UniCredit: S&P aligns UniCredit S.p.A.'s rating with that of the sovereign Italy - main subsidiaries affirmed

On 18 December 2014 Standard & Poor's Ratings Services has aligned UniCredit S.p.A.'s ratings with that of the recently downgraded sovereign Italy ('BBB-' long- and 'A-3' short-term Issuer Credit Rating) as it is capped at the same level due to S&P's criteria. Section D – Risks

Element	Title	
D.2	<p>Key risks regarding the Issuers and the Guarantor</p>	<p>In purchasing Notes, investors assume the risk that the Issuers and the Guarantor may become insolvent or otherwise be unable to make all payments due in respect of the Notes. There is a wide range of factors which individually or together could result in the Issuers and the Guarantor becoming unable to make all payments due in respect of the Notes. It is not possible to identify all such factors or to determine which factors are most likely to occur, as the Issuers and the Guarantor may not be aware of all relevant factors and certain factors which they currently deem not to be material may become material as a result of the occurrence of events outside the Issuers' and the Guarantor's control. The Issuers and the Guarantor have identified a number of factors which could materially adversely affect their businesses and ability to make payments due under the Notes. These factors include:</p> <ul style="list-style-type: none"> • risks concerning liquidity which could affect the UniCredit Group's ability to meet its financial obligations as they fall due; • the UniCredit Group's results of operations, business and financial condition have been and will continue to be affected by adverse macroeconomic and market conditions; • the European sovereign debt crisis has adversely affected, and may continue to, adversely affect the Group's results of operations, business and financial condition; • the Group has exposure to European sovereign debt; • financial regulators have requested that UniCredit Group companies reduce their credit exposure to other UniCredit Group entities, particularly their upstream exposure to UniCredit, which could have a material adverse effect on the way in which the UniCredit Group funds its operations and provides liquidity to members of the Group; • systemic risk could adversely affect the Group's business; • risks connected to an economic slowdown and volatility of the financial markets – credit risk; • deteriorating asset valuations resulting from poor market conditions may adversely affect the Group's future earnings; • the economic conditions of the geographic markets in which the Group operates have had, and may continue to have, adverse effects on the Group's results of operations, business and financial condition; • non-traditional banking activities expose the Group to additional

The implementation of the directive or the taking of any action under it could materially affect the value of any Notes; • as of 2016 the UniCredit Group will be subject to the provisions of the Regulation establishing the Single Resolution Mechanism; • the UniCredit Group may be subject to a proposed EU regulation on mandatory separation of certain banking activities; • the UniCredit Group may be affected by a proposed EU Financial Transactions Tax; • the UniCredit Group may be affected by new accounting and regulatory standards; • operational and IT risks are inherent in the Group's business; • intense competition, especially in the Italian market, where the Group has a substantial part of its businesses, could have a material adverse effect on the Group's results of operations and financial condition; • the Group may fail to implement its 2013-2018 Strategic Plan; • risks related to the Goodwill Impairment Test; • any rating downgrades of UniCredit or other entities of the Group would increase the re-financing costs of the Group and

Key risks regarding the Notes

There are also risks associated with the Notes. These include a range of market risks (including that there may be no or only a limited secondary market in the Notes, that the value of an investor's investment may be adversely affected by exchange rate movements where the Notes are not denominated in the investor's own currency, that any credit rating assigned to the Notes may not adequately reflect all the risks associated with an investment in the Notes and that changes in interest rates will affect the value of Notes which bear interest at a fixed rate), the fact that the conditions of the Notes may be modified without the consent of the holder in certain circumstances, that the holder may not receive payment of the full amounts due in respect of the Notes as a result of amounts being withheld by the Issuer in order to comply with applicable law and that investors are exposed to the risk of changes in law or regulation affecting the value of Notes held by them.

Key risks regarding to certain types of Notes

Notes subject to optional redemption by the relevant Issuer: the relevant Issuer may be expected to redeem Notes when its cost of borrowing is lower than the interest rate on the Notes. At those times, an investor generally would not be able to reinvest the redemption proceeds at an effective interest rate as high as the interest rate on the Notes being redeemed and may only be able to do so at a significantly lower rate. Potential investors should consider reinvestment risk in light of other investments available at that time.

If the relevant Issuer has the right to convert the interest rate on any Notes from a fixed rate to a floating rate, or vice versa, this may affect the secondary market and the market value of the Notes concerned.

Notes which are issued at a substantial discount or premium may experience price volatility in response to changes in market interest rates.

There are certain risks associated with investing in Subordinated Notes. These risks include:

- an investor in Subordinated Notes assumes an enhanced risk of loss in the event of the relevant Issuer's insolvency as UniCredit and UniCredit Ireland obligations under Subordinated Notes will be unsecured and subordinated and will rank junior in priority of payment to Senior Liabilities;
- Subordinated Notes may be subject to loss absorption on any application of the general bail-in tool or at the point of non-viability of the Issuer. Investors should be aware that, in addition to the general bail-in tools, the bank recovery and resolution directive contemplates that Subordinated Notes may be subject to a write-down or conversion into common shares at the point of non-viability should the Bank of Italy, the Central Bank of Ireland or other authority or authorities having prudential oversight of the relevant Issuer at the relevant time (the **Relevant Authority**) be given the power to do so. The Subordinated Notes issued under the Programme include provisions setting out that the obligations of the relevant Issuer under such Subordinated Notes are subject to the powers of the

		<p>of the Italian Banking Act) of UniCredit, the Subordinated Guarantee will rank in right of payment after unsubordinated unsecured creditors (including depositors) of UniCredit; and</p> <ul style="list-style-type: none"> • the regulatory classification of the Notes - although it is the Issuers' expectation that the Notes qualify as "Tier 2 capital" there can be no representation that this is or will remain the case during the life of the Notes. <p>There are certain risks associated with investing in Inflation Linked Interest Notes. These risks include:</p> <ul style="list-style-type: none"> • potential investors in any such Notes should be aware that depending on the terms of the Inflation Linked Interest Notes they may receive no interest or a limited amount of interest; • Inflation Linked Interest Notes may be subject to certain disruption provisions or extraordinary event provisions and If the Calculation Agent determines that any such event has occurred this may delay valuations under and/or settlements in respect of the Notes and consequently adversely affect the value of the Notes; • the market price of Inflation Linked Interest Notes may be volatile and may depend on the time remaining to the maturity date or expiration and the volatility of the level of the inflation or consumer price index or indices; and • the level of the inflation or consumer price index or indices may be affected by the economic, financial and political events in one or more jurisdictions or areas. <p>There are certain risks associated with investing in Renminbi Notes. These risks include:</p> <ul style="list-style-type: none"> • the Renminbi is not freely convertible and there are significant restrictions on the remittance of the Renminbi into and outside the PRC which may affect the liquidity of the Notes; • there is only limited availability of Renminbi outside the PRC, which may affect the liquidity of the Notes and the relevant Issuer's ability to source Renminbi outside the PRC to service the Renminbi Notes; • an investment in Renminbi Notes is subject to exchange rate risk and interest rate risk; • an investment in Renminbi Notes is subject to interest rate risk; • an investment in Renminbi Notes is subject to risk of change in the regulatory regime governing the issuance of Renminbi Notes; and • payments in respect of the Renminbi Notes will only be made to
