[In case of Reference Asset FX spot conversions, the following applies:

The Interest Amount(s) and the Redemption Amount will be converted from the Reference Asset Currency into the Issue Currency at a market rate (as defined in the Final Terms) applicable when they become due and payable.]

[In case of Credit Linked Securities relating to a single Reference Entity (Single Name Credit Linked Securities), the following applies: If a Credit Event occurs in relation to the Reference Entity on or prior to the Credit Event Cut-Off Date (subject to any extension in the event that a potential Credit Event exists at the time of the Credit Event Cut-Off Date), then (i) the accrual of interest ceases and (ii) the Securities are not redeemed on the Scheduled Maturity Date at the Outstanding Principal Amount, but on the Maturity Date at the Credit Event Redemption Amount. The latter amount is generally significantly lower than the initial Principal Amount of the Securities and in certain circumstances may be zero.

In principle, therefore, the Issuer will pay interest and redeem the Securities on the Scheduled Maturity Date at the Outstanding Principal Amount only if no Credit Event has occurred in relation to the Reference Entity prior to the Credit Event Cut-Off Date (subject to any extension in the event that a potential Credit Event exists at the time of the Credit Event Cut-Off Date).]

[In case of Credit Linked Securities relating to a basket of Reference Entities (Basket Credit Linked), the following applies: If a Credit Event occurs relating to a Reference Entity (an "Affected Reference Entity") at any time up to and including the Credit Event Cut-Off Date (subject to any extension in the event that a potential Credit Event exists at the time of Credit Event Cut-Off Date), then (i) the accrual of interest ceases with respect to that portion of the Outstanding Principal Amount attributable to the Affected Reference Entity (the "Reduction Amount"), and (ii) the Outstanding Principal Amount of the Securities is reduced by the Reduction Amount. The Securities are therefore redeemed pro rata on the Settlement Date by payment of the corresponding Credit Event Redemption Amount *[In case of all Securities other than Securities with Fixed Recovery equal to zero, the following applies:* (which may also be zero)] *[In case of all Securities with Fixed Recovery equal to zero, the following applies:* which will be zero]. The occurrence of further Credit Events with respect to further Reference Entities is reflected in further reductions in the Outstanding Principal Amount equal in each case to the relevant Reduction Amounts.

In principle, therefore, the Issuer will pay interest and redeem the Securities on the Scheduled Maturity Date at the Principal Amount only if no Credit Event has occurred in relation to any Reference Entity prior to the Credit Event Cut-Off Date (subject to any extension in the event that a potential Credit Event exists at the time of the Credit Event Cut-Off Date).]

[In case of Reference Asset Linked Securities, the following applies: If a Risk Event relating to a Reference Asset occurs at any time during the term of the Securities, (i) the accrual of interest ceases and (ii) the Securities are not redeemed on the Scheduled Maturity Date at the Redemption Amount, but on the Maturity Date at the Reference Asset Settlement Amount. These amounts are generally significantly lower than the initial Principal Amount of the Securities and in certain circumstances may be zero.]

[In case of Credit and Reference Asset Linked Securities, the following applies:

If a Credit Event or a Risk Event relating to a Reference Asset occurs at any time during the term of the Securities, then (i) the accrual of interest ceases [*In case of Basket Credit and Reference Asset Linked Securities insert: with respect to that portion of the Outstanding Principal Amount attributable to the Affected Reference Entity (the "Reduction Amount")*], and (ii) [*In case of Single Name Credit and Reference Asset Linked Securities insert: the Securities are not redeemed on the Scheduled Maturity Date at the Outstanding Principal Amount, but on the Reference Asset Settlement Date at the Reference Asset Settlement Amount*] [*In case of Basket Credit and Reference Asset Linked Securities insert: (a) in case of the occurrence of a Risk Event the Securities are not redeemed on the Scheduled Maturity Date at the Outstanding Principal Amount, but on the Reference Asset Settlement Date at the Reference Asset Settlement Amount and (b) in case of the occurrence of a Credit Event the Outstanding Principal Amount of the Securities is reduced by the Reduction Amount, and a Risk Event is deemed to have occurred in relation to such portion of the Reference Asset whose Reference Asset Nominal Amount is equivalent to the relevant Reduction Amount, to the effect that the Securities are partially redeemed on the Reference Asset Settlement Date at the Reference Asset Settlement Amount*]. If a Credit Event occurs subsequent to a Risk Event (but before or on the Reference Asset Settlement Date) then the [*In case of Single Name Credit and Reference Asset Linked Securities, insert: Credit Event Redemption Amount*] [*In case of Basket Credit and Reference Asset Linked Securities: Reduction Amount*] is calculated on the basis of the Reference Asset Settlement Amount, provided that the Reference Asset Settlement Date is no later than the Credit Event Cut-Off Date. C.15	Effect of the underlying on the value of the securities	<p>The Securities are linked to [the creditworthiness of the] [Reference Entity] [Reference Entities] [and] [the Reference Asset]. The payment of interest and redemption are dependent upon whether certain events ("Credit Events") have occurred in relation to [the][a] Reference Entity] [or] [certain other events ("Risk Events") have occurred in relation to the Reference Asset]. Investors should be aware that (i) in certain circumstances they will receive only partial interest payments or no interest payments at all, (ii) the payment of the Redemption Amount or of interest may be made on a different date than expected and (iii) the Redemption Amount may be significantly lower than the purchase price and may even be zero, and investors could therefore lose a significant portion of their capital invested or even suffer a total loss.</p> <p>The probability that a [Credit Event will occur in relation to [the] [a] Reference Entity] [or] [that a Risk Event will occur in relation to the Reference Asset] generally varies because of the financial position and other key figures of [the [relevant] Reference Entity] [and] [the Reference Asset Issuer], the general economic situation, the position on certain financial markets and because of political events, developments or tendencies in specific sectors, changes in the applicable interest rates and other factors. Measures taken [by the Reference Entity] [or] [by the Reference Entities] (such as a business combination or a spin-off or the repayment or transfer of Obligations) may have an adverse effect on the value of the Securities. The [Reference Entity] [or Reference Entities] [and the] [Reference Asset] to which the Securities relate and the terms and conditions of that relationship may change during the term of the Securities.</p> <p><i>[In case of Credit Linked Securities relating to a single Reference Entity (Single Name Credit Linked Securities):</i> If a Credit Event occurs in relation to the Reference Entity on or prior to the Credit Event Cut-Off Date (subject to any extension in the event that a potential Credit Event exists at the time of the Credit Event Cut-Off Date), then (i) the accrual of interest ceases and (ii) the Securities are not redeemed on the Scheduled Maturity Date at the Outstanding Principal Amount, but on the Maturity Date at the Credit Event Redemption Amount. The latter amount is generally significantly lower than the initial Principal Amount of the Securities and in certain circumstances may be zero.</p> <p>In principle, therefore, the Issuer will pay interest and redeem the Securities on the Scheduled Maturity Date at the Principal Amount only if no Credit Event has occurred in relation to the Reference Entity prior to the Credit Event Cut-Off Date (subject to any extension in the event that a potential Credit Event exists at the time of the Credit Event Cut-Off Date).]</p>

[In case of Credit Linked Securities relating to a basket of Reference Entities (Basket Credit Linked): If a Credit Event occurs relating to a Reference Entity (an "Affected Reference Entity") at any time on or prior to the Credit Event Cut-Off Date (subject to any extension in the event that a potential Credit Event exists at the time of Credit Event Cut-Off Date), then (i) the accrual of interest ceases with respect to that portion of the Outstanding Principal Amount attributable to the Affected Reference Entity (the "Reduction Amount"), and (ii) the Outstanding Principal Amount of the Securities is reduced by the Reduction Amount. The Securities are therefore redeemed pro rata on the Settlement Date by payment of the corresponding Credit Event Redemption Amount *[In case of all Securities other than Securities with Fixed Recovery equal to zero, the following applies:* (which may also be zero) *[In case of all Securities with Fixed Recovery equal to zero, the following applies:* which will be zero]. The occurrence of further Credit Events with respect to further Reference Entities is reflected in further reductions in the Outstanding Principal Amount equal in each case to the relevant Reduction Amounts.

In principle, therefore, the Issuer will pay interest and redeem the Securities on the Scheduled Maturity Date at the Outstanding Principal Amount only if no Credit Event has occurred in relation to any Reference Entity prior to the Credit Event Cut-Off Date (subject to any extension in the event that a potential Credit Event exists at the time of the Credit Event Cut-Off Date).]

[In case of Reference Asset Linked Securities, insert: If a Risk Event relating to a Reference Asset occurs at any time during the term of the Securities, (i) the accrual of interest ceases and (ii) the Securities are not redeemed on the Scheduled Maturity Date at the Redemption Amount, but on the Maturity Date at the Reference Asset Settlement Amount. This amount is generally significantly lower than the initial Principal Amount of the Securities and in certain circumstances may be zero.]

RISK FACTORS

*The following is a disclosure of Risk Factors that, in the opinion of UniCredit Bank AG as issuer (the "Issuer"), are material with respect to the Issuer and to the securities issued under this base prospectus (the "Base Prospectus") (the "Securities") in order to assess the risk associated with these Securities. Moreover, further risks that are currently unknown or currently believed to be immaterial may also have a negative impact on the value of the Securities. Potential investors should be aware that the Securities may decline in value and that they may sustain a **total loss** of their investment. This is particularly the case in the light of the fact that redemption and the payment of interest are dependent on the occurrence of a Credit Event (in the case of Credit Linked Securities relating to one Reference Entity (Single Name Credit Linked)) or of one or more Credit Events (in the case of Credit Linked Securities relating to a basket of Reference Entities (Basket Credit Linked)).*

The relevant final terms of the Securities (the "Final Terms") do not replace a consultation with a potential investor's house bank which will be indispensable in any case. Potential investors should review these Risk Factors carefully before deciding to purchase Securities.

*Potential investors should consider all information provided in (a) this Base Prospectus and in any supplements thereto, as well as (b) in the registration document of UniCredit Bank AG dated 17 May 2013 (the "**Registration Document**"), incorporated herein by reference, and (c) all documents which are incorporated in the Base Prospectus by reference. An investment in the Securities is only suitable for highly sophisticated investors, who understand the nature of such Securities and the extent of the incorporated risk and who have sufficient knowledge, experience and access to professional advisors (including their financial-, accounting-, legal- and tax advisors) in order to form their own legal, tax, accounting and financial opinion upon the existing risks of such investments. Furthermore, potential investors should be aware that the risks described below may arise separately or cumulatively in combination with other risks and may possibly have mutually reinforcing effects. The order of the risks described below does not imply any statement about the likelihood of occurrence of each risk or the influence of such risk factor on the value of the Securities.*

"Securityholder" means the holder of a Security.

A. Risks related to the Issuer

Potential investors should consider the information within the section entitled "**Risk Factors**" of the Registration Document of HVB which is incorporated by reference as set out on page 393 seq. of this Base Prospectus. This section contains information on risks, which may affect the Issuer's ability to fulfil its obligations arising from the Securities.

B. Risks related to potential conflicts of interest

1. General potential conflicts of interest

The below stated functions of the Issuer, the financial institutions and financial intermediaries with whom the Issuer has entered into distribution agreements (the "**Distributors**") (see under "Potential conflicts related to other functions of the Issuer - calculation agent or paying agent") or any of their affiliates as well as the below mentioned transactions may have a negative impact on the market value of and/or the amounts payable under the Securities, which may be adverse to the interests of the Securityholders.

Potential conflicts related to the Issue Price

The Securities will be sold at a price determined by the Issuer, the "**Issue Price**". The Issue Price is based on internal pricing models of the Issuer and may be higher than the market value of the Securities. The Issue Price may contain, beside upfront, management or other fees, an additional premium that may not be obvious

to the Securityholders. Such an additional premium depends on several factors, particularly on the volume of the Securities of each series, current and expected market conditions as of the time of the issuance of the Securities. The premium will be added to the original mathematical value of the Securities and may differ between each issue of the Securities as well as from the premiums charged by other market participants.

Potential conflicts related to market maker activities

The Issuer and any of its affiliates may, but are not obliged to, act as a market maker for the Securities. "**Market Making**" means the Issuer and any of its affiliates continuously quotes bid and offer prices at which the Issuer or any of its affiliates are prepared to trade the Securities in a certain volume. Market Making, carried out especially by the Issuer and any of its affiliates, may substantially influence the liquidity and/or the value of the Securities. The prices quoted by a market maker usually do not correspond to the prices which would have been formed without Market Making and in a liquid market.

Potential conflicts related to Distributors and inducements

Distributors may subscribe the Securities at a price equivalent to or below the Issue Price. A periodic fee may be payable to the Distributors in respect of the Securities until maturity. The rate of the fee will be determined by the Issuer as well as the relevant Distributor and may vary. The Distributors agree to comply with the selling restrictions stated in the Base Prospectus. Distributors act independently and not as agents of the Issuer.

In particular, the Issuer may pay placement- and/or management fees in terms of sales-related commissions to the relevant Distributor. Placement fees are one-off payments. Alternatively, the Issuer can grant an appropriate discount on the Issue Price (without subscription surcharge). Payment of management fees is recurring and dependant on the volume of Securities issued.

Potential conflicts related to other functions of the Issuer - calculation agent or paying agent

The Issuer or any of their affiliates may act as a calculation agent or paying agent. In this function the Issuer or any of their affiliates may, inter alia, calculate amounts payable under the Securities, and – in the case of Securities issued by HVB – make adjustments or other determinations, as described in the Final Terms, by i.e. exercising reasonable discretion (§ 315 German Civil Code, Bürgerliches Gesetzbuch, "**BGB**").

The aforementioned calculations, and – in the case of Securities issued by HVB – adjustments and determinations may influence the value of, and/or the amounts payable under the Securities and therefore could cause conflicts of interest between the Issuer and any of their affiliates on the one hand and the Securityholders on the other hand since, even if acting within its reasonable discretion, such calculations and – in the case of Securities issued by HVB – adjustments and determinations could be disadvantageous for a Securityholder.

2. Potential conflicts of interest with respect to credit linked Securities

Potential conflicts of interest related to transactions in respect of the Reference Entity

The Issuer or any of its affiliates may occasionally participate in transactions for their own account or for the account of their customers which may affect the creditworthiness of the Reference Entity and the Securities and which may be adverse to the interests of the Securityholders.

Potential conflicts of interest related to information with respect to the Reference Entity

In the course of their business activities or over the term of the Securities, the Issuer, a Distributor or one of their affiliates may be in possession of or may acquire important information (also not publicly available) about a Reference Entity. The issue of credit linked Securities relating to such a Reference Entity does not

give rise to an obligation to disclose information of that nature (whether confidential or not) to the Securityholders.

Potential conflicts of interest related to business relations

The Issuer, any Distributor or any of their affiliates may have business relations with Obligors of Reference Obligations and their affiliates and engage in any kind of commercial or investment banking or other business activities, as if the Securities issued under the Base Prospectus did not exist. Any such business relations may have a negative impact on the Reference Entity and therefore on the Securities and could have a negative impact on the interests of the Securityholders.

Potential conflicts of interest related to other functions of the Issuer – member of a syndicate of banks, etc.

The Issuer and any of its affiliates may also act as a member of a syndicate of banks, as financial advisor or as a bank of the Reference Entity. The aforementioned functions may affect the credit risk of the Reference Entity and therefore could lead to conflicts of interest between the Issuer and its affiliates on the one hand and the Securityholders on the other.

C. Risks related to the Securities

1. Risks related to the market

Risk that no active trading market for the Securities exists

The Securities will be newly issued securities, which may not be widely distributed and for which no active trading market may exist and may develop.

Although applications could be made for the Securities to be admitted to the regulated market of any stock exchange or to any market within the European Economic Area, there is no assurance that such applications will be accepted, that a particular tranche of Securities will be admitted or that an active trading market will develop. Accordingly, there is no assurance regarding the development or liquidity of a trading market for a particular tranche of Securities. Neither the Issuer nor a Distributor can assure that a Securityholder will be able to sell their Securities prior to their maturity. If the Securities are not traded on any securities exchange, pricing information for the Securities may be more difficult to obtain which may have a negative effect on the liquidity and the market prices of the Securities.

The Issuer may, but is not obliged to, purchase Securities at any time and at any price in the open market, by tender or private agreement. Any Securities purchased in this way by the Issuer may be held, resold or cancelled.

If the Issuer acts as the only market maker or if there is no market maker, the secondary market may become even more limited. The more limited the secondary market is, the more difficult it may be for Securityholders to realise the value of the Securities prior to the settlement of the Securities. Therefore, a certain risk does exist that Securityholders have to hold the Securities until expiration or, respectively until the Securities are called and in the case of Securities, where an Exercise Right of the Securityholder is intended, until the Securities are called.

Risks relating to the offering volume

The offering volume described in the Final Terms is the same as the maximum volume of the Securities offered, which may be increased at any time. This amount does not allow any conclusions on the volume of the actual Securities issued and thus on the liquidity of a potential secondary market associated with the same risks as stated above.

Risk relating to the market value of the Securities

The market value (or the market price) of the Securities will be affected by the creditworthiness of the Issuer and by a number of further factors such as prevailing interest and yield rates, the market for similar securities, general economic conditions or, as the case may be, the remaining term of the Securities. If the Securities are traded after their initial issuance, these factors may lead to a market value of the Securities being substantially below their Issue Price.

The market value, at which a Securityholder will be able to sell the Securities, may be substantially below the Issue Price. The Issuer does not guarantee that the spread between purchase and selling prices lies within a certain range or remains constant. If the Securityholder sells the Securities at a time where the market value of the Securities is below the Issue Price he will suffer a loss.

Risk relating to the expansion of the spread between bid and offer prices

In special market situations, the Issuer may be unable to conclude hedging transactions, or when such transactions are very difficult to conclude, the spread between the bid and offer prices which will be quoted by the Issuer may be temporarily expanded, in order to limit the economic risk of the Issuer. As a consequence, Securityholders who sell their Securities on an exchange or directly among market participants via so-called over-the-counter dealings (off-exchange) can only sell them at a price that is substantially lower than the actual value of the Securities at the time of the sale and will therefore suffer a loss.

Currency risk with respect to the Securities

The Securities may be denominated in a currency other than the currency of the jurisdiction where the investor is domiciled or where the investor seeks to receive funds. Exchange rates between currencies (the "**Currency Exchange Rates**") are determined by factors of supply and demand in the international currency markets, which are affected by macro-economic factors, speculations and intervention by the central banks and governments (including the imposition of currency controls and restrictions). Fluctuations in Currency Exchange Rates may have a negative impact on the value of the Securities and may result in a loss.

Risk relating to hedging transactions

Securityholders may not be able to make transactions to preclude or limit risks. Their ability to do so will depend on, inter alia, market conditions. In some cases investors may have to carry out such transactions only at a market price that is disadvantageous to them, so that a significant loss will occur.

2. Risks related to Securities in general

Credit risk of the Issuer

Any person who purchases the Securities relies on the creditworthiness of the Issuer and has no rights against any other person. Securityholders are subject to the risk of a partial or total failure of the Issuer to make interest and/or redemption payments which the Issuer is obliged to make due to the Securities. The worse the creditworthiness of the Issuer is the higher is the risk of a loss. Such risk is not protected by the deposit protection scheme of the Association of German Banks (*Einlagensicherungsfonds des Bundesverbandes deutscher Banken*), the German Banks Compensation Scheme GmbH (*Entschädigungseinrichtung deutscher Banken GmbH*) or any similar institution.

Possible limitations of the legality of purchase

Neither the Issuer nor any Distributor or any of their affiliates have assumed or assume responsibility towards any potential investor for the legality of the acquisition of the Securities, whether under the laws of the jurisdiction of its incorporation or the jurisdiction in which it operates (if different), or for the compliance by a potential investor with any law, regulation or regulatory policy applicable to it.

Risks arising from financial market turmoils, and the German Bank Restructuring Act and other governmental or regulatory interventions

Market turmoil in the international financial markets may affect inflation, interest rates, the price of securities, participation of other investors and thus almost all investments and may lead to (and in the past have led to) extensive governmental interventions. It is generally not possible to predict the structural and/or regulatory changes which may result from current and future market conditions or whether such changes may be materially adverse to the Securities and to their Underlyings, if any.

With respect of Securities issued by HVB, it should be taken into account that the German legislator implemented a bank restructuring act (*Gesetz zur Restrukturierung und geordneten Abwicklung von Kreditinstituten, zur Errichtung eines Restrukturierungsfonds für Kreditinstitute und zur Verlängerung der Verjährungsfrist der aktienrechtlichen Organhaftung, Restrukturierungsgesetz*, the "**German Bank Restructuring Act**") as part of its reaction to the capital markets crisis which begun in 2007. As German credit institution HVB is subject to the German Bank Restructuring Act, which has introduced a special restructuring scheme for German credit institutions on 1 January 2011. This scheme consists of: (i) the restructuring procedure (*Sanierungsverfahren*) pursuant to sections 2 et seqq. of the German Act on the Reorganisation of Credit Institutions (*Kreditinstitute-Reorganisationsgesetz*, the "**KredReorgG**"), (ii) the reorganisation procedure (*Reorganisationsverfahren*) pursuant to sections 7 et seqq. of the KredReorgG, and (iii) the transfer order (*Übertragungsanordnung*) pursuant to sections 48a et seqq. of the German Banking Act (*Kreditwesengesetz*, the "**KWG**").

Whereas a restructuring procedure generally may not interfere with rights of creditors, the reorganisation plan established under a reorganisation procedure may provide measures that affect the rights of the credit institution's creditors including a reduction of existing claims or a suspension of payments. The measures proposed in the reorganisation plan are subject to a majority vote of the creditors and shareholders of the respective credit institution. Furthermore, the KredReorgG stipulates detailed rules on the voting process and on the required majorities and to what extent negative votes may be disregarded. Measures pursuant to the KredReorgG are instituted by the respective credit institution and after approval by the German Financial Services Supervisory Authority (*Bundesanstalt für Finanzdienstleistungsaufsicht*, the "**BaFin**").

Is the existence of the relevant credit institution endangered (*Bestandsgefährdung*) and does this endanger the stability of the financial system (*Systemgefährdung*), BaFin may issue a transfer order pursuant to which the credit institution will be forced to transfer whole or parts of its business activities or assets to a so-called bridge bank.

Claims of Securityholders may be negatively affected by the reorganisation plan, which can be adopted by majority vote. In the context of a transfer order, the initial debtor of Securities (i.e. the Issuer) may be replaced by another debtor (which may have a fundamentally different risk assumption or creditworthiness than the Issuer). Alternatively, the claims may remain with the original debtor, but this situation regarding the debtor's assets, business activity and/or creditworthiness may not be identical to the situation prior to the transfer order.

In addition, the German legislator has introduced the Second Financial Market Stabilisation Act (*Zweites Gesetz zur Umsetzung eines Maßnahmenpakets zur Stabilisierung des Finanzmarktes*) which went into force on 1 March 2012. Pursuant to such act, inter alia, the BaFin may impose regulatory measures on a German credit institution if the financial condition of such credit institution raises doubts whether such institute can constantly comply with the capital or liquidity requirements of the KWG. Even though such regulatory measures may not directly interfere with Securityholders' rights, the fact that BaFin applies such measures towards a credit institution may have negative effects, e.g. on the pricing of Securities or on the institute's ability to refinance itself.

Risks due to no own independent review and advice of the investor

Each potential investor must determine, based on its own independent review and, if applicable, professional advice if the purchase of the Securities fully complies (or if the investor is acquiring the Securities in a fiduciary capacity, the beneficiary's) with the investor's financial needs, objectives and restrictions, and whether it is fully consistent with all investment policies, guidelines and restrictions applicable to it (whether acquiring the Securities as principal or in a fiduciary capacity) and if it is a fit, proper and suitable investment for the investor (or if the investor is acquiring the Securities in a fiduciary capacity, for the beneficiary), notwithstanding the substantial risks inherent in investing in or holding the Securities. Otherwise, there is the risk of an unfavorable or unsuitable investment by such investor.

Risks arising from financing the purchase of the Securities

If a potential investor decides to finance the purchase of the Securities with funds borrowed from a third party, the investor should make sure in advance that he can still pay the interest and principal payments on the loan also in the event of a loss. The investor should not rely on gains or profits from the investment in the Securities in order to repay interest and principal of the loans when due and payable. In that case, the expected return must be set higher since the costs relating to the purchase of the Securities and those relating to the loan (interest, redemption, handling fee) have to be taken into account.

Risks arising from transaction costs

When Securities are purchased or sold, several types of incidental costs (including transaction fees and commissions) are incurred beside the purchase or sale price of the Securities. These incidental costs may significantly reduce or even eliminate any profit from holding the Securities. Generally, credit institutions charge commissions which are either fixed minimum commissions or pro-rata commissions, depending on the order value. To the extent that additional – domestic or foreign – parties are involved in the execution of an order, for example domestic dealers or brokers in foreign markets, Securityholders may also be charged for the brokerage fees, commissions and other fees and expenses of such parties (third-party costs).

In addition to such costs directly related to the purchase of Securities (direct costs), potential investors must also take into account any follow-up costs (such as custody fees). Potential investors should inform themselves about any additional costs incurred in connection with the purchase, custody or sale of the Securities before investing in the Securities.

Inflation risk

The inflation risk is the risk of future money depreciation. The real yield from an investment is reduced by inflation. The higher the rate of inflation, the lower the real yield on a Security. If the inflation rate is equal to or higher than the nominal yield, the real yield is zero or even negative.

Risks arising from transactions to reduce risks

Any person intending to use the Securities as a hedging instrument should recognise the correlation risk. The correlation risk in this case is the risk that the estimated and the actual correlation of the Securities may differ. This means that the hedging position estimated to move in the opposite direction as a security may prove to be correlated with the security, and that this may lead to failure of the envisaged hedging transaction. The Securities – if suitable at all for this purpose – may not be a perfect hedge to an underlying or portfolio of which the underlying forms a part. In addition, it may not be possible to liquidate the Securities at a level which directly reflects the price of the Underlying or portfolio of which the Underlying forms a part.

Potential investors should not rely on being able to make transactions to preclude or limit risks at any time during the term of the Securities; in fact, this is dependent on current market situations and the respective

terms of the transactions. Such transactions may under certain circumstances only be made at less favourable market prices resulting in a loss for the Securityholders.

Securityholders may not be able to make transactions to preclude or limit risks. Their ability to do so will depend on, inter alia, market conditions. In some cases investors may have to carry out such transactions only at a market price that is disadvantageous to them, so that a significant loss will occur.

Risks related to Taxation

General

Potential purchasers and sellers of Securities should be aware that they may be required to pay taxes or other charges or duties in accordance with the laws and practices of the country where the Securities are transferred to or held or other jurisdictions. In some jurisdictions, no official statements, rulings and/or guidelines of the tax authorities or court decisions may be available for innovative financial instruments such as the Securities. Potential investors are advised not to rely on the tax summary contained in this document but to ask for their own tax advisors' advice on their individual taxation with respect to the acquisition, sale or redemption of the Securities. Only these advisors are in a position to duly consider the specific situation of the potential investor.

Payments under the Securities may be subject to withholding tax pursuant to the Foreign Account Tax Compliance Act (FATCA)

In certain circumstances payments made on or with respect to the Securities after 31 December 2016 may be subject to U.S. withholding tax under Sections 1471 through 1474 of the U.S. Internal Revenue Code of 1986, as amended (commonly referred to as "FATCA"). This withholding tax does not apply to payments on Securities that are issued prior to 1 January 2014 (or, if later, the date that is six months after the date on which the final regulations that define "foreign passthru payments" are published) unless the Securities are "materially modified" after that date or are characterized as equity for U.S. federal income tax purposes.

While the Securities are in global form and held within the clearing systems, in all but the most remote circumstances, it is not expected that FATCA will affect the amount of any payment received by the clearing systems. However, FATCA may affect payments made to custodians or intermediaries in the subsequent payment chain leading to the ultimate investor if any such custodian or intermediary generally is unable to receive payments free of FATCA withholding. It also may affect payment to any ultimate investor that is a financial institution that is not entitled to receive payments free of withholding under FATCA, or an ultimate investor that fails to provide its broker (or other custodian or intermediary from which it receives payment) with any information, forms, other documentation or consents that may be necessary for the payments to be made free of FATCA withholding. Investors should choose the custodians or intermediaries with care (to ensure each is compliant with FATCA or other laws or agreements related to FATCA) and provide each custodian or intermediary with any information, forms, other documentation or consents that may be necessary for such custodian or intermediary to make a payment free of FATCA withholding. Investors should consult their own tax adviser to obtain a more detailed explanation of FATCA and how FATCA may affect them. The Issuer's obligations under the Securities are discharged once it has paid the Common Depositary or Common Safekeeper for the clearing systems (as the holder of the Securities) and the Issuer has therefore no responsibility for any amount thereafter transmitted through the hands of the clearing systems and custodians or intermediaries.

3. Risks related to the Securities in specific cases

Risk of the occurrence of Credit Events

The payment of interest and redemption are dependent upon whether certain events ("Credit Events") relating to the Reference Entity (in the case of Credit Linked Securities relating to one Reference Entity (*Single Name Credit Linked*)) or (in the case of Credit Linked Securities relating to a basket of Reference

Entities (*Basket Credit Linked*) relating to one or more Reference Entities have occurred and, if this is the case, upon the value of certain specified Obligations of that Reference Entity (in the case of Credit Linked Securities relating to one Reference Entity (*Single Name Credit Linked*)) or (in the case of Credit Linked Securities relating to a basket of Reference Entities (*Basket Credit Linked*)) of those Reference Entities.

Investors should be aware that (i) in certain circumstances they will receive no interest payments, (ii) the payment of interest may be made on a different date than expected, (iii) the payment of the Redemption Amount may be made on a different date than expected, and (iv) the Redemption Amount may be significantly lower than the Purchase Price and investors could therefore lose a significant portion of their capital invested or even suffer a total loss.

Since Credit Linked Securities are not capital protected, it is not possible to predict the returns on such Securities at the time of their issue. The occurrence of any of the following events generally constitutes a Credit Event: Bankruptcy, Failure to Pay, Repudiation/Moratorium, Obligation Acceleration, Obligation Default, Restructuring.

The probability that a Credit Event will occur in relation to (in the case of Credit Linked Securities relating to one Reference Entity (*Single Name Credit Linked*)) the Reference Entity or, respectively, (in the case of Credit Linked Securities relating to a basket of Reference Entities (*Basket Credit Linked*)) a Reference Entity generally varies because of the financial position and other key figures of the Reference Entity, the general economic situation, the position on certain financial markets and because of political events, developments or tendencies in specific sectors, changes in the applicable interest rates and other factors. Potential investors should undertake a thorough examination of the Reference Entity or, respectively, the Reference Entities and their own research and analysis with respect to the creditworthiness of the Reference Entity or, respectively, the Reference Entities and to the probability of a Credit Event occurring in relation to the Reference Entity or, respectively, the Reference Entities. Potential investors should be clear that the Reference Entity or Reference Entities and the terms and conditions of this relationship may change during the term of the Securities.

Furthermore, the credit risk for investors in Securities linked to a basket of Reference Entities may increase, among other things, due to the concentration of the Reference Entities in a particular sector or in a particular geographical region, or due to the fact that the Reference Entities are exposed to similar financial or other risks.

The Issuer's obligations are independent of the existence or the amount of any credit exposure on the part of the Issuer and/or one of its affiliates with respect to the Reference Entity, and the Issuer and/or one of its affiliates do not need to suffer a loss or provide evidence of a loss following the occurrence of a Credit Event.

Risk of the occurrence of Risk Events in relation to the Reference Asset

The payment of interest and redemption are dependent upon whether certain events ("Risk Events") relating to the Reference Asset have occurred and, if this is the case, upon the value of the Reference Asset. Investors should be aware that (i) in certain circumstances they will receive no interest payments, (ii) the payment of interest may be made on a different date than expected, (iii) the payment of the Redemption Amount may be made on a different date than expected, and (iv) the Redemption Amount may be significantly lower than the Purchase Price and investors could therefore lose a significant portion of their capital invested or even suffer a total loss. Since Reference Asset Linked Securities are not capital protected, it is not possible to predict the returns on such Securities at the time of their issue.

The probability that a Risk Event will occur in relation to the Reference Asset generally varies because of the financial position and other key figures of the Reference Entity, the general economic situation, the position on certain financial markets and because of political events, developments or tendencies in specific sectors, changes in the applicable interest rates and other factors. Potential investors should undertake a thorough examination of the Reference Entity or, respectively, the Reference Asset Issuer and their own research and

analysis with respect to the creditworthiness of the Reference Asset Issuer and to the probability of a Credit Event occurring in relation to the Reference Asset Issuer. Potential investors should be clear that the Reference Asset Issuer and the terms and conditions of this relationship may change during the term of the Securities.

The Issuer's obligations are independent of the existence or the amount of any credit exposure on the part of the Issuer and/or one of its affiliates with respect to the Reference Entity, and the Issuer and/or one of its affiliates do not need to suffer a loss or provide evidence of a loss following the occurrence of a Credit Event.

Currency risks

The Issue Currency or a Reference Obligation may be denominated in a currency other than the currency of the relevant investor's home country. The rates of exchange between currencies are determined by supply and demand on the international currency markets which are subject in particular to the effects of macro-economic factors, speculative transactions and interventions by central banks and governments (including the introduction of exchange control regulations and restrictions). Exchange rate movements may therefore have a negative effect on the market value of the Securities. To the extent that a currency must be converted for the purpose of calculating amounts payable, movements in the relevant rate of exchange are directly reflected in the market value of the Securities.

Risks in relation to adjustment events

In the case of the occurrence of an Adjustment Event specified in the Final Terms, the Calculation Agent or – in the case of Securities issued under Austrian law – the Competent Third Party is entitled, as specified in the Final Terms, to carry out adjustments according to the Final Terms and in its reasonable discretion. Although these adjustments intend to retain the economic situation of the Securityholders unchanged to the largest extent possible, it cannot be guaranteed that such an adjustment only leads to a minimal economic impact. In fact, this adjustment may also have a negative impact on the value or the future performance of the Securities.

Risk of Market Disruptions

If the Final Terms include provisions dealing with the occurrence of market disruptions and the calculation agent determines that a market disruption has occurred or currently exists, any consequential postponement of, or any alternative provisions for, valuation provided in such Security may have an adverse effect on its value and the point of time where a payment takes place.

Risk of regulatory consequences to investors

There may be negative regulatory and other consequences associated with the ownership by certain investors of certain Securities, such as the obligation to conduct its own credit analysis of the Reference Entities or a dramatic increase of the capital requirements resulting in limitations of other business activities. The investment in the Securities may be prohibited for an investor due to supervisory regulations or special reporting or notification requirements may be attached to the Securities. Additionally, the purchase or holding of Securities may be excluded or unsuitable under civil law agreements (i.e. if eligibility as trustee stock (*Mündelsicherheit*) is required). Each investor of the Securities has to verify its own regulatory situation in respect of a potential purchase of the Securities. The Issuer will assume no obligation or liability towards such an investor.

Negative effect of hedging arrangements by the Issuer on the Securities

The Issuer may use a portion of the total proceeds from the sale of the Securities on transactions to hedge the risks of the Issuer relating to the Securities. In such case, the Issuer or any of its affiliates may conclude transactions that correspond to the obligations of the Issuer under the Securities. Generally, such transactions

are concluded prior to or on the Issue Date, but it is also possible to conclude such transactions after the Issue Date. On or prior to such a Valuation Date the Issuer or any of its affiliates may take the steps necessary for closing out any hedging arrangements. The possibility cannot be ruled out, however, that the creditworthiness of a Reference Entity may be influenced by such transactions in individual cases. Entering into or closing out these hedging arrangements may have a negative effect on the market price of the Securities and/or on the amounts payable under the Securities.

Risks with respect to the Issuer's extraordinary call right

The Issuer has the right to call the Securities extraordinarily upon the occurrence of an event specified in the Final Terms at the Optional Redemption Amount. Since the latter will generally be lower than the purchase price of the Securities, the respective Securityholder **will suffer a partial or total loss of its invested capital**.

Risks with respect to the Issuer's Regular Call Right

Securities that contain a regular call right of the Issuer (the "**Regular Call Right**") may be redeemed by the Issuer on certain call dates (the "**Call Dates**") as specified in the Final Terms, by giving notice to the Securityholders. In this event, the Securityholders may suffer a loss of market value since as a rule the Issuer will only exercise its call right if, as result of the interest rate environment, the market value is higher than the Redemption Amount. In addition, the Securityholders bear a reinvestment risk.

4. Risk factors in respect of certain features of the Securities

General risks associated with interest rates

The Securityholder of a Security linked to an Interest Rate is exposed in particular to the risk of fluctuating interest rates. Fluctuating interest rates make it impossible to determine in advance the value of Securities linked to an Interest Rate. The performance of an underlying Interest Rate is influenced by supply and demand on the international money and capital markets as well as by a large number of factors, such as economic and macroeconomic developments, measures taken by central banks and governments and politically motivated factors. The past performance of an underlying floating or structured Interest Rate is no guarantee of future results, even if the past performance of the Interest Rate has been recorded for a relatively long time.

Risks relating to Fixed-Rate Securities

Potential investors in Fixed-Rate Securities should be aware that the fair market value of the Fixed-Rate securities may be very volatile, depending on the volatility of interest rates on the capital market (the "**Market Rate of Interest**"). The performance of the Market Rate of Interest may depend on a number of interrelated factors, including economic, financial and political events and their general effect on capital markets and on the respective stock exchanges. It is not possible to predict how the Market Rate of Interest will change over time. While the Interest Rate of Fixed-Rate Securities is specified in the Final Terms for the term of the Securities, the Market Rate of Interest is subject to daily changes.

If the Market Rate of Interest rises, this normally causes the fair market value of the Fixed-Rate Securities to fall to such an extent that it is similar to the level of Securities that offer an Interest Rate equal to the Market Rate of Interest. If the Market Rate of Interest falls, the fair market value of the Fixed-Rate Securities normally rises until the fair market value of the Fixed-Rate Securities is similar to the level of Securities that offer an Interest Rate equal to the Market Rate of Interest. If the Final Terms grant the Issuer a Call Right or grant the Securityholder a Redemption Right and the Securityholder intends to sell the Fixed-Rate Securities before they mature, they should be aware of the influence of the Market Rate of Interest on the fair market value of the Fixed-Rate Securities.

Specific risks relating to Fixed-Rate Dual Currency Securities

Potential investors in Fixed-Rate Dual Currency Securities should be aware that the redemption of the Securities as well as the interest payments from the Securities depend on changes in the exchange rate and are therefore subject to currency risk. As a result, the investor may incur losses on interest or principal.

Risks relating to Floater Securities

Potential investors in Floater Securities should be aware that they are exposed to the risk of fluctuating interest rates and uncertain interest income. Fluctuating interest rates make it impossible to determine in advance the return on Floating-Rate Securities. Floating-Rate Securities may have Factors, Maximum and Minimum Interest Rates or similar features. The fair market values of these types of structured floating-rate notes are normally more volatile than conventional notes.

Risks relating to Reverse Floater Securities

The interest income from Reverse Floater Securities is in reverse proportion to the Reference Rate. If the Reference Rate rises, interest income falls. Interest income rises if the Reference Rate falls. Potential investors should note that they are exposed to a risk of loss, if the long-term Market Rates of Interest rise.

Risks relating to Fixed Floater Securities

Potential investors in Fixed Floater Securities should be aware that they are exposed to the risk of Fixed-Rate Securities (see above under "Risks relating to Fixed-Rate Securities") as well as the risk of Floater Securities (see above under "Risks relating to Floater Securities").

Risks relating to Range Accrual Securities

Potential investors in Range Accrual Securities should be aware that an interest payment may depend on the number of days on which the Reference Rate specified in the Final Terms moves within a specified range. The interest payment in relation to Securities with an Interest Rate Range declines in relation to the number of days on which the Reference Rate is outside the range. If the Reference Rate is outside the range for the entire Interest Period, there is a risk that Securityholders will not receive any interest payment for this Interest Period.

Specific risks associated with Inflation Indices

Securities for which interest depends on an Inflation Index may be associated with risks that do not exist for a conventional index (e.g. a stock index). Inflation Indices measure how average prices of consumer goods and services purchased by private households change over time. Depending on the composition of an Inflation Index, the development of the inflation rate may vary, and the basket of goods and services on which the Index is based does not necessarily correspond to the investor's consumer behaviour. As a result, an investment in a Security whose Interest Rate is linked to an Inflation Index may not be suitable for protecting the investor from inflation. The Inflation Index may be influenced by, among other things, changes in the economic, political or supervisory conditions as well as changes in the prices of different consumer goods, services, and/or sales taxes (e.g. value added tax). The factors described above make it more difficult to assess the performance of the relevant Inflation Index and thus the value and market price of the relevant Securities. Moreover, an Inflation Index is normally calculated only on a monthly basis and published only several months after the month under review. As a result, the calculation of a payment (e.g. an interest payment) from Securities whose Interest Rate is linked to an Inflation Index as well as the payment itself are made only with a corresponding delay after the month under review relevant for the calculation.

The value of an Inflation Index may be subject to fluctuations in the course of time and in the process rise or fall in response to a large number of factors. Securityholders should note that past performance of an Inflation Index provides no indication of future performance.

General return risk

For Securities with an Interest Rate structure, the return on the notes can be calculated only at the end of the term, because the amount of all payments from the Securities is known only at that point. Even if the Securityholder holds the Securities until repayment or redemption by the Issuer, there is a risk that the return expectations will not be met or that the return on a capital market investment with a comparable term and normal market interest rates will not be achieved.

Issue Price

Securities may be issued at an issue price which will be either specified in column "Issue Price" of the Table 1.1 of § 1 of the Product Data or if the issue price has not been specified at the time of creation of the Final Terms the issue price per Security will be specified and published thereafter on a website as indicated in the Final Terms.

Term

The Securities have a fixed term, which may be reduced under certain circumstances.

Pricing

The Issue Price as well as the bid and offer prices quoted by the Issuer during the term of the Securities are based on internal pricing models of the Issuer. The Issue Price may contain, beside upfront and distribution fees, an expected margin for the Issuer. Generally, the margin may contain costs, which, i.a., cover the Issuer's costs for structuring the Securities, risk hedging of the Issuer and the distribution.

Selling concession or other concessions

A selling concession or other concession may be charged as set out in the Final Terms. In the case of Securities offered to Italian consumers the Final Terms will also state the presumable value at which the Securityholders may liquidate the Securities in case of divestment the day after the Issue Date.

Placing and Distribution

The Securities may be distributed by way of public or private placements and, in each case, through financial intermediaries as agreed between the Issuer and the relevant financial intermediary. The method of distribution of each tranche will be stated in the applicable Final Terms.

Admission to Trading and Listing of the Securities

Application may be made to list and trade Securities to be issued under the Programme on the markets or trading systems as set out in the Final Terms. However, Securities may also be issued under the Programme without being listed on any stock exchange. The Issuer may but does not have to act as or instruct another party to act as Market Maker as set out in Final Terms. The obligations of the Market Maker with regard to admission to trading and listing of the Securities are as set out in Final Terms.

Potential investors

The Securities may be offered to qualified investors and/or retail investors and/or institutional investors as stated in the Final Terms. If the offer is being made simultaneously in the markets of two or more countries and if a tranche has been or is being reserved for certain of these, such information will be given in the Final Terms.

Terms and conditions of the offer

The following details regarding the terms and conditions of the offer will be indicated in the Final Terms: (i) the country(ies) where the offer(s) to the public takes place, (ii) the conditions for the offer of the Securities; (iii) day of the first public offer; (iv) possibility to reduce or increase the number of securities offered for sale by the Issuer, (v) smallest transferable and/or tradable unit; (vi) possibility of an early termination of the public offer.

Distributors

Under this Programme, the Issuer may from time to time issue Securities to one or more financial intermediaries acting as a distributor (each a "**Distributor**" and together the "**Distributors**") as set out in the Final Terms. The Distributors may underwrite the Securities with or without a firm underwriting commitment or under a best efforts arrangement as agreed in a subscription agreement.

In case of Securities offered to Italian consumers, the Issuer or the Distributor is the intermediary responsible for the placement of the Securities ("*Responsabile del Collocamento*"), as defined in article 93-bis of the Italian Legislative Decree 24 February 1998, n. 58 (as subsequently amended and supplemented).

Offer during a subscription period

The Securities may be offered during a Subscription Period. For the purpose of acquisition, a potential investor has to make a subscription order to be forwarded to the Issuer during the Subscription Period. If

specified in the Final Terms, the Securities may subsequently be offered. The Issuer reserves the right to extend or shorten the subscription period or to withdraw the issue prior to the Issue Date during the Subscription Period for any reason. The Issuer has the right to accept or reject the subscription orders of potential investors in whole or in part, irrespective of whether or not the intended volume of the Securities to be placed is reached. The Issuer has the right to make allocations at its own discretion; whether and to what extent the Issuer exercises such right is subject to its own discretion. Potential investors who made purchase offers in the form of subscription orders may presumably be informed by the Issuer from the first Banking Day onwards following the end of the Subscription Period on the number of Securities allocated to them. Trading of the Securities is possible prior to the notification of the allocation. Subscription orders are irrevocable, except for Securities being offered to consumers. In case of Securities being offered to consumers, subscription orders are subject to revocation rights applicable to the "door to door selling" and the "long distance technique selling".

Representative of Securityholders

There shall be no representative of the Securityholders.

DESCRIPTION OF THE SECURITIES

The definitions of the defined terms used herein are specified in the Conditions (as defined in the section "Conditions of the Securities") below.

The Securities

Credit Linked Securities, Reference Asset Linked Securities, and Credit and Reference Asset Linked Securities are issued as bonds or certificates (the "**Securities**").

All of the Securities constitute bearer debt instruments within the meaning of § 793 of the German Civil Code (*Bürgerliches Gesetzbuch*, "**BGB**") or the general principles of Austrian securities law, as the case may be. All Securities are either subject to German or to Austrian Law.

General dependence of interest and redemption upon the occurrence of a Credit Event or a Risk Event

The Securities are linked to the creditworthiness of the Reference Entity or Reference Entities, to the Reference Asset or to both the creditworthiness of a Reference Entity or Reference Entities and the Reference Asset. The payment of interest and redemption are dependent upon whether certain events ("**Credit Events**") have occurred in relation to the or a Reference Entity, whether certain other events ("**Risk Events**") have occurred in relation to the Reference Asset, or a combination of these. Investors should be aware that (i) in certain circumstances they will receive only partial interest payments or no interest payments at all, (ii) the payment of the Redemption Amount or of interest may be made on a different date than expected and (iii) the Redemption Amount may be significantly lower than the purchase price and may even be zero, and investors could therefore lose a significant portion of their capital invested or even suffer a total loss.

The probability that a Credit Event will occur in relation to the or a Reference Entity, or that a Risk Event will occur in relation to the Reference Asset generally varies because of the financial position and other key figures of the relevant Reference Entity and the Reference Asset Issuer, the general economic situation, the position on certain financial markets and because of political events, developments or tendencies in specific sectors, changes in the applicable interest rates and other factors. Measures taken by the relevant Reference Entity and the Reference Asset Issuer (such as a business combination or a spin-off or the repayment or transfer of Obligations) may have an adverse effect on the value of the Securities. The Reference Entity or Reference Entities and the Reference Asset Issuer to which the Securities relate and the terms and conditions of that relationship may change during the term of the Securities.

In case of Single Name Credit Linked Securities, if a Credit Event occurs in relation to the Reference Entity on or prior to the Credit Event Cut-Off Date (subject to any extension in the event that a potential Credit Event exists at the time of the Credit Event Cut-Off Date), then (i) the accrual of interest ceases and (ii) the Securities are not redeemed on the Scheduled Maturity Date at the Outstanding Principal Amount, but on the Maturity Date at the Credit Event Redemption Amount. The latter amount is generally significantly lower than the initial Principal Amount of the Securities and in certain circumstances may be zero.

In principle, therefore, the Issuer will pay interest and redeem the Securities on the Scheduled Maturity Date at the Outstanding Principal Amount only if no Credit Event has occurred in relation to the Reference Entity prior to the Credit Event Cut-Off Date (subject to any extension in the event that a potential Credit Event exists at the time of the Credit Event Cut-Off Date).

In case of Basket Credit Linked Securities, if a Credit Event occurs relating to a Reference Entity (an "**Affected Reference Entity**") at any time up to and including the Credit Event Cut-Off Date (subject to any extension in the event that a potential Credit Event exists at the time of Credit Event Cut-Off Date), then (i) the accrual of interest ceases with respect to that portion of the Outstanding Principal Amount attributable to the Affected Reference Entity (the "**Reduction Amount**"), and (ii) the Outstanding Principal Amount of the

Securities is reduced by the Reduction Amount. The Securities are, therefore, redeemed pro rata on the Settlement Date by payment of the corresponding Credit Event Redemption Amount which, in case of all Securities other than Securities with Fixed Recovery equal to zero, may also be zero, and, in case of all Securities with Fixed Recovery equal to zero, will be zero. The occurrence of further Credit Events with respect to further Reference Entities is reflected in further reductions in the Outstanding Principal Amount equal in each case to the relevant Reduction Amounts.

In principle, therefore, the Issuer will pay interest and redeem the Securities on the Scheduled Maturity Date at the Outstanding Principal Amount only if no Credit Event has occurred in relation to any Reference Entity prior to the Credit Event Cut-Off Date (subject to any extension in the event that a potential Credit Event exists at the time of the Credit Event Cut-Off Date).

In case of Reference Asset Linked Securities, if a Risk Event relating to a Reference Asset occurs at any time during the term of the Securities, then (i) the accrual of interest ceases and (ii) the Securities are not redeemed on the Scheduled Maturity Date at the Redemption Amount, but on the Maturity Date at the Reference Asset Settlement Amount. This amount is generally significantly lower than the initial Principal Amount of the Securities and in certain circumstances may be zero.

In case of Credit and Reference Asset Linked Securities, if a Credit Event or a Risk Event relating to a Reference Asset occurs at any time during the term of the Securities, then (i) the accrual of interest ceases (in case of Basket Credit and Reference Asset Linked Securities with respect to that portion of the Outstanding Principal Amount attributable to the Affected Reference Entity (the "**Reduction Amount**")), and (ii) in case of Single Name Credit and Reference Asset Linked Securities the Securities are not redeemed on the Scheduled Maturity Date at the Outstanding Principal Amount, but on the Reference Asset Settlement Date at the Reference Asset Settlement Amount; and, in case of Basket Credit and Reference Asset Linked Securities (a) in case of the occurrence of a Risk Event the Securities are not redeemed on the Scheduled Maturity Date at the Outstanding Principal Amount, but on the Reference Asset Settlement Date at the Reference Asset Settlement Amount and (b) in case of the occurrence of a Credit Event the Outstanding Principal Amount of the Securities is reduced by the Reduction Amount, and a Risk Event is deemed to have occurred in relation to such portion of the Reference Asset whose Reference Asset Nominal Amount is equivalent to the relevant Reduction Amount, to the effect that the Securities are partially redeemed on the Reference Asset Settlement Date at the Reference Asset Settlement Amount. If a Credit Event occurs subsequent to a Risk Event (but before or on the Reference Asset Settlement Date) then the Credit Event Redemption Amount (in case of Single Name Credit and Reference Asset Linked Securities) and the Reduction Amount (in case of Basket Credit and Reference Asset Linked Securities) is calculated on the basis of the Reference Asset Settlement Amount (in case of the occurrence of a Risk Event). These amounts are generally significantly lower than the initial Principal Amount of the Securities and in certain circumstances may be zero.

Product Type 1: Fixed-Rate Credit Linked / Reference Asset Linked / Credit and Reference Asset Linked Securities

General

Fixed-Rate Securities bear interest during the term of the Securities. Fixed-Rate Securities are redeemed on the Scheduled Maturity Date by payment of the Redemption Amount.

Redemption

In the case of Fixed-Rate Securities other than Fixed-Rate Dual Currency Securities, the Redemption Amount is specified by the Issuer in the Issue Currency at the time the Securities are issued.

In the case of Fixed-Rate Dual Currency Securities, the Redemption Amount is calculated in the Payment Currency as follows:

- For *Fixed-Rate Dual Currency Securities (Upside)*, the Outstanding Principal Amount is multiplied by FX (initial), divided by FX (final).
- For *Fixed-Rate Dual Currency Securities (Downside)*, the Outstanding Principal Amount is multiplied by FX (final), divided by FX (initial).

For Dual Currency Securities, the Securityholder bears an exchange rate risk as at the Scheduled Maturity Date and – if the Securities are sold early – during the term.

Call Rights

The Terms and Conditions of the Securities may grant the Issuer a Regular Call Right. The Issuer may exercise its Regular Call Right as at each Call Date of the Securities. Once the right has been exercised, the term of the Securities is limited. Following the exercise of such call right, Securityholders are entitled to receive payment of the Redemption Amount on the respective Call Date.

The Terms and Conditions of the Securities may grant the Issuer Extraordinary Call Rights in the case of a Call Event, or the occurrence of a Spread Trigger Event, or a Mark-to-Market Unwind Event, or an Early Termination Event, or a Swap Currency Risk Event. Following the exercise of such call right, Security Holders are entitled to receive payment of the Optional Redemption Amount together with any interest accrued up to the Call Date as the case may be.

Interest

Fixed-Rate Securities bear interest on their Outstanding Principal Amount for one or more Interest Periods at the Interest Rate (expressed in each case as a percentage per annum):

- *Fixed-Rate Securities that provide for only one Interest Rate for the Interest Period* bear interest at a fixed rate specified in the Final Terms.
- *Fixed-Rate Securities that provide for different Interest Rates for each Interest Period* bear interest at the different Interest Rates specified in the Final Terms for the respective Interest Period.

Interest Amount

For *Fixed-Rate Securities*, the respective Interest Amount to be paid is calculated by multiplying the product of the Interest Rate and the Outstanding Principal Amount by the Day Count Fraction.

For *Fixed-Rate Dual Currency Securities (Upside)*, the respective Interest Amount to be paid is calculated by multiplying the product of the Interest Rate and the Outstanding Principal Amount by the Day Count Fraction and by FX (initial) divided by FX (k).

For *Fixed-Rate Dual Currency Securities (Downside)*, the respective Interest Amount to be paid is calculated by multiplying the product of the Interest Rate and the Outstanding Principal Amount by the Day Count Fraction and by FX (k) divided by FX (initial).

The respective Interest Amount falls due for payment on the relevant Interest Payment Date.

If the Securities are Dual Currency Securities, the Interest Amount depends on an exchange rate movement. The Securityholder therefore carries an exchange rate risk.

Product Type 2: Floating-Rate Credit Linked / Reference Asset Linked / Credit and Reference Asset Linked Securities

1. Credit Linked / Reference Asset Linked / Credit and Reference Asset Linked Floater Securities

General

Floater Securities bear floating-rate interest during the term of the Securities. Floater Securities are redeemed on the Scheduled Maturity Date by payment of the Redemption Amount.

Redemption

In the case of Floater Securities other than Floater Dual Currency Securities, the Redemption Amount is specified by the Issuer in the Issue Currency at the time the Securities are issued.

In the case of Floater Dual Currency Securities, the Redemption Amount is calculated in the Payment Currency as follows:

- For *Floater Dual Currency Securities (Upside)*, the Outstanding Principal Amount is multiplied by FX (initial), divided by FX (final).
- For *Floater Dual Currency Securities (Downside)*, the Outstanding Principal Amount is multiplied by FX (final), divided by FX (initial).

For Dual Currency Securities, the Security Holder bears an exchange rate risk as at the Maturity Date and - if the Securities are sold early - during the term.

Call Rights

The Terms and Conditions of the Securities may grant the Issuer a Regular Call Right. The Issuer may exercise its Regular Call Right as at each Call Date of the Securities. Once the right has been exercised, the term of the Securities is limited. Following the exercise of such call right, Securityholders are entitled to receive payment of the Redemption Amount on the respective Call Date.

The Terms and Conditions of the Securities may grant the Issuer Extraordinary Call Rights in the case of a Call Event, or the occurrence of a Spread Trigger Event, or a Mark-to-Market Unwind Event, or an Early Termination Event, or a Swap Currency Risk Event. Following the exercise of such call right, Securityholders are entitled to receive payment of the Optional Redemption Amount together with any interest accrued up to the Call Date as the case may be.

Early Redemption

In the case of TARN Express Floater Securities, the Securities are redeemed early by payment of the Early Redemption Amount, if an Early Redemption Event occurs.

An Early Redemption Event occurs, if the total of all Interest Rates specified up to an Interest Determination Date (inclusive) touches or exceeds the Knock-Out Interest Rate on an Interest Determination Date.

Interest

Floater Securities bear interest on their Outstanding Principal Amount for one or more Interest Periods at the Interest Rate (expressed in each case as a percentage per annum).

Interest Rate

The Interest Rate is specified depending on the respective Interest Rate structure.

For *Floater Securities with a EURIBOR as Reference Rate*, the Securities bear interest at an Interest Rate that is equal to the offered rate for deposits in euros for the Designated Maturity. The Reference Rate is determined on the Screen Page on the relevant Interest Determination Date and specified for the relevant Interest Period.

For *Floater Securities with a LIBOR as Reference Rate*, the Securities bear interest at an Interest Rate that is equal to the offered rate for deposits in the Reference Asset Currency for the Designated Maturity. The Reference Rate is determined on the Screen Page on the relevant Interest Determination Date and specified for the relevant Interest Period.

For *Floater Securities with CMS as Reference Rate*, the Securities bear interest at an Interest Rate that is equal to the rate for swap transactions in euros for the relevant Designated Maturity displayed on the Screen Page at the Reference Time (local time of the Reference Rate Financial Centre) on the relevant Interest Determination Date.

For *Interest Rate Difference Floater Securities*, the Interest Rate for the respective Interest Period is the Difference between the Reference Rate for Designated Maturity₁ and the Reference Rate for Designated Maturity₂.

For *Fixed Floater Securities*, the Interest Rate is the Reference Rate or the Fixed Interest Rate indicated for the respective Interest Period.

For *Reverse Fixed Floater Securities*, the Interest Rate is the Floating Interest Rate or the Fixed Interest Rate indicated for the respective Interest Period.

It may be specified that for the calculation of the Interest Rate a *Premium* is added to or a *Discount* deducted from the Reference Rate. In addition or alternatively, it may be specified that the Reference Rate is multiplied by a *Factor*.

A *Maximum Interest Rate* may be specified for Floater Securities. This means that, if the Interest Rate determined for an Interest Period is higher than the Maximum Interest Rate, the Interest Rate for this Interest Period is the Maximum Interest Rate.

A *Minimum Interest Rate* may also be specified for Floater Securities. This means that, if the Interest Rate determined for an Interest Period is lower than the Minimum Interest Rate, the Interest Rate for this Interest Period is the Minimum Interest Rate.

A *Knock-In Interest Rate* may be specified for Floater Securities. This means that, if the Interest Rate determined for an Interest Period is higher than the Knock-In Interest Rate, the Interest Rate is the Knock-In Interest Rate for the entire term of the Securities.

A *Global Cap* may be specified for Floater Securities. This means that, if on an Interest Determination Date the total of all Interest Rates determined up to this Interest Determination Date (inclusive) is equal to or greater than the Aggregate Maximum Interest Rate, the Interest Rate for the relevant Interest Determination Date is equal to the difference between the Aggregate Maximum Interest Rate and the total of all Interest Rates determined up to this Interest Determination Date (exclusive), and the respective Interest Rate for all subsequent Interest Determination Dates is zero (0%).

A *Global Floor* may be specified for Floater Securities. This means that, if on the last Interest Determination Date the total of all Interest Rates determined up to this Interest Determination Date (inclusive) is smaller than the Aggregate Minimum Interest Rate, the Interest Rate for the relevant Interest Determination Date is equal to the difference between the Aggregate Minimum Interest Rate and the total of all Interest Rates determined up to this Interest Determination Date (exclusive).

Interest Amount

For *Floater Securities*, the respective Interest Amount to be paid is calculated by multiplying the product of the Interest Rate and the Outstanding Principal Amount by the Day Count Fraction.

For *Floater Dual Currency Securities (Upside)*, the respective Interest Amount to be paid is calculated by multiplying the product of the Interest Rate and the Outstanding Principal Amount by the Day Count Fraction and by FX (initial) divided by FX (k).

For *Floater Dual Currency Securities (Downside)*, the respective Interest Amount to be paid is calculated by multiplying the product of the Interest Rate and the Outstanding Principal Amount by the Day Count Fraction and by FX (k) divided by FX (initial).

The respective Interest Amount falls due for payment on the relevant Interest Payment Date.

If the Securities are Dual Currency Securities, the Interest Amount depends on an exchange rate movement. The Securityholder therefore carries an exchange rate risk.

2. Credit Linked / Reference Asset Linked / Credit and Reference Asset Linked Range Accrual Securities

General

Range Accrual Securities bear floating-rate interest during the term of the Securities. Range Accrual Securities are redeemed on the Scheduled Maturity Date by payment of the Redemption Amount.

Redemption

In the case of Range Accrual Securities other than Range Accrual Dual Currency Securities, the Redemption Amount is specified by the Issuer in the Issue Currency at the time the Securities are issued.

In the case of Range Accrual Dual Currency Securities, the Redemption Amount is calculated in the Payment Currency as follows:

- For *Range Accrual Dual Currency Securities (Upside)*, the Outstanding Principal Amount is multiplied by FX (initial), divided by FX (final).
- For *Range Accrual Dual Currency Securities (Downside)*, the Outstanding Principal Amount is multiplied by FX (final), divided by FX (initial).

Irrespective of whether the redemption is made in the Issue Currency or in the Payment Currency, the Redemption Amount depends on an exchange rate movement. The Securityholder therefore carries an exchange rate risk.

Call Rights

The Terms and Conditions of the Securities may grant the Issuer a Regular Call Right. The Issuer may exercise its Regular Call Right as at each Call Date of the Securities. Once the right has been exercised, the term of the Securities is limited. Following the exercise of such call right, Securityholders are entitled to receive payment of the Redemption Amount on the respective Call Date.

The Terms and Conditions of the Securities may grant the Issuer Extraordinary Call Rights in the case of a Call Event, or the occurrence of a Spread Trigger Event, or a Mark-to-Market Unwind Event, or an Early Termination Event, or a Swap Currency Risk Event. Following the exercise of such call right,

Securityholders are entitled to receive payment of the Optional Redemption Amount together with any interest accrued up to the Call Date as the case may be.

Early Redemption

In the case of TARN Express Range Accrual Securities, the Securities are redeemed early by payment of the Early Redemption Amount, if an Early Redemption Event occurs.

An Early Redemption Event occurs if the total of all Interest Rates specified up to an Interest Determination Date (inclusive) reaches or exceeds the Knock-Out Interest Rate on an Interest Determination Date.

Interest

Range Accrual Securities bear interest on their Outstanding Principal Amount for several Interest Periods at the Interest Rate (expressed in each case as a percentage per annum). For Range Accrual Securities, the interest payment depends on, among other things, the number of days on which the Reference Rate moves within a specified range.

Interest Rate

The Interest Rate is calculated for each Interest Period as the total of (i) the Premium and (ii) (a) the number of Observation Dates in Range (b) divided by the total number of Observation Dates of the respective Interest Period (c) multiplied by the Fixed Interest Rate In and (iii) (a) the number of Observation Dates out of Range (b) divided by the total number of Observation Dates of the respective Interest Period and (c) multiplied by the Fixed Interest Rate Out.

Number of Observation Dates in Range ("*exclusive*" observation) means the number of Observation Dates in the respective Interest Period on which the Reference Rate is within the Interest Rate Range; for the Frozen Period the Reference Rate is relevant that was determined on the last Interest Determination Date of the respective Interest Period.

Number of Observation Dates out of Range ("*exclusive*" observation) means the number of Observation Dates in the respective Interest Period on which the Reference Rate is outside the Interest Rate Range or is at the Upper or Lower Interest Rate Threshold; for the Frozen Period the Reference Rate is relevant that was determined on the last Interest Determination Date of the respective Interest Period.

Number of Observation Dates in Range ("*inclusive*" observation) means the number of Observation Dates in the respective Interest Period on which the Reference Rate is within the Interest Rate Range or is at the Upper or Lower Interest Rate Threshold; for the Frozen Period the Reference Rate is relevant that was determined on the last Interest Determination Date of the respective Interest Period.

Number of Observation Dates out of Range ("*inclusive*" observation) means the number of Observation Dates in the respective Interest Period on which the Reference Rate is outside the Interest Rate Range; for the Frozen Period the Reference Rate is relevant that was determined on the last Interest Determination Date of the respective Interest Period.

For *Range Accrual Securities with a EURIBOR as Reference Rate*, the Securities bear interest at an Interest Rate that is equal to the offered rate for deposits in euros for the Designated Maturity. The Reference Rate is determined on the Screen Page on the relevant Interest Determination Date and specified for the relevant Interest Period.

For *Range Accrual Securities with a LIBOR as Reference Rate*, the Securities bear interest at an Interest Rate that is equal to the offered rate for deposits in the Reference Asset Currency for the Designated Maturity. The Reference Rate is determined on the Screen Page on the relevant Interest Determination Date and specified for the relevant Interest Period.

For *Range Accrual Securities with CMS as Reference Rate*, the Securities bear interest at an Interest Rate that is equal to the rate for swap transactions in euros for the relevant Designated Maturity displayed on the Screen Page at the Reference Time (local time of the Reference Rate Financial Centre) on the relevant Interest Determination Date.

A *Maximum Interest Rate* may be specified for Range Accrual Securities. This means that, if the Interest Rate determined for an Interest Period is higher than the Maximum Interest Rate, the Interest Rate for this Interest Period is the Maximum Interest Rate.

A *Minimum Interest Rate* may also be specified for Range Accrual Securities. This means that, if the Interest Rate determined for an Interest Period is lower than the Minimum Interest Rate, the Interest Rate for this Interest Period is the Minimum Interest Rate.

A *Knock-In Interest Rate* may be specified for Range Accrual Securities. This means that, if the Interest Rate determined for an Interest Period is higher than the Knock-In Interest Rate, the Interest Rate is the Knock-In Interest Rate for the entire term of the Securities.

A *Global Cap* may be specified for Range Accrual Securities. This means that, if on an Interest Determination Date the total of all Interest Rates determined up to this Interest Determination Date (inclusive) is equal to or greater than the Aggregate Maximum Interest Rate, the Interest Rate for the relevant Interest Determination Date is equal to the difference between the Aggregate Maximum Interest Rate and the total of all Interest Rates determined up to this Interest Determination Date (exclusive), and the respective Interest Rate for all subsequent Interest Determination Dates is zero (0%).

A *Global Floor* may be specified for Range Accrual Securities. This means that, if on the last Interest Determination Date the total of all Interest Rates determined up to this Interest Determination Date (inclusive) is smaller than the Aggregate Minimum Interest Rate, the Interest Rate for the relevant Interest Determination Date is equal to the difference between the Aggregate Minimum Interest Rate and the total of all Interest Rates determined up to this Interest Determination Date (exclusive).

Interest Amount

For *Range Accrual Securities*, the respective Interest Amount to be paid is calculated by multiplying the product of the Interest Rate and the Outstanding Principal Amount by the Day Count Fraction.

For *Range Accrual Dual Currency Securities (Upside)*, the respective Interest Amount to be paid is calculated by multiplying the product of the Interest Rate and the Outstanding Principal Amount by the Day Count Fraction and by FX (initial) divided by FX (k).

For *Range Accrual Dual Currency Securities (Downside)*, the respective Interest Amount to be paid is calculated by multiplying the product of the Interest Rate and the Outstanding Principal Amount by the Day Count Fraction and by FX (k) divided by FX (initial).

The respective Interest Amount falls due for payment on the relevant Interest Payment Date.

If the Securities are Dual Currency Securities, the Interest Amount depends on an exchange rate movement. The Securityholder therefore carries an exchange rate risk.

Product Type 3: Inflation Credit Linked / Reference Asset Linked / Credit and Reference Asset Linked Securities

1. Inflation Credit Linked / Reference Asset Linked / Credit and Reference Asset Linked Floater Securities

General

Inflation Floater Securities bear floating-rate interest during the term of the Securities. Inflation Floater Securities are redeemed on the Scheduled Maturity Date by payment of the Redemption Amount.

Redemption

In the case of Inflation Floater Securities other than Inflation Floater Dual Currency Securities, the Redemption Amount is specified by the Issuer in the Issue Currency at the time the Securities are issued.

In the case of Inflation Floater Dual Currency Securities, the Redemption Amount is calculated in the Payment Currency as follows:

- For *Inflation Floater Dual Currency Securities (Upside)*, the Outstanding Principal Amount is multiplied by FX (initial), divided by FX (final).
- For *Inflation Floater Dual Currency Securities (Downside)*, the Outstanding Principal Amount is multiplied by FX (final), divided by FX (initial).

For Inflation Dual Currency Securities, the Securityholder bears an exchange rate risk as at the Scheduled Maturity Date and – if the Securities are sold early – during the term.

Call and Redemption Right

The Terms and Conditions of the Securities may grant the Issuer a Regular Call Right. The Issuer may exercise its Regular Call Right as at each Call Date of the Securities. Once the right has been exercised, the term of the Securities is limited. Following the exercise of such call right, Securityholders are entitled to receive payment of the Redemption Amount on the respective Call Date.

The Terms and Conditions of the Securities may grant the Issuer Extraordinary Call Rights in the case of a Call Event, or the occurrence of a Spread Trigger Event, or a Mark-to-Market Unwind Event, or an Early Termination Event, or a Swap Currency Risk Event. Following the exercise of such call right, Securityholders are entitled to receive payment of the Optional Redemption Amount together with any interest accrued up to the Call Date as the case may be.

Early Redemption

In the case of Inflation TARN Express Floater Securities, the Securities are redeemed early by payment of the Early Redemption Amount, if an Early Redemption Event occurs.

An Early Redemption Event occurs if the total of all Interest Rates specified up to an Interest Determination Date (inclusive) reaches or exceeds the Knock-Out Interest Rate on an Interest Determination Date.

Interest

Inflation Floater Securities bear interest on their Outstanding Principal Amount for one or more Interest Periods at the Interest Rate (expressed in each case as a percentage per annum).

Interest Rate

The Interest Rate is specified depending on the respective Interest Rate structure.

For *Inflation Floater Securities*, the Securities bear interest at a rate that depends on the performance of an Inflation Index. The Interest Rate is calculated on the relevant Interest Determination Date and specified for the relevant Interest Period.

For *Inflation Interest Rate Difference Floater Securities*, the Interest Rate for the respective Interest Period is the difference between the Inflation Rate for Designated Maturity₁ and the Inflation Rate for Designated Maturity₂.

For *Inflation Reverse Floater Securities*, the Interest Rate is the difference between the Fixed Interest Rate and the Inflation Rate.

For *Inflation Fixed Floater Securities*, the Interest Rate for the respective Interest Period is either the Inflation Rate or the Fixed Interest Rate indicated for the respective Interest Period.

For *Inflation Reverse Fixed Floater Securities*, the Interest Rate is the difference between the Fixed Interest Rate and the Inflation Rate, or the Fixed Interest Rate indicated for the respective Interest Period.

It may be specified that for the calculation of the Interest Rate a *Premium* is added to or a *Discount* deducted from the Inflation Rate. In addition or alternatively, it may be specified that the Inflation Rate is multiplied by a *Factor*.

For *Inflation Digital Cap Floater Securities*, the Interest Rate for each Interest Period is calculated as follows:

- a) If the Inflation Rate is higher than or equal to the Strike, the Interest Rate is the Fixed Interest Rate.
- b) If the Inflation Rate is lower than the Strike, the Interest Rate is calculated by multiplying the Inflation Rate by the Factor and adding the Premium to the result.

For *Inflation Digital Floor Floater Securities*, the Interest Rate for each Interest Period is calculated as follows:

- a) If the Inflation Rate is higher than the Strike, the Interest Rate is calculated by multiplying the Inflation Rate by the Factor and adding the Premium to the result.
- b) If the Inflation Rate is lower than or equal to the Strike, the Interest Rate is the Fixed Interest Rate.

A *Maximum Interest Rate* may be specified for Inflation Floater Securities. This means that, if the Interest Rate determined for an Interest Period is higher than the Maximum Interest Rate, the Interest Rate for this Interest Period is the Maximum Interest Rate.

A *Minimum Interest Rate* may also be specified for Inflation Floater Securities. This means that, if the Interest Rate determined for an Interest Period is lower than the Minimum Interest Rate, the Interest Rate for this Interest Period is the Minimum Interest Rate.

A *Knock-In Interest Rate* may be specified for Inflation Floater Securities. This means that, if the Interest Rate determined for an Interest Period is higher than the Knock-In Interest Rate, the Interest Rate is the Knock-In Interest Rate for the entire term of the Securities.

A *Global Cap* may be specified for Inflation Floater Securities. This means that, if on an Interest Determination Date the total of all Interest Rates determined up to this Interest Determination Date (inclusive) is equal to or greater than the Aggregate Maximum Interest Rate, the Interest Rate for the relevant

Interest Determination Date is equal to the difference between the Aggregate Maximum Interest Rate and the total of all Interest Rates determined up to this Interest Determination Date (exclusive), and the respective Interest Rate for all subsequent Interest Determination Dates is zero (0%).

A *Global Floor* may be specified for Inflation Floater Securities. This means that, if on the last Interest Determination Date the total of all Interest Rates determined up to this Interest Determination Date (inclusive) is smaller than the Aggregate Minimum Interest Rate, the Interest Rate for the relevant Interest Determination Date is equal to the difference between the Aggregate Minimum Interest Rate and the total of all Interest Rates determined up to this Interest Determination Date (exclusive).

Interest Amount

For *Inflation Floater Securities*, the respective Interest Amount to be paid is calculated by multiplying the product of the Interest Rate and the Outstanding Principal Amount by the Day Count Fraction.

For *Inflation Floater Dual Currency Securities (Upside)*, the respective Interest Amount to be paid is calculated by multiplying the product of the Interest Rate and Outstanding Principal Amount by the Day Count Fraction and by FX (initial) divided by FX (k).

For *Inflation Floater Dual Currency Securities (Downside)*, the respective Interest Amount to be paid is calculated by multiplying the product of the Interest Rate and the Outstanding Principal Amount by the Day Count Fraction and by FX (k) divided by FX (initial).

The respective Interest Amount falls due for payment on the relevant Interest Payment Date.

If the Securities are Inflation Dual Currency Securities, the Interest Amount depends in addition to the inflation rate movement on an exchange rate movement. The Securityholder therefore carries an exchange rate risk.

2. Inflation Credit Linked / Reference Asset Linked / Credit and Reference Asset Linked Range Accrual Securities

General

Inflation Range Accrual Securities bear floating-rate interest during the term of the Securities. Inflation Range Accrual Securities are redeemed on the Scheduled Maturity Date by payment of the Redemption Amount.

Redemption

In the case of Inflation Range Accrual Securities other than Inflation Range Accrual Dual Currency Securities, the Redemption Amount is specified by the Issuer in the Issue Currency at the time the Securities are issued.

In the case of Inflation Range Accrual Dual Currency Securities, the Redemption Amount is calculated in the Payment Currency as follows:

- For *Inflation Range Accrual Dual Currency Securities (Upside)*, the Outstanding Principal Amount is multiplied by FX (initial), divided by FX (final).
- For *Inflation Range Accrual Dual Currency Securities (Downside)*, the Outstanding Principal Amount is multiplied by FX (final), divided by FX (initial).

For Inflation Dual Currency Securities, the Securityholder bears an exchange rate risk as at the Scheduled Maturity Date and – if the Securities are sold early – during the term.

Call and Redemption Right

The Terms and Conditions of the Securities may grant the Issuer a Regular Call Right. The Issuer may exercise its Regular Call Right as at each Call Date of the Securities. Once the right has been exercised, the term of the Securities is limited. Following the exercise of such call right, Securityholders are entitled to receive payment of the Redemption Amount on the respective Call Date.

The Terms and Conditions of the Securities may grant the Issuer Extraordinary Call Rights in the case of a Call Event, or the occurrence of a Spread Trigger Event, or a Mark-to-Market Unwind Event, or an Early Termination Event, or a Swap Currency Risk Event. Following the exercise of such call right, Securityholders are entitled to receive payment of the Optional Redemption Amount together with any interest accrued up to the Call Date as the case may be.

Early Redemption

In the case of Inflation TARN Express Range Accrual Securities, the Securities are redeemed early by payment of the Early Redemption Amount, if an Early Redemption Event occurs.

An Early Redemption Event occurs, if the total of all Interest Rates specified up to an Interest Determination Date (inclusive) reaches or exceeds the Knock-Out Interest Rate on an Interest Determination Date.

Interest

Inflation Range Accrual Securities bear interest on their Outstanding Principal Amount for several Interest Periods at the Interest Rate (expressed in each case as a percentage per annum). For Inflation Range Accrual Securities, the interest payment depends on, among other things, the number of days on which the Inflation Rate moves within a specified range.

Interest Rate

For *Inflation Range Accrual Securities*, the Securities bear interest at a rate that depends on the performance of an Inflation Index. The Interest Rate is calculated on the relevant Interest Determination Date and specified for the relevant Interest Period.

The Interest Rate is calculated for each Interest Period as the total of (i) the Premium and (ii) (a) the number of Observation Dates in Range (b) divided by the total number of Observation Dates of the respective Interest Period (c) multiplied by the Fixed Interest Rate In and (iii) (a) the number of Observation Dates out of Range (b) divided by the total number of Observation Dates of the respective Interest Period and (c) multiplied by the Fixed Interest Rate Out.

Number of Observation Dates in Range (*"exclusive" observation*) means the number of Observation Dates in the respective Interest Period on which the Reference Rate is within the Interest Rate Range; for the Frozen Period the Reference Rate is relevant that was determined on the last Interest Determination Date of the respective Interest Period.

Number of Observation Dates out of Range (*"exclusive" observation*) means the number of Observation Dates in the respective Interest Period on which the Reference Rate is outside the Interest Rate Range or is at the Upper or Lower Interest Rate Threshold; for the Frozen Period the Reference Rate is relevant that was determined on the last Interest Determination Date of the respective Interest Period.

Number of Observation Dates in Range (*"inclusive" observation*) means the number of Observation Dates in the respective Interest Period on which the Reference Rate is within the Interest Rate Range or is at the Upper or Lower Interest Rate Threshold; for the Frozen Period the Reference Rate is relevant that was determined on the last Interest Determination Date of the respective Interest Period.

Number of Observation Dates out of Range ("*inclusive*" *observation*) means the number of Observation Dates in the respective Interest Period on which the Reference Rate is outside the Interest Rate Range; for the Frozen Period the Reference Rate is relevant that was determined on the last Interest Determination Date of the respective Interest Period.

A *Maximum Interest Rate* may be specified for Inflation Range Accrual Securities. This means that, if the Interest Rate determined for an Interest Period is higher than the Maximum Interest Rate, the Interest Rate for this Interest Period is the Maximum Interest Rate.

A *Minimum Interest Rate* may be specified for Inflation Range Accrual Securities. This means that, if the Interest Rate determined for an Interest Period is lower than the Minimum Interest Rate, the Interest Rate for this Interest Period is the Minimum Interest Rate.

A *Knock-In Interest Rate* may be specified for Inflation Range Accrual Securities. This means that, if the Interest Rate determined for an Interest Period is higher than the Knock-In Interest Rate, the Interest Rate is the Knock-In Interest Rate for the entire term of the Securities.

A *Global Cap* may be specified for Inflation Range Accrual Securities. This means that, if on an Interest Determination Date the total of all Interest Rates determined up to this Interest Determination Date (inclusive) is equal to or greater than the Aggregate Maximum Interest Rate, the Interest Rate for the relevant Interest Determination Date is equal to the difference between the Aggregate Maximum Interest Rate and the total of all Interest Rates determined up to this Interest Determination Date (exclusive), and the respective Interest Rate for all subsequent Interest Determination Dates is zero (0%).

A *Global Floor* may be specified for Inflation Range Accrual Securities. This means that, if on the last Interest Determination Date the total of all Interest Rates determined up to this Interest Determination Date (inclusive) is smaller than the Aggregate Minimum Interest Rate, the Interest Rate for the relevant Interest Determination Date is equal to the difference between the Aggregate Minimum Interest Rate and the total of all Interest Rates determined up to this Interest Determination Date (exclusive).

Interest Amount

For *Inflation Range Accrual Securities*, the respective Interest Amount to be paid is calculated by multiplying the product of the Interest Rate and the Outstanding Principal Amount by the Day Count Fraction.

For *Inflation Range Accrual Dual Currency Securities (Upside)*, the respective Interest Amount to be paid is calculated by multiplying the product of the Interest Rate and the Outstanding Principal Amount by the Day Count Fraction and by FX (initial) divided by FX (k).

For *Inflation Range Accrual Dual Currency Securities (Downside)*, the respective Interest Amount to be paid is calculated by multiplying the product of the Interest Rate and the Outstanding Principal Amount by the Day Count Fraction and by FX (k) divided by FX (initial).

The respective Interest Amount falls due for payment on the relevant Interest Payment Date.

If the Securities are Inflation Range Accrual Dual Currency Securities, the Interest Amount depends in addition to the inflation rate movement on an exchange rate movement. The Securityholder therefore carries an exchange rate risk.

³ The text found in § 1(2) is known as the "TEFRA D legend". This footnote provides a very brief synopsis of the TEFRA rules under the tax code of the United States of America ("U.S."). Generally, debt instruments in bearer form which have a maturity of longer than 365 days may be subject to U.S. tax penalties if the issuance of such instruments does not comply with either the TEFRA C or TEFRA D rules. TEFRA C is highly restrictive and may be used only if, among other things, the instruments will not be offered or issued to persons in the U.S. and its possessions, as defined under the U.S. Internal Revenue Code, and the issuer does not "significantly engage in interstate commerce with respect to the issuance." In this case a TEFRA legend is not required. The TEFRA D rules, which are more mechanical than the TEFRA C rules, impose, during a "restricted period", certain restrictions on (i) the offer and sale of the instruments to "U.S. persons" or to persons within the U.S. and its possessions and (ii) the delivery of the instruments in the U.S. The TEFRA D rules also generally require that the owner of an instrument certify as to non-U.S. beneficial ownership and that the instrument contain a "TEFRA D legend" with specific language on its face. Compliance with TEFRA D provides for a safe harbour if instruments are inadvertently issued to U.S. persons. To the extent that Securities have debt characteristics, such as "principal protection", TEFRA C and TEFRA D rules may apply. **IF THERE IS ANY DOUBT WHETHER A SECURITY MAY BE CONSIDERED DEBT, U.S. LEGAL AND TAX COUNSEL MUST BE CONSULTED.**

"**U.S. persons**" means such persons as defined in *Regulation S of the United States Securities Act of 1933* and particularly includes residents of the United States as well as American stock corporations and private companies.]

- (iii) **"Enabling Obligation"** means an outstanding Valuation Obligation that (A) is a Fully Transferable Obligation and (B) has a final maturity date occurring on or prior to the Credit Event Cut-Off Date and following the Limitation Date immediately preceding the Credit Event Cut-Off Date (or, in circumstances where the Credit Event Cut-Off Date occurs prior to the 2.5-year Limitation Date, following the final maturity date of the Latest Maturity Restructured Bond or Loan, if any).
- (iv) **"Limitation Date"** means the first of March 20, June 20, September 20 or December 20 in any year to occur on or immediately following the date that is one of the following numbers of years after the Restructuring Date: 2.5 years (the **"2.5-year Limitation Date"**), 5 years (the **"5-year Limitation Date"**), 7.5 years, 10 years, 12.5 years, 15 years, or 20 years (the **"20-year Limitation Date"**), as applicable. *[If Limitation Dates are not subject to any Business Day Convention insert: Limitation Dates shall not be subject to adjustment in accordance with any Business Day Convention.] [If Limitation Dates are subject to any Business Day Convention insert: Limitation Dates shall be subject to adjustment in accordance with [Insert the applicable Business Day Convention].]*

Germany

The following is a general discussion of certain German tax consequences of the acquisition, the ownership and the sale, assignment or redemption of Securities. It does not purport to be a comprehensive description of all tax considerations, which may be relevant to a decision to purchase Securities, and, in particular, does not consider any specific facts or circumstances that may apply to a particular purchaser. This summary is based on the laws of Germany currently in force and as applied on the date of this Base Prospectus, which are subject to change, possibly with retroactive or retrospective effect.

With regard to certain types of Securities, neither official statements of the tax authorities nor court decisions exist, and it is not clear how these Securities will be treated. Furthermore, there is often no consistent view in legal literature about the tax treatment of instruments like the Securities, and it is neither intended nor possible to mention all different views in the following section. Where reference is made to statements of the tax authorities, it should be noted that the tax authorities may change their view even with retroactive effect and that the tax courts are not bound by circulars of the tax authorities and, therefore, may take a different view. Even if court decisions exist with regard to certain types of Securities, it is not certain that the same reasoning will apply to the Securities due to certain peculiarities of such Securities. Furthermore, the tax authorities may restrict the application of judgements of tax courts to the individual case with regard to which the judgement was rendered.

Prospective purchasers of Securities are advised to consult their own tax advisors as to the tax consequences of the acquisition, ownership and the sale, assignment or redemption of Securities, including the effect of any state or local taxes, under the tax laws of Germany and each country of which they are residents. Only these advisers will be able to take into account appropriately the details relevant to the taxation of the respective Securityholders.

Tax Residents

Private Investors

Interest and Capital Gains

Interest payable on the Securities to persons holding the Securities as private assets ("**Private Investors**") who are tax residents of Germany (i.e. persons whose residence or habitual abode is located in Germany) should qualify as investment income (*Einkünfte aus Kapitalvermögen*) according to Sec. 20 para. 1 German Income Tax Act (*Einkommensteuergesetz*) and should, in general, be taxed at a separate tax rate of 25 per cent. (*Abgeltungsteuer*, in the following also referred to as "**flat tax**") plus 5.5 per cent. solidarity surcharge thereon and, if applicable, church tax. Capital gains from the sale, assignment or redemption of the Securities, including interest having accrued up to the disposition of a Security and credited separately ("**Accrued Interest**", *Stückzinsen*, if any) should qualify – irrespective of any holding period – as investment income pursuant to Sec. 20 para. 2 German Income Tax Act and should also be taxed at the flat tax rate of 25 per cent., plus 5.5 per cent. solidarity surcharge thereon and, if applicable, church tax. If the Securities are assigned, redeemed, repaid or contributed into a corporation by way of a hidden contribution (*verdeckte Einlage in eine Kapitalgesellschaft*) rather than sold, as a rule, such transaction is treated like a sale.

Capital gains are determined by taking the difference between the sale, assignment or redemption price (after the deduction of expenses directly and factually related to the sale, assignment or redemption) and the acquisition price of the Securities. Where the Securities are issued in a currency other than Euro the sale, assignment or redemption price and the acquisition costs have to be converted into Euro on the basis of the

foreign exchange rates prevailing on the acquisition date and the sale, assignment or redemption date respectively.

Expenses (other than such expenses directly and factually related to the sale, assignment or redemption) related to interest payments or capital gains under the Securities are – except for a standard lump sum (*Sparer-Pauschbetrag*) of EUR 801 (EUR 1,602 for married couples or registered partners filing jointly) – not deductible.

According to the flat tax regime losses from the sale, assignment or redemption of the Securities can only be set-off against other investment income including capital gains. If the set-off is not possible in the assessment period in which the losses have been realised, such losses can be carried forward into future assessment periods only and can be set-off against investment income including capital gains generated in these future assessment periods. Losses from so called private disposal transactions (*private Veräußerungsgeschäfte*) according to Sec. 23 German Income Tax Act as applicable until 31 December 2008 may be set-off against capital gains under the flat tax regime until 31 December 2013.

Further, the German Federal Ministry of Finance in its decree dated 9 October 2012 (IV C 1 – S 2252/10/10013, hereafter referred to as "**Decree**") has taken the position that a bad debt loss (*Forderungsausfall*) and a waiver of a receivable (*Forderungsverzicht*) shall, in general, not be treated as a sale, so that losses suffered upon such bad debt loss or waiver shall not be deductible for tax purposes. This position is subject to controversial discussions among tax experts. In this respect, it is not clear whether the position of the tax authorities may affect securities (*Wertpapiere*) which are linked to a reference value in case such value decreases.

Furthermore, restrictions with respect to the claiming of losses may also apply if certain types of Securities would have to be qualified as derivative transactions and expire worthless. Moreover, according to the Decree the German Federal Ministry of Finance holds the view that a disposal (*Veräußerung*) (and, as a consequence, a tax loss resulting from such disposal) shall not be recognized if the sales price does not exceed the actual transaction cost.

Withholding

If the Securities are held in a custody with or administrated by a German credit institution, financial services institution (including a German permanent establishment of such foreign institution), securities trading company or securities trading bank (the "**Disbursing Agent**"), the flat tax at a rate of 25 per cent. (plus 5.5 per cent. solidarity surcharge thereon and, if applicable, church tax) will be withheld by the Disbursing Agent on interest payments and the excess of the proceeds from the sale, assignment or redemption (after the deduction of expenses incurred directly and factually in connection with the sale, assignment or redemption) over the acquisition cost for the Securities (if applicable converted into Euro terms on the basis of the foreign exchange rates as of the acquisition date and the sale, assignment or redemption date respectively). The Disbursing Agent will provide for the set-off of losses with current investment income including capital gains from other securities. If, in the absence of sufficient current investment income derived through the same Disbursing Agent, a set-off is not possible, the Securityholder may – instead of having a loss carried forward into the following year – file an application with the Disbursing Agent until 15 December of the current fiscal year for a certification of losses in order to set-off such losses with investment income derived through other institutions in the holder's personal income tax return. If custody has changed since the acquisition and the acquisition data is not proved as required by Sec. 43a para. 2 German Income Tax Act or not relevant, the flat tax rate of 25 per cent. (plus 5.5 per cent. solidarity surcharge thereon and, if applicable, church tax) will be imposed on an amount equal to 30 per cent. of the proceeds from the sale, assignment or redemption of the Securities. In the course of the tax withholding provided for by the Disbursing Agent foreign taxes may be credited in accordance with the German Income Tax Act. Taxes withheld on the basis of the EU Savings Directive (for further details see below "**EU Savings Directive**") may be credited in the course of the tax assessment procedure.

The Issuer is, in general, not obliged to levy German withholding tax in respect of payment on the Securities. If, however, the Securities qualify as hybrid instruments (e. g. silent partnership, profit participating notes, jouissance rights (*Genussrechte*)), German withholding tax has to be imposed by the Issuer irrespective of whether or not the Securities are held in a custodial account maintained with a Disbursing Agent.

In general, no flat tax will be levied if the Securityholder filed a withholding exemption certificate (*Freistellungsauftrag*) with the Disbursing Agent (in the maximum amount of the standard lump sum of EUR 801 (EUR 1,602 for married couples filing jointly)) to the extent the income does not exceed the maximum exemption amount shown on the withholding exemption certificate. Similarly, no flat tax will be deducted if the Securityholder has submitted to the Disbursing Agent a valid certificate of non-assessment (*Nichtveranlagungsbescheinigung*) issued by the competent local tax office.

For Private Investors the withheld flat tax is, in general, definitive. Exceptions apply, if and to the extent the actual investment income exceeds the amount which was determined as the basis for the withholding of the flat tax by the Disbursing Agent. In such case, the exceeding amount of investment income must be included in the Private Investor's income tax return and will be subject to the flat tax in the course of the assessment procedure. According to the Decree of the German Federal Ministry of Finance, however, any exceeding amount of not more than EUR 500 per assessment period can be refrained from claiming on grounds of equity, provided that no other reasons for an assessment according to Sec. 32d para. 3 German Income Tax Act exist. Further, Private Investors may request that their total investment income, together with their other income, be subject to taxation at their personal, progressive tax rate rather than the flat tax rate, if this results in a lower tax liability. In order to prove such investment income and the withheld flat tax thereon the investor may request a respective certificate in officially required form from the Disbursing Agent.

Investment income not subject to the withholding of the flat tax (e.g. since there is no Disbursing Agent) must be included into the personal income tax return and will be subject to the flat tax rate of 25 per cent. (plus 5.5 per cent. solidarity surcharge thereon and, if applicable, church tax), unless the investor requests the investment income to be subject to taxation at lower personal, progressive income tax rate. In the course of the assessment procedure withholding tax levied on the basis of the EU Savings Directive (for further details see below "**EU Savings Directive**") and foreign taxes on investment income may be credited in accordance with the German Income Tax Act.

Business Investors

Interest payable under the Securities to persons holding the Securities as business assets ("**Business Investors**") who are tax residents of Germany (i.e. Business Investors whose residence, habitual abode, statutory seat or place of effective management and control is located in Germany) and capital gains, including Accrued Interest, if any, from the sale, assignment or redemption of the Securities are subject to income tax at the applicable personal, progressive income tax rate or, in case of corporate entities, to corporate income tax at a uniform 15 per cent. tax rate (in each case plus solidarity surcharge at a rate of 5.5 per cent. on the tax payable; and in case where payments of interest on the Securities to Business Investors are subject to income tax plus church tax, if applicable). Such interest payments and capital gains may also be subject to trade tax if the Securities form part of the property of a German trade or business. Losses from the sale, assignment or redemption of the Securities are generally recognized for tax purposes; this may be different if certain (e.g. index linked) Securities would have to be qualified as derivative transactions.

Withholding tax, if any, including solidarity surcharge thereon is credited as a prepayment against the Business Investor's corporate or personal, progressive income tax liability and the solidarity surcharge in the course of the tax assessment procedure, i.e. the withholding tax is not definitive. Any potential surplus will be refunded. However, in general and subject to further requirements no withholding deduction will apply on capital gains from the sale, assignment or redemption of the Securities and certain other income if (i) the Securities are held by a corporation, association or estate in terms of Sec. 43 para. 2 sentence 3 no. 1 German Income Tax Act or (ii) the proceeds from the Securities qualify as income of a domestic business and the

investor notifies this to the Disbursing Agent by use of the required official form according to Sec. 43 para. 2 sentence 3 no. 2 German Income Tax Act (*Erklärung zur Freistellung vom Kapitalertragsteuerabzug*).

Withholding tax levied on the basis of the EU Savings Directive (for further details see below "**EU Savings Directive**") and foreign taxes may be credited in accordance with the German Income Tax Act. Alternatively, foreign taxes may also be deducted from the tax base for German income tax purposes.

Non-residents

Interest payable on the Securities and capital gains, including Accrued Interest, if any, are not subject to German taxation, unless (i) the Securities form part of the business property of a permanent establishment, including a permanent representative, or a fixed base maintained in Germany by the Securityholder; or (ii) the interest income otherwise constitutes German-source income. In the cases (i) and (ii) a tax regime similar to that explained above under "**Tax Residents**" applies.

Non-residents of Germany are, subject to certain exceptions, exempt from German withholding tax on interest and the solidarity surcharge thereon, even if the Securities are held in custody with a Disbursing Agent. However, where the investment income is subject to German taxation as set forth in the preceding paragraph and Securities are held in a custodial account with a Disbursing Agent withholding flat tax is levied as explained above under "**Tax Residents**".

The withholding tax may be refunded based upon an applicable tax treaty or German national tax law.

Inheritance and Gift Tax

No inheritance or gift taxes with respect to any Security will arise under the laws of Germany, if, in the case of inheritance tax, neither the decedent nor the beneficiary, or, in the case of gift tax, neither the donor nor the donee, is a resident of Germany and such Security is not attributable to a German trade or business for which a permanent establishment is maintained, or a permanent representative has been appointed, in Germany. Exceptions from this rule apply to certain German expatriates.

Other Taxes

No stamp, issue, registration or similar taxes or duties will be payable in Germany in connection with the issuance, delivery, execution or conversion of the Securities. Currently, net assets tax is not levied in Germany.

German implementation of the EU Directive on the Taxation of Savings Income

Germany has implemented the EU Council Directive 2003/48/EC (for further details, see below "**EU Savings Directive**") into national legislation by means of an Interest Information Regulation (*Zinsinformationsverordnung*) in 2004. Starting on 1 July 2005, Germany has therefore begun to communicate all payments of interest on the Securities and similar income with respect to Securities to the beneficial owners Member State of residence if the Securities have been kept in a custodial account with a Disbursing Agent.

Austria

This section on taxation contains a brief summary of the Issuer's understanding with regard to certain important principles which are of significance in connection with the purchase, holding or sale of the Securities in the Republic of Austria. This summary does not purport to exhaustively describe all possible tax aspects and does not deal with specific situations which may be of relevance for certain potential investors. The following comments are rather of a general nature. These comments are not intended to be, nor should they be construed to be, legal or tax advice. This summary furthermore only refers to investors which are

subject to unlimited (corporate) income tax liability in Austria. It is based on the currently valid tax legislation, case law and regulations of the tax authorities, as well as their respective interpretation, all of which may be amended from time to time. Such amendments may possibly also be effected with retroactive effect and may negatively impact on the tax consequences described. It is recommended that potential purchasers of the Securities consult with their legal and tax advisors as to the tax consequences of the purchase, holding or sale of the Securities. Tax risks resulting from the Securities (in particular from a potential qualification as a foreign investment fund within the meaning of sec. 188 of the Austrian Investment Funds Act 2011 [Investmentfondsgesetz 2011]) shall in any case be borne by the purchaser. For the purposes of the following it is assumed that the Securities are legally and factually offered to an indefinite number of persons.

General remarks

Individuals having a permanent domicile (*Wohnsitz*) and/or their habitual abode (*gewöhnlicher Aufenthalt*) in Austria are subject to income tax (*Einkommensteuer*) in Austria on their worldwide income (unlimited income tax liability; *unbeschränkte Einkommensteuerpflicht*). Individuals having neither a permanent domicile nor their habitual abode in Austria are subject to income tax only on income from certain Austrian sources (limited income tax liability; *beschränkte Einkommensteuerpflicht*).

Corporations having their place of effective management (*Ort der Geschäftsleitung*) and/or their legal seat (*Sitz*) in Austria are subject to corporate income tax (*Körperschaftsteuer*) in Austria on their worldwide income (unlimited corporate income tax liability; *unbeschränkte Körperschaftsteuerpflicht*). Corporations having neither their place of effective management nor their legal seat in Austria are subject to corporate income tax only on income from certain Austrian sources (limited corporate income tax liability; *beschränkte Körperschaftsteuerpflicht*).

Both in case of unlimited and limited (corporate) income tax liability Austria's right to tax may be restricted by double taxation treaties.

Income taxation of Securities

Pursuant to sec. 27(1) of the Austrian Income Tax Act (*Einkommensteuergesetz*), the term investment income (*Einkünfte aus Kapitalvermögen*) comprises:

- income from the letting of capital (*Einkünfte aus der Überlassung von Kapital*) pursuant to sec. 27(2) of the Austrian Income Tax Act, including dividends and interest;
- income from realised increases in value (*Einkünfte aus realisierten Wertsteigerungen*) pursuant to sec. 27(3) of the Austrian Income Tax Act, including gains from the sale, redemption and other realisation of assets that lead to income from the letting of capital, zero coupon bonds and also broken-period interest; and
- income from derivatives (*Einkünfte aus Derivaten*) pursuant to sec. 27(4) of the Austrian Income Tax Act, including cash settlements, option premiums received and income from the sale or other realisation of forward contracts like options, futures and swaps and other derivatives such as index certificates.

Also the withdrawal of Securities from a bank deposit (*Depotentnahme*) and circumstances leading to a loss of Austria's taxation right regarding Securities *vis-à-vis* other countries, e.g., relocation from Austria (*Wegzug*), are in general deemed to constitute a sale (*cf.* sec. 27(6)(1) of the Austrian Income Tax Act).

Individuals subject to unlimited income tax liability in Austria holding Securities as a non-business asset are subject to income tax on all resulting investment income pursuant to sec. 27(1) of the Austrian Income Tax Act. In case of investment income with an Austrian nexus (*inländische Einkünfte aus Kapitalvermögen*),

basically meaning income that is paid by an Austrian paying agent (*auszahlende Stelle*) or an Austrian custodian agent (*depotführende Stelle*), the income is subject to a withholding tax of 25%; no additional income tax is levied over and above the amount of tax withheld (final taxation pursuant to sec. 97(1) of the Austrian Income Tax Act). In case of investment income without an Austrian nexus, the income must be included in the income tax return and is subject to a flat income tax rate of 25%. In both cases upon application the option exists to tax all income subject to the tax rate of 25% at the lower progressive income tax rate (option to regular taxation pursuant to sec. 27a(5) of the Austrian Income Tax Act). Pursuant to sec. 27(8) of the Austrian Income Tax Act, losses from investment income may not be offset with other types of income. Negative income subject to the flat tax rate of 25% may not be offset with income subject to the progressive income tax rate (this equally applies in case of an exercise of the option to regular taxation). Further, an offsetting of losses from realised increases in value and from derivatives in the form of securities with (i) interest and other claims against credit institutions and (ii) income from Austrian or foreign private law foundations and comparable legal estates (*privatrechtliche Stiftungen und damit vergleichbare Vermögensmassen*) is not permissible.

Individuals subject to unlimited income tax liability in Austria holding Securities as a business asset are subject to income tax on all resulting investment income pursuant to sec. 27(1) of the Austrian Income Tax Act. In case of investment income with an Austrian nexus (as described above) the income is subject to a withholding tax of 25%. While this withholding tax has the effect of final taxation for income from the letting of capital, income from realised increases in value and income from derivatives must on the other hand be included in the income tax return (nevertheless flat income tax rate of 25%). In case of investment income without an Austrian nexus, the income must always be included in the income tax return (flat income tax rate of 25%). In both cases upon application the option exists to tax all income subject to the tax rate of 25% at the lower progressive income tax rate (option to regular taxation pursuant to sec. 27a(5) of the Austrian Income Tax Act). Pursuant to sec. 6(2)(c) of the Austrian Income Tax Act, depreciations to the lower fair market value and losses from the sale, redemption and other realisation of financial assets and derivatives in the sense of sec. 27(3) and (4) of the Austrian Income Tax Act, which are subject to the special tax rate of 25%, are primarily to be offset against income from realised increases in value of such financial assets and derivatives and with appreciations in value of such assets; only half of the remaining negative difference may be offset against other types of income (and carried forward).

Corporations subject to unlimited corporate income tax liability in Austria are subject to corporate income tax on interest from Securities at a rate of 25%. In case of investment income with an Austrian nexus (as described above) the income is subject to a withholding tax of 25%, which can be credited against the corporate income tax liability. However, under the conditions set forth in sec. 94(5) of the Austrian Income Tax Act no withholding tax is levied in the first place. Income from the sale of the Securities is subject to corporate income tax of 25%. Losses from the sale of the Securities can be offset against other income (and carried forward).

Private foundations pursuant to the Austrian Private Foundations Act fulfilling the prerequisites contained in sec. 13(3) and (6) of the Austrian Corporate Income Tax Act and holding Securities as a non-business asset are subject to interim taxation at a rate of 25% on interest income, income from realised increases in value and income from derivatives in the form of securities. Interim tax does not fall due insofar as distributions subject to withholding tax are made to beneficiaries in the tax period. In case of investment income with an Austrian nexus (as described above) the income is in general subject to a withholding tax of 25%, which can be credited against the tax falling due. Under the conditions set forth in sec. 94(12) of the Austrian Income Tax Act no withholding tax is levied.

Pursuant to sec. 93(6) of the Austrian Income Tax Act, the Austrian custodian agent is obliged to automatically offset negative investment income against positive investment income, taking into account all of a taxpayer's bank deposits with the custodian agent. If negative and at the same time or later positive income is earned, then the negative income is to be offset against the positive income. If positive and later negative income is earned, then the withholding tax on the positive income is to be refunded, with such

refund being limited with 25% of the negative income. In certain cases, the offsetting is not permissible. The custodian agent has to issue a written confirmation on the offsetting of losses for each bank deposit.

Pursuant to sec. 188 of the Austrian Investment Funds Act 2011, a foreign investment fund is defined as any assets subject to a foreign jurisdiction which, irrespective of the legal form they are organized in, are invested according to the principle of risk-spreading on the basis either of a statute, of the entity's articles or of customary exercise. Certain collective investment vehicles investing in real estate are exempted. It should be noted that the Austrian tax authorities have commented upon the distinction between index certificates of foreign issuers on the one hand and foreign investment funds on the other hand in the Investment Fund Regulations (*Investmentfondsrichtlinien*). Pursuant to these, no foreign investment fund may be assumed if for the purposes of the issuance no predominant actual purchase of the underlying assets by the issuer or a trustee of the issuer, if any, is made and no actively managed assets exist. Directly held bonds shall not be considered as foreign investment funds if the performance of the bonds depends on an index, notwithstanding the fact of whether the index is a well-known one, an individually constructed "fixed" index or an index which is changeable at any time.

EU withholding tax

Sec. 1 of the Austrian EU Withholding Tax Act (*EU-Quellensteuergesetz*) – which transforms into national law the provisions of Council Directive 2003/48/EC of 3 June 2003 on taxation of savings income in the form of interest payments – provides that interest payments paid or credited by an Austrian paying agent to a beneficial owner who is an individual resident in another EU member state (or in certain dependent or associated territories) are subject to a withholding tax of 35% if no exception from such withholding applies. Sec. 10 of the Austrian EU Withholding Tax Act provides for an exemption from withholding tax where the beneficial owner presents to the paying agent a certificate drawn up in his/her name by the competent authority of his/her EU member state of residence for tax purposes, indicating the name, address and tax or other identification number or, failing such, the date and place of birth of the beneficial owner, the name and address of the paying agent, and the account number of the beneficial owner or, where there is none, the identification of the security; such certificate shall be valid for a period not exceeding three years.

Regarding the issue of whether also index certificates are subject to the EU withholding tax, the Austrian tax authorities distinguish between index certificates with and without a capital guarantee, a capital guarantee being the promise of repayment of a minimum amount of the capital invested or the promise of the payment of interest. The exact tax treatment of index certificates furthermore depends on their underlying.

Tax treaty between Austria and Switzerland

On 1 January 2013 the Treaty between the Republic of Austria and the Swiss Confederation on Cooperation in the Areas of Taxation and Capital Markets entered into force. The treaty provides that a Swiss paying agent has to withhold a withholding tax with the effect of final taxation corresponding to the Austrian income tax, amounting to 25%, on income and capital gains from assets booked with an account or deposit of such Swiss paying agent, if the relevant holder of such assets (*i.e.* in general individuals on their own behalf and as beneficial owners of domiciliary companies) is tax resident in Austria. The following income and capital gains are subject to the withholding tax: interest income, dividends and capital gains. The treaty, however, does not apply to interest covered by the Agreement between the European Community and the Swiss Confederation providing for measures equivalent to those laid down in Council Directive 2003/48/EC on taxation of savings income in the form of interest payments. The taxpayer can opt for voluntary disclosure instead of the withholding tax by expressly authorising the Swiss paying agent to disclose to the competent Austrian authority the income and capital gains; these subsequently have to be included in the income tax return.

Austrian inheritance and gift tax

Austria does not levy inheritance or gift tax.

However, it should be noted that certain gratuitous transfers of assets to (Austrian or foreign) private law foundations and comparable legal estates (*privatrechtliche Stiftungen und damit vergleichbare Vermögensmassen*) are subject to foundation tax (*Stiftungseingangssteuer*) pursuant to the Austrian Foundation Tax Act (*Stiftungseingangssteuergesetz*). Such tax is triggered if the transferor and/or the transferee at the time of transfer have a domicile, their habitual abode, their legal seat or their place of effective management in Austria. Certain exemptions apply in case of a transfer *mortis causa*, in particular for bank deposits, publicly placed bonds and portfolio shares (*i.e.*, less than 1%). The tax basis is the fair market value of the assets transferred minus any debts, calculated at the time of transfer. The tax rate is in general 2.5%, with a higher rate of 25% applying in special cases.

In addition, a special notification obligation exists for gifts of money, receivables, shares in corporations, participations in partnerships, businesses, movable tangible assets and intangibles. The notification obligation applies if the donor and/or the donee have a domicile, their habitual abode, their legal seat or their place of effective management in Austria. Not all gifts are covered by the notification obligation: In case of gifts to certain related parties, a threshold of EUR 50,000 per year applies; in all other cases, a notification is obligatory if the value of gifts made exceeds an amount of EUR 15,000 during a period of five years. Furthermore, gratuitous transfers to foundations falling under the Austrian Foundation Tax Act described above are also exempt from the notification obligation. Intentional violation of the notification obligation may lead to the levying of fines of up to 10% of the fair market value of the assets transferred.

Further, it should be noted that gratuitous transfers of Securities may trigger income tax on the level of the transferor pursuant to sec. 27(6)(1) of the Austrian Income Tax Act (see above).

Luxembourg

The following is a general description of certain Luxembourg withholding tax considerations relating to the Securities. It does not purport to be a complete analysis of all tax considerations relating to the Securities, whether in Luxembourg or elsewhere. Prospective purchasers of the Securities should consult their own tax advisors as to which countries' tax laws could be relevant to acquiring, holding and disposing of the Securities and receiving payments of interest, principal and/or other amounts under the Securities and the consequences of such actions under the tax laws of Luxembourg. This summary is based upon the law as in effect on the date of this Base Prospectus. The information contained within this section is limited to withholding taxation issues, and prospective investors should not apply any information set out below to other areas, including (but not limited to) the legality of transactions involving the Securities.

Withholding Tax

All payments of interest and principal by the Issuer in the context of the holding, disposal, redemption or repurchase of the Securities can be made free and clear of any withholding or deduction for or on account of any taxes of whatsoever nature imposed, levied, withheld, or assessed by Luxembourg or any political subdivision or taxing authority thereof or therein, in accordance with the applicable Luxembourg law, subject however to:

- (a) the application of the Luxembourg laws of 21 June 2005 implementing the European Union Savings Directive (Council Directive 2003/48/EC – the "**EU Savings Directive**") and several agreements concluded with certain dependent or associated territories and providing for the possible application of a withholding tax (35% from 1 July 2011) on interest and other similar income (including reimbursement premium received at maturity or Redemption Date) paid to certain non-Luxembourg resident investors (individuals and certain types of entities called "**residual entities**") resident or established in another Member State of the European Union in the event of the Issuer appointing a paying agent in Luxembourg within the meaning of the above-mentioned directive (see section "**EU Savings Directive**" below) or agreements, unless the beneficiary of the interest payment elects for an exchange of information. The same regime applies to payments to individuals or residual entities resident in any of the following territories: Aruba, the British Virgin Islands, Guernsey, the Isle of

Man, Jersey, Montserrat, i.e. Bonaire, Curaçao, Saba, Sint Eustatius and Sint Maarten. The terms "**interest**", "**paying agent**" and "**residual entity**" used hereafter have the same meaning as in the laws of EU Savings Directive (see below). As a general rule, instruments whose return is exclusively linked to profits derived from certain underlying investments such as commodities or indices are generally out of the scope of the EU Savings Directive. However, to the extent Securities bear a fixed interest component, this interest may fall within the scope of the EU Savings Directive.

- (b) the application as regards Luxembourg resident individuals of the Luxembourg law of 23 December 2005, as amended, (the "**Law**") which has introduced a 10% withholding tax on savings income (i.e. with certain exemptions, savings income within the meaning of the Luxembourg laws of 21 June 2005 implementing the EU Savings Directive). The Law applies to savings income accrued as from 1 July 2005 and paid as from 1 January 2006.

Under the Law, the 10% Luxembourg withholding tax is levied on interest or similar income payments made by Luxembourg paying agents to or for the immediate benefit of an individual beneficial owner who is resident in Luxembourg.

In addition, pursuant to the Law, Luxembourg resident individuals who are beneficial owners of interest payments made by paying agents located in a Member State of the European Union other than Luxembourg, a Member State of the European Economic Area or in a State or territory which has concluded an agreement directly relating to the EU Savings Directive on the taxation of savings income, can opt to self-declare and pay a 10% levy. The option for the 10% levy must cover all interest payments made by paying agents to the Luxembourg resident beneficial owners during the entire civil year.

The 10% withholding tax as described above or the 10% levy are final when Luxembourg resident individuals are acting in the context of the management of their private wealth.

Responsibility for the withholding of tax in application of the above-mentioned Luxembourg laws of 21 June 2005 and the Law, is assumed by the Luxembourg paying agent within the meaning of these laws and not by the Issuer.

EU Savings Directive

Under the EC Council Directive 2003/48/EC on the taxation of savings income (the "**EU Savings Directive**"), each Member State is required, to provide to the tax authorities of another Member State details of payments of interest or other similar income paid by a person within its jurisdiction to, or collected by such a person for, an individual resident in that other Member State; however, for a transitional period, Austria and Luxembourg will (unless during such period they elect otherwise) instead operate a information reporting system whereby if a beneficial owner, within the meaning of the EU Savings Directive does not comply with one of two procedures for information reporting, the relevant Member State will levy a withholding tax on payments to such beneficial owner. The withholding tax system applies for a transitional period during which the withholding tax rate has raised over time to 35 per cent. The transitional period is to terminate at the end of the first full fiscal year following the agreement by certain non-EU countries to the exchange of information relating to such payments.

Also, a number of non-EU countries, including Switzerland, and certain dependent or associated territories of certain Member States have adopted similar measures (either provision of information or transitional withholding) in relation to payments made by a person within their jurisdiction to, or collected by such a person for, an individual resident in a Member State. In addition, the Member States have entered into reciprocal provision of information or transitional withholding arrangements with certain of those dependent or associated territories in relation to payments made by a person in a Member State to, or collected by such a person for, an individual resident in one of those territories.

On 15 September 2008, the European Commission issued a report to the Council of the European Union on the operation of the EU Savings Directive, which included the Commission's advice on the need for changes to the EU Savings Directive. On 13 November 2008, the European Commission published a more detailed proposal for amendments to the EU Savings Directive (COM (2008) 727), which included a number of suggested changes. The European Parliament approved an amended version of this proposal on 24 April 2009. If any of those proposed changes are made in relation to the EU Savings Directive, they may amend or broaden the scope of the requirements described above. Investors who are in any doubt as to their position should consult their professional advisers.

GENERAL INFORMATION

Selling Restrictions

General

No action has been or will be taken in any jurisdiction by the Issuer that would permit a public offering of the Securities, or possession or distribution of any offering material in relation thereto, in any country or jurisdiction where action for that purpose is required other than the approval of the Base Prospectus by the BaFin and a notification to the countries set forth in the Final Terms under "**Terms and conditions of the offer**". No offers, sales or deliveries of any Securities, or distribution of any offering material relating to the Securities, may be made in or from any jurisdiction except in circumstances which will result in compliance with any applicable laws and regulations and will not impose any obligation on the Issuer other than the approval and notification(s) mentioned above.

United States of America

S. persons except in accordance with *Regulation S* under the *Securities Act* or pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the *Securities Act*.
- (b) Any person purchasing Securities is deemed to agree with the Issuer and, if different, the seller of such Securities that (i) it will not at any time offer, sell, resell or deliver, directly or indirectly, any Securities so purchased in the United States or to, or for the account or benefit of, any U.S. person, (ii) it is not purchasing any Securities for the account or benefit of any U.S. person and (iii) it will not make offers, sales, re-sales or deliveries of any Securities (otherwise acquired), directly or indirectly, in the United States or to, or for the account or benefit of, any U.S. person.

Public Offer Selling Restrictions under the Prospectus Directive

In relation to each Member State of the European Economic Area, which has implemented the Prospectus Directive (each, a "**Relevant Member State**"), the Securities may, with effect from and including the date on which the Prospectus Directive is implemented in that Relevant Member State (the "**Relevant Implementation Date**"), not be offered to the public in that Relevant Member State except that, with effect from and including the Relevant Implementation Date, an offer of Securities to the public may be made in that Relevant Member State:

- (a) if the Final Terms in relation to the Securities specify that an offer of those Securities may be made other than pursuant to Article 3(2) of the Prospectus Directive in that relevant Member State (a

"**Non-Exempt Offer**"), following the date of publication of a base prospectus in relation to such Securities, which has been approved by the competent authority in that Relevant Member State or, where appropriate, approved in another Relevant Member State and notified to the competent authority in that Relevant Member State, provided that any such base prospectus has subsequently been completed by the Final Terms contemplating such Non-Exempt Offer, in accordance with the Prospectus Directive, in the period beginning and ending on the dates specified in such base prospectus or final terms, as applicable and the Issuer has consented in writing to its use for the purpose of the Non-Exempt Offer;

- (b) at any time to any legal entity which is a qualified investor as defined in the Prospectus Directive;
- (c) at any time to fewer than 150 natural or legal persons (other than qualified investors as defined in the Prospectus Directive), subject to obtaining the prior consent of the relevant person or entity placing or offering the Securities nominated by the Issuer for any such offer; or
- (d) at any time in any other circumstances falling within Article 3(2) of the Prospectus Directive,

provided that no such offer of Securities referred to in (b) to (d) above shall require the Issuer or a natural or legal person placing or offering the Securities to publish a base prospectus pursuant to Article 3 of the Prospectus Directive or supplement a base prospectus pursuant to Article 16 of the Prospectus Directive.

For the purposes of this provision, the expression an "**offer of Securities to the public**" in relation to any Securities in any Relevant Member State means the communication in any form and by any means of sufficient information on the terms of the offer and the Securities to be offered so as to enable an investor to decide to purchase or subscribe the Securities, as the same may be varied in that Member State by any measure implementing the Prospectus Directive in that Member State; the expression "**Prospectus Directive**" means Directive 2003/71/EC (and amendments thereto, including the 2010 PD Amending Directive, to the extent implemented in the Relevant Member State), and includes any relevant implementing measure in the Relevant Member State and the expression "**2010 PD Amending Directive**" means Directive 2010/73/EU.

Selling Restrictions Addressing additional United Kingdom Securities Laws

The Issuer represents, warrants and agrees that (a) it has only communicated or caused to be communicated and will only communicate or cause to be communicated an invitation or inducement to engage in investment activity (within the meaning of Section 21 of the Financial Services and Markets Act 2000 (the "**FSMA**")) received by it in connection with the issue or sale of the Securities in circumstances in which Section 21(1) of the FSMA would not, if the Issuer was not an authorised person, apply to the Issuer and (b) it has complied and will comply with all applicable provisions of the FSMA with respect to anything done by it in relation to the Securities in, from or otherwise involving the United Kingdom.

Selling Restrictions Addressing additional Italian Securities Laws

The offering of the Securities has not been registered pursuant to Italian securities legislation. Accordingly, Securities may not be offered or sold and documents relating to the Securities may not be distributed in the Republic of Italy except:

- (1) to qualified investors (*investitori qualificati*), as defined in Article 26, paragraph 1 (d) of Consob Regulation No. 16190 of October 29, 2007, as amended ("**CONSOB Intermediaries Regulation**") in connection with Article 34-ter, paragraph 1, letter (b) of CONSOB Regulation No. 11971 of May 14, 1999, as amended ("**CONSOB Regulation No. 11971**") implementing Article 100 of Legislative Decree No. 58 of February 24, 1998, as amended (the "**Financial Services Act**"); or

- (2) in other circumstances which are exempted from the rules on public offerings pursuant to Article 100 of the Financial Services Act and CONSOB Regulation No. 11971; Any such offer, sale or delivery of the Securities or distribution of any other document relating to the Securities in the Republic of Italy must be:
- (a) made by investment firms, banks or financial intermediaries permitted to conduct such activities in the Republic of Italy in accordance with the Financial Services Act, Legislative Decree No. 385 of September 1, 1993 as amended (the "**Banking Act**"), CONSOB Intermediaries Regulation, as amended and any other applicable laws and regulations; and
 - (b) in compliance with any other applicable notification requirement or limitation which may be imposed by CONSOB or the Bank of Italy (e.g. Article 129 of the Banking Act pursuant to which the Bank of Italy may request periodic information on the Securities offered in the Republic of Italy).

Provisions relating to the secondary market in the Republic of Italy

Investors should also note that, in any subsequent distribution of the Securities in the Republic of Italy, Article 100-*bis* of the Financial Services Act may require compliance with the law relating to public offers of securities. Furthermore, where the Securities are placed solely with qualified investors and are then systematically resold on the secondary market at any time in the twelve months following such placing, purchasers of Securities who are acting outside of the course of their business or profession may in certain circumstances be entitled to declare such purchase void and, in addition, to claim damages from any authorised person at whose premises the Securities were purchased, unless an exemption provided for under the Financial Services Act applies.
