year).

When determining the sensitivities of the defined benefit obligation for the significant actuarial assumptions, the same method has been applied (projected unit credit method) as has been used to calculate the pension provisions recognised in the consolidated balance sheet. Increases and decreases in the various valuation assumptions do not entail the same absolute amount in their impact when the defined benefit obligation is calculated, due mainly to the compound interest effect when determining the present value of the future benefit. If more than one of the assumptions are changed simultaneously, the combined effect does not necessarily correspond to the sum total of the individual effects. Furthermore, the sensitivities only reflect a change in the present value of the defined benefit obligation for the actual extent of the change in the assumptions (such as 0.25%). If the assumptions change to a different extent, this does not necessarily have a straight-line impact on the present value of the defined benefit obligation. Since the sensitivity analyses are based on the average duration of the expected pension obligation, and consequently the expected disbursement dates are not taken into account, they only result in indicative information or trends.

Asset liability management

The plan assets are managed by a trustee with a view to ensuring that the present and future pension obligations are settled by applying an adequate investment strategy, thus minimising the risk of the trustors or sponsoring companies having to provide additional capital.

Under the CTA, the capital investment decisions are taken by an institutionalised body, the Investment Committee, which defines the investment strategy and policies for the plan assets. The concept calls for the assets to be invested in line with the structure of the pension obligations in particular and an appropriate return to be generated taking into account the associated risks. In order to optimise the risk/return ratio, the Investment Committee sets strategic allocation ranges and investment limits for the asset classes in the plan assets, which can be exploited flexibly within the agreed risk budget. The bodies and processes required by law have been set up as appropriate for HVB Pensionskasse and the pension fund.

In order to allow for an integral view on plan assets and defined benefit obligations (asset liability management), the pension risks are monitored regularly with the aid of a specially developed risk model and included in the Bank's risk calculation. Since HVB Group employs various methods involving legally independent entities to implement the company pension plans, risk management concepts including stress tests and analysis of risk-taking capacity are also applied in specific instances.

Alongside the actuarial risks mentioned above, the risks associated with the defined benefit obligations relate primarily to financial risks in connection with the plan assets. The capital investment risk in the funding of the pension obligations encompasses notably potential liquidity, credit, concentration, market and real estate risks.

Liquidity risk can result from non-existent or limited marketability of the capital investments, which may cause losses to be realised when the assets are sold to settle payment obligations. HVB is not currently exposed to this risk as the expected incoming payments are sufficient to meet the payment obligations. In addition, an appropriate proportion of the capital investments is invested in assets classified as liquid (cash and cash equivalents/term deposits). Liquidity projections are prepared at regular intervals with a view to continue avoiding this risk.

Credit risk stems from anything from a deterioration in the solvency of individual debtors through to insolvency. This risk is mitigated by deliberately spreading the capital investments and complying with specific investment policies regarding the creditworthiness of issuers. The relevant ratings are monitored constantly.

Concentration risk arises from excessive investment in an individual asset class, individual industry, individual security or individual property. This risk is countered by means of broad diversification in line with investment policies, ongoing review of the capital investment policy and specific parameters for the asset managers. Among other things, targeted investment in mixed investment funds is used to reduce concentration risk by diversifying the composition of the fund assets.

Market risk has its roots in the risk of declining fair values caused by negative changes in market prices, equity prices and changes in interest rates. Here, too, compliance with the parameters specified for the composition and diversity of the capital investments is ensured and risk-limiting investment policies are defined for the asset managers.

Real estate risk exists with both directly held real estate and special-purpose real estate funds. It results from factors like possible unpaid rents, loss of property value, high maintenance costs and declining location attractiveness. To minimise these risks, the proportion that may be invested in real estate is constrained by a limit and the greatest possible diversification is targeted. In addition, no short-term rental contracts are concluded for directly owned real estate.

Disaggregation of plan assets

The following table shows a disaggregation of the plan assets used to fund the defined benefit obligations by asset class:		(€ millions)
	2019	2018
Participating interests	68	61
Debt securities	270	124
Properties	220	215
Mixed investment funds	3,132	3,034
Property funds	518	427
Cash and cash equivalents/term deposits	100	76
Other assets	6	136
Total	4,314	4,073

Quoted market prices in an active market were observed for most of the fixed-income securities held directly and almost all the types of asset held in the mixed investment fund. As a general rule, the fixed-income securities have an investment grade rating.

In terms of amount, the investment in mixed investment funds represents the lion's share of the asset allocation for the plan assets. The deliberate investment in various asset classes and the general restriction to traditional investment instruments serve to ensure a risk-mitigating minimum diversification and also reflect a conservative underlying strategy. The high proportion of bonds with a medium- to long-term benchmark (such as government and corporate bonds, and Pfandbriefe) held in the fund implies low volatility with the intention of balancing the development in the value of the long-term pension commitments that follows general interest rates.

	2019	2018

Other assets	—	—
Total	353	239

Future cash flows

There are financing agreements at HVB Group that contain measures to fund defined benefit plans. The minimum funding requirements included in the agreements may have an impact on future contribution payments. In the case of HVB Trust Pensionsfonds AG, HVB Group is liable for calls for additional capital should the assets fall below the minimum cover provision. For HVB Pensionskasse, the Bank is required to make an additional contribution if the permanent financing of the obligations is no longer ensured. No such requirement for calls for additional capital exists for the CTA.

HVB Group intends to make contributions of €27 million (previous year: €27 million) to defined benefit plans in the 2020 financial year.

The weighted average duration of HVB Group's defined benefit obligations at the reporting date amounted to 18.8 years (previous year: 17.6 years).

Multi-employer plans

HVB Group is a member of Versorgungskasse des Bankgewerbes e.V. (BVV), which also includes other financial institutions in Germany in its membership. BVV provides company pension benefits for eligible employees of the sponsoring companies. The BVV tariffs allow for fixed pension payments with profit participation. On account of the employer's statutory subsidiary liability applicable in Germany (Section 1 (1) 3 of the German Occupational Pensions Act (Betriebsrentengesetz – BetrAVG)), HVB Group classifies the BVV plan as a multi-employer defined benefit plan.

Since the available information is not sufficient to allow this plan to be accounted for as a defined benefit plan by allocating to the individual member companies the assets and the pension obligations relating to active and former employees, HVB Group accounts for the plan as if it were a defined contribution plan.

In the event of a plan deficit, the Group may be exposed to investment risk and actuarial risk. In addition, a need for adjustment might arise from compensating the beneficiaries for inflation. HVB Group does not currently expect that the statutory subsidiary liability will be used.

HVB Group expects to book employer contributions of $\in 21$ million for this pension plan in the 2020 financial year (previous year: $\in 22$ million). Due to the current interest rate environment, BVV reduced the payment for the future pension rights in 2016. To exempt the Bank's employees from this reduction in payment, the Bank, as the employer, pays an additional contribution so that employees do not suffer any disadvantage in their future pension rights. This additional contribution amounts to $\in 6$ million in the 2020 financial year (previous year: $\in 6$ million).

Defined contribution plans

HVB Group companies pay fixed amounts for each period to independent pension organisations for the defined contribution pension commitments. The contributions for the defined contribution plans recognised as current expense under payroll costs totalled €24 million during the reporting period (previous year: €25 million).

The employer contributions to the statutory pension scheme and the alternative professional pension schemes, which qualify as defined contribution state plans, are similarly included in payroll costs. Such contributions amounted to €83 million in the reporting period (previous year: €83 million).

1 Transfers between the individual stages are shown here (disposal at the previous stage, addition at the new stage).

Restructuring provisions

The restructuring provisions essentially relate to measures taken by HVB Group as part of its Team 23 strategic plan. The implementation of the fouryear Team 23 strategic plan will lead to an adjustment in the personnel capacity. Where this cannot be achieved through natural fluctuation or further qualification of employees for new roles, severance agreements will be concluded. In essence, this involved setting aside new restructuring provisions of \in 324 million, which were offset by the reversal of existing restructuring provisions in the amount of \in 109 million.

Other provisions

The payroll provisions carried under other provisions encompass long-term obligations to employees such as provisions for service anniversary awards, early retirement or partial retirement. In addition, payroll provisions cover the parts of the bonus that are disbursed on a deferred basis, or transferred in cases where the bonus is granted in the form of shares, with the waiting period exceeding one year. The disbursement of these bonuses is additionally dependent upon the achievement of pre-defined targets. The bonus commitments for the 2014, 2015, 2016, 2017, 2018 and 2019 financial years to be disbursed as of 2020 are included here accordingly. The bonus provisions included here have been taken to the income statement in both the reporting period and the previous financial years. It is considered highly probable that the bonus will be disbursed. For details of the bonus plan, please refer to the Note "Operating costs".

The decline in provisions for rental guarantees and dismantling obligations from \in 154 million in the previous year to \in 95 million in the reporting year arose largely from the sale of the subsidiary Ocean Breeze Energy GmbH & Co. KG, as a provision had been set aside in this company for the purpose of dismantling the BARD Offshore 1 wind farm when it reaches the end of its useful life.

The other provisions of \leq 312 million (previous year: \leq 1,617 million) include provisions of \leq 217 million (previous year: \leq 1,535 million) for legal risks, litigation fees and damage payments. The sharp decline in the item "Other provisions" is mainly attributable to the conclusion of the proceedings for violations of US economic sanctions. In April 2019, the Bank reached a settlement with the US and New York authorities to conclude the proceedings for violations of US economic sanctions in the period from 2002 to 2012. The amounts paid under the settlement are lower than the provisions that had been set aside for this purpose in previous years, so that the excess portion could be reversed.

The amount of the respective provisions reflects the best estimate of the amount required to settle the obligation at the reporting date. Nevertheless, the amounts involved are subject to uncertainties in the estimates made. Besides the assumptions regarding periods, the cost estimates are validated regularly for rental guarantees in particular.

With the exception of the provisions for rental guarantees and dismantling obligations, most of the other provisions are normally expected to be utilised during the following financial year.

73 Shareholders' equity

The shareholders' equity of HVB Group at 31 December 2019 consisted of the following:

Subscribed capital

At 31 December 2019, the subscribed capital of HVB totalled €2,407 million (previous year: €2,407 million) and consisted of 802,383,672 no par shares of common bearer stock (previous year: 802,383,672 no par shares).

The proportionate amount of share capital attributable to the share amounts to €3.00 per no par share. The shares are fully paid in.

Additional paid-in capital

The additional paid-in capital results from premiums generated on the issuance of shares; the total at 31 December 2019 amounted to \notin 9,791 million (previous year: \notin 9,791 million).

Other reserves

Other reserves of \in 3,396 million (previous year: \in 5,481 million) mainly contain retained earnings. The decrease is essentially based on the balance from the reclassification of \notin 2,495 million to consolidated profit, the actuarial losses of \notin 428 million on defined benefit plans recognised under other reserves and the initial transfer of \notin 852 million to the revaluation surplus for owner-occupied real estate.

Within the framework of the prospective adoption of the revaluation method according to IAS 16, the difference between the fair value of owner-occupied real estate and the previous carrying amount at amortised cost was allocated to the revaluation surplus for owner-occupied real estate through other comprehensive income in the consolidated statement of total comprehensive income, with deferred taxes deducted.

Change in valuation of financial instruments

At €28 million, the hedge reserve is unchanged over the previous year.

The FVTOCI reserve of \in 15 million (previous year: \in 4 million) includes the difference between the amortised cost and fair value of the securities allocated to this category. In the reporting year, the sum of \in 11 million was transferred through other comprehensive income to the consolidated statement of total comprehensive income.

74 Subordinated capital

The following table shows the breakdown of subordinated capital included in the balance-sheet items "Deposits from banks", "Deposits from customers" and "Debt securities in issue":

	2019	2018
Subordinated liabilities	410	493
Hybrid capital instruments	54	52
Total	464	545

In this context, subordinated liabilities and hybrid capital instruments have been classified as Tier 2 capital for banking supervisory purposes in accordance with the provisions of Articles 62 (1a), 63 to 65, 66 (1a) and 67 CRR. The hybrid capital instruments are allocated to Tier 2 capital in accordance with Articles 87 and 88 CRR.

The following table shows the breakdown of subordinated capital by balance sheet item:		(€ millions)
	2019	2018
Deposits from customers	—	_
Deposits from banks	313	313
Debt securities in issue	151	232
Total	464	545

We have incurred interest expenses of €11 million (previous year: €16 million) in connection with this subordinated capital. Subordinated capital includes pro rata interest of €1 million (previous year: €4 million).

Subordinated liabilities

The borrowers cannot be obliged to make early repayments in the case of subordinated liabilities. In the event of insolvency or liquidation, subordinated liabilities can only be repaid after the claims of all primary creditors have been settled.

There were subordinated liabilities of €313 million payable to related parties in the reporting period (previous year: €313 million).

Hybrid capital instruments

Hybrid capital instruments may include, in part, issues placed by specially created subsidiaries in the form of capital contributions from silent partners.

Our hybrid capital instruments satisfy the requirements for classification as Tier 2 capital as defined in Article 63 CRR. At the reporting date, no hybrid capital of HVB Group was included in our regulatory capital base.

Notes to the Cash Flow Statement

75 Notes to the items in the cash flow statement

The cash flow statement shows the cash flows for the reporting period, divided into the areas "operating activities", "investing activities" and "financing activities". Operating activities are defined broadly enough to allow the same breakdown as for operating profit.

The cash and cash equivalents shown correspond to the "Cash and cash balances" item in the balance sheet, comprising both cash on hand and deposits with central banks repayable on demand.

The "Change in other non-cash positions" item comprises the changes in the valuation of financial instruments, net additions to deferred taxes, changes in provisions, changes in protect and deferred interest, the reversal of premiums and discounts, changes arising from measurement using the equity method and minority interests in net income.

All proceeds and payments from transactions relating to equity and subordinated capital are allocated to cash flow from financing activities. The portfolios of subordinated and hybrid capital included in the cash flow from financing activities as financing liabilities have decreased by a net \in 130 million in the reporting period (previous year: \in 45 million).

Gains of €1,140 million were generated on the disposal of shares in fully consolidated companies in the 2019 financial year, of which €1,101 million was in cash.

There were no significant acquisitions of subsidiaries or associates in the 2019 and 2018 financial years.

The following table shows the assets and liabilities of the fully consolidated companies sold:

Other Information

76 Events after the reporting period

At the beginning of December 2019, HVB sold to Commerz Real the HVB-owned property Am Tucherpark, comprising an office building complex and a hotel. The transfer of the property occurred on 15 January 2020 (closing). This will result in the recognition of a significant profit in financial year 2020.

77 Information regarding lease operations

HVB Group has adopted the new leasing standard IFRS 16 for the first time in the current financial year in accordance with the transitional provisions based on the modified retrospective approach and has therefore not adjusted the comparative information for the previous year (see Note "First-time adoption of new IFRS accounting standards"). As a result, the previous-year figures are still reported in accordance with the accounting and valuation methods based on the leasing standard IAS 17, including the corresponding interpretations, that applied prior to 1 January 2019. For a detailed presentation of the accounting and valuation methods with regard to the leases of HVB Group as lessee and lessor, please refer to the Note "Lease operations".

Information regarding the current financial year (IFRS 16)

HVB Group as lessee

As of 1 January 2019, the lessee's previous classification of lease agreements into operating leases and finance leases was abolished with IFRS 16 and a uniform lessee accounting system was introduced in its place. According to this approach the lessee always recognises right-of-use assets and lease liabilities for all lease agreements in its balance sheet. Only short-term leases and leases where the underlying asset is of low value are excluded.

The rental and lease agreements entered into by HVB Group as lessee relate to real estate (land and buildings) on the one hand and movables (operating and office equipment including vehicles) on the other hand. The lease agreements for real estate are generally concluded for a non-cancellable basic term of ten years and usually include extension options with periods of between three and five years. These agreements also contain price adjustment clauses in the form of stepped rents or index clauses; termination or purchase options are not usually agreed. The extension options are used to give HVB Group as lessee and not by the respective lessor. The lease agreements for movables have been concluded at customary market terms for lease periods of between three and nine years. No variable lease payments were agreed for any of the lease agreements concluded by HVB Group as lessee. The Bank's obligations under lease agreements are secured by the ownership rights of the respective lessor to the leased assets. Leased objects may therefore not be used as security for borrowing.

Amounts recognised in the consolidated balance sheet

In the consolidated balance sheet the following items were recognised in connection with lease agreements where HVB Group is lessee.

The following table shows the carrying amount of the right-of-use assets reported in property, plant and equipment at the end of the reporting period by class of underlying asset:

	2019
Right-of-use assets (property, plant and equipment)	
Leased land and buildings	273
Leased plant and office equipment	12
Carrying amount 31/12	285

Additions to the right-of-use assets recognised in property, plant and equipment amounted to €35 million during the financial year.

Other Information (CONTINUED)

The carrying amount of the lease liabilities reported in the items "Deposits from customers" and "Deposits from banks" at the end of the report period is as follows:

	(e minoria)
	2019
Lease liabilities	487
Carrying amount 31/12	487

(€ millio

(€ millions)

The following table contains a maturity analysis for lessee's lease liabilities and shows the undiscounted lease payments to be made after the reporting date:

	2019
up to 1 year	63
from 1 year to 2 years	58
from 2 years to 3 years	55
from 3 years to 4 years	53
from 4 years to 5 years	50
from 5 years and over	242
Total	521

HVB Group sees no significant liquidity risk with regard to lease liabilities. The lease liabilities are monitored by the Bank's Treasury unit.

Amounts recognised in the consolidated income statement

The consolidated income statement contains the following amounts in connection with leases in which HVB Group is lessee.

The following tables shows the depreciation charge on the right-of-use assets contained in property, plant and equipment for the reporting period by class of underlying assets. The write-downs are recognised under "Amortisation, depreciation and impairment losses on intangible and tangible assets" within operating costs:

 (€ millions)

 Depreciation expense from right-of-use assets (property, plant and equipment)

Depresidation expense norming of doe doords (property, plant and equipmenty	
Leased land and buildings	41
Leased plant and office equipment	12
Total	53

The effect recognised in interest expense from the interest on lease liabilities for the reporting year is as follows:	(€ millions)
	2019
Interest expense from lease liabilities	6

The following table shows other expenses and income in connection with lease agreements with lessees that were recognised in the consolidated income statement during the financial year. Expenses in connection with short-term lease agreements and lease agreements that are based on low-value assets, are recognised in the "Other administrative expenses" item, whereas income from subleasing the right-of-use assets is shown as other operating income in property, plant and equipment:

	2019
Expense from short-term leases	10
Expense from leases for low-value assets (excl. expense from short-term leases	
based on an asset of low value)	_
Income from subleases of right-of-use assets (property, plant and equipment)	3

Right-of-use assets that correspond to the definition of an investment property and are reported as investment properties were not included in the above figures for carrying amount, additions, depreciation amount or for income from the subleasing of right-of-use assets. Disclosures on such right-of-use assets can be found in the Note "Investment Properties".

In 2019, cash outflows from leases amounted to €72 million.

In the reporting period, HVB Group carried out a sale and leaseback transaction as seller/lessee for two owner-occupied properties (property, plant and equipment) which are previously classified as "Non-current assets or disposal groups held for sale" in accordance with IFRS 5. The assets were first transferred to the buyer/lessor (sale) in accordance with the criteria for sales as set out in IFRS 15 and then partially leased back (leaseback) from them. In the process, HVB Group has recognised the right of use associated with the leasing back of the real estate with that portion of the former carrying amount that relates to the right of use retained by the Group. Right-of-use assets totalling \in 6 million were recognised for this purpose in the consolidated balance sheet.

In the reporting year, HVB Group acted as seller/lessee for another sale-and-leaseback transaction. For reasons of portfolio and location optimisation, the Bank sold the "Am Tucherpark" site in Munich to the buyer/lessor Commerz Real, and leased part of the property back from it again. When the purchase agreement was signed in early December, a lease agreement was concluded for the transfer of use of the administrative buildings used by the Bank. The lease agreement will become effective when the property is transferred to the buyer (as of reporting date not yet effected). As a result, no right-of-use assets and lease liabilities have been recognised in the consolidated balance sheet as at 31 December 2019. The future cash outflows to which HVB Group is exposed in connection with this agreement amount to €109 million in total (indexed rental payments of approximately €24 million yearly) and are spread over the agreed basic term of 54 months. As lessee, HVB Group has the right to extend the lease agreement once for a period between 12 and 36 months; no option exists for an early termination of the agreement.

HVB Group as lessor

According to IFRS 16, the lessor is still required to classify leases either as operating leases or finance leases.

Other Information (Continued)

Operating leases

In the reporting year, HVB Group acted as lessor in operating leases. These lease agreements mainly encompass real estate (land and buildings) and movable assets such as plant and office equipment, motor vehicles and industrial machinery. The lease agreements for real estate have terms of between three and five years. These agreements are based on customary market terms and include extension options and price adjustment clauses in the form of stepped rents or index clauses; termination options are not agreed. If the lessee exercises its right to extend the lease agreement, market review clauses are used. By contrast, leases for the lessee do not usually include any option to purchase the leased property at the end of the lease period. Unguaranteed residual values do not represent a significant risk for HVB Group, as these relate to properties that have exhibited a steadily increasing trend in market values over many years. The Bank sees no indication of any future change in this trend. The lease agreements for movable assets are generally concluded for terms of between four and ten years and include an additional purchase option; they do not include extension or price adjustment clauses. No variable leasing payments were agreed by HVB Group as lessor in the concluded operating lease agreements.

The following table shows the lease income from lessor operating leases in the consolidated income statement during the financial year:

	(
	2019
Income from operating leases	146

(€ millions)

The following table contains a maturity analysis of undiscounted payments from operating leases that the lessor will receive in the future: (€ millions)

	2019
up to 1 year	84
from 1 year to 2 years	32
from 2 years to 3 years	31
from 3 years to 4 years	24
from 4 years to 5 years	20
from 5 years and over	91
Total	282

At the end of the reporting period, the carrying amount of the assets included in property, plant and equipment which are the subject of an operating lease amounts to €112 million.

Finance leases

In the reporting year HVB Group leased mobile assets as a lessor under finance leases. These mainly included plant and office equipment, aircraft, motor vehicles and industrial machinery. As a general rule, the lease agreements stipulate lease periods of between four and ten years and possibly a pre-emptive right in favour of the lessor; they do not contain any extension or price adjustment clauses. The residual risk for these leased assets is insignificant because there is a secondary market. No variable lease payments were agreed by HVB Group as lessor in the finance leases concluded.

The following table shows the amounts recognised in the consolidated income statement for finance leases held by the lessor during the financial year:

held by the lessor during the financial year:	(€ millions)
	2019
Gains/(losses) on the disposal of finance leases	—
Finance income from the net investment in the lease (interest income from finance lease receivables)	23

The following table contains a maturity analysis of the lessor's existing loans and receivables with customers and banks (at cost) from the lease operations (receivables under finance leases) and shows the undiscounted lease payments to be received after the reporting date. The subsequent reconciliation to the net investment in the lease makes the unguaranteed residual value and the still unrealised finance income transparent in relation to the receivables from leases:

	2019
up to 1 year	682
from 1 year to 2 years	439
from 2 years to 3 years	319
from 3 years to 4 years	193
from 4 years to 5 years	111
from 5 years and over	151
Total amount of undiscounted lease payments to be received	1,895
+ Unguaranteed residual value	—
= Gross investment in the lease	1,895
- Unrealised finance income	- 79
= Net investment in the lease (finance lease receivables)	1,816

The overall amount of discounted lease payments encompasses the payments to be made by the lessee to the lessor in the finance lease including any residual value guarantees.

Unguaranteed residual value is that part of the residual value of the underlying asset whose realisation is not secured by the lessor.

Gross investment in the lease is the sum of the lease payments and the unguaranteed residual value.

Unrealised finance income is the difference between the lessor's gross investment in the lease and its present value (net investment). It corresponds to the return implicit in the lease between the reporting date and the end of the lease.

The net investment in the lease (receivables under finance leases) is therefore determined by discounting the gross investment with the interest rate on which the lease is based.

Other Information (CONTINUED)

For receivables under finance leases in the item ("Loans and receivables from customers (at cost)", the development of the gross carrying amounts, the breakdown by rating classes, and analysis of allowances is shown below (see also Note "Loans and receivables from customers (at cost)"):

	STAGE 1	STAGE 2	STAGE 3	POCI	TOTAL

Disclosures regarding the previous year (IAS 17)

HVB Group as lessee

Until 31 December 2018, leases were classified by the lessee as either operating or finance leases in accordance with IAS 17.

Operating leases

Until the end of 2018, HVB Group acted as lessee in connection with operating leases. The current commitments related primarily to rental and lease agreements for real estate (land and buildings) and moveable assets, mainly comprising plant and equipment, including motor vehicles. The lease agreements for real estate generally contained extension options and price adjustment clauses in the form of stepped rents or index clauses; options to purchase were agreed in some cases. The lease agreements for movable assets were concluded at customary market terms for lease periods of between three and nine years. All of the operating leases entered into by HVB Group as lessor contained no agreements on conditional lease payments (contingent rental payments).

In 2018, the commitments arising from operating leases under lease and sublease agreements resulted for the lessee in minimum lease payments of €58 million being recognised as expense in the consolidated income statement.

At the reporting date, the following cumulative minimum lease payments from non-cancellable operating leases were expected for future financial years, which were due as follows:

	2018
up to 1 year	55
from 1 year to 5 years	131
from 5 years and over	65
Total	251

(€ millions)

Other Information (Continued)

HVB Group had concluded sublease agreements for real estate at customary market terms, some of which include rent adjustment clauses and extension options. Payments of €7 million received from subleases were recognised as income in the consolidated income statement in 2018.

In 2018, the aggregate future minimum lease payments arising from non-cancellable subleases expected to be received in the subsequent financial years amounted to €19 million.

Finance leases

The finance leases entered into by HVB Group as lessee up until 31 December 2018 related to real estate (land and buildings). The lease agreements generally contained an option to purchase and price adjustment clauses. All lease agreements have been concluded on the basis of fixed repayments and no agreements have been made for conditional lease payments (contingent rental payments). The Group's commitments under finance lease agreements are secured by the ownership rights of the respective lessor to the leased assets.

The following table shows the reconciliation from the aggregate future minimum lease payments at the reporting date to their present value. This gave rise to deposits from customers from lease operations (liabilities from finance leases) as follows:

	2018
Future minimum lease payments	187
- Finance charge (interest included in minimum lease payments)	(14)
= Present value of future minimum lease payments	173

(€ millions)

The difference between the future minimum lease payments and their present value represents unamortised interest expense.

The following table shows the remaining maturity of the future minimum lease payments and their present value at the reporting date: (€ millions)

	201	2018		
	FUTURE MINIMUM LEASE PAYMENTS	PRESENT VALUE OF FUTURE MINIMUM LEASE PAYMENTS		
up to 1 year	13	13		
from 1 year to 5 years	55	50		
from 5 years and over	119	110		
Total	187	173		

In 2018, the aggregate future minimum lease payments arising from non-cancellable subleases expected to be received in the subsequent financial years amounted to €26 million.

HVB Group as lessor

According to IAS 17, lessors had to classify leases either as operating leases or finance leases.

Operating leases

Until the end of 2018, HVB Group acted as lessor in operating leases. The relevant lease agreements notably encompassed real estate (land and buildings) and movable assets, such as plant and office equipment, motor vehicles and industrial machinery. The lease agreements for real estate were based on customary market terms and contained extension options and price adjustment clauses in the form of stepped rents or index clauses; options to purchase were generally not agreed. The lease agreements for movable assets were generally concluded with lease periods of between four and ten years and included an additional option to purchase; they did not contain any extension or price adjustment clauses. All of the operating leases received by HVB Group as lessor contained no agreements on conditional lease payments (contingent rental payments).

The following table shows the minimum lease payments to be received by the lessor in the future from non-cancellable operating leases at reporting date:

	2018
up to 1 year	64
from 1 year to 5 years	123
from 5 years and over	101
Total	288

Finance leases

Until the end of 2018, HVB Group leased mobile assets as lessor under finance leases. These notably included plant and office equipment, aircraft, motor vehicles and industrial machinery. As a general rule, the lease agreements stipulated period of between four and ten years and possibly a pre-emptive right in favour of the lessor; they did not contain any extension or adjustment clauses. No conditional lease payments (contingent rental payments) were agreed for the finance leases concluded by HVB Group as lessor.

The following table shows the reconciliation from the future minimum lease payments to the gross and net investment in the lease and to the present value of the future minimum lease payments at the reporting date. The breakdown of the amounts receivable from customers (at cost) from the lease operations (receivables under finance leases) for the lessor is as follows:

	2018
Future minimum lease payments	1,955
+ Unguaranteed residual value	—
= Gross investment	1,955
- Unrealised finance income	(81)
= Net investment	1,874
- Present value of unguaranteed residual value	
= Present value of future minimum lease payments	1,874

The future minimum lease payments reflect the total lease payments to be made by the lessee under the lease agreement plus the guaranteed residual value.

The unguaranteed residual value is that portion of the residual value of the leased asset which is not guaranteed to be realised by the lessor.

For the lessor, the gross investment in the lease is the aggregate of the minimum lease payments and any unguaranteed residual value accruing to the lessor.

Unrealised finance income is the difference between the lessor's gross investment under the lease and its present value (net investment). It corresponds to the return implicit in the lease between the reporting date and the end of the lease.

The present value of the future minimum lease payments is calculated as the net investment in the lease less the present value of the unguaranteed residual value.

(€ millions)

The gross investment in the lease and the present value of future minimum lease paym	(€ millions)		
	2018		
	GROSS INVESTMENT	PRESENT VALUE OF FUTURE MINIMUM LEASE PAYMENTS	
up to 1 year	722	692	
from 1 year to 5 years	1,071	1,026	
from 5 years and over	162	156	
Total	1,955	1,874	

At year-end 2018, the cumulative write-downs on uncollectable outstanding minimum lease payments in amounts receivable from customers (at cost) under finance leases amounted to €13 million.

For the receivables under finance leases included in the item "Loans and receivables with customers (at cost)", the development of gross carrying amounts, the breakdown by rating class and the development of impairments are presented below (see also Note "Loans and receivable with customers (at cost)"):

78 Fair value hierarchy

The development of financial instruments measured at fair value and recognised at fair value in the balance sheet is described below, notably with regard to the fair value hierarchy.

This fair value hierarchy is divided into the following levels:

Level 1 contains financial instruments measured using prices of identical assets or liabilities listed on active markets. These prices are incorporated unchanged. We have assigned mostly listed equity instruments, bonds and exchange-traded derivatives to this category.

Assets and liabilities whose valuation is derived from directly observable (prices) or indirectly observable (derived from prices) input data (valuation parameters) are shown in Level 2. No price can be observed on an active market for the assets and liabilities concerned themselves. As a result of this, we notably show the fair values of interest rate and credit derivatives in this level together with the fair values of ABS bonds, provided a liquid market exists for the asset class in question.

Financial assets or liabilities of \in 652 million (previous year: \in 180 million) were transferred between Level 1 and Level 2. At the same time, financial assets or liabilities of \in 2,317 million (previous year: \in 2,253 million) were transferred between Level 2 and Level 1. Most of the transfers relate to securities, resulting from an increase or decrease in the actual trading taking place in the securities concerned and the associated change in the bid-offer spreads.

(€ millions)

The following table shows transfers between Level 1 and Level 2 for financial instruments where fair value is determined on a recurring basis:

where fair value to determined on a recurring	baolor		(c minoris)
		TO LEVEL 1	T0 LEVEL 2
Financial assets held for trading			
	Transfer from Level 1	_	156
	Transfer from Level 2	114	_
Financial assets at FVTPL			
	Transfer from Level 1		496
	Transfer from Level 2	2,116	—
Financial assets at FVTOCI			
	Transfer from Level 1		_
	Transfer from Level 2	85	_
Financial liabilities held for trading			
	Transfer from Level 1		—
	Transfer from Level 2	2	_
Financial liabilities at FVTPL			
	Transfer from Level 1		
	Transfer from Level 2		_

1 January is considered the transfer date for instruments transferred between the levels in the reporting period (1 January to 31 December).

Level 3 relates to assets or liabilities for which the fair value cannot be calculated exclusively on the basis of observable market data (non-observable input data). The amounts involved are stated in Level 2 if the impact of the non-observable input data on the determination of fair value is insignificant. Thus, the respective fair values also incorporate valuation parameters based on model assumptions. This includes derivatives and structured products that contain at least one "exotic" component, such as foreign currency or interest rate derivatives on illiquid currencies, derivatives without standard market terms, structured products with an illiquid underlying as reference and ABS bonds of an asset class for which no liquid market exists.

If the value of a financial instrument is based on non-observable valuation parameters, the value of these parameters may be selected from a range of possible appropriate alternatives at the reporting date. Appropriate values, which are calibrated according to the principle of prudent evaluation, are determined for these non-observable parameters and applied for valuation purposes, when the annual financial statements are prepared. In addition, individual parameters that cannot be incorporated separately as standalone valuation parameters are taken into account by applying a model reserve.

The following measurement methods are applied for each product type, broken down by the individual classes of financial instrument. The measurements of financial instruments in fair value Level 3 depend upon the following significant parameters that cannot be observed on the market:

PRODUCT TYPE	MEASUREMENT METHOD	SIGNIFICANT NON-OBSERVABLE PARAMETERS	RANGE
Fixed-income securities and other debt instruments	Market approach	Price	0.7bps-76.5bps
Equities	Market approach	Price	0%–37%
Asset-backed securities (ABS)	DCF method	Credit spread curves	10bps-416bps
		Residual value	0%–28%
		Default rate	0%-1.3%
		Prepayment rate	0%—9%
Commodity-/Equity derivatives	Option price model	Commodity price volatility/Equity volatility	2%-11%
		Correlation between commodity/Equities	2%-20%
	DCF method	Dividend yields	0%–20%
Interest rate derivatives	DCF method	Swap interest rate	0.32bps-37.6bps
		Inflation swap interest rate	2.9bps-6.3bps
	Option price model	Inflation volatility	0% -2%
		Interest rate volatility	2%-35%
		Correlation between interest rates	0%–20%
Credit derivatives	Hazard rate model	Credit spread curves	1.3bps-329.3bps
		Residual value	0%-5%
Currency derivatives	DCF method	Yield curves	0.32bps-37.6bps
	Option price model	FX volatility	0%–7%

The impact of changing possible appropriate alternative parameter values on the fair value of the financial instruments classified as Level 3 is shown in the sensitivity analysis presented below. The level of variation of the unobservable parameters reflects the prevailing market conditions regarding the valuation of sensitivities. For portfolios at fair value through profit or loss, the positive and negative fair value changes would amount to a plus or minus of \in 37 million respectively at the reporting date (previous year: a plus or minus of \in 49 million respectively).

The following table shows the significant sensitivity effects, broken down by the individual classes of financial instrument for the various product types:

	2019		2018		
	POSITIVE	NEGATIVE	POSITIVE	NEGATIVE	
Fixed-income securities and other debt instruments	—	—	—	—	
Equities	—	—	—	—	
Asset-backed securities	—	—	—	—	
Commodity-/Equity derivatives	27	(27)	39	(39)	
Interest rate derivatives	—	—	—	—	
Credit derivatives	10	(10)	10	(10)	
Currency derivatives	—	—	—	—	
Total	37	(37)	49	(49)	

(€ millions)

The parameters and ranges of the non-observable parameters were revised in the reporting year. This resulted in adjustments being made to the sensitivity impact. To facilitate comparability with the previous year, the figures stated for the previous year were also calculated accordingly.

For fixed-income securities and other debt instruments as well as asset-backed securities, the credit spread curves were varied as part of the sensitivity analyses in line with the ratings. For equities, the spot price is varied using a relative value.

The following non-observable parameters were varied (stress test) for the sensitivity analysis for equity derivatives included in Level 3: spot prices for hedge funds, implicit volatility, dividends, implicit correlations and the assumptions regarding the interpolation between individual parameters observable on the market, such as volatilities. For interest rate products, interest rates, interest rate correlations and implicit volatilities were varied as part of the sensitivity analysis. For credit derivatives, rating-dependent shifts in the risk premium curves for credit risk were assumed together with changes in implicit correlations and increases in default rates. Foreign currency derivatives were varied in terms of the implicit volatility.

Where trades are executed for which the transaction price deviates from the fair value at the trade date and non-observable parameters are employed to a considerable extent in valuation models, the financial instrument concerned is recognised at the trade price. This difference between the transaction price and the fair value of the valuation model is defined as the trade date gain/loss. Corresponding gains and losses determined at the trade date are deferred and recognised in the income statement over the term of the transaction. As soon as a reference price can be determined for the transaction on an active market, or the significant input parameters are based on observable market data, the deferred trade date gain is taken directly to the income statement in net trading income.

The following table shows a year-on-year comparison of changes in trade date gains and losses that were deferred on account of the application of significant non-observable parameters for financial instruments recognised at fair value:

	2019	2018

1 In the income statement and shareholders' equity. 2 Also including changes in the group of companies included in consolidation.

Additions from acquisitions are mainly due to the purchase of individual illiquid equity derivatives of financial assets held for trading as well as new syndicated lending business in relation to financial assets. The disposals are a result of short-term foreign currency transactions in specific currencies that have not yet been classified as observable. Due to better observability of the liquidity of these currencies, these are now classified as Level 2. The expired transactions are thus shown as a disposal, while existing transactions are reported as transfer to other levels.

The following table shows the change in the fir	ancial liabilities assigne	ed to Level 3 und	er the fair value hie	rarchy:		(€ millions)

Realised gains ¹	(42)	(174)	(6)	(20)		—
Transfer to other levels	(343)	(159)	(127)	(218)		_
Other disposals	(11)	(27)	(2)	(7)		_
Balance at 31/12	839	1,250	332	203	_	_

1 In the income statement and shareholders' equity.

2 Also including changes in the group of companies included in consolidation.

Most of the disposals result from short-term foreign currency transactions in specific currencies that have not yet been classified as observable. Due to better observability of the liquidity of these currencies, these are now classified as Level 2. The expired transactions are thus shown as a disposal, while existing transactions are reported as transfer to other levels. The remaining transfers to other levels relating to liabilities held for trading as well as financial liabilities are primarily attributable to the improved liquidity of the instruments underlying certain structured issues.

79 Fair values of financial instruments compliant with IFRS 7

The fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It is assumed in this context that the transaction takes place on the principal market for the instrument or the most advantageous market to which the Bank has access.

The method used to determine the fair values for loans was developed further in the first half of 2018. While the method for determining the fair values of performing loans is based on the previous fair value model which was supplemented by additional factors, a separate model was implemented for determining the fair values of non-performing loans.

The calculation of the fair value for performing loans is explained to begin with. The fair value of loans is calculated as the sum total of the discounted, risk-adjusted anticipated cash flows discounted on the basis of the swap curve (based on Libor). Cash flows are determined on the basis of the conditions of the loan agreement (interest and redemption), whereby rights of termination are taken into account for the first time. In this context, the anticipated, risk-adjusted cash flows are based on the survival probability and the loss given default. The survival probability is determined on the basis of the risk-neutral probability of default, while the proceeds upon realisation are determined on the basis of the internal loss given default parameters. In turn, the risk-neutral probability of default is determined on the basis of the internally calculated one-year default rate (real-world probability of default), the market risk premium and the correlation between the respective loan and the general market risk. The market risk premium represents a factor used to cover the difference between the real-world probability of default and the market's return expectations for the risk assumed. The loan portfolio is divided into five sectors (sovereign loans, loans to banks, corporate loans, syndicated loans and retail loans) in order to take account of the specific features of each sector. The sector for syndicated loans is taken into account in 2018 for the first time. For each of these sectors with exception of retail loans, first of all the market risk premium derived from the market risk premiums for the other sectors due to the lack of a CDS market (except for syndicated loans). Furthermore, the fair value calculated by the model is calibrated in 2018 for the first time in order to take account of the difference between this value and the fair value upon addition. This is in line with the assumption based on IFRS 13.58 according to which the transaction price reflects the fair value.

The proceeds upon realisation estimated by the Bank are taken as a basis to determine the fair value of non-performing loans. These already take account of the expected credit default. The maturities of the expected proceeds upon realisation are determined using model assumptions. These cash flows are discounted at a market interest rate in order to establish the fair value.

The fair value calculation for loans and receivables is built around the risk-neutral credit spread, which takes account of all relevant factors on the market. Further parameters besides the risk-neutral credit spread and the risk-free return on investment are not included. Provided the markets are liquid and no relevant market disruptions are evident, as is currently the case, the arbitrage between the markets on which credit risks are traded leads to a narrowing of the credit spreads. Accordingly, the CDS market is defined as the relevant exit market for loans and receivables. Otherwise, the parameters used to determine the real-world probability of default (PD) and loss given default (LGD) are determined on the basis of internal procedures.

In the reporting year, the method for determining the level for loans was refined. Levels are now allocated based on a sensitivity analysis for which a range is determined, when calculating the respective fair value, for the internal parameters within which the internal parameters may fluctuate based on realistic assumptions. In order to calculate the sensitivity, the internal parameter is now replaced with the value with the highest deviation in the estimated range, and based on that figure the fair value is recalculated. As long as the deviation of the fair value determined using this method is not significant compared with the originally determined fair value, the financial instrument is allocated to Level 2; otherwise, it is allocated to Level 3.

Investments in joint ventures and associates are accounted for using the equity method, provided they are not of minor significance. Investments in nonconsolidated companies and listed companies not accounted for using the equity method are normally carried at their fair value.

Quoted market prices are used for securities and derivatives traded on an exchange as well as for listed debt instruments. These instruments are allocated to Level 1. The fair value of the remaining securities is calculated as the net present value of anticipated future cash flows. The methods used to determine the fair value levels as described in the Note "Fair value hierarchy" are employed for this purpose.

The fair values of single-currency and cross-currency swaps and interest rate futures are calculated on the basis of discounted, anticipated future cash flows. In doing so, we apply the market rates applicable for the remaining maturity of the financial instruments. The fair value of forward exchange transactions is computed on the basis of current forward rates. Options are valued using price quotations or generally accepted models used to calculate the price of options. The common Black & Scholes model and the Bachelier model are used to value simple European options. In the case of more complex instruments, the interest is simulated using term-structure models with the current interest rate structure as well as caps and swaption volatilities as parameters relevant for valuation. The disbursement structure of the equities or indexes for the complex instruments is valued using either Black & Scholes or a stochastic volatility model with equity prices, volatilities, correlations and dividend expectations as parameters. The methods used to determine the fair value levels described in the Note "Fair value hierarchy" are employed for this purpose.

Please refer to the Note "Fair value hierarchy" for a description of the methods used to determine the fair value levels for unlisted derivatives.

The anticipated future cash flows of the liabilities (deposits from banks and customers, and debt securities in issue, provided these are not listed) are discounted to the present value using current interest rates taking into account internally determined funding premiums. The funding premiums correspond to the parameters that the Bank uses when setting the prices for its own issues. These funding premiums represent internally determined parameters that are essential for the determination of the fair value; the other liabilities are allocated to Level 3 accordingly.

The fair values are calculated using the market information available at the reporting date as well as specific company valuation methods.

1 Derivatives are included in the balance sheet items "Financial liabilities held for trading" and "Hedging derivatives".

2 Repos are covered in the Notes "Deposits from banks" and "Deposits from customers". They are also included in financial liabilities held for trading

with an amount of €540 million (previous year: €1,401 million).

3 Only relates to current accounts, cash collateral or pledged credit balances and other liabilities (including cumulative variation margins),

as covered in the Notes "Deposits from banks" and "Deposits from customers".

Compliant with IAS 32.42, financial assets and liabilities with the same counterparty are to be offset and recognised in the balance sheet at the net amount if such offsetting of the amounts recognised at the present date is legally enforceable and the intention is to settle on a net basis during the normal course of business or to realise the asset and settle the liability simultaneously. The tables show a reconciliation from the gross amounts prior to netting and the set-off amounts to the net amounts after offsetting for these set-offs in the balance sheet. At HVB Group, the set-offs in the balance sheet relate to transactions with central counterparties (CCPs), being OTC derivatives (set-off of the balancing positive and negative fair values at currency level) and the receivables and liabilities arising from reverse repos and repos concluded with the same central counterparty. At the same time, nettable receivables and liabilities repayable on demand with the same counterparties in the banking business are also offset in the balance sheet. In addition, cumulative changes in the fair value of listed future-styled derivatives are netted with the cumulative variation margin payments.

The column "Effects of master netting arrangements" shows the financial instruments that are subject to a legally enforceable master netting arrangement or similar arrangement, but which are not netted in the balance sheet as they do not satisfy the IAS 32.42 offsetting requirements as described above. At HVB Group, this includes OTC derivatives and repo transactions with individual counterparties with which legally enforceable master netting arrangements have been concluded allowing netting in the event of default.

In addition, collateral in the form of financial instruments and cash collateral pledged or received in this context is presented in the tables. Furthermore, the securities lending transactions shown off the balance sheet without the cash collateral are not included in the above netting tables.

81 Undiscounted cash flow

Compliant with IFRS 7.39, we are disclosing the remaining terms for non-derivative and derivative financial liabilities and for credit commitments and financial guarantees. The breakdown of remaining terms is based on the contractual due dates. These are crucial for determining the timing of payments. Consequently, we have divided the contractually agreed, undiscounted payments into maturity buckets. The undiscounted cash flows shown here are not comparable with the carrying amounts, as the latter are based on discounted cash flows.

At the same time, we have broken down the financial assets by remaining term in this context compliant with IFRS 7.39. These are financial assets that generate cash flows used to settle financial liabilities.

In the following tables, we have divided the derivative and non-derivative financial assets and liabilities into maturity buckets. All financial liabilities have been allocated to the respective maturity bucket. The derivatives on financial assets held for trading and financial liabilities held for trading have been allocated to the shortest maturity bucket with their fair value. This reflects the fact that the derivatives are subject to an intention to sell in the short term and hence the maturity of the contractual undiscounted cash flows does not adequately represent the timing of payments that is actually expected. The remaining financial instruments classified as financial assets held for trading and financial liabilities held for trading have been allocated to the earliest possible maturity bucket with their cash flows. Hedging derivatives used under hedge accounting have been allocated to the applicable maturity bucket with their contractually agreed, undiscounted cash flows.

Credit commitments and financial guarantees have been allocated with the maximum amount to the shortest maturity bucket (repayable on demand) in which they can be utilised at the earliest. The credit commitments amount to \in 52,866 million (previous year: \in 49,405 million). This assumption defined in IFRS 7 is unrealistic for credit commitments not utilised and contingent liabilities for financial guarantees in particular, as the complete utilisation of all open credit commitments and financial guarantees on the next day cannot be expected. The same holds true for the presentation of the fair values of trading derivatives.

82 Regulatory disclosure requirements (Disclosure Report)

HVB has been classified as a significant subsidiary of UniCredit S.p.A. within the meaning of Article 13 (1) of the Capital Requirements Regulation (CRR), making it subject to the scope of the CRR (Article 13 (1) and Part 8 CRR) and certain extended regulatory disclosure requirements in accordance with Section 26a KWG (disclosure under Pillar III).

HVB discloses this information on a standalone basis in the form of a separate disclosure report. This report is produced on an annual basis as at 31 December and at each quarter-end during the year and published on the Bank's website under About us > Investor Relations > Reports. The publication for the reporting date of 31 December is scheduled for shortly after the publication of the Annual Report. The interim reports should be published shortly after submission of the regulatory COREP report to the supervisory authorities responsible.

The disclosure of the remuneration policy and practices for those categories of staff whose professional activities have a material impact on the Bank's risk profile (known as "risk takers") required by Article 450 CRR in conjunction with Section 16 (1) of the German Regulation on the Requirements for the Remuneration Systems of Institutions under Regulatory Law (Institutsvergütungsverordnung) takes the form of a separate report for HVB. This is drawn up once a year as at 31 December and published on the Bank's website under About us > Investor Relations > Corporate Governance in the second quarter of the following year.

83 Key capital ratios (based on IFRS)

HVB Group manages its economic and supervisory capital as part of its value-oriented overall bank management strategy. The yield expectations are calculated in accordance with the allocated capital principle that UniCredit employs across its entire organisation. Under the principle of dual control, both regulatory capital in the sense of committed core capital and internal capital are allocated to the business segments. Both resources are expected to yield an appropriate return, which is derived from the expectations of the capital market. Please refer to the section of the Risk Report entitled "Implementation of overall bank management" for further details on the management of regulatory capital adequacy requirements and economic capital adequacy.

The supervisory ratios are discussed below.

The legal basis is provided by the EU Regulation on Prudential Requirements for Credit Institutions and Investment Firms (CRR), which came into force on 1 January 2014. The supervisory total capital ratio prescribed in the CRR II represents the capital ratio determined in accordance with Part 2 CRR II to the total amount of the risk-weighted assets for default risk, market risk and operational risk (corresponds to the risk-weighted assets determined as described as the ratio of Tier 1 capital to total risk-weighted assets determined as described above must be at least 6.0%.

Own funds underlying the calculation of the total capital ratio in accordance with CRR II consists of Tier 1 and Tier 2 capital. Under Article 92 CRR II, the total capital ratio calculated as the ratio of own funds to total risk-weighted assets must be at least 8.0%. HVB Group uses internal models in particular to measure market risk positions.

The following table shows own funds based on the approved consolidated financial statements and risk-weighted assets together with the risk equivalents for market risk positions and operational risk at the reporting date:

Own funds ¹		(€ millions)
	2019	2018
Tier 1 – Total Tier 1 capital for solvency purposes	14,987	16,454

Other	—	—
Capital deductions		
Total own funds	15,491	16,984

1 Group of consolidated companies and principles of consolidation in accordance with banking supervisory regulations.

Own funds of HVB Group in accordance with Part 2 CRR II amounted to €15,491 million at the reporting date (previous year: €16,984 million). As in the previous year, we have not included in Tier 2 capital any unrealised reserves in accordance with Section 10 (2b) 1 No. 6 and 7 KWG in the version applicable until 31 December 2013.

Own funds are determined on the basis of IFRS figures determined in accordance with CRR II/CRD V using the consolidated accounting method.

	COMMON EQUITY TIER 1 CAPITAL	ADDITIONAL TIER 1 CAPITAL	TIER 2 CAPITAL	TOTAL OWN FUNDS
Shown in IFRS balance sheet

85 Contingent liabilities and other commitments

	2019	2018
Contingent liabilities ¹	25,707	26,204
Guarantees and indemnities	25,707	26,204
Other commitments	51,835	49,438
Irrevocable credit commitments	51,811	49,405
Other commitments	24	33 ²
Total	77,542	75,642

1 Contingent liabilities are offset by contingent assets of the same amount.

2 Not included in other commitments are the future payment commitments arising from non-cancellable operating leases

Financial guarantees and irrevocable credit commitments are shown at their nominal amount (maximum outflow) less provisions set up for this purpose. Neither contingent liabilities nor other commitments contain any significant items. The financial guarantees and indemnities listed here essentially reflect guarantees and indemnities that the Bank has granted on behalf of customers. Consequently, the Bank has a right of recourse against the customer (contracting party) should the guarantee or indemnity in question be used. An appropriate provision is set up where such a customer's creditworthiness is doubtful. This takes account of the loss suffered by the Bank, as the recourse claim against the contracting party is not considered fully realisable on account of the party's doubtful creditworthiness.

It is hard to anticipate the date at which the contingent liabilities and other commitments mentioned here will result in an outflow of funds. Credit commitments frequently serve as liquidity reserve for the beneficiary in particular, meaning that the amounts are not necessarily utilised at all and hence an outflow of funds is not certain. In terms of financial guarantees, it is important to note that these are conditional payment commitments, meaning that the condition must be met before utilisation becomes possible (such as default on the guaranteed credit in the case of a credit guarantee or non-compliant delivery in the case of a delivery guarantee). Here, too, it is hard to assess whether and when this will be the case, as financial guarantees in particular are only ever utilised in exceptional circumstances entailing an outflow of funds.

Securities lending transactions are not recognised, as economic ownership remains with the lender. The Bank only becomes the legal owner of the borrowed securities which are returned to the lender, when the lending transaction falls due. Obligations of \in 14,449 million (previous year: \in 11,421 million) to return securities arising from securities lending transactions are thus offset by borrowed securities of the same amount, which are not carried as assets on the assets side of the balance sheet.

(€ millions)

(€ millions)

HVB has made use of the option to provide some of the annual contribution to the bank restructuring fund in the form of fully secured payment claims (irrevocable payment commitments) in accordance with Section 12 of the German Bank Restructuring Fund Act (Restrukturierungsfondsgesetz – RStruktFG). The cash collateral provided in this regard amounted to €82 million at the reporting date (previous year: €64 million).

HVB has made use of the option to provide up to 30% of the annual contribution to the deposit guarantee scheme of German banks (Entschädigungseinrichtung deutscher Banken) in the form of fully secured payment claims (irrevocable payment commitments) in accordance with Section 19 of the German Regulation on Financing the Deposit Guarantee Scheme (Entschädigungseinrichtungs-Finanzierungsverordnung – EntschFinV). The financial security provided in this regard amounted to \in 30 million at the reporting date (previous year: \notin 22 million).

Legal risks can give rise to losses for HVB, the occurrence of which is greater than improbable but less than probable, and for which no provisions have been set aside. Such legal risks may result from negative developments in civil-law proceedings and the tendency for rulings to be made in favour of consumers or customers. The assessment of the risk of loss may prove to be too low or too high, depending on the outcome of the proceedings. HVB assumes that it will not be necessary to utilise the vast majority of the contingent liabilities arising from legal risks, meaning that the amounts are not representative of actual future losses. Such contingent liabilities arising from significant legal risks for which an estimate is possible amounted to \notin 91 million at year-end 2019 after \notin 63 million at year-end 2018.

As part of real estate financing and development operations, we have assumed rental obligations and pre-emptive obligations or issued rental guarantees to make fund constructions more marketable – in particular for lease funds and (closed-end) KG real estate funds. Identifiable risks arising from such guarantees have been incorporated by setting up provisions.

Commitments for uncalled payments on shares not fully paid up amounted to \notin 24 million at the reporting date (previous year: \notin 29 million), and similar obligations for shares in cooperatives totalled \notin 1 thousand (previous year: \notin 1 thousand). We were not liable for any defaults on such calls under Section 22 (3) and 24 of the German Private Limited Companies Act (Gesetz betreffend die Gesellschaften mit beschränkter Haftung – GmbHG).

At the reporting date, we had unlimited personal liability arising from ownership of shares in 60 partnerships (previous year: 57).

With a Statement of Responsibility dated 21 December 1993, HVB issued an undertaking to the State of Baden-Wuerttemberg (Ministry of Finance) to assume a liquidity provision obligation in the event of the sale, liquidation or bankruptcy of HVB Projekt GmbH.

UniCredit Bank AG assumes liability as a member of the deposit guarantee funds in Germany within the scope of the valid provisions.

Euro-denominated government bonds issued by EU countries

On 31 January 2019, UniCredit S.p.A. and HVB received a Statement of Objections from the European Commission referring to the investigation by the European Commission of a suspected violation of antitrust rules in relation to European government bonds. The subject matter of the investigation extends to certain periods from 2007 to 2012 and includes alleged activities by HVB in a part of this period. The Statement of Objections does not prejudge the outcome of the proceeding; should the Commission conclude that there is sufficient evidence of an infringement, a decision prohibiting the conduct and imposing a fine could be adopted, with any fine subject to a statutory maximum of 10% of company's annual worldwide turnover.

HVB had access to the entirety of the European Commission's file on the investigation from 15 February 2019 onwards. As a result of the assessment of the files, the Bank regards it no longer remote but possible, even though not likely, that a cash outflow might be required to fulfil a potential fine arising from the outcome of the investigation. On the basis of the current information, it is not possible to reliably estimate the amount of any potential fine at the present date.

UniCredit S.p.A. and HVB responded to the raised objections on 29 April 2019 and participated at a hearing of the European Commission from 22 to 24 October 2019. Proceedings are ongoing. There is no legal deadline for the Commission to complete antitrust inquiries.

On 11 June 2019, HVB and UniCredit Capital Markets LLC were named, among other financial institutions, as defendants in a putative class action already pending in the United States District Court for the Southern District of New York. The third amended class action complaint, filed December 3, 2019, alleges a conspiracy among dealers of Euro-denominated bonds issued by European central banks to fix and manipulate the prices of those bonds, among other things by widening the bid-ask spreads they quoted to customers. The putative class consists of those who purchased or sold Euro-denominated bonds issued by European central banks in the US between 2007 and 2012. The third amended class action complaint does not include a quantification of damages claimed. The proceedings are in their inception. Motions to dismiss – a procedural device contemplated by the United States Federal Rules of Civil Procedure which provides defendants with an opportunity to challenge the legal sufficiency of a complaint and present arguments that the complaint should be dismissed – will likely be fully briefed before the end of the second quarter of 2020 and will likely include the argument that the complaint fails to state a claim.

86 Contingent assets from income taxes

At year-end 2019, there were contingent assets from income taxes in the two-digit million range for which an inflow of economic benefits is likely but which cannot yet be considered almost certain.

87 Statement of Responsibility

HVB ensures that, to the extent of its shareholding, the company set forth below is in a position to meet its contractual obligations except in the event of political risks:

Financial companies
UniCredit Leasing GmbH, Hamburg

HVB's commitment arising from the above Statement of Responsibility declines to the extent as HVB's shareholding decreases in the future with regard to those contractual obligations of the company that arose only after HVB's shareholding decreased. In case HVB is no longer a shareholder in the company listed above, our commitment arising from the above Statement of Responsibility with regard to such liabilities of the company that arose only after our shareholding ceased ends on the date on which our shareholding ceased.

HVB no longer provides a Statement of Responsibility for companies for which a Statement of Responsibility had been provided in earlier annual reports but which no longer appear in the above list. Liabilities of these companies arising before the reduction or cessation of the shareholding are only covered by such Statements of Responsibility that were provided before the reduction or cessation of the shareholding in each case.

88 Disclosures regarding structured entities

A structured entity as defined in IFRS 12 is an enterprise (or an economically separate entity) that has been designed so that voting rights or similar rights are not the dominant factor in deciding who controls the entity. Structured entities are frequently characterised by restricted activities, a narrow, well-defined objective, insufficient equity or financing in tranches.

Structured entities may be consolidated or not consolidated, depending on whether HVB Group has control over the entity or not. Transactions involving structured entities can be divided into the following categories using the business model applied by HVB Group:

- ABS vehicles
- Repackaging vehicles
- Funding vehicles for customers
- Some investment funds
- Other structured entities

Financial instruments with unconsolidated structured entities

Financial instruments with unconsolidated structured entities encompass all contractual relationships from which HVB Group obtains variable earnings and exposure to loss from the structured entities, but without gaining control over the structured entity. These might be equity and debt instruments, derivatives, liquidity facilities or guarantees.

ABS vehicles

HVB Group invests in ABS vehicles and uses ABS vehicles for its own securitisations. These vehicles buy loans or receivables and refinance themselves by issuing securities on the money or capital market. The securities are backed by the assets purchased. HVB Group can also provide finance for these vehicles in the form of liquidity facilities.

ABS vehicles used for own securitisations are fully consolidated in the consolidated financial statements and are not included in the unconsolidated structured entities shown here. This means that only such ABS vehicles in which HVB Group solely has an interest as an investor are classified as unconsolidated structured entities.

	2019	2018
Number of unconsolidated ABS vehicles (investor positions only)	230	244

Repackaging vehicles

Repackaging vehicles are used to offer customers specific securities and derivatives solutions. These vehicles buy assets (such as securities, loans and receivables, and derivatives) and restructure the cash flows from these assets by incorporating other instruments or securities. The vehicles refinance themselves by issuing custom-packaged securities or derivatives that meet the customer's demands. The funding is normally secured by the acquired assets.

	2019	2018
Number of unconsolidated repackaging vehicles	1	2
Aggregate total assets of unconsolidated repackaging vehicles (€ millions)	7	22
Nominal value of the securities issued by unconsolidated repackaging vehicles (€ millions)	7	22

Funding vehicles for customers

Customers use these vehicles as a source of funding. These funding vehicles buy current receivables or lease receivables from customers and refinance themselves mostly by issuing securities on the capital and money market (mostly commercial paper conduits). HVB Group can also provide financing for these vehicles in the form of liquidity facilities or other lending products. The majority of the vehicles listed below were set up by the customer or by HVB Group on behalf of the customer. These vehicles are not consolidated as HVB Group is not exposed to a majority of the variable income from the vehicles and has no possibility of influencing them.

	2019	2018
Number of unconsolidated funding vehicles for customers	40	33
Aggregate total assets of unconsolidated funding vehicles for customers (€ millions)	8,595	5,922
Nominal value of the securities issued by unconsolidated funding vehicles		
for customers (€ millions)	8,591	5,922

Some investment funds

Investment funds are classified as structured entities if they are not controlled by means of voting or similar rights. Investment funds invest in a range of assets and can also finance themselves with debt within the framework of their investment policies alongside the moneys provided by investors. Investment funds serve to achieve specifically defined investment goals.

HVB Group offers its customers investment funds under own and third party management and also itself invests in investment funds. We are also mandated by customers to keep shares in investment funds in securities accounts for third party account. Furthermore, HVB Group holds shares in investment funds in its own portfolio. These are mostly held in the held-for-trading portfolio and to a much smaller extent also in the portfolio at FVTPL. In addition, we offer typical banking services to investment funds, including derivative and financing solutions and deposit-taking operations.

The European-Office-Fonds investment fund controlled by HVB Group is fully consolidated in the consolidated financial statements and is not one of the unconsolidated structured entities shown here. The number and aggregated net asset value of investment funds show funds to which HVB Group has an exposure. Regarding the statement of the number of unconsolidated investment funds classified as structured entities, we have separately reported every special purpose entity to which HVB Group has an exposure.

	2019	2018
Number of unconsolidated investment funds classified as structured entities	687	733
of which: managed by HVB Group	36	45
Aggregate net asset value (including minority interests) of the investment funds classified as		
structured entities (€ millions)	444,073	556,171
of which: managed by HVB Group	1,940	1,765

With regard to the aggregate net asset value, it should be noted that our risk is only calculated in terms of the participating interest held, loans extended or derivatives issued as a proportion of the aggregate fund volume. A risk analysis is provided in the table under "Risks in connection with unconsolidated structured entities" below.

Other structured entities

This category covers structured entities that cannot be assigned to any of the other categories. For the most part, HVB Group mainly performs lending activities under this category with structured entities set up by customers or by HVB Group on behalf of customers.

These entities are mostly leasing vehicles that have only insufficient equity and are controlled economically by the lessee. Some of the leasing vehicles were financed through syndicated loans.

	2019	2018

Maximum exposure to loss	7,231	2	7,068	3,428	37

The maximum exposure to loss from unconsolidated structured entities arises from the assets and off-balance-sheet risk positions relating to structured entities. This view does not, however, reflect the economic risk, as security received and hedging instruments are not included.

No financial or other support ("implicit support") was provided to unconsolidated structured entities during the reporting period without having a contractual obligation to do so. Neither are there any concrete plans to provide support to unconsolidated structured entities in future.

Sponsored unconsolidated structured entities

Structured entities are classified as sponsored by HVB Group, if HVB Group was materially involved in setting up the entities. HVB Group has sponsored structured entities without having a participating interest in these entities through financial instruments. Thus, HVB Group is not exposed to the economic risks arising from these structured entities.

We only generate income from structured entities without participating interests to a limited extent through financial instruments. Fee and commission income of \in 12 million (previous year: \in 11 million) from charges and management fees was generated during the reporting period on investment funds managed by the Bank, of which \in 9 million (previous year: \in 7 million) was passed on to third parties in trailer fees.

Consolidated structured entities

The biggest consolidated structured entity is the multi-seller conduit programme Arabella. Securities with a nominal value of \in 4,881 million (previous year: \in 4,312 million) were outstanding at 31 December 2019. The total assets of the multi-seller conduit Arabella Finance DAC at the reporting date amounted to \in 4,891 million (previous year: \in 4,317 million).

Contractual arrangements that oblige HVB Group to provide financial assistance to consolidated structured entities exist notably in the form of liquidity facilities. These may be drawn by the vehicles to bridge maturity mismatches between the assets acquired and the securities issued.

Financial or other support was provided to consolidated structured entities without a contractual obligation to do so ("implicit support"):

- Where the market conditions prevented the securities issued by the consolidated multi-seller conduit Arabella Finance DAC being placed, HVB has acquired such issues. Without the purchases of the securities, HVB would have been required to provide liquidity facilities in the same amount to individual Elektra Purchase companies. At the reporting date, HVB held securities issued by Arabella Finance DAC with a nominal value of €2,395 million (previous year: €1,698 million) in its portfolio.
- Future support arrangements are planned as follows: HVB will continue to decide on a case-by-case basis whether to buy temporarily non-placeable securities issued by the consolidated multi-seller conduit Arabella Finance DAC or utilise the liquidity lines. Accordingly, the volume of securities to be acquired depends on the funding required, the prevailing market conditions and the above decision in each case.
- Both contractual financial and other support provided to consolidated structured entities without a contractual obligation to do so are not material for the consolidated financial statements, as these represent intra-group transactions.

90 Transfer of financial assets

Transferred financial assets are derecognised in accordance with the derecognition criteria set forth in IFRS 9 when substantially all the risks and rewards incident to ownership of the asset are transferred.

HVB Group has no continuing involvement in transferred and derecognised financial assets for which substantially the risks and rewards are neither retained nor transferred.

Transferred, non-derecognised financial assets

However, HVB Group conducts business transactions under which it transfers previously recognised financial assets in accordance with IFRS 9, but substantially retains all the risks and rewards associated with these assets, meaning that such assets are not derecognised. The recognised asset is simultaneously offset by an associated liability for the consideration received, which corresponds to recognition as a secured loan. HVB Group may not use these transferred, non-derecognised assets for other purposes.

Transactions of this type conducted by the Group relate primarily to genuine securities repurchase agreements (repos) and securities lending transactions.

The securities (transferred) under repo transactions (cash sale) continue to be carried and measured in the consolidated balance sheet, as the Group as seller retains all the credit, share price, interest rate and currency risks associated with the assets and their results. The payment received by the buyer for whom the transferred security acts as collateral is recognised as a repo liability payable to banks or customers, depending on the counterparty. Upon delivery of the securities, the unrestricted power of disposal passes to the buyer.

Where the corporate group acts as a lender of securities in securities lending transactions, the securities lent to the counterparty continue to be carried in the consolidated balance sheet of the lender.

The transactions are conducted under the customary market terms for securities lending and repurchasing agreements, under which the counterparty holds a contractual or customary right to sell on or pledge on the securities received.

At the same time, these transaction types also encompass such examples as the true sale securitisation transactions Rosenkavalier 2008, Rosenkavalier 2015 and Geldilux 2015 (see the Note "Own securitisation") carried out by HVB Group, under which non-derecognised securitised customer receivables indirectly serve as security for repurchase agreements with the ECB.

The following Note "Assets assigned or pledged as security for own liabilities" contains details of repo transactions, securities lending transactions and other transactions under which the financial assets transferred as security for own liabilities are not derecognised.

91 Assets assigned or pledged as security for own liabilities

Examples of own liabilities of HVB Group for which we provide collateral are special credit facilities provided by KfW and similar institutions, which we have passed on as loans in compliance with their conditions. In addition, collateral has been provided for borrowings under repurchase agreements on international money markets, for open market transactions with central banks and for securities lending transactions. As a seller under repurchase agreements, HVB Group has entered into sales and repurchase transactions for securities with a carrying amount of ≤ 39.5 billion (previous year: ≤ 37.3 billion) or transferred them to a collateral pool with the European Central Bank or GC Pooling. It is not always necessary for liabilities to exist in the latter instance. These securities continue to be shown under our assets, and the consideration received in return is stated under liabilities.

The following table shows the breakdown of assets that we provide as collateral for own liabilities: (€ millions) 2019 2018 8.623 10,300 Financial assets held for trading Financial assets at FVTPL 7.423 6.241 Financial assets at FVTOCI 9,951 4,936 Loans and receivables with banks (at cost) 977 Loans and receivables with customers (at cost) 11,280 10,971 Property, plant and equipment _ _ Non-recognised received securities pledged on: Pledged securities from non-capitalised securities lending transactions 10,991 9,266 Received collateral pledged 14,548 15,127 Total 62,816 57,818

The collateral pledged from "Loans and receivables with customers (at cost)" relates to special credit facilities provided by KfW and similar institutions.

The assets pledged by HVB Group as security relate to the following liabilities: (€ millions) 2019 2018 Deposits from banks 46,141 38,416 Deposits from customers 2,936 6,337 Debt securities in issue 5,039 Financial liabilities held for trading 6,034 Financial liabilities at FVTPL Contingent liabilities Obligations to return non-expensed, borrowed securities 7,705 8.026 Total 62,816 57,818

Compliant with IFRS 7.14, we are disclosing the carrying amount of the financial assets which we provide as security. In addition, figures are disclosed showing the extent to which the security provided may be pledged or sold on by the security-taker.

		(€ millions)
	2019	2018
Aggregate carrying amount of assets pledged as security	62,816	57,818
of which: may be pledged/sold on	35,957	33,694

92 Collateral received that HVB Group may pledge or sell on

As part of repurchase agreements and collateral agreements for OTC derivatives, HVB Group has received security that it may pledge or sell on at any time at customary market terms without the security provider having to be in arrears. The fair value of this security is ≤ 23.7 billion (previous year: ≤ 27.6 billion).

HVB Group has actually pledged or sold on €14.5 billion (previous year: €15.1 billion) of this total, for which there is an obligation to return collateral received of the same type, volume and quality.

The transactions that make it possible to use this collateral were conducted under the customary market terms for repurchase agreements and securities lending transactions.

93 Information on relationships with related parties

Besides the relationships with consolidated, affiliated companies, there are a number of transactions involving UniCredit S.p.A. and other affiliated but not consolidated UniCredit companies as a result of the integration of HVB into the UniCredit group of companies. The quantitative information in this regard can be found in the notes to the balance sheet and the income statement.

HVB has been assigned the role of centre of competence for the markets and investment banking activities of the entire UniCredit corporate group. Among other things, HVB acts as counterparty for derivative transactions conducted by UniCredit companies in this role. For the most part, this involves hedge derivatives that are externalised on the market via HVB. The section of the Risk Report in the Group Management Report entitled "Credit risk" under "Risk types in detail" contains further information regarding the exposure to UniCredit and its subsidiaries.

Like other affiliated companies, HVB has outsourced IT activities to UniCredit Services S.C.p.A., Milan, a company that is affiliated with the Bank. The goal is to exploit synergies and enable the Bank to offer fast, high-quality IT services by means of a service level agreement. HVB incurred expenses of \in 543 million for these services in the reporting year (previous-year period: \in 546 million). This was offset by income of \in 28 million (previous-year period: \in 32 million) from services rendered and internal charges. Moreover, software products worth \in 1 million (previous-year period: \in 1 million) were purchased from UniCredit Services S.C.p.A.

Furthermore, HVB has transferred certain back office activities to UniCredit Services S.C.p.A. In this context, UniCredit Services S.C.p.A. provides settlement services for HVB and other affiliated companies in line with a standard business and operating model. HVB incurred expenses of €173 million for these services in the reporting year (previous-year period: €114 million).

Transactions involving related parties are generally conducted on an arm's length basis.

Subsequent to the filing of the squeeze-out resolution in the Commercial Register on 15 September 2008, HVB is not listed any more. Consequently, the compensation paid to the members of the Management Board is not shown on an individualised basis.

It is the task of the Bank's full Supervisory Board to decide on the total remuneration paid to the individual members of the Management Board and to review the structure of the remuneration systems for the Management Board. The full Supervisory Board receives assistance in this regard from the Remuneration Control Committee, which submits appropriate proposals to the full Supervisory Board. Appropriateness and sustainability are key criteria for the form and structure of the remuneration paid to the members of the Management Board. The structure of remuneration is derived from the service agreements with the members of the Management Board. It has two components: a fixed salary and a variable element. The variable remuneration is normally granted in deferred tranches over several years in the form of cash and in shares, with disbursement dependent upon defined corporate targets being achieved in the subsequent years.

Pension commitments for seven members of the Management Board are shown in the table alongside the direct emoluments. Five members of the Management Board took part in the employer-financed, fund-linked pension scheme for executives (known as AgfA) in 2019. The Bank will provide/has provided 35% of the fixed salary contributions (reporting period: €980 thousand, previous-year period: €978 thousand).

Non-monetary compensation and other fringe benefits are granted to members of the Management Board to the usual extent. The amounts involved are included in the totals for fixed remuneration shown.

Compensation paid to members of the Management Board for positions on supervisory boards of any UniCredit group companies is surrendered to HVB.

Provisions for pensions totalling \in 20 thousand were recognised in the reporting year (previous-year period: reversal of \in 9 thousand) with regard to the commitments (for death benefits) made to the members of the Management Board.

The provisions for pensions compliant with IFRS for former and retired members of the Management Board of HVB and their surviving dependants (including the pension commitments transferred to HVB Trust Pensionsfonds AG) amounted to €148,034 thousand (previous-year period: €137,561 thousand).

The compensation paid to retired members of the Management Board and their surviving dependants amounted to \in 8,834 thousand in the reporting period after the transfer of a large part of the pension commitments to HVB Trust Pensionsfonds AG (previous-year period: \in 8,740 thousand).

Share-based remuneration was granted to the members of the Management Board under the Group Incentive Scheme in the reporting period as follows:

SHARES GRANTED TO MEMBERS OF THE MANAGEMENT BOARD OF UNICREDIT BANK AG	2019	2018
Number of shares granted	7,948	14,415
Number of shares committed after capital measures in 2017	—	—
Fair value on grant date (€)	11.838	17.088

For details of share-based compensation, please refer to the disclosures in the Note "Operating costs", where the underlying UniCredit programmes are described.

Loans and advances made to, and contingent liabilities and liabilities assumed for, related parties at the reporting date were as follows: (c thousands)

		2019			2018		
	LOANS AND Receivables	Contingent Liabilities Assumed	LIABILITIES	LOANS AND Receivables	Contingent Liabilities Assumed	LIABILITIES	
Members of the Management Board of UniCredit Bank AG	2,312	593	4,148	2,235	10	3,166	
Members of the Supervisory Board of UniCredit Bank AG		_	2,735	_	_	4,804	
Members of the Executive Management Committee ¹	_	_	4,978		_	8,374	

1 Excluding members of the Management Board and Supervisory Board of UniCredit Bank AG.

Members of the Supervisory Board and Management Board at HVB, and members of the Executive Management Committee of UniCredit S.p.A. and their respective immediate family members are considered related parties.

Mortgage loans were granted to members of the Management Board and their immediate family members with interest rates of between 0.6% and 1.74% falling due in the period from 2020 to 2049.

All banking transactions involving the group of people listed were conducted at customary market terms with the usual collateral.

94 Fees paid to the independent auditors

The following table shows the breakdown of fees (excluding value-added tax) recorded as expense in the reporting period, as paid to the independent auditors Deloitte GmbH Wirtschaftsprüfungsgesellschaft, for activities performed for HVB Group:

as paid to the independent auditors Deloitte GmbH Wirtschaftsprüfungsgesellschaft, for activities performed for HVB Group:				
	2019	2018		
Fee for	11	12		
Auditing of the financial statements	9	10		
Other auditing services	2	2

Auditor's Report

INDEPENDENT AUDITOR'S REPORT

To UniCredit Bank AG, Munich

REPORT ON THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS AND OF THE GROUP MANAGEMENT REPORT

Audit Opinions

We have audited the consolidated financial statements of UniCredit Bank AG, Munich, and its subsidiaries (the Group), which comprise the consolidated balance sheet as at 31 December 2019, the consolidated income statement including the consolidated statement of total comprehensive income, the statement of changes in consolidated shareholders' equity and the consolidated cash flow statement for the financial year from 1 January to 31 December 2019 as well as the notes to the consolidated financial statements, including a summary of significant accounting policies. In addition, we have audited the group management report of UniCredit Bank AG, Munich, for the financial year from 1 January to 31 December 2019.

In our opinion, on the basis of the knowledge obtained in the audit,

- the accompanying consolidated financial statements comply, in all material respects, with the IFRS as adopted by the EU and the additional requirements of German commercial law pursuant to § 315e (1) German Commercial Code (HGB) and, in compliance with these requirements, give a true and fair view of the assets, liabilities and financial position of the Group as at 31 December 2019 and of its financial performance for the financial year from 1 January to 31 December 2019, and
- the accompanying group management report as a whole provides an appropriate view of the Group's position. In all material respects, this group management report is consistent with the consolidated financial statements, complies with German legal requirements and appropriately presents the opportunities and risks of future development.

Pursuant to § 322 (3) sentence 1 German Commercial Code (HGB), we declare that our audit has not led to any reservations relating to the legal compliance of the consolidated financial statements and of the group management report.

Basis for the Audit Opinions

We conducted our audit of the consolidated financial statements and of the group management report in accordance with §317 German Commercial Code (HGB) and the EU Audit Regulation (No. 537/2014, referred to subsequently as "EU Audit Regulation"), and in compliance with German Generally Accepted Standards for Financial Statement Audits promulgated by the Institut der Wirtschaftsprüfer [Institute of Public Auditors in Germany] (IDW). Our responsibilities under those requirements and principles are further described in the "Auditor's Responsibilities for the Audit of the Consolidated Financial Statements and of the Group Management Report" section of our auditor's report. We are independent of the group entities in accordance with the requirements of European law and German commercial and professional law, and we have fulfilled our other German professional responsibilities in accordance with these requirements. In addition, in accordance with Article 10 (2) point (f) of the EU Audit Regulation, we declare that we have not provided non-audit services prohibited under Article 5 (1) of the EU Audit Regulation. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions on the consolidated financial statements and on the group management report.

Key Audit Matters in the Audit of the Consolidated Financial Statements

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements for the financial year from 1 January to 31 December 2019. These matters were addressed in the context of our audit of the consolidated financial statements as a whole and in forming our audit opinion thereon; we do not provide a separate audit opinion on these matters.

In the following we present the key audit matters we have determined in the course of our audit:

- 1. Loan loss provisions in the credit business
- 2. Determination of the fair value of financial instruments that are measured at fair value and are not equity instruments
- 3. IT controls related to financial reporting

4. Change in accounting policy – adoption of the revaluation model in accordance with IAS 16 and the fair value model in accordance with IAS 40

Our presentation of these key audit matters has been structured as follows:

- a) Description (including reference to corresponding information in the consolidated financial statements)
- b) Auditor's response
- c) Key observations

1. Loan loss provisions in the credit business

- a) UniCredit Bank AG provides loans to customers. In the bank's consolidated financial statements, loan loss provisions are offset against the balance sheet item "Loans to customers". Furthermore, provisions for credit risks are disclosed under other provisions. A key element of risk provisioning in stage 1 and stage 2, according to IFRS 9, is the allocation of financial instruments to the stages, based on the comparison of the current default risk with the default risk on initial recognition of the financial instrument. The allocation leads to the recognition of the loan loss provision to the amount of the expected one-year credit loss or the expected lifetime credit loss of the financial instrument. The loan loss provision of stage 1 and stage 2 is, therefore, largely determined by the models used to determine the stage transfer, the models for calculating the expected one-year credit loss or the expected lifetime credit loss of the financial instrument and the parameters used. Significant parameters within the calculation models that affect the expected credit loss are; the probability of default, the exposure at default and the loss given default. The risk provisioning of stage 3, in accordance with IFRS 9, is based on assumptions relating to various scenarios relating to expected cash flows from the defaulted loans or from the estimated probability of occurrence of the respective scenarios. Both the valuation parameters and the models for risk provisioning stage 1 and stage 2 have a significant impact on the amount of loan loss provision. Since the determination of the loan loss provision is subject to uncertainty and margin of discretion, this was a key audit matter in our audit. The disclosures regarding the loan loss provisions are enclosed in sections 13 and 54 of the notes to the consolidated financial statements.
- b) As part of the audit of the consolidated financial statements, we have initially audited the adequacy and operating effectiveness of the internal controls regarding the recording, processing and valuation of loans as well as the related financial reporting. In doing so, we also took into account the relevant business organization, including the significant IT systems and valuation models. The audit of the valuation included the assessment of the implemented processes and controls for identifying impaired loans, as well as an assessment of the models used to determine the stage transfer between stage 1 and stage 2, and the models used to determine the expected one-year or the expected life time credit loss of the financial instrument. We have used specialists from our Risk Advisory division specialised in credit risk management and IT audit for our audit. The group-wide valuation models for the determination of the loan loss provision of stage 1 and stage 2 were audited by our colleagues from Deloitte & Touche S.p.A., Milan (Italy), as these models were developed and validated by the parent company of the bank in Milan. We have used their results of the work for our purposes. Similarly, we utilised validation reports and third-party audit reports. Furthermore, for a sample of financial instruments measured at amortised cost, we audited the stage 1 and stage 2 loan loss provision by auditing the stage allocation as well as the calculated expected loss. For the audit of the stage 3 loan loss provision, our focus was on the significantly impaired loans, since there are areas of judgement and these have a material impact on the valuation of loans and the recognition of loan loss provisions. We have evaluated the valuation for a sample of the loans based on bank-internal forecasts of the future income and liquidity position of borrowers and assessed the appropriateness of the information basis used for planning purposes. In doing so, we have critically challenged and assessed the underlying assumptions of the legal representatives, with regard to the various expected cash flows of the audited loans, respectively the recovery of collaterals. Similarly, we assessed for the loans in our sample the probabilities of occurrence of the used scenarios with regard to their comprehensibility.
- c) We challenged significant assumptions and estimates made by the legal representatives. Overall, the risk provisions are within acceptable ranges.

2. Determination of the fair value of financial instruments that are measured at fair value and are not equity instruments

a) Financial instruments assets, which are valued at fair value and are not equity instruments, are disclosed in the consolidated financial statements under the balance sheet items "Financial assets held for trading", "Financial assets aFVtPL", "Financial assets aFVtOCI", and "Hedging derivatives". Similarly, financial instruments liabilities at fair value are disclosed under the balance sheet items "Financial liabilities held for trading", "Financial instruments was identified as a key audit matter as it is subject to complex accounting principles, valuation procedures and -methods and is partially based on estimates and assumptions made by the legal representatives regarding the valuation of financial instruments is enclosed in section 8 of the notes to the consolidated financial statements.

Auditor's Report (Continued)

- b) We have audited the organizational structure and related processes with regards to the determination of the fair value of financial instruments that are not equity instruments by examination of the adequacy and operating effectiveness of the implemented key controls. In particular, our audit included the independent verification process for pricing, the validation of valuation methods and assumptions, the approval process for new financial instruments, the audit of controls for recording contractual and valuation inputs, the flow of market data, the governance and the reporting. The calculated fair values are adjusted for the Group's creditworthiness, counterparty credit risk, model risk, bid-ask spread, refinancing costs and expected costs in connection with the liquidation of less actively traded instruments. With respect to these adjustments, we examined whether the Bank's assumptions, procedures and models are in line with standard industry practice and we audited whether the valuations are correct and comprehensible. In addition, we have conducted our own independent valuation on a sample of selected financial instruments and compared our results with the valuation performed by the Bank. We have used valuation specialists from our Risk Advisory division for our audit. Noteworthy issues from disputes with counterparties and extraordinary gains or losses from the sale of financial instruments were investigated.
- c) The valuation methods selected by the legal representatives of the Bank for the determination of the fair value of financial instruments are in line with industry standards.

3. IT controls related to financial reporting

- a) For the preparation of the consolidated financial statements, the Bank uses a large number of IT applications that have numerous interfaces. In order to maintain the integrity of the data used for the preparation of the consolidated financial statements, the Bank has taken various precautionary measurements and implemented controls. The Bank has outsourced its IT services, to a large extent, to UniCredit Services S.C.p.A., Milan (Italy), which has further outsourced a part of these services to other service providers. The IT controls related to financial reporting has been selected as a key audit matter, as the security of information affects many aspects of the accounting and financial reporting process, results in a large audit effort and is characterised by a high level of complexity. We refer to the disclosure of the legal representatives in section 4 Operational Risk in the risk report of the group management report with regards to the outsourcing of IT services.
- b) Based on our risk assessment, we have audited the design, implementation and operating effectiveness of the controls related to user rights and change management processes for the significant accounting-relevant IT applications by using IT specialists from our Risk Advisory division. In doing so, we agreed the scope of the ISAE 3402 audit with the ISAE 3402 auditor at UniCredit Services S.C.p.A. and the group auditors of UniCredit S.p.A. and used the audit results of those. We have informed ourselves of the professional competence, independence and regulatory governance of these auditors. When using these reports, we have inter alia critically assessed the reporting related to these audit procedures and audit results.
- c) IT controls related to financial reporting implemented by the Bank were enhanced over the past years.

4. Change in accounting policy – adoption of the revaluation model in accordance with IAS 16 and the fair value model in accordance with IAS 40

a) In the consolidated financial statements of UniCredit Bank AG, properties in use (IAS 16) are disclosed under balance sheet item "Property, Plant and Equipment" and investment properties (IAS 40) are disclosed under balance sheet item "Investment Properties". At year-end, the measurement after initial recognition of properties in use was changed to the revaluation model in accordance with IAS 16 and that of investment properties was changed to the fair value model in accordance with IAS 16 was done prospectively with effect from 31 December 2019 whereas IAS 40 was applied retrospectively as of 1 January 2018. The UniCredit Bank AG determines the fair values of properties in use for all properties considered significant by incorporating external valuation experts and an internal valuation using a discounted cash flow model is used to determine the fair value for all non-significant properties. The determination of the fair values of investment properties was identified as a key audit matter, as it has material effects on the financial statements. Also, the used valuation parameters for the fair value determination are subject to considerable uncertainty and margin of discretion and are based to some extent on estimates and assumptions made by the legal representatives. The disclosures of the legal representatives are in Sections 3, 15, 17, 58 and 59 of the notes to the consolidated financial statements.

- b) For the audit of the consolidated financial statements, we have audited the organizational structure and related processes with regards to the determination of the fair value of properties by examination of the adequacy and operating effectiveness of the implemented key controls. In doing so, we focused on the controls implemented to test the internal and external value determination. We audited the fair value determination for a representative sample of properties. In doing so, we audited the applied valuation methodology on its conformity with accounting regulations. We audited the adequacy of applied parameters and assumptions, specifically whether they are within an acceptable range. Further, the subject of our audit was the accurate and complete transfer of the databases. We also attended property inspections performed by the external valuators and performed independent inspections of properties in order to convince ourselves of the conditions of such properties presented in the valuators' reports. We convinced ourselves of the competency, capability and objectivity of the externally appointed valuators. With regards to the change in accounting policies, we assured ourselves of the correct processing of the determined fair values within the accounting department. In doing so, the focus of our audit was on the correct prospective initial application of the revaluation model for properties in use and the correct retrospective initial application of the fair value model for investment properties.
- c) We challenged significant assumptions and estimates made by the legal representatives. Overall, the parameters used for the valuation of properties are within acceptable ranges.

Other Information

The executive directors are responsible for the other information. The other information comprises:

- the executive directors' confirmation regarding the consolidated financial statements and to the group management report pursuant to § 297 (2) sentence 4 and § 315 (1) sentence 5 German Commercial Code (HGB) respectively, and
- all the remaining parts of the annual report, with the exception of the audited consolidated financial statements and group management report and our auditor's report.

Our audit opinions on the consolidated financial statements and on the group management report do not cover the other information, and consequently we do not express an audit opinion or any other form of assurance conclusion thereon.

In connection with our group audit, our responsibility is to read the other information and, in so doing, to consider whether the other information

is materially inconsistent with the consolidated financial statements, with the group management report or our knowledge obtained in the audit, or
 otherwise appears to be materially misstated.

Responsibilities of the Executive Directors and the Supervisory Board for the Consolidated Financial Statements and the Group Management Report

The executive directors are responsible for the preparation of the consolidated financial statements, that comply, in all material respects, with IFRS as adopted by the EU and the additional requirements of German commercial law pursuant to § 315e (1) German Commercial Code (HGB) and that the consolidated financial statements, in compliance with these requirements, give a true and fair view of the assets, liabilities, financial position and financial performance of the Group. In addition, the executive directors are responsible for such internal control as they have determined necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the executive directors are responsible for assessing the Group's ability to continue as a going concern. They also have the responsibility for disclosing, as applicable, matters related to going concern. In addition, they are responsible for financial reporting based on the going concern basis of accounting unless there is an intention to liquidate the Group or to cease operations, or there is no realistic alternative but to do so.

Auditor's Report (CONTINUED)

Furthermore, the executive directors are responsible for the preparation of the group management report that, as a whole, provides an appropriate view of the Group's position and is, in all material respects, consistent with the consolidated financial statements, complies with German legal requirements, and appropriately presents the opportunities and risks of future development. In addition, the executive directors are responsible for such arrangements and measures (systems) as they have considered necessary to enable the preparation of a group management report that is in accordance with the applicable German legal requirements, and to be able to provide sufficient appropriate evidence for the assertions in the group management report.

The supervisory board is responsible for overseeing the Group's financial reporting process for the preparation of the consolidated financial statements and of the group management report.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements and of the Group Management Report

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and whether the group management report as a whole provides an appropriate view of the Group's position and, in all material respects, is consistent with the consolidated financial statements and the knowledge obtained in the audit, complies with the German legal requirements, and appropriately presents the opportunities and risks of future development, as well as to issue an auditor's report that includes our audit opinions on the consolidated financial statements and on the group management report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with § 317 German Commercial Code (HGB) and the EU Audit Regulation and in compliance with German Generally Accepted Standards for Financial Statement Audits promulgated by the Institut der Wirtschaftsprüfer (IDW) will always detect a material misstatement. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements and this group management report.

We exercise professional judgment and maintain professional scepticism throughout the audit.

We also

- identify and assess the risks of material misstatement of the consolidated financial statements and of the group management report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our audit opinions. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls.
- obtain an understanding of internal control relevant to the audit of the consolidated financial statements and of arrangements and measures relevant to the audit of the group management report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an audit opinion on the effectiveness of these systems.
- evaluate the appropriateness of accounting policies used by the executive directors and the reasonableness of estimates made by the executive directors and related disclosures.
- conclude on the appropriateness of the executive directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in the auditor's report to the related disclosures in the consolidated financial statements and in the group management report, or, if such disclosures are inadequate, to modify our respective audit opinions. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to be able to continue as a going concern.
- evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures and whether the consolidated financial statements present the underlying transactions and events in a manner that the consolidated financial statements give a true and fair view of the assets, liabilities, financial position and financial performance of the Group in compliance with IFRS as adopted by the EU and with the additional requirements of German commercial law pursuant to § 315e (1) German Commercial Code (HGB).
- obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express audit opinions on the consolidated financial statements and on the group management report. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinions.
- evaluate the consistency of the group management report with the consolidated financial statements, its conformity with German law, and the view of the Group's position it provides.
- perform audit procedures on the prospective information presented by the executive directors in the group management report. On the basis of sufficient appropriate audit evidence we evaluate, in particular, the significant assumptions used by the executive directors as a basis for the prospective information, and evaluate the proper derivation of the prospective information from these assumptions. We do not express a separate audit opinion on the prospective information and on the assumptions used as a basis. There is a substantial unavoidable risk that future events will differ materially from the prospective information.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with the relevant independence requirements, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, the related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter.

OTHER LEGAL AND REGULATORY REQUIREMENTS

Further Information pursuant to Article 10 of the EU Audit Regulation

We were elected as group auditor by the annual general meeting on June 3, 2019. We were engaged by the supervisory board on July 15, 2019. We have been the group auditor of UniCredit Bank AG, Munich, without interruption since the financial year 2013.

We declare that the audit opinions expressed in this auditor's report are consistent with the additional report to the audit committee pursuant to Article 11 of the EU Audit Regulation (long-form audit report).

In addition to the financial statement audit, we have provided to group entities the following services that are not disclosed in the consolidated financial statements or in the group management report:

- Audits and reviews of reporting packages
- Audits pursuant to § 89 of the Securities Trading Act
- Audit of the internal control system of a service organization
- Performing agreed upon procedures
- Audits of financial information or their components
- Review of an assignment of findings to process areas
- Review of archived documents

GERMAN PUBLIC AUDITOR RESPONSIBLE FOR THE ENGAGEMENT

Legal basis

UniCredit Bank AG (HVB) is a universal bank with its registered office and principal place of business in Arabellastrasse 12, Munich, Germany. It is entered under HRB 42148 in the B section of the Commercial Register maintained by Munich Local Court. HVB is an affiliated company of UniCredit S.p.A., Milan, Italy (ultimate parent company).

The annual financial statements of UniCredit Bank AG for the 2019 financial year are prepared in accordance with the accounting regulations in the German Commercial Code (Handelsgesetzbuch – HGB), the German Stock Corporation Act (Aktiengesetz – AktG), the German Pfandbrief Act (Pfandbriefgesetz – PfandBG) and the Regulations Governing Disclosures in the Financial Statements of Banks and Similar Financial Institutions (Verordnung über die Rechnungslegung der Kreditinstitute und Finanzdienstleistungsinstitute – RechKredV).

HVB is active in all of the sectors served by commercial and mortgage banks.

Accounting, valuation and disclosure

1 Reporting date/period

The amounts shown in the tables and texts below relate to the reporting date of 31 December for disclosures regarding balance sheet items and totals and the period from 1 January to 31 December of the respective year for disclosures regarding the income statement.

2 Consistency

The same accounting and valuation methods have essentially been applied as last year.

As part of the optimisation of its payment transaction activities, HVB has decided to adjust the recognition of expenses for the purchase of certain payment transaction services (an external service provider carries out the activities required for the settlement of payment transactions on behalf of the Bank) and of services in connection with credit card payments or credit card management. These expenses are now reported under commission expense instead of general administrative expenses. In view of the adjustments made in recent years to the pricing scheme for accounts and payment services, it is more appropriate to set off the expenses for the purchase of the services as commission expense from commission income for these services. The change in recognition results in the financial statements providing more reliable and relevant information on the respective banking services. Consequently, \in 41 million is recognised as commission expense in the 2019 reporting year, whereas ϵ 41 million was shown as general administrative expenses for the purchase of the retroactive application, the previous year's figures have been adjusted so that commission expense has increased by ϵ 41 million while general administrative expenses have fallen by ϵ 41 million.

3 Cash and cash balances

The cash and cash balances (asset item 1) are stated at nominal amounts.

4 Treasury bills and bills of exchange

Treasury bills and other bills (asset item 2) are shown at their cash value, i.e. less any discounted amounts.

5 Loans and receivables with banks and customers

Loans and receivables with banks and customers (asset items 3 and 4) are always stated at the nominal amount plus any accrued interest. Differences between acquisition cost and nominal amount (premiums/discounts) that are attributable to interest are allocated to prepaid expenses or deferred income and taken to the income statement under net interest income in the correct period over the term of the underlying items. Any necessary write-downs and provisions compliant with Section 340f HGB are deducted.

Loans and receivables are valued at the lower of cost or market as stipulated in Section 253 (4) 1 HGB. HVB creates specific loan-loss provisions and accruals to the amount of the anticipated loss for all identifiable exposure to acute counterparty default risk. The expected flow-backs discounted at the original effective interest rate are used when determining the level of write-downs compliant with Section 253 HGB. In the process, various realistic scenarios are estimated whereby the loss in value resulting from the expected value of the credit default losses is weighted by the probability of occurrence for each scenario. Specific loan-loss provisions are reversed once the receivable is classified as irrecoverable and written off. Accruals are reversed as soon as the default risk has ceased.

Country risk is covered by specific loan-loss provisions for loans at risk of default; a distinction is no longer made between the default risk of the borrower and the transfer risk from the borrower to the Bank.

Latent lending risks are covered by global provisions. When assessing domestic latent lending risks, HVB applies the principles of the German tax regulations allowing financial institutions to deduct global provisions. When assessing foreign latent lending risks, HVB similarly applies the principles of the German tax regulations allowing financial institutions to deduct global provisions. The only exception is the calculation of latent lending risks for the Athens branch, where the global provisions are set up on the basis of Greek law (1% of the average volume of loans and receivables with customers).

Accounting, valuation and disclosure (CONTINUED)

Like other loans and receivables, mortgage loans are shown at their nominal values. Differences between the nominal amount and the actual amount paid out are included under either prepaid expenses or deferred income, and reversed over the period to which they apply.

The purpose defined at the time of acquisition (Section 247 (1) and (2) HGB) determines the assignment of loans, receivables and securities to the heldfor-trading portfolios, the liquidity reserve or investment assets.

The Bank has made use of the option permitted by Section 340f (3) HGB and has included the change in provisions compliant with Section 340f HGB to net the write-downs and impairments for receivables and certain securities as well as additions to provisions for losses on guarantees and indemnities with the write-ups on bad and doubtful debts and on certain securities as well as release of provisions for losses on guarantees and indemnities.

6 Bonds and other fixed-income securities, and equity securities and other variable-yield securities

Investment securities and securities held for liquidity purposes (securities treated neither as held for trading purposes nor as investment securities) are shown under bonds and other fixed-income securities (asset item 5) and equity securities and other variable-yield securities (asset item 6).

We measure investment securities in accordance with the modified lower of cost or market principle compliant with Section 253 (3) 5 HGB, under which impairments are only to be deducted from the acquisition cost if the loss of value is expected to be permanent. In the case of equity instruments, we recognise an impairment loss if the fair value at the reporting date is significantly lower than the carrying amount or if the fair value has fallen below the carrying amount for a long period of time. In the case of debt instruments, on the other hand, an impairment that is likely to be permanent occurs when the issuer of the securities defaults. In the event of a loss of value that is attributable to market prices, we assume that the impairment is only temporary, as these losses will be balanced out again by the due date at the latest.

Securities held for liquidity purposes are measured at amortised cost, taking account of the lower of cost or market principle (Section 253 (4) 1 HGB) and if necessary, written down to the market value or fair value at the balance sheet date, whichever is lower. Premiums and discounts are amortised over the remaining term of the securities holdings upon addition.

In observance of the lower of cost or market principle, appropriate write-downs are made to take account of the creditworthiness of the issuer and the liquidity of the financial instrument. Where the reasons for a write-down to the lower of cost or market no longer apply, the write-down is reversed compliant with Section 253 (5) HGB.

The Bank sets up portfolio valuation units documented in advance for certain interest-bearing securities, promissory notes (with a carrying amount of \in 33,197 million (previous year: \in 29,613 million)) and certain interest rate derivatives hedged against interest rate risk by equivalent hedging derivatives (notably interest rate swaps). The hedge of the dynamic portfolio within the framework of the valuation unit is of unlimited duration; the hedging period of the individual hedging derivatives is always related to the residual maturity of the respective hedged items in the portfolio. The offset changes in the value of the interest-bearing securities amount to an increase of \in 574 million (previous year: \in 367 million) for the portfolios whose hedged items encompass securities and promissory notes. The change is largely attributable to a higher volume and the lower level of interest rate risk sensitivity analysis based on basis point values (BPV). The changes in value arising from the hedged items and hedges induced from the hedged risk are set against each other and offset within the individual valuation units. Under the net hedge presentation method, no net valuation gain is taken to the income statement; provisions are set up to cover any net loss on the ineffective portion of the changes in the value of the hedge. Any valuation loss arising from the unhedged risk is included in the respective hedged items and hedging derivatives in accordance with the imparity principle.

The Bank makes use of the option permitted by Section 340f (3) HGB to net the write-downs and impairments for receivables and certain securities as well as additions to provisions for losses on guarantees and indemnities with the write-ups on bad and doubtful debts and on certain securities as well as the release of provisions for losses on guarantees and indemnities.

7 Held-for-trading portfolio

Compliant with Section 340e (3) HGB, financial instruments held by banks for trading purposes are measured at fair value less a risk discount and recognised in the balance sheet. Any ensuing changes in value and provisions relating to trading transactions are recognised in the income statement under net income from the held-for-trading portfolio. In addition, compliant with Section 340e (4) HGB an amount is allocated to the "Fund for general banking risks" in accordance with Section 340g HGB, and shown in the balance sheet separately. HVB assigns all financial instruments (bonds, equity securities, derivatives, loans and receivables, and liabilities, including delivery obligations arising from short sales of securities) to the held-for-trading portfolio that are acquired and sold with the intention of generating a short-term gain on proprietary trading. This is done to exploit existing or anticipated differences between buying and selling prices or fluctuations in market rates, prices, values or interest rates to generate a trading gain or margin. No changes have been made compared with last year regarding the criteria for assignment to the trading portfolio (definition of the intention to trade). No financial instruments have been reclassified to or from the held-for-trading portfolio. The assets and liabilities that are held for trading are shown separately in the balance sheet (asset item 6a and liability item 3a).

We have determined the fair value of the financial instruments held for trading purposes in accordance with the valuation hierarchy specified in Section 255 (4) HGB. The fair value is normally defined as the amount at which the asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction on the balance sheet date. The market price is used for financial instruments for which there is an active market. Where there is no active market that can be used to determine the market price, the fair value is determined with the aid of generally recognised valuation methods (notably present value and option price models).

The fair values of securities and derivatives are assumed on the basis of either external price sources (such as stock exchanges or other price providers like Reuters) or determined using internal valuation models. For the most part, prices from external sources are used to calculate the fair value of securities. HVB's credit risk is included in the fair value of liabilities held for trading purposes. Derivatives are primarily measured on the basis of valuation models. The parameters for HVB's internal valuation models (such as yield curves, volatilities and spreads) are taken from external sources, and checked for their validity and correctness by the Risk Control unit.

Appropriate adjustments (referred to as fair value adjustments) are made to the fair values calculated in this way in order to take account of further influences on the fair value (such as the liquidity of the financial instrument, closing out costs or model risks when the fair value is calculated using a valuation model). Rating-related default risk in trading-book derivatives is covered by applying suitable valuation adjustments (CVAs and DVAs). Furthermore, funding valuation adjustments (FVAs) were recognised in the income statement for the measurement at fair value of not fully secured derivatives. Apart from unsecured derivatives, this also affects derivatives for which collateral has been provided in favour of the counterparty only.

The main conditions that can influence the amount, timing and certainty of future cash flows from derivatives essentially relate to the following features of derivatives:

- Where the cash flows under derivatives are linked to current market prices or rates, the respective market price or market rate at the payment date determines the amount payable (in the case of interest rate swaps, for instance, the payment of the variable interest rate on the payment date depends on the interest rate fixed on this date, such as Euribor).
- Where the derivatives allow for cash settlement at fair value on the due date, the amount payable is calculated as the difference between the price set when the derivative was entered into and the current market price (in the case of a foreign exchange forward with cash settlement, for instance, the difference between the agreed forward price and the current price is payable).
- In the case of American options, unlike European options, the option buyer has the right to exercise the option at any time during the term of the option.
- Where it is possible to terminate a derivative prior to maturity (as is the case with all exchange-traded derivatives, for instance), the derivative may be terminated by paying the current fair value.
- The counterparty's credit rating and solvency are a further important consideration. If the counterparty becomes insolvent, it can no longer be expected that it will meet its obligations arising from the derivative.

Accounting, valuation and disclosure (CONTINUED)

These features may be included in the terms agreed for any type of derivative. Thus it is possible that foreign exchange, interest rate and equity options may be exercised at any time (American option) or only at maturity (European option). It is generally possible to determine the size of the derivative positions entered into from the respective nominal amounts.

In order to obtain the final figures disclosed in the balance sheet for the held-for-trading portfolios, the risk discount required by Section 340e (3) 1 HGB is deducted from the fair values of the financial instruments held for trading purposes determined in this way. Including the risk discount in net trading income reflects the risk of possible price losses up until the earliest possible date of realisation of unrealised valuation gains or losses. In accordance with the relevant regulatory rules, the risk discount is determined on the basis of the internal risk management system using an accounting value-at-risk approach (holding period of ten days; confidence level: 99%; 2-year observation period). We have deducted the risk discount determined for the entire held-for-trading portfolio from the assets held for trading purposes in the balance sheet (asset item 6a) and recognised it in the net income from the held-for-trading portfolio.

HVB employs derivative financial instruments both for trading purposes and to hedge balance sheet items. The vast majority are trading derivatives which are disclosed at their fair value in the held-for-trading portfolio items on the assets side and liabilities side of the balance sheet and taken to the income statement.

With interest rate swaps, the two opposing cash flows from interest are aggregated for each swap contract and disclosed net as interest income or interest expense. In the case of derivative portfolios purely held for trading, we disclose the netted interest payments in the net trading income.

Derivatives that are not associated with the held-for-trading portfolio continue to be treated in accordance with the principle of the non-recognition of pending transactions. Only cash flows that have started, such as option premiums and accrued upfront payments on unvalued banking book derivatives, are disclosed under other assets (asset item 12), other liabilities (liability item 5) and deferred income or prepaid expenses (asset item 13 and liability item 6). Irrespective of whether it results from the hedged item or the hedging derivative, any net loss arising from valuation units set up for the netting (compensation) of the change in value of the hedged item and hedging derivative associated with the hedged risk is to be taken to the income statement as a provision for valuation units. In accordance with German GAAP, any change in fair value arising from the unhedged risk in both the hedged item and the hedging instrument is recognised on a gross basis in compliance with individual valuation under the imparity principle.

The Bank takes out the credit derivatives not held for trading exclusively as a protection buyer. In this context, the credit derivatives serve to hedge the risk of default of other transactions entered into by the Bank. The credit derivatives not held for trading are therefore accounted for according to the principles relating to loan collateral.

The interest rate derivatives employed for asset/liability management of the general interest rate risk associated with receivables and liabilities in the banking book are measured as part of the aggregate interest position. Please refer to the Risk Report for a discussion of the management of the overall interest rate position.

The few remaining standalone derivatives outside the trading book are valued in accordance with the imparity principle. A provision for anticipated losses on pending transactions is set up for unrealised valuation losses; unrealised valuation gains are not recognised.

Derivatives held for trading purposes that were concluded under master agreements together with a credit support annex allowing for daily exchange of collateral are netted for each counterparty in the balance sheet. Such netting encompasses both the carrying amount of the derivatives and the collateral provided for each counterparty.

Extensive information about HVB's derivative financial instruments, complete with detailed breakdowns by product and risk type, and showing the nominal amounts, fair values and the counterparty structure, is included in the note to the annual financial statements regarding derivative financial instruments.

The Risk Report contains a detailed overview of the Bank's derivative transactions.

8 Participating interests and shares in affiliated companies

Participating interests and shares in affiliated companies (asset items 7 and 8) are shown at the lower of acquisition cost or – if there is a permanent impairment – fair value prevailing at the balance sheet date.

Where HVB holds a controlling interest, profits and losses of partnerships as well as dividends paid by limited or incorporated companies are recognised in the year in which they arise, provided the relevant legal conditions are met.

Compliant with Section 340c (2) 1 HGB, HVB nets income from write-ups on participating interests, shares in affiliated companies and investment securities with write-downs on these investments. In addition, the expense and income items which reflect the results from the disposal of financial assets are included in this netting process in accordance with the option permitted by Section 340c (2) 2 HGB.

9 Intangible assets

Goodwill and software are disclosed under intangible assets (asset item 10).

Purchased goodwill is calculated by setting the acquisition cost of a company against the value of the company's individual assets, less the liabilities at the time of acquisition. It is normally amortised over the standard useful life assumed by law. An impairment is recognised in the event of a permanent loss of value. Should the reasons for the impairment no longer apply, the lower amount recognised for derivative goodwill is retained.

Purchased intangible assets are capitalised at cost and amortised over their expected useful life of three to five years (software) or a longer contractual useful life of up to ten years (other intangible assets). Impairments are recognised where necessary. HVB has not made use of the capitalisation option for internally generated intangible assets classified as non-current.

10 Property, plant and equipment

Property, plant and equipment (asset item 11) is valued at acquisition or production cost, less – insofar as the assets are depreciable – depreciation using the straight-line method based on their expected useful life. In such cases, the useful lives are closely related to the depreciation rules specified in Section 7 of the German Income Tax Act (Einkommensteuergesetz – EStG) in conjunction with the depreciation tables for equipment. Pro rata depreciation is taken to the income statement for additions to furniture and office equipment in the year of acquisition.

Low-value assets with acquisition costs of up to \in 250 are fully expensed in the year of acquisition and shown as additions and disposals in the analysis of non-current assets. We set up a collective item for all items of property, plant and equipment with acquisition costs of between \in 250 and \in 1,000 (pool depreciation in accordance with Section 6 (2a) EStG, new version), one-fifth of which we reverse in the financial year of creation and each of the following four years in the income statement.

11 Liabilities

Liabilities (liability items 1 to 3, 8 and 9) are stated at the amount repayable plus accrued interest. Differences between the amount repayable and the amount disbursed (premiums/discounts) that are attributable to interest are allocated to prepaid expenses or deferred income, and reversed under net interest income in the correct accounting period. Liabilities without current interest payments (zero-coupon bonds) are stated at their present value calculated using a constant discount rate over the relevant terms.

Accounting, valuation and disclosure (CONTINUED)

12 Provisions

In accordance with the principles of sound commercial judgement, we assess provisions for taxes, uncertain liabilities and anticipated losses on pending transactions (liability item 7) at the amount repayable, taking into account anticipated future price and cost increases. As a basic principle, provisions falling due in more than one year are discounted using the average market rate of the past seven financial years determined and published by Deutsche Bundesbank as appropriate for the respective maturities.

HVB offers its employees various types of company pension plans. To fund the company pension plans, HVB has covered its pension commitments largely with plan assets managed as external trustee assets with limited access. These plan assets are set against the liabilities arising from pension commitments or similar long-term commitments. If the plan assets of the pension funds, pension guarantee associations or retirement benefit corporations in question do not cover the amount of the equivalent pension commitments payable, HVB recognises a provision for pension funds and similar obligations in the amount of the shortfall. If the fair value of the plan assets exceeds the commitments, the difference is recognised as the excess of plan assets over pension liabilities.

We measure payment obligations arising from pension commitments at the amount payable calculated using the projected unit credit method on the basis of biometric probabilities. Anticipated future salary and pension increases are taken into account when measuring the pension commitment. Insofar as the amount of the pension commitments is determined exclusively by the fair value of securities, we recognise provisions for this at the fair value of these securities where it exceeds a guaranteed minimum amount. HVB has made use of the option to employ the average market rate determined and published by Deutsche Bundesbank as the discount rate for an assumed residual maturity of 15 years.

The German Act Implementing the Directive on Credit Agreements Relating to Residential Immovable Property and Amending Provisions of Commercial Law enacted in 2016 changed the specified discount rate used in discounting provisions for pension obligations from a seven-year average to a ten-year average. The difference occurring in every financial year between the valuation of the provision applying the corresponding average market rate from the previous ten financial years and applying the corresponding average market rate from the previous seven financial years is subject to a ban on distribution.

	2019	2018
Discount rate (10-year average)	2.71%	3.21%
Discount rate (7-year average)	1.97%	2.32%
Pension trend	1.50%	1.70%
Anticipated wage and salary increases	1.50%	1.50%
Career trend	0.50%	0.50%
Reduction of the probabilities based on the		
modified Heubeck 2018 G tables to		
Mortality		
Men	80%	80%
Women	95%	95%
Probability of disability		
Men	80%	80%
Women	80%	80%

Income and expenses arising from the compounding and discounting of provisions for pensions are included in other operating income less other operating expenses. However, the current service cost accruing during the period and the effects arising from changed assumptions regarding the wage, salary and pension trend and biometric probabilities are disclosed under payroll costs. The same principles apply for the impact on earnings arising from the change in the group of beneficiaries and the change in provisions for pensions in connection with company restructuring activities. Similarly, the impact on earnings of the change in the discount rate is allocated to payroll costs.

Furthermore, the revised version of IDW RS BFA 3 requires the Bank to check whether it has incurred a loss on the aggregate holding of interest-bearing transactions in the banking book. The Bank applies the net present value approach to ascertain whether there are any circumstances beyond the individual valuation that had already occurred in economic terms at the reporting date that would lead to losses in the future. In this instance, it would be necessary to set up a provision for anticipated losses on pending transactions to ensure loss-free valuation in the banking book. To do this, the cash flows from the interest-bearing transactions in the banking book are discounted on the basis of the market interest rates at the reporting date and set against their carrying amounts using the net present value approach. All on- and off-balance-sheet, interest-bearing financial instruments outside of the held-for-trading portfolio are included in this process. All costs to be incurred in connection with the interest-bearing transactions such as risk costs, administration costs for handling the transactions through to their maturity, funding costs and so on are taken into account for discounting. The contractual cash flows are normally used as the basis; appropriate assumptions regarding the anticipated utilisation are only made and hence an economic maturity used as the basis for financial instruments with no fixed maturity (such as demand and savings deposits) in compliance with the internal risk management rules. The present value and generally set against a carrying amounts; derivatives concluded to hedge interest rate risk in the banking book are recognised at their fair value and generally set against a carrying amount of zero as they are not carried as general hedging derivatives individually in the banking book. A provision for anticipated losses on pending transactions needs to be set up to cover any shortfall between the present value determined in this way and the carrying amount. In this context, positive dif

13 Plan assets

Assets serving exclusively to settle pension commitments or similar long-term commitments, and to which all other creditors do not have recourse (plan assets), are measured at fair value and offset against the underlying commitment.

If the offsetting results in an excess of commitments over plan assets, we recognise a provision for pensions and similar commitments (liability item 7) to this amount. If the value of the assets exceeds the commitments, the amount is recognised under excess of plan assets over pension liabilities (asset item 15).

The plan assets consist mainly of investment fund shares that are recognised at the current redemption price (fair value). Income and expenses arising from plan assets to be offset are shown in other operating income less other operating expenses.

Compliant with Section 8a of the German Semi-Retirement Act (Altersteilzeitgesetz – AltTZG), employee credits for semi-retirement are secured by pledging securities to the trustee.

Accounting, valuation and disclosure (CONTINUED)

14 Deferred tax assets and liabilities

Compliant with Section 274 HGB, deferred tax items are determined for temporary differences between the carrying amount of an asset, liability or deferred item shown in the commercial balance sheet and the corresponding amount disclosed for tax reporting purposes as well as for tax loss carryforwards and tax credits. German corporations are normally charged a corporate income tax rate of 15%, irrespective of any dividend distribution. Deferred taxes are measured using the uniform corporate income tax rate of 15.8%, including the solidarity surcharge, and the municipal trade tax dependent upon the applicable municipal trade tax multiplier. At HVB, this results in an overall valuation rate for the domestic portion of deferred taxes of 31.4%. The respective local tax rates are applied analogously for the foreign establishments. Compliant with Section 274 (1) 2 HGB, the deferred tax assets involved have not been recognised on account of an aggregate future reduction in tax. This results mainly from tax valuation reservations regarding general provisions and held-for-trading portfolios as well as tax loss carryforwards.

15 Foreign currencies

Amounts in foreign currency are translated in accordance with the principles set forth in Section 340h and Section 256a HGB. As a result, assets and liabilities denominated in foreign currency and spot transactions outstanding at the balance sheet date are always converted into euros using the mean spot rate applicable at the balance sheet date. The foreign currency positions in the portfolio not held for trading that are concluded in each currency are transferred to the held-for-trading portfolio on a daily basis under a standard system of currency risk management that is applicable across the Bank as a whole. The translation gains on the foreign currency positions managed in the held-for-trading portfolio are recognised at fair value in the income statement in accordance with the valuation methods applicable to the held-for-trading portfolio (Section 340e (3) 1 HGB). Consequently, the entire net income from FX trading is disclosed under net income from the held-for-trading portfolio in the income statement. On the other hand, investment securities denominated in foreign currency that are not specifically covered in the same currency and are not transferred to the held-for-trading portfolio as part of currency risk management applicable throughout the Bank are carried at their historical cost. Outstanding forward transactions are translated using the forward rate effective at the balance sheet date.

Notes to the Income Statement

The condensed income statement is shown with the Management Report.

16 Breakdown of income by region

The following table shows a breakdown by region of:

- interest income
- current income from equity securities and other variable-yield securities, participating interests and shares in affiliated companies
- fees and commissions receivable
- $-\operatorname{net}$ income from the held-for-trading portfolio and
- other operating income

		(€ millions)
	2019	2018
Total income	6,318	5,720
Germany	5,011	4,580
Italy	303	170
United Kingdom	372	397
Rest of Europe	247	184
Americas	285	288
Asia	100	101

17 Net interest income

	2019	2018
Net interest income	3,223	2,757
Interest income from		
lending and money market transactions	3,224	3,103
including: netted positive interest from borrowings	150	154
fixed-income securities and government-inscribed debt	324	234
Current income from equity securities and other variable-yield securities, participating		
interests and shares in affiliated companies	368	425
Income from profit-pooling and profit-and-loss-transfer agreements	522	138
Interest expenses	1,215	1,143
including: netted positive interest from borrowings	241	263

Negative interest mainly relates to securities repurchase agreements, overnight deposits and forward transactions with banks and institutional investors.

The interest expense arising from the compounding of provisions amounts to €3 million (previous year: €3 million).

(€ millions)

Notes to the Income Statement (CONTINUED)

18 Services performed for third parties

HVB performed significant services for third parties notably in portfolio, asset and trust-loan management, in the brokerage of insurance, savings and loan contracts and investment funds, in investment and securities commission activities, and in the handling of payments.

19 Net income from the held-for-trading portfolio

Net income from the held-for-trading portfolio (net trading income) of €478 million (previous year: €345 million) includes the netted income and expenses arising from transactions involving financial instruments held for trading purposes, complete with the full net income from FX operations. Also carried here are certain fees and commissions in connection with transactions involving financial instruments held for proprietary trading purposes and trading with precious metals. We carry the current interest income/expense resulting from held-for-trading portfolios (referred to as trading-induced interest) as well as dividend income in net interest income and in current income rather than in net trading income in accordance with our internal management.

20 Breakdown of other operating income and expenses

Other operating income primarily includes the following:

- income from the reversal of provisions other than provisions for lending and securities operations (€499 million, previous year: €162 million),
- cross-charged payroll costs and cost of materials (€83 million, previous year: €66 million) and
- the recognition of income from services performed in earlier years (€16 million, previous year: €16 million).

Other operating expenses primarily include the following:

- additions to provisions other than provisions for lending and securities operations (€51 million, previous year: €929 million),
- compensation and ex gratia payments (€9 million, previous year: €6 million),
- expenses of €5 million (previous year: €7 million) arising from the compounding and discounting of other provisions in the non-lending business and
- expenses of €5 million (previous year: €6 million) related to other periods.

21 Expenses from absorbed losses

In the 2019 financial year, there was no expense (previous year: €6 million) from an absorbed loss in other accounting periods.

22 Extraordinary income/expenses

In the reporting year, this item amounts to €1 million. In the previous-year period, it included a gain of €496 million on the merger of UniCredit Luxembourg S.A. into UniCredit Bank AG in July 2018.

23 Taxes on income

The expense from current taxes on income of €394 million includes a net tax expense of €52 million from earlier years.

24 Net income

The profit available for distribution amounts to \notin 3,288 million. This is made up of profit before tax of \notin 1,051 million generated in the reporting year less transfers to other retained earnings of \notin 263 million and withdrawals from other retained earnings of \notin 2,500 million. We will propose to the Shareholders' Meeting that a dividend of \notin 3,288 million be paid to UniCredit S.p.A. (UniCredit), Milan, Italy. This represents a dividend of around \notin 4.10 per share after around \notin 0.65 in the 2018 financial year. In accordance with a resolution adopted by the Shareholders' Meeting on 3 June 2019, the profit available for distribution of \notin 520 million reported in the previous year was distributed to UniCredit.

Liabilities held for trading	21,376	24,707
Derivative financial instruments (negative fair values)	9,165	7,006
Liabilities (including delivery obligations arising from short sales of securities)	12,211	17,701

Derivatives held for trading purposes that were concluded under master agreements together with a credit support annex allowing for daily exchange of collateral were netted for each counterparty in the balance sheet. The netting for each counterparty encompasses both the carrying amount of the derivatives and the collateral provided. This involved netting positive fair values of \in 58.2 billion (previous year: \in 32.9 billion) with negative fair values of \in 59.8 billion (previous year: \in 33.5 billion) on derivatives held for trading with the associated receivables (\notin 11.6 billion, previous year: \notin 7.9 billion) and liabilities (\notin 10 billion, previous year: \notin 8.2 billion) from collateral provided.

33 Investment funds

The following table contains information regarding shares in investment funds compliant with Section 285 No. 26 HGB for which the Bank's holding exceeds 10% of the total number of shares:

	0							
		20	19		2018			
	CARRYING Amount	FAIR VALUE	DIFFERENCE CARRYING AMOUNT/ FAIR VALUE	DIVIDEND PAYMENTS	CARRYING Amount	FAIR VALUE	DIFFERENCE Carrying Amount/ Fair Value	DIVIDEND Payments
Total investment funds	1,107	1,112	5	2.8	717	720	3	5.6
Equity funds	241	241	—	—	176	176	—	_

near-money market funds	—	—	—		—	—	—	_
Mixed funds	358	363	5	1.4	183	186	3	2.9
Index funds	288	288	—	0.5	109	109	—	0.5
Bond funds	33	33			171	171		0.4
Funds of funds	187	187		0.9	78	78		1.8

In addition, the Bank holds all the shares in the "European-Office-Fonds" property special purpose entity, which is fully consolidated in the Bank's consolidated financial statements in accordance with IFRS 10.

Under Section 246 (2) HGB, assets to which all other creditors do not have access and which serve exclusively to settle liabilities arising from pension commitments or similar long-term commitments must be offset against these liabilities. Where these assets represent shares in investment funds, they are not shown in this table.

The shares listed in this table are held in either the Bank's held-for-trading portfolio or its liquidity reserve. Where necessary, the holdings in the liquidity reserve are always written down to the lower fair value.

In the case of the information regarding the dividend payments, it should be noted that the positions included in the table frequently represent investment funds that reinvest dividends in themselves. Consequently, the dividend payments shown in the table serve only as a limited indicator for the performance of the investment funds.

There are no indications of a restriction on daily return for the shares listed here.

Discounts on funds borrowed	44	32
Premiums on amounts receivable	_	1

37 Excess of plan assets over pension liabilities

An amount payable of €1,738 million arising from liabilities due to pension and similar commitments was set against offsetting plan assets with a fair value of €1,741 million. The excess of assets over commitments is disclosed in the balance sheet as the excess of plan assets over pension liabilities (€3 million). The acquisition cost of the offsetting plan assets totalled €1,495 million. The assets involved are essentially fund shares, subordinated bonds, investments, and cash and cash equivalents.

		(€ millions)
	2019	2018

HypoVereinsbank · 2019 Annual Report

Notes to the Balance Sheet (CONTINUED)

38 Assets assigned or pledged as security for own liabilities

Assets were assigned or pledged as security for the following liabilities:		(€ millions)
	2019	2018
Assets assigned or pledged as security for own liabilities	40,497	40,105
Deposits from banks	37,501	32,383
Deposits from customers	2,996	7,722

In addition, collateral is pledged to the ECB, irrespective of whether this is actually used to borrow funds or not. At the reporting date, the volume of pledged collateral amounted to \in 15.7 billion (previous year: \in 15.2 billion).

Examples of own liabilities for which HVB provides collateral are special credit facilities provided by KfW and similar institutions, which the Bank has passed on as loans in compliance with their conditions.

As a seller under repurchase agreements, HVB has transferred assets with a book value of \in 27.3 billion (previous year: \in 27.2 billion) to its funding partners. The total includes \in 8.3 billion (previous year: \in 7.8 billion) relating to own securities holdings. These securities continue to be disclosed as HVB's assets. The consideration received in return is stated under liabilities. They comprise mainly international money market transactions.

At the same time, further assets totalling \in 13.7 billion (previous year: \in 13.1 billion) were pledged as security for securities lending transactions and exchange-traded derivatives. In setting up a contractual trust arrangement (CTA), HVB transferred collateral to the asset administrator to secure pension and semi-retirement obligations. Pursuant to Section 8a AltTZG, employers are required to secure credit exceeding three times the amount of normal earnings, including the associated employer's contribution to the total social security charge, against the risk of insolvency. Recognised provisions and obligations to cover the costs of other group companies are not considered suitable means of security.

39 Other liabilities

The following table shows the main items included in other liabilities:

	2019	2018
Amounts owed to special purpose entities	6,640	6,640
Obligations arising from debts assumed	179	175
Other amounts owed to employees	58	76
Taxes payable	43	39
Liabilities from losses absorbed from subsidiaries	21	2
Trading book valuation reserves	11	11
Amounts yet to be distributed from outplacements, etc.	2	1

The true sale transactions included under amounts owed to special purpose entities were carried out with a view to using the securities generated as collateral for repurchase agreements with the ECB. The underlying receivables are still recognised by HVB. All tranches are retained by the Bank, meaning that there is no corresponding reduction in risk-weighted assets.

The obligations arising from debts assumed contain obligations arising from the liquidation of media funds.

The taxes payable include liabilities from other taxes of €42 million (previous year: €39 million).

40 Deferred income

Discounts on amounts receivable shown at nominal value totalled $\in 10$ million (previous year: $\in 12$ million). Furthermore, other deferred income includes accrued commissions of $\in 12$ million (previous year: $\in 12$ million), processing fees of $\in 91$ million (previous year: $\in 91$ million) and interest of $\in 64$ million (previous year: $\in 130$ million) collected in advance.

(€ millions)

Notes to the Balance Sheet (CONTINUED)

41 Provisions

Other provisions include the following items:		(€ millions)
	2019	2018
Total other provisions	1,866	3,051
Provisions for losses on guarantees and indemnities	186	178
Anticipated losses on pending transactions	—	—
Provisions for uncertain liabilities	1,680	2,873
thereof:		
Legal risks	213	1,512
Payments to employees	332	344
Restructuring	350	263
Valuation units	196	185
Payments for early retirement, semi-retirement, etc.	163	182
Anniversary bonus payments	26	30
Bonuses on saving plans	3	4
Other	397	353

The provisions for legal risks shown under provisions for uncertain liabilities also contain provisions for litigation fees and damages payments. Other provisions include provisions for dismantling obligations, among other things.

42 Subordinated liabilities

This item includes accrued interest of $\in 1$ million (previous year: $\in 3$ million). At the reporting date, interest expenses on subordinated liabilities amounted to $\in 20$ million (previous year: $\notin 25$ million).

The borrower cannot be obliged to make early repayment in the case of subordinated liabilities. In the event of insolvency or liquidation, subordinated loans are only repaid after the claims of all primary creditors have been settled. For the purposes of a bank's liable funds as defined under banking supervisory regulations, subordinated liabilities are regarded as supplementary (Tier 2) capital.

On 25 January 2001, HVB issued a subordinated promissory note with a volume of €96 million. This subordinated promissory note matures on 27 January 2031 and bears interest at the 6-month Euribor rate, taking account of a surcharge of 0.65% p.a. for the entire term.

On 28 December 2001, HypoVereinsFinance N.V. (merged into HVB in July 2017) issued a subordinated promissory note with a volume of €60 million. This subordinated promissory note matures on 28 December 2031 and bears interest at the 3-month Euribor rate, taking account of a surcharge of 0.75% p.a. for the entire term.

44 Holdings of HVB stock in excess of 5%		(in %)
	2019	2018
UniCredit S.p.A.	100.0	100.0

Compliant with Section 271 (2) HGB, HVB is an affiliated company of UniCredit S.p.A., Milan, Italy, and is included in the consolidated financial statements of UniCredit, which can be obtained from the Trade and Companies Register in Milan, Italy.

45 Amounts not available for distribution

The measurement at fair value of offsetting plan assets in connection with pension commitments and semi-retirement agreements gives rise to an amount of \leq 246 million (previous year: \leq 195 million). The amount not available for distribution arising from the difference between the valuation of the provisions for pension commitments based on the respective average market rate of the past ten financial years and their valuation based on the respective average market rate of the post ten financial years: \leq 300 million). Freely disposable provisions have been set up to cover the amount not available for distribution.

46 List of shareholdings pursuant to Section 285 No. 11, 11a HGB, Section 340a (4) HGB

A complete list of shareholdings as a constituent part of the notes to the financial statements is given in the section entitled "List of Holdings" in this Annual Report.

Other Information

47 Report on subsequent events (events after the end of the reporting period)

There were no significant events at HVB after 31 December 2019 to report.

48 Contingent liabilities and other financial commitments

The following table shows the breakdown of contingent liabilities arising from guarantees and indemnity agreements totalling €25,373 million:

	2019	2018
Guarantees and indemnities	20,438	21,388
Loan guarantees	942	1,151
Documentary credits	3,993	3,558
Total	25,373	26,097
of which to:		
affiliated companies	2,643	2,041
associated companies	_	1

Irrevocable lending commitments totalling €55,457 million break down as follows:		(€ millions)
	2019	2018
Book credits	49,720	46,849
Mortgage and municipal loans	2,830	2,836
Guarantees	2,907	3,065
Bills of exchange	_	_
Total	55,457	52,750
of which to:		
affiliated companies	331	324
associated companies	_	_

Utilisation by the Bank on account of the contingent liabilities and other commitments that it has entered into is possible as part of its banking activities. Thus, every loan is fundamentally granted by utilising a previously made lending commitment that is shown under other commitments. Although utilisation by the Bank under contingent liabilities is not very probable in the case of guarantees it has issued, the possibility cannot be excluded. Utilisation is also the general case with regard to the documentary credits also shown here, as these are employed in the handling of foreign trade payments.

The key factor in this regard is that utilisation by the Bank under its contingent liabilities and other commitments does not generally lead to a loss. Instead, it results in the loan granted being recognised as is the case when a lending commitment is utilised. Provisions for anticipated losses on pending transactions that are required due to commitments to make payouts to defaulting borrowers are set up and deducted from the disclosed contingent liabilities and other commitments.

As a member of the deposit guarantee scheme in Germany, UniCredit Bank AG is liable in accordance with the current provisions.

HVB has made use of the option to provide up to 15% (previous year: 15%) of the annual contribution to the bank restructuring fund in the form of fully secured payment claims (irrevocable payment commitments) in accordance with Section 12 of the German Bank Restructuring Fund Act (Restrukturing rierungsfondsgesetz – RStruktFG). The cash collateral provided in this regard amounted to €82 million in the reporting period (previous year: €64 million).

HVB has made use of the option to provide up to 30% of the annual contribution to the compensation scheme of German banks in the form of fully secured payment claims (irrevocable payment commitments) in accordance with Section 19 of the Regulation on the Financing of the Compensation Scheme of German Banks (Entschädigungseinrichtungs-Finanzierungsverordnung – EntschFinV). The financial security provided in this regard amounted to €30 million in the reporting year (previous year: €22 million).

Legal risks can give rise to losses for HVB, the occurrence of which is greater than improbable but less than probable, and for which no provisions have been set aside. Such legal risks may result from negative developments in proceedings under civil law and the tendency for rulings to be made in favour of consumers or customers. The assessment of the risk of loss may prove to be too low or too high, depending on the outcome of the proceedings. HVB assumes that it will not be necessary to utilise the vast majority of the contingent liabilities arising from legal risks, meaning that the amounts are not representative of actual future losses. Such contingent liabilities arising from significant legal risks for which an estimate is possible amounted to \notin 91 million at year-end 2019 after \notin 63 million at year-end 2018.

(€ millions)

Other Information (Continued)

Euro-denominated bonds issued by EU countries

On 31 January 2019, UniCredit S.p.A. and HVB received a Statement of Objections from the European Commission referring to the investigation by the European Commission of a suspected violation of antitrust rules in relation to European government bonds. The subject matter of the investigation extends to certain periods from 2007 to 2012, and includes alleged activities by HVB in a part of this period. The Statement of Objections does not prejudge the outcome of the proceeding; should the Commission conclude that there is sufficient evidence of an infringement, a decision prohibiting the conduct and imposing a fine could be adopted, with any fine subject to a statutory maximum of 10% of company's annual worldwide turnover.

HVB had access to the entirety of the European Commission's file on the investigation from 15 February 2019 onwards. As a result of the assessment of the files, the Bank regards it no longer remote but possible, even though not likely, that a cash outflow might be required to fulfil a potential fine arising from the outcome of the investigation. On the basis of the current information, it is not possible to reliably estimate the amount of any potential fine at the present date.

UniCredit S.p.A. and HVB have responded to the raised objections on 29 April 2019 and participated in a hearing before the European Commission on 22–24 October 2019. Proceedings are ongoing. There is no legal deadline for the Commission to complete antitrust inquiries.

On 11 June 2019, HVB and UniCredit Capital Markets LLC were named, among other financial institutions, as defendants in a putative class action already pending in the United States District Court for the Southern District of New York. The third amended class action complaint, filed 3 December 2019, alleges a conspiracy among dealers of Euro-denominated bonds issued by European central banks to fix and manipulate the prices of those bonds, among other things by widening the bid-ask spreads they quoted to customers. The putative class consists of those who purchased or sold Euro-denominated bonds issued by European central banks to fix and manipulate the prices of those a quantification of damages claimed. The proceedings are in their inception. Motions to dismiss – a procedural device contemplated by the United States Federal Rules of Civil Procedure which provides defendants with an opportunity to challenge the legal sufficiency of a complaint and present arguments that the complaint should be dismissed – will likely be fully briefed before the end of the second quarter of 2020 and will likely include the argument that the complaint fails to state a claim.

Other financial commitments arising in particular from real estate and IT operations total \in 714 million (previous year: \in 773 million). A large part of the total relates to contracts with subsidiaries (\in 564 million (previous year: \in 568 million)). The contracts run for standard market periods, and no charges have been put off to future years.

At the reporting date, HVB had pledged securities worth €1,990 million (previous year: €1,195 million) as collateral for transactions with Eurex Frankfurt AG, Frankfurt am Main.

As part of real estate financing and development operations, HVB has assumed rental obligations and pre-emptive rights or issued rental guarantees to make fund constructions more marketable – in particular for lease funds and (closed-end) KG real estate funds. Provisions have been set aside to cover identifiable risks arising from such guarantees.

Commitments for uncalled payments on shares not fully paid up amounted to \in 24 million in the reporting year (previous year: \in 29 million), and similar obligations for shares in cooperatives totalled \in 1 thousand (previous year: \in 1 thousand). HVB was not liable for any defaults on such calls under Section 22 (3) and Section 24 Limited Liability Companies Act (Gesetz betreffend Gesellschaften mit beschränkter Haftung – GmbHG).

Where employees are granted a bonus that is disbursed over a period of several years under their variable compensation arrangements, the expense is to be taken to the income statement over the period on a pro rata basis accordingly. Hence, an expense accrued for the bonus commitments for the years 2014 to 2019 in the reporting period. Especially in the case of the group of employees identified as "risk-takers", the German regulations governing institutions' remuneration systems (Instituts-Vergütungsverordnung) requires the bonus in a financial year to be disbursed over a period of several years. The bonus is granted subject to the proviso that the beneficiaries satisfy specific criteria (in the case of bonuses granted in the form of shares, stock options or deferred cash payments) that comply with both the regulatory requirements and the Bank's own rules. In addition, the bonus is linked to further conditions such as a malus arrangement that ensures that negative contributions to earnings and any compliance violations are taken into account when determining the deferred variable compensation components or when determining the bonus. Provisions totalling €158 million were set aside in the income statement at 31 December 2019 (previous year: €162 million) in connection with bonus commitments. The final amount disbursed may be higher, should the plan conditions be met.

In its function as personally liable partner, HVB had unlimited liability arising from shares in the partnership Bayerischer BankenFonds GbR, Munich, at the reporting date, as was the case in the previous year.

With a Statement of Responsibility dated 21 December 1993, HVB issued an undertaking to the State of Baden-Wuerttemberg (Ministry of Finance) to assume a liquidity provision obligation in the event of the sale, liquidation or bankruptcy of HVB Projekt GmbH.

49 Statement of Responsibility

HVB ensures that, to the extent of its shareholding, the company set forth below is in a position to meet its contractual obligations except in the event of political risks:

Financial companies	
UniCredit Leasing GmbH, Hamburg	

HVB's commitment arising from the above Statement of Responsibility declines to the extent as HVB's shareholding decreases in the future with regard to those contractual obligations of the company that arose only after HVB's shareholding decreased. In case HVB is no longer a shareholder in the company listed above, our commitment arising from the above Statement of Responsibility with regard to such liabilities of the company that arose only after our shareholding ceased ends on the date on which our shareholding ceased.

HVB no longer provides a Statement of Responsibility for companies for which a Statement of Responsibility had been provided in earlier annual reports but which no longer appear in the above list. Liabilities of these companies arising before the reduction or cessation of the shareholding are only covered by such Statements of Responsibility that were provided before the reduction or cessation of the shareholding in each case.

50 Auditor's fees

We have exercised the option provided by Section 285 No. 17 HGB and refer to the disclosures regarding the fees paid to the independent auditor made in the section of the consolidated financial statements at 31 December 2019 entitled "Other Information".

51 Off-balance-sheet transactions

Special purpose entities

HVB maintains business relations with a number of special purpose entities that pursue varying business models and hold various different types of assets. HVB's business relations with the special purpose entities are recognised in the financial statements either on or off the balance sheet.

The Bank uses special purpose entities to securitise both the Bank's own receivables and customer receivables. The latter involve commercial paper conduits for which the Bank provides guarantees and liquidity facilities.

In the case of the Bank's own receivables, the special purpose entities mainly serve to procure liquidity. These do not, however, result in the securitised receivables being taken off the books as they involve securitisation transactions with all risks retained to create securities as collateral with central banks. The securitisation of customer receivables is generally accompanied by an improvement in the customer's liquidity situation and a broadening of the funding base, whereby the Bank generates income from the structuring service and the facilities provided. HVB may face economic disadvantages, in particular, should the facilities provided be drawn down.

In addition, there are special purpose entities for which HVB acts solely as an investor, for instance to purchase securities or grant loans. The ensuing risks may lead to write-downs being recognised on the positions involved.

In some instances, HVB controls a special purpose entity from an economic point of view, which entails full consolidation of the special purpose entity in the consolidated financial statements of HVB.

Other Information (Continued)

Revocable credit commitments

HVB has granted its customers credit and liquidity facilities that are callable at any time and are not shown either on or off the balance sheet. The advantage for HVB from this customary, standardised product lies in the possibility of generating additional interest and commission income. This is set against the risk of a deterioration in the financial situation of those customers to whom these credit commitments were made.

Outsourcing of activities

Like other affiliated companies, HVB has outsourced IT activities and activities relating to the settlement of transactions to UniCredit Services S.C.p.A., Milan. The goal is to exploit synergies and make it possible to provide fast, high-quality IT services and to make settlement services available in line with a standard business and operating model.

HVB has outsourced activities in the fields of payments, document management and archiving in Germany and the settlement of securities transactions in Germany and at its Milan branch to external service providers. The purpose of this for HVB is to permanently reduce its operating costs.

52 Regulatory disclosure requirements (Disclosure Report)

HVB has been classified as a significant subsidiary of UniCredit S.p.A. within the meaning of Article 13 (1) of the Capital Requirements Regulation (CRR), making it subject to the scope of the CRR (Article 13 (1) and Part 8 CRR) and certain extended regulatory disclosure requirements in accordance with Section 26a KWG (disclosure under Pillar III).

HVB discloses this information on a standalone basis in the form of a separate disclosure report. This report is produced on an annual basis as at 31 December and in addition at each quarter-end during the year and published on the Bank's website under About us > Investor Relations > Reports. The publication for the reporting date of 31 December is scheduled for shortly after the publication of the Annual Report. The interim reports should be published shortly after submission of the regulatory COREP report to the supervisory authorities responsible.

The disclosure of the remuneration policy and practices for those categories of staff whose professional activities have a material impact on the Bank's risk profile (known as "risk takers") required by Article 450 CRR in conjunction with Section 16 (1) of the German Regulation on the Requirements for the Remuneration Systems of Institutions under Regulatory Law (Institutsvergütungsverordnung – InstitutsVergV) takes the form of a separate report for HVB. This is drawn up once a year as at 31 December and published on the Bank's website under About us > Investor Relations > Corporate Governance in the second quarter of the following year.

53 Own funds

Pursuant to Article 72 CRR II, for regulatory purposes own funds consists of Tier 1 capital and Tier 2 capital; they amounted to €13,838 million at year-end 2019 (previous year: €16,253 million) based on annual financial statements approved by the Supervisory Board. We have not allocated any unrealised reserves to Tier 2 capital compliant with Section 10 (2b) KWG as applicable until 31 December 2013.

The eligible capital calculated in accordance with Article 4 (1) 71b in conjunction with Article 494 CRR II is used primarily to determine thresholds for large exposures and loans to executive board members and for investment limits. It amounted to \in 13,838 million at year-end 2019 (previous year: \in 16,253 million).

54 Derivative financial instruments

The following table provides detailed information about the nominal amount and fair values of all derivative transactions and credit derivative transactions of HVB:

It is the task of the Bank's full Supervisory Board to decide on the total remuneration paid to the individual members of the Management Board and to review the structure of the remuneration systems for the Management Board. The full Supervisory Board receives assistance in this regard from the Remuneration Control Committee, which submits appropriate proposals to the full Supervisory Board. Appropriateness and sustainability are key criteria for the form and structure of the remuneration paid to the members of the Management Board. The structure of remuneration is derived from the service agreements with the members of the Management Board. It has two components: a fixed salary and a variable element. The variable remuneration is normally granted in deferred tranches over several years in the form of cash and in shares, with disbursement dependent upon defined corporate targets being achieved in the subsequent years.

Pension commitments for seven members of the Management Board are shown in the table alongside the direct emoluments. Five members of the Management Board took part in the employer-financed, fund-linked pension scheme for executives (known as AgFA) in 2019. The Bank will provide/has provided 35% of the fixed salary contributions (2019: €980 thousand; 2018: €978 thousand).

Other Information (Continued)

Non-monetary compensation and other fringe benefits are granted to members of the Management Board to the usual extent. The amounts involved are included in the totals for fixed remuneration shown.

Compensation paid to members of the Management Board for positions on supervisory boards of any UniCredit group companies is surrendered to HVB.

At 31 December 2019, there were provisions of €30 million (previous year: €26 million) for pensions payable to former members of the Management Board and retired members of the Management Board of HVB and their surviving dependents, as calculated in accordance with actuarial principles using the projected unit credit method, taking into account anticipated future rises in pensions.

Share-based remuneration was granted to the members of the Management Board under the Group Incentive Scheme in the reporting period as follows:

SHARES GRANTED TO MEMBERS OF THE MANAGEMENT BOARD OF UNICREDIT BANK AG		2018
Number of shares granted	7,948	14,415
Number of shares committed after capital measures in 2017	—	_
Fair value on grant date (€)	11.838	17.088

57 Loans to executive board members

Loans and advances made to, and contingent liabilities and liabilities assumed for, related parties at the reporting date were as follows: (€ thousands)

	2019					
	LOANS AND Advances	CONTINGENT LIABILITIES	LIABILITIES	LOANS AND Advances	CONTINGENT LIABILITIES	LIABILITIES
Members of the Management Board						
and their related parties	2,314	593	4,148	2,235	10	3,166
Members of the Supervisory Board						
and their related parties	—	—	2,735	—	_	4,804

Members of the Supervisory Board and Management Board at HVB and their respective immediate family members are considered related parties.

Mortgage loans with interest rates of between 0.6% and 1.74% were granted to members of the Management Board and their immediate family members falling due in the period from 2020 to 2049.

All banking transactions involving the group of people listed were conducted at customary market terms with the usual collateral.

Auditor's Report

INDEPENDENT AUDITOR'S REPORT

To UniCredit Bank AG, Munich

REPORT ON THE AUDIT OF THE ANNUAL FINANCIAL STATEMENTS AND OF THE MANAGEMENT REPORT

Audit Opinions

We have audited the annual financial statements of UniCredit Bank AG, Munich, which comprise the balance sheet as at 31 December 2019, the income statement for the financial year from 1 January to 31 December 2019 and the notes to the financial statements, including the presentation of the accounting and measurement methods. In addition, we have audited the management report of UniCredit Bank AG, Munich, for the financial year from 1 January to 31 December 2019. In accordance with the German legal requirements, we have not audited the content of the statement on business management pursuant to § 289f (4) German Commercial Code (HGB) (gender quota disclosures) included in section "Corporate structure of UniCredit Bank AG" of the management report.

In our opinion, on the basis of the knowledge obtained in the audit,

- the accompanying annual financial statements comply, in all material respects, with the requirements of German commercial law and give a true and fair view of the assets, liabilities and financial position of the Company as at 31 December 2019 and of its financial performance for the financial year from 1 January to 31 December 2019 in compliance with German Legally Required Accounting Principles, and
- the accompanying management report as a whole provides an appropriate view of the Company's position. In all material respects, this management report is consistent with the annual financial statements, complies with German legal requirements and appropriately presents the opportunities and risks of future development. Our audit opinion on the management report does not cover the content of the above-mentioned statement on business management pursuant to § 289f (4) German Commercial Code (HGB) (gender quota disclosures).

Pursuant to § 322 (3) sentence 1 German Commercial Code (HGB), we declare that our audit has not led to any reservations relating to the legal compliance of the annual financial statements and of the management report.

Basis for the Audit Opinions

We conducted our audit of the annual financial statements and of the management report in accordance with § 317 German Commercial Code (HGB) and the EU Audit Regulation (No. 537/2014, referred to subsequently as "EU Audit Regulation"), and in compliance with German Generally Accepted Standards for Financial Statement Audits promulgated by the Institut der Wirtschaftsprüfer [Institute of Public Auditors in Germany] (IDW). Our responsibilities under those requirements and principles are further described in the "Auditor's Responsibilities for the Audit of the Annual Financial Statements and of the Management Report" section of our auditor's report. We are independent of the Company in accordance with the requirements of European law and German commercial and professional law, and we have fulfilled our other German professional responsibilities in accordance with these requirements. In addition, in accordance with Article 10 (2) point (f) of the EU Audit Regulation, we declare that we have not provided non-audit services prohibited under Article 5 (1) of the EU Audit Regulation. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions on the annual financial statements and on the management report.

Auditor's Report (Continued)

Key Audit Matters in the Audit of the Annual Financial Statements

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the annual financial statements for the financial year from 1 January to 31 December 2019. These matters were addressed in the context of our audit of the annual financial statements as a whole and in forming our audit opinion thereon; we do not provide a separate audit opinion on these matters.

In the following we present the key audit matters we have determined in the course of our audit:

- 1. Loan loss provisions in the credit business
- 2. Determination of the fair value of financial instruments held for trading
- 3. IT controls related to financial reporting

Our presentation of these key audit matters has been structured as follows:

a) Description (including reference to corresponding information in the annual financial statements)

- b) Auditor's response
- c) Key observations

1. Loan loss provisions in the credit business

- a) UniCredit Bank AG provides loans to customers. In the bank's annual financial statements, loan loss provisions are offset against the balance sheet item "Loans and receivables with customers". Furthermore, provisions for credit risks are disclosed under other provisions. The valuation parameters used for the measurement of the loan loss provisions have a significant impact on the recognition respectively the amount of the required provisions for credit risk. In this respect, the determination of the provisions are subject to uncertainty and margin of discretion and therefore this issue was identified as a key audit matter. The disclosures regarding the loan loss provisions are enclosed in section 5 of the notes.
- b) As part of the audit of the annual financial statements, we have initially audited the adequacy and operating effectiveness of the internal controls regarding the recording, processing and valuation of loans as well as the related financial reporting. In doing so, we also took into account the relevant business organization, including the significant IT systems and valuation models. The audit of the valuation included the assessment of the implemented processes and controls for identifying impaired loans. We have used specialists from our Risk Advisory division specialized in credit risk management and IT audit for our audit. For the audit of the valuation of loans and contingent liabilities, as well as other financial commitments related to the credit business, our focus was on the significantly impaired loans, since there are areas of judgement and these have a material impact on the valuation of loans and the recognition of loan loss provisions. We have evaluated the valuation on a sample of loans based on bank-internal forecasts of the future income and liquidity position of borrowers and assessed the appropriateness of the information basis used for planning purposes. In doing so, we have critically challenged and assessed the underlying assumptions of the legal representatives, with regard to the various expected cash flows of the audited loans, respectively the recovery of collaterals. Similarly, we assessed for the loans in our sample the probabilities of occurrence of the used scenarios with regard to their comprehensibility.

c) We challenged significant assumptions and estimates made by the legal representatives. Overall, the risk provisions are within acceptable ranges.

2. Determination of the fair value of financial instruments held for trading

- a) Financial instruments assets, which are valued at fair value, are disclosed net of a risk discount under the balance sheet item "Held-for-trading portfolio" in accordance with § 340e (3) German Commercial Code (HGB) in the annual financial statements. Similarly, financial instruments liabilities at fair value are disclosed under the balance sheet item "Held-for-trading portfolio" in the annual financial statements. The valuation of financial instruments held for trading was identified as a key audit matter as it is subject to complex accounting principles, valuation procedures and -methods and is partially based on estimates and assumptions made by the legal representatives. The disclosures made by the legal representatives regarding the valuation of financial instruments are enclosed in section 7 and 32 of the notes.
- b) We have audited the organizational structure and related processes with regards to the determination of the fair value of trading financial instruments by examination of the adequacy and operating effectiveness of the implemented key controls. In particular, our audit included the independent verification process for pricing, the validation of valuation methods and assumptions, the approval process for new financial instruments, the audit of controls for recording contractual and valuation inputs, the flow of market data, the governance and the reporting processes. The calculated fair values are adjusted for the Bank's creditworthiness, counterparty credit risk, model risk, bid-ask spread, refinancing costs and expected costs in connection with the liquidation of less actively traded instruments. With respect to these adjustments, we examined whether the Bank's assumptions, procedures and models are in line with standard industry practice and we audited whether the valuations are correct and comprehensible. In addition, we have conducted our own independent valuation on a sample of financial instruments and compared our results with the valuation performed by the Bank. We have used valuation specialists from our Risk Advisory division for our audit. Noteworthy issues from disputes with counterparties and extraordinary gains or losses from the sale of financial instruments were investigated.
- c) The valuation methods selected by the legal representatives of the Bank for the determination of the fair value of financial instruments are in line with industry standards.

3. IT controls related to financial reporting

- a) For the preparation of the annual financial statements, the Bank uses a large number of IT applications that have numerous interfaces. In order to maintain the integrity of the data used for the preparation of the annual financial statements, the Bank has taken various precautionary measurements and implemented controls. The Bank has outsourced its IT services, to a large extent, to UniCredit Services S.C.p.A., Milan (Italy), which has further outsourced a part of these services to other service providers. The IT controls related to financial reporting has been selected as a key audit matter, as the security of information affects many aspects of the accounting and financial reporting process, results in a large audit effort and is characterised by a high level of complexity. We refer to the disclosure of the legal representatives in section 4 Operational Risk in the risk report of the management report with regards to the outsourcing of IT services.
- b) Based on our risk assessment, we have audited the design, implementation and operating effectiveness of the controls related to user rights and change management processes for the significant accounting-relevant IT applications by using IT specialists from our Risk Advisory division. In doing so, we agreed the scope of the ISAE 3402 audit with the ISAE 3402 auditor at UniCredit Services S.C.p.A. and the group auditors of UniCredit S.p.A. and used the audit results of those. We have informed ourselves of the professional competence, independence and regulatory governance of these auditors. When using these reports, we have inter alia critically assessed the reporting related to these audit procedures and audit results.
- c) IT controls related to financial reporting implemented by the Bank were enhanced over the past years.

Auditor's Report (CONTINUED)

Other Information

The executive directors are responsible for the other information. The other information comprises:

- the statement on business management included in section "Corporate structure of UniCredit Bank AG" of the management report pursuant to § 289f (4) German Commercial Code (HGB) (gender quota disclosures),
- the executive directors' confirmation regarding the annual financial statements and to the management report pursuant to § 264 (2) sentence 3 and § 289 (1) sentence 5 German Commercial Code (HGB) respectively, and
- all the remaining parts of the annual report, with the exception of the audited annual financial statements and management report and our auditor's report.

Our audit opinions on the annual financial statements and on the management report do not cover the other information, and consequently we do not express an audit opinion or any other form of assurance conclusion thereon.

In connection with our audit, our responsibility is to read the other information and, in so doing, to consider whether the other information

- is materially inconsistent with the annual financial statements, with the management report or our knowledge obtained in the audit, or
 otherwise appears to be materially misstated.
- Responsibilities of the Executive Directors and the Supervisory Board for the Annual

of annual financial statements that are free from material misstatement, whether intentional or unintentional.

Financial Statements and the Management Report The executive directors are responsible for the preparation of the annual financial statements, that comply, in all material respects, with the requirements of German commercial law, and that the annual financial statements give a true and fair view of the assets, liabilities, financial position and financial performance of the Company in compliance with German Legally Required Accounting Principles. In addition, the executive directors are responsible for such internal control as they, in accordance with German Legally Required Accounting Principles, have determined necessary to enable the preparation

In preparing the annual financial statements, the executive directors are responsible for assessing the Company's ability to continue as a going concern. They also have the responsibility for disclosing, as applicable, matters related to going concern. In addition, they are responsible for financial reporting based on the going concern basis of accounting, provided no actual or legal circumstances conflict therewith.

Furthermore, the executive directors are responsible for the preparation of the management report that, as a whole provides an appropriate view of the Company's position and is, in all material respects, consistent with the annual financial statements, complies with German legal requirements and appropriately presents the opportunities and risks of future development. In addition, the executive directors are responsible for such arrangements and measures (systems) as they have considered necessary to enable the preparation of a management report that is in accordance with the applicable German legal requirements, and to be able to provide sufficient appropriate evidence for the assertions in the management report.

The supervisory board is responsible for overseeing the Company's financial reporting process for the preparation of the annual financial statements and of the management report.

Auditor's Responsibilities for the Audit of the Annual Financial Statements and of the Management Report

Our objectives are to obtain reasonable assurance about whether the annual financial statements as a whole are free from material misstatement, whether due to fraud or error, and whether the management report as a whole provides an appropriate view of the Company's position and, in all material respects, is consistent with the annual financial statements and the knowledge obtained in the audit, complies with the German legal requirements and appropriately presents the opportunities and risks of future development, as well as to issue an auditor's report that includes our audit opinions on the annual financial statements and on the management report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with § 317 German Commercial Code (HGB) and the EU Audit Regulation and in compliance with German Generally Accepted Standards for Financial Statement Audits promulgated by the Institut der Wirtschaftsprüfer (IDW) will always detect a material misstatement. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual financial statements and this management report.

We exercise professional judgment and maintain professional scepticism throughout the audit. We also

- identify and assess the risks of material misstatement of the annual financial statements and of the management report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our audit opinions. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls.
- obtain an understanding of internal control relevant to the audit of the annual financial statements and of arrangements and measures relevant to the audit of the management report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an audit opinion on the effectiveness of these systems of the Company.
- evaluate the appropriateness of accounting policies used by the executive directors and the reasonableness of estimates made by the executive directors and related disclosures.
- conclude on the appropriateness of the executive directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in the auditor's report to the related disclosures in the annual financial statements and in the management report, or, if such disclosures are inadequate, to modify our respective audit opinions. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to be able to continue as a going concern.
- evaluate the overall presentation, structure and content of the annual financial statements, including the disclosures and whether the annual financial statements present the underlying transactions and events in a manner that the annual financial statements give a true and fair view of the assets, liabilities, financial position and financial performance of the Company in compliance with German Legally Required Accounting Principles.
- evaluate the consistency of the management report with the annual financial statements, its conformity with German law, and the view of the Company's position it provides.
- perform audit procedures on the prospective information presented by the executive directors in the management report. On the basis of sufficient appropriate audit evidence, we evaluate, in particular, the significant assumptions used by the executive directors as a basis for the prospective information, and evaluate the proper derivation of the prospective information from these assumptions. We do not express a separate audit opinion on the prospective information and on the assumptions used as a basis. There is a substantial unavoidable risk that future events will differ materially from the prospective information.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Auditor's Report (CONTINUED)

We also provide those charged with governance with a statement that we have complied with the relevant independence requirements, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, the related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the annual financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter.

OTHER LEGAL AND REGULATORY REQUIREMENTS

Further Information pursuant to Article 10 of the EU Audit Regulation

We were elected as auditor by the annual general meeting on June 3, 2019. We were engaged by the supervisory board on July 15, 2019. We have been the auditor of UniCredit Bank AG, Munich, without interruption since the financial year 2013.

We declare that the audit opinions expressed in this auditor's report are consistent with the additional report to the audit committee pursuant to Article 11 of the EU Audit Regulation (long-form audit report).

In addition to the financial statement audit, we have provided to the Company, respectively to entities controlled by the company, the following services that are not disclosed in the annual financial statements or in the management report:

- Audits and reviews of reporting packages
- Audits pursuant to § 89 of the Securities Trading Act
- Audit of the internal control system of a service organization
- Performing agreed upon procedures
- Audits of financial information or their components
- Review of an assignment of findings to process areas
- Review of archived documents

GERMAN PUBLIC AUDITOR RESPONSIBLE FOR THE ENGAGEMENT
